

PILLAR 3 REMUNERATION DISCLOSURES – As at 31st December 2011

European Union Capital Requirements Directive III

These disclosures relate to identified staff in Bank of America entities located in the European Union (“EU”) as defined in the Guidelines on Remuneration Policies issued by the Committee of European Banking Supervisors (“CEBS”) (now the European Banking Authority (“EBA”)) and equivalent designations used by regulators in individual member states of the EU.

EU Pillar III Public Disclosures for Performance Year 2011

Introduction

The following information sets forth the qualitative disclosures required under Directive 2006/48/EU (as amended by Directive 2010/76/EU) (CRD III) at paragraphs (a) to (e) of Point 15, Annex XII, Part 2 regarding the incentive compensation programs operated in performance year 2011 by Bank of America Corporation (“Bank of America” or “the Company”). The quantitative disclosures required under paragraphs (f) and (g) of Point 15, Annex XII, Part 2 of Directive 2006/48/EU in respect of countries within the European Union (the “EU”) in which Bank of America operates appear after this section.

The disclosures relate to Identified Staff, as defined in the Guidelines on Remuneration Policies and Practices issued by the Committee of European Banking Supervisors (“CEBS”) (now the European Banking Authority (“EBA”)) and equivalent designations used by the regulators in individual Member States of the EU.

The following three key principles are used so the Company’s incentive compensation plans do not encourage imprudent risk-taking:

1. Incentive compensation plans should be designed to appropriately balance risk and financial results.
2. The Company’s risk management processes and internal controls should reinforce and support the development and governance of balanced incentive compensation plans.
3. The Company should have a strong corporate governance approach to incentive compensation plans, with oversight, review and responsibility for compensation decision-making allocated to the appropriate level of the Company’s structure so the most relevant level of management makes compensation decisions on the basis of appropriate oversight and appropriate input from the Company’s Independent Control Functions (i.e., Risk, Compliance, Legal, Finance, Audit and Global Human Resources).

These principles work in conjunction with broader compensation practices, including the Company’s overall commitment to pay for performance, which are reflected in Bank of America’s disclosed global compensation principles and its remuneration policy and risk management procedures.

Governance and the decision-making process for determining the remuneration policy

The Company applies its compensation policy on a global basis and has four primary levels for the governance of incentive compensation plans (together the “Compensation Committees”):

- (i) the Board of Directors (the “Board”),
- (ii) the Compensation and Benefits Committee of the Board of Directors (the “Committee”), which is wholly made up of independent directors and functions as the Company’s global Remuneration Committee,
- (iii) the Management Compensation Committee, and
- (iv) a Line of Business Compensation Committee for each of the Company’s lines of business.

The Committee oversees the establishment, maintenance and administration of the Company’s compensation programs and employee benefit plans, including approving and recommending the compensation of its Chief Executive Officer to the Board for its approval and approving all of its executive officers’ compensation. In addition, the Committee recommends director compensation for approval by the Board. The Committee engaged Frederic W. Cook & Company (“Cook”) as its

independent compensation consultant for 2011. Cook meets regularly with the Committee outside the presence of management and alone with the Committee chairman.

During 2010, the Committee formally adopted the Company's Compensation Governance Policy to govern its incentive compensation decisions and define the framework for oversight of the design of incentive compensation programs across the Company. The Committee reviews and assesses the effectiveness of its Compensation Governance Policy annually and adopts updates as appropriate, most recently in January 2012. The Compensation Governance Policy is designed to be consistent with global regulatory initiatives so that the Company's incentive compensation plans do not encourage imprudent risk-taking.

Bank of America's compensation governance structure allocates oversight, review and responsibility to the appropriate level within the Company so the most relevant level of management or the Board, as applicable, makes compensation decisions, with documented input from the Company's Independent Control Functions. The appropriate level of compensation committee reviews and evaluates employee compensation programs periodically in order to assess any risk posed by the programs so they do not encourage excessive risk-taking.

Consistent with the Compensation Governance Policy, the Company conducts a comprehensive review, analysis and discussion of incentive design and operation annually through an incentive plan certification and review process. In support of this process, each of the Chief Executive Officer's management direct reports, along with their management teams and Independent Control Functions, meet throughout the year to discuss business strategy, performance and risk with respect to compensation. These participants in the process certify that their respective incentive programs (i) are aligned with line of business and the Company's business strategy and performance objectives, (ii) do not encourage excessive risk-taking beyond the Company's ability to effectively identify and manage risk and (iii) are compatible with effective controls and risk management. The Committee also meets with senior risk officers, including its Chief Risk Officer, to review and assess any risks posed by its incentive compensation programs so that they appropriately balance risks and rewards in a manner that does not encourage imprudent risk-taking. These management certifications are reviewed by Cook and shared and reviewed with the Committee.

