

Environmental Policy

Global Environmental Policy

ARM recognises that all human activities interact with the environment and considers environmental management to be an integral part of good business practice. We will continue to develop our business by taking into account the effect our activities have on the environment. Wherever we operate we seek to achieve this through our commitment to:

- complying with all relevant legislation and regulatory requirements
- regularly reviewing the actual and potential environmental interactions of our activities and striving for continual improvement in our environmental performance and the prevention of pollution including the appropriate use of objectives and targets.
- exploring opportunities to minimise waste and maximise the efficient use of resources (materials, water, fuel, energy and associated emissions).
- involving employees and contractors in our environmental programmes and providing training to enable them to discharge their responsibilities effectively.
- encouraging suppliers and other interested parties to participate in environmental best practice.
- regularly monitoring and reviewing our environmental performance and the contents of this policy to ensure the ongoing suitability and effectiveness of environmental management across ARM.

We actively encourage all employees to work together to meet the requirements of this policy.
