During the Reporting Period, profit attributable to owners of the parent of the Group amounted to RMB1,550.1 million, representing a decrease of 54.4% over the same period of 2011, primarily due to the substantial decrease in comparison with that of the same period of last year in the gain on fair value adjustment on certain equity investments at fair value through profit or loss held by the Company and the reason that domestic economic growth has slowed down and the steel demand was sluggish. The selling price of steel products reduced substantially in comparison with that of the same period of last year, and this reduction rate was higher than the decrease in price of raw materials and fuels, which cause that the results of the steel segment in the first half year dropped significantly as compared with that of the same period of 2011.

Asset Allocation of the Group

During the Reporting Period, in the backdrop of a relatively harsh external macroeconomic environment, the Group stuck to value investment philosophy, continued to invest in China's consumption and consumption upgrade, financial services, resources and energy, and manufacturing upgrade, with the aim of building an investment portfolio that will benefit from China's growth momentum.

PHARMACEUTICALS AND HEALTHCARE

The Group's pharmaceuticals and healthcare segment mainly includes its subsidiary, Fosun Pharma. During the Reporting Period, Fosun Pharma achieved a significant growth in its core business, drug manufacturing, which was mainly attributable to an overall steady growth in the sale of its key product mix for the treatment of diseases in respect of metabolism, digestive tract, anti-infection and central nervous system. Among which, the sales of Atuomolan (Reduced Glutathione), Artesunate series and Ao De Jin (Deproteinized Calf Blood Injection) continued to grow rapidly, while the sales of new products such as You Di Er (Alprostadil Dried Emulsion) and Xi Mei Xin (Ademetionine) accelerated. Meanwhile, Fosun Pharma continued its effort in matching quality standards for international drug production persistently. It obtained another Pre-Qualificaiton ("**PQ**") of medicine provider from the World Health Organisation for the combined medication of its Artesunate series, which is the fifth World Health Organisation PQ of Fosun Pharma for its anti-malaria medicinal products. Furthermore, Fosun Pharma continued to integrate marketing and resources of product research and development ("**R&D**") and strengthened the cooperation with Sinopharm, enhancing the linkage between its drug production and the commercial channel of Sinopharm to combine their complementary advantages for a win-win operation. For healthcare services, Fosun Pharma commenced the upgrade of its invested hospitals to advance the medical technology and expand services to the public. It is also actively identifying new investment opportunity in this area.

At the same time, Fosun Pharma's plan of issuing overseas listed foreign shares (H shares) obtained the approval of China Security Regulatory Commission and passed the hearing of the listing committee of the Hong Kong Stock Exchange and will proceed accordingly. The improvement in multiple financing channels will facilitate the development of its drug manufacturing business, fortify R&D platforms, strengthen its merger and acquisitions towards domestic and foreign pharmaceutical firms, and make it a globally competitive pharmaceutical enterprise.

During the Reporting Period, the revenue and profit attributable to owners of the parent of the pharmaceuticals and healthcare segment were as follows:

Unit: RMB million

	Six months ended 30 June 2012	Six months ended 30 June 2011	Change over the same period of last year

Profit attributable to owners of the parent	337.7	413.6	-18.4%

During the Reporting Period, the increase in revenue from the pharmaceuticals and healthcare segment reflects the development of Fosun Pharma's business in industrial manufacturing. The decrease in profit attributable to owners of the parent was mainly due to the gain on deemed disposal of equity interests in Sinopharm as a result of the completion of Sinopharm's additional shares issuance in the same period of 2011.

STEEL

The Group's steel segment mainly includes its subsidiary Nanjing Iron & Steel and its associate Tianjin Jianlong Iron & Steel Industrial Co., Ltd.. During the Reporting Period, under a deteriorating global economy and slowdown of economic growth in China, demand for steel products was low and the oversupply situation worsened. Steel prices fell sharply compared with the same period of last year while the extent of decrease in price of raw materials and fuels was less, therefore, the profits of the steel industry decreased sharply with losses expanding in many enterprises. In such a hard time of the steel industry, our steel segment was also under pressure. Nevertheless, Nanjing Iron & Steel has a flexible operation mechanism. Despite of the difficult time, it persisted in management of lowering cost and improving efficiency, developed products with technological advantages and high value added, explored steel markets relating to emerging and hot industries and maintained its competitiveness. During the Reporting Period, its high value added products such as 9 Ni steel and steel plates for oil tank maintained leading market shares in China. (Loss)/Profit attributable to owners of the parent	(178.0)	271.9	-165.5%

During the Reporting Period, the slight decrease in revenue of the steel segment compared with the same period of last year was primarily due to the drop of both sales volume and average selling prices of steel products. Furthermore, the decrease in average selling prices of steel products far exceeded the decrease in average price of upstream raw materials, resulting in the loss attributable to owners of the parent.

MINING

The Group's mining segment mainly includes its subsidiary, Hainan Mining and Anhui Jin'an Mining Co., Ltd. and associates Beijing Huaxia Jianlong Mining Technology Co., Ltd. and Shanxi Coking Coal Group Wulin Coal Coke Development Co., Ltd.. Leveraging on its cost competitiveness, Hainan Mining actively developed marketing. As at the end of the Reporting Period, the total sales of iron ore products of Hainan Mining reached 2.02 million tonnes, representing an increase of 4.4% as compared with the same period of last year. During the Reporting Period, the China

Securities Regulatory Commission disclosed the initial public offering ("**IPO**") prospectus (application draft) of Hainan Mining.