The link between pay and performance

The cornerstone of Bank of America's compensation philosophy across all lines of business is to pay for performance – Company, line of business and individual performance. Through the Company's Performance Management process, employees understand performance expectations for their role through on-going dialogue with their manager. The Performance Management process is designed and monitored by the Leadership Development function in Global Human Resources. This process is reviewed periodically so it meets the needs of managers to assess and communicate performance expectations. Throughout the year, employees receive coaching on their performance and ultimately receive a rating for their full year of performance based upon their achievement of goals for their job.

Each employee's performance is assessed on financial and non-financial metrics as well as specific behaviors, and performance is factored into each employee's incentive compensation award. Depending on the employee, financial performance metrics may be focused on corporate-wide, line of business, or product results. Non-financial performance metrics may include quality and sustainability of earnings, successful implementation of strategic initiatives, adherence to risk and compliance policies, and other core values and operating principles of the Company.

Employees receive two ratings – a Result rating (based on objective metrics) and a Behavior rating (based on subjective metrics such as leadership, teamwork, etc.). The scale for both ratings is Exceeds Expectations, Meets Expectations, and Does Not Meet Expectations. Both the Result and Behavior ratings are used in determining employees' compensation. As a result, an employee's compensation can be influenced not only by what the employee achieves, but how the employee achieves it and employees may receive no variable award if performance is not sufficiently strong.

The Company's pay-for-performance program also requires that all employees complete annual mandatory risk and compliance training. Failure to complete the training can impact an individual employee's compensation.

Incentive Plans

The Company's incentive plans are designed to compensate employees based on their performance ratings for results against their individual performance plan and behaviors, as well as overall Company and line of business performance. The levels of funding approved for and compensation awarded from the incentive plan bonus pools are benchmarked regularly with an independent consultant.

Incentive plan bonus pools are based on profit measures, which inherently recognize certain underlying risk factors and are further adjusted to reflect the use of capital associated with individual lines of business or products and/or the quality and sustainability of earnings over time. The determination of incentive plan bonus pools is also subject to management discretion which operates so proper account is taken of the performance of the overall Company, individual lines of business, products and other factors including the achievement of strategic objectives.

Incentive plan bonus pools may be adjusted to reflect long-term risk arising through line of business and product performance. The overall incentive plan bonus pool, once determined, is split across different functions but is ultimately subject to management discretion. The pool is tied to the overall performance of Bank of America and/or specific lines of business or products, creating a vested interest in profitable performance across the Company and its businesses.

Long-term risk is also taken into account and managed in connection with the Company's incentive compensation programs through arrangements permitting performance adjustment of deferred variable compensation. Employees in positions where the greatest risk is being taken are subject to higher levels of deferral and potential performance adjustments.

The compensation of the Independent Control Functions is determined independently from the line of business supported. The funding of the incentive pool for these employees is based upon overall Company performance with the actual employee awards determined based upon individual performance against predetermined objectives.

Employee Pay

Bank of America compensates its employees using a balanced mix of base salary, annual cash incentives and long-term incentives (which are delivered in equity, equity-linked instruments or cash). In general, the higher an employee's management level or amount of incentive compensation award, the greater the proportion of incentive compensation should be (i) subject to deferral and (ii) delivered in the form of equity-linked compensation. The Company believes equity-linked awards are the simplest, most direct way to align employee interests with those of its stockholders. A significant portion of incentive awards is provided as a long-term incentive that generally becomes earned and payable over a period of three years after grant subject to performance adjustment (i.e., cancellation) in case of detrimental conduct or (for certain risk-takers) failure of the Company, line of business or product (as applicable) to remain profitable during the vesting period. This approach serves two key objectives, which are to focus employees on long-term sustainable results and to subject compensation awards to risk over an appropriate time horizon that can be easily communicated and understood.

Identified Staff Pay

The Company has determined that the following individuals and groups of employees should be classified as Identified Staff, excluding certain roles which have been determined not to involve material risk-taking activities:

- senior management
- material risk-takers
- Heads of Control Functions (i.e., Risk, Compliance, Legal, Finance, Audit and Global Human Resources)
- individuals registered as carrying out a significant influence function (and local equivalents outside the UK)
- employees receiving total remuneration that takes them into the same remuneration bracket as material risk-takers, whose professional activities may have an impact on the Company's risk profile

Variable pay for Identified Staff for performance year 2011 consisted of a mixture of upfront payments and deferred payments. Upfront payments were delivered 50% in cash and 50% in immediately vested stock subject to a six month holding period. Deferred payments for Identified Staff (Code Staff) in the U.K. were delivered in the form of long-term equity-linked awards which become earned and payable over a period of three years after grant, with each tranche being subject to a further six month holding period following vesting. For Identified Staff outside the U.K. deferred payments were delivered 50% in equity-linked and 50% in long term cash awards, which become earned and payable over a period of three years after grant. The equity-linked portion of all deferred payments is subject to a further six month holding period following vesting. Deferred awards are subject to cancellation in the case of detrimental conduct or failure of the Company, line of business or product, as applicable, to remain profitable during the vesting period. If risks taken as part of approved business strategies do not result in sustainable profits, or if the employee fails to behave according to Company standards, the value of the long-term equity award may be impacted. The deferral rates for Identified Staff ranged from a low of 40% to a high of 60%. The recommendations for performance year 2011 incentive awards for Identified Staff were reviewed on a name by name basis by the Committee at its meeting in January 2012.

By combining long-term awards with performance-based and detrimental conduct clawbacks, the Company considers that it places a strong focus on sustainable long-term results and appropriate behaviors.

Disclosure Tables - UK

The following disclosure tables contain the information required under paragraphs (f) and (g) of Point 15, Annex XII, Part 2 of Directive 2006/48/EU as implemented by the FSA's Handbook for banks, building societies and investment firms ("BIPRU") 11.5.18 (6) and (7). Disclosures in respect of the information required under BIPRU 11.5.18 (1) to (5) are set out above.

Breakdown of remuneration of staff by line of business – Code Staff only (performance year 2011) – all data is shown in £000's

Line of Business	Total Remuneration
GBAM	£172,422
GWIM	£4,325
Other	£9,871

Aggregate quantitative information on remuneration, broken down by senior management and members of staff whose professional activities have a material impact on the risk profile of the Company or local employing entity (performance year 2011)

Category	Senior Management (£000's)	Other Code Staff (£000's)
Amounts of remuneration		
Fixed Remuneration	£4,896	£27,339
Variable Remuneration	£49,547	£104,835
Number of Staff	18	108
Types of Variable remuneration		
Upfront cash (paid February 2012)	£10,318	£23,017
Special Equity (Upfront stock, vested February 2012, 6 month hold)	£9,814	£20,149
Long term stock awards	£29,415	£61,669
	£49,547	£104,835
Deferred remuneration		
Amount invested at 1 January 2011	£33,609	£134,290
Amount awarded in 2011	£39,419	£100,550
Amount vesting in 2011	£15,025	£51,433
Amount invested at 31 December 2011	£58,003	£160,221
Amounts awarded in February 2012	£29,415	£61,669
Amounts reduced by performance clawback	£0	£0

Category	Total Code Staff ¹ (£000's)
Guarantees and severance payments	
Total guarantees paid	£10,991
Number of payees	6
Total severance payments	£2,260
Number of payees	12
Highest single severance payment	£319

Stock price used for Deferred Remuneration calculations is Feb 2011 award price of \$14.77

Stock price for February 2012 grant was \$7.95

Stock price for Special Equity Award was \$7.78

Disclosure - EU countries outside the UK

This section contains the disclosures required under paragraphs (f) and (g) of Point 15, Annex XII, Part 2 of Directive 2006/48/EU in respect of Belgium, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Poland and Spain.

Point 15, Annex XII, Part 2 of Directive 2006/48/EU states that the disclosure requirements in CRD III must be complied with in a manner that is appropriate to the size, nature, internal organization and the nature scope and complexity of the activities of a credit institution and without prejudice to Directive 95/46/EC (the "EU Data Protection Directive").

Bank of America has carried out a review of its remuneration policy, which has included determining where Identified Staff are located. The criteria used by the Company to assess Identified Staff (and equivalent designations outside the EU) on a global basis are based on the Financial Stability Board's Principles and Implementation Standards and CRD III.

The Company considers that it applies its remuneration policy and practices (including the determination of Identified Staff) in a way that is appropriate to the size, internal organization and the nature, scope and complexity of its activities in all the countries in which it operates and has determined that, as the scope of the activities of employees in the countries listed above is relatively limited, each country has only a very small number of Identified Staff (if any).

Any disclosure of information in respect of the compensation received by a very small number of Identified Staff in any individual country may permit those employees to be easily identified. Any disclosure would therefore carry a material risk of disclosing the compensation of individuals to the public, thereby prejudicing their legitimate interests and would be contrary to the EU Data Protection Directive and/or applicable local law. The Company is therefore unable to make more detailed quantitative disclosures in respect of the countries listed above.