During the Reporting Period, the revenue and profit attributable to owners of the parent of the mining segment were as follows:

Profit attributable to owners of the parent	501.1	634.6	-21.0%

During the Reporting Period, the decrease in both revenue and profit attributable to owners of the parent of the mining segment was mainly attributable to the deceased average selling prices of iron ore and iron concentrate.

INTEREST EXPENSES

Interest expenses net of capitalised amounts of the Group increased from RMB1,027.1 million for the six months ended 30 June 2011 to RMB1,314.3 million for the six months ended 30 June 2012. This was mainly attributable to an increase of interest rates and expanding scale of total borrowings on average compared with the same period of last year. For the six months ended 30 June 2012, the interest rates of borrowings were approximately between 1.67% and 15.0%, as compared with approximately between 1.0% and 12.18% for the same period of last year.

TAX

Tax of the Group decreased from RMB924.9 million for the six months ended 30 June 2011 to RMB320.3 million for the six months ended 30 June 2012. NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

1.1 BASIS OF PREPARATION

The unaudited interim condensed consolidated financial statements, which comprise the interim condensed consolidated statement of financial position of the Group as at 30 June 2012 and the related interim condensed consolidated statements of income, comprehensive income, changes in equity and cash flows for the six months ended 30 June 2012 (the "Period"), have been prepared in accordance with HKAS 34 *Interim Financial Reporting* issued by the Hong Kong Institute of Certified Public Accountants.

The unaudited interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2011.

1.2 NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS THEREOF, ADOPTED BY THE GROUP

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2011, except for the adoption of revised Hong Kong Financial Reporting Standards ("HKFRSs") (which also include Hong Kong Accounting Standards ("HKASs") and Interpretations), as of 1 January 2012 noted below:

1. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

1.2 NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS THEREOF, ADOPTED BY THE GROUP (CONTINUED)

HKFRS 1 Amendments	Amendments to HKFRS 1 *First-time Adoption of Hong Kong Financial Reporting Standards – Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters*
HKFRS 7 Amendments	Amendments to HKFRS 7 *Financial Instruments: Disclosures – Transfers of Financial Assets*
HKAS 12 Amendments	Amendments to HKAS 12 *Income Taxes – Deferred Tax: Recovery of Underlying Assets*

The principal effects of adopting these revised HKFRSs are as follows:

Amendments to HKAS 12 include a rebuttable presumption that the carrying amount of investment property measured using the fair value model in HKAS 40 will be recovered through sale and, accordingly, any related deferred tax should be measured on a sale basis. The presumption is rebutted if the investment property is depreciable and it is held within a business model whose objective is to consume substantially all of the economic benefits in the investment property over time, rather than through sale. Specifically, HKAS 12 will require that deferred tax arising from a non-depreciable asset measured using the revaluation model in HKAS 16 should always reflect the tax consequences of recovering the carrying amount of the underlying asset through sale. The effective implementation date is annual periods beginning on or after 1 January 2012.

The Group has investment properties at fair value. The jurisdictions in which the Group operates do have a different tax charge for sale or consumption of the investment properties. The Group rebuts the presumption of the amendments to HKAS 12 because the investment properties of the Group are held within a business model whose objective is to consume substantially all of the economic benefits in the investment properties over time rather than through sale. So while the amendments are applicable, they have no impact on the Group's interim condensed consolidated financial statements.

Save as disclosed above, the adoption of these revised HKFRSs has had no significant financial effect on the Group's interim condensed consolidated financial statements.

The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

1. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

1.3 Change in accounting estimate

With effective from 1 January 2012, an indirect subsidiary of the Company, Nanjing Nangang Iron & Steel United Co., Ltd., and its subsidiaries decided to change the estimated useful lives of the buildings, plant and machinery and motor vehicles included in their property, plant and equipment as follows:

Buildings:	from 20 years to 30 years
Plant and machinery:	from 10 years to 15 years
Motor vehicles:	from 5 years to 10 years

The change of accounting estimate is a result of technical innovations and maintenance effort on the property, plant and equipment in the past few years and is based on the reassessment by the directors of Nanjing Nangang Iron & Steel United Co., Ltd. according to the historical experience of the actual useful lives of the property, plant and equipment of similar nature and functions and reference to the market common practice. Such change in accounting estimate was recognised prospectively from 1 January 2012 and decreased the depreciation charges of the Group for the six months ended 30 June 2012 by approximately RMB339,000,000.

2. SEASONALITY OF OPERATIONS

The Group's operations are not subject to seasonality.

3. OPERATING SEGMENT INFORMATION

The adjusted profit or loss after tax is measured consistently with the Group's profit or loss after tax except that head office and corporate expenses are excluded from such measurement.

Inter-segment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

(1) Hong Kong profits tax has been provided at the rate of 16.5% (six months ended 30 June 2011: 16.5%) on the estimated assessable profits arising in Hong Kong during the Period.

(2) The provision for Mainland China current income tax is based on a statutory rate of 25% (six months ended 30 June 2011: 25%) of the assessable profits of the Group as determined in accordance with the PRC Corporate Income Tax Law which was approved and became effective on 1 January 2008, except for certain subsidiaries of the Group in Mainland China, which are exempted from income tax or taxed at preferential rates of 12.5% to 15%.

(3) According to the tax notices issued by the relevant local tax authorities, the Group commenced to pay LAT at rates ranging from 0.5% to 5% on proceeds from the sale and pre-sale of properties from 2004. Prior to 2007, except for this amount paid to the local tax authorities, no further provision for LAT had been made.
