

# Third Quarter 2012 Financial Teleconference

## Forward-Looking Statements

Statements contained in this presentation about future performance, including, without limitation, operating results, asset and rate base growth, capital expenditures, San Onofre Nuclear Generating Station (SONGS), EME liquidity and restructuring activities, and other statements that are not purely historical, are forward-looking statements. These forward-looking statements reflect our current expectations; however, such statements involve risks and uncertainties. Actual results could differ materially from current expectations. These forward-looking statements represent our expectations only as of the date of this presentation, and Edison International assumes no duty to update them to reflect new information, events or circumstances. Important factors that could cause different results are discussed under the headings “Risk Factors,” and “Management’s Discussion and Analysis” in Edison International’s 2011 Form 10-K, most recent Form 10-Q and other reports filed with the Securities and Exchange Commission, which are available on our website: [www.edisoninvestor.com](http://www.edisoninvestor.com). These filings also provide additional information on historical and other factual data contained in this presentation.

# Third Quarter Earnings Summary

|  | Q3 11          | Q3 12           | Variance        |
|--|----------------|-----------------|-----------------|
| <b>Core EPS<sup>1</sup></b>                  |                |                 |                 |
| SCE  | \$1.25         | \$1.11          | \$(0.14)        |

|                              |               |               |                 | Total                     | \$(0.14)    |

## Recent Developments

- September 2012, SCE filed proposed formula rate update with 2013 transmission revenue requirement of \$900 million, representing an increase of \$178 million, or 25%, over 2012 revenue requirement
- October 2012:
  - 2012 GRC Proposed Decision released (see page 4)
  - CPUC approved SONGS OII to consider appropriate cost recovery – all SONGS costs since January 1 tracked in separate memo account (see page 7)
  - SCE submitted response to Confirmatory Action Letter and restart plans for Unit 2 to the NRC (see page 7)

<sup>1</sup> See Non-GAAP Reconciliations and Use of Non-GAAP Financial Measures in Appendix for reconciliation of core earnings per share to basic earnings per share.

# SCE 2012 CPUC General Rate Case (A.10-11-015)

- Proposed Decision issued on October 19 with 2012 revenue requirement of \$5,693 million
  - Decrease of \$601 million from SCE's request primarily related to O&M with some plant-related capital reductions
  - \$929 million capital expenditures removed (2010 – 2012)
  - Proposed CPUC rate base of \$15,086 million in 2012
  - Proposed post-test year escalation on capital additions of 3.05% for 2013, and 2.93% for 2014
  - SONGS revenue requirement subject to refund and reasonableness review, and tracked in memorandum account pending outcome of outage investigation
- SCE believes PD is consistent with Range Cases provided in rate base forecast
- Final decision retroactive to January 1, 2012, through memorandum account, except for SONGS
  - SCE expects to adjust its total spending to amount authorized by Commission
  - SCE's ongoing goal is to earn its authorized returns as set by the CPUC and FERC

# SCE Capital Expenditures Forecast

(\$ billions)

## Forecast By Classification

|                                  | \$          | %          |
|----------------------------------|-------------|------------|
| Solar Photovoltaic               | 0.2         | 1          |
| Edison SmartConnect <sup>®</sup> | 0.4         | 3          |
| Generation                       | 1.7         | 13         |
| Transmission                     | 3.8         | 29         |
| Distribution                     | 7.1         | 54         |
| <b>Total</b>                     | <b>13.2</b> | <b>100</b> |

## By Proceeding

|                     | %          |
|---------------------|------------|
| 2012 CPUC Rate Case | 68         |
| Other CPUC          | 3          |
| FERC Cases          | 29         |
| <b>Total</b>        | <b>100</b> |

|                                   | 2011 | 2012         | 2013         | 2014         | Total         |
|-----------------------------------|------|--------------|--------------|--------------|---------------|
| <b>Forecast Range<sup>1</sup></b> |      |              |              |              |               |
| Request                           |      | \$5.0        | \$4.4        | \$3.8        | \$13.2        |
| <b>GRC PD<sup>2</sup></b>         |      | <b>\$4.6</b> | <b>\$4.2</b> | <b>\$3.7</b> | <b>\$12.5</b> |
| Range                             |      | \$4.4        | \$4.0        | \$3.4        | \$11.8        |

**Due to GRC delay, 2012 capital expenditures expected to be below forecast range**

1 Forecasted 2012-2014 FERC and CPUC capital spending while final GRC decision is pending, subject to timely receipt of permitting, licensing, and regulatory approvals. Forecast range reflects an 11% variability to annual expenditure levels related to execution risk, scope change, delays, regulatory constraints, and other contingencies. Variability based on average level of actual variability experienced from 2009 through 2011.

2 Capital expenditure forecast updated for GRC Proposed Decision only.

# SCE Rate Base Forecast

(\$ billions)

**2012 – 2014 CAGR<sup>2</sup>**

Rate Base

7-9%

- Rate base forecast<sup>1</sup> based on 2012 CPUC GRC request and 2012 FERC Formula Rate
- FERC rate base includes CWIP and increases to approximately 20% of 2014 forecast
- Forecast subject to change based on timely receipt of permitting, licensing, capital deployment, and regulatory approvals on capital expenditures
- GRC PD, if adopted, would result in forecasted rate base of \$20.1 billion in 2012, \$21.7 billion in 2013, and \$23.4 billion in 2014

1 Forecast range is weighted-average year basis and includes: (1) forecasted 2012-2014 CPUC and FERC rate base requests; (2) SCE Solar PV program including CPUC approved petition for modification; (3) consolidation of CWIP projects; (4) estimated impact of bonus depreciation provisions. Rate Base forecast reflects SCE Capital Expenditures Forecast range.  
 2 Forecasted Rate Base and related earnings per share may vary depending on authorized revenues and cost of capital, including financing costs, operating expenses, taxes, and other revenue activities.  
 3 Based on capital expenditure forecast updated for GRC Proposed Decision only.

# SONGS Update

## Operational

- SCE submitted CAL response and restart plans for Unit 2 to NRC
  - Operate at 70% power for 5 months with follow up outage and inspection
  - No assurance about NRC review time or approval of restart request
  - Repairs to restart Unit 2 at reduced power levels substantially completed
- Unit 3 will not restart this year
- August 2012, SCE announced plans for downsizing to bring SONGS in line with industry peers
  - \$30 million estimated cash severance costs recorded in the third quarter

## Financial

- September 2012, SCE submitted \$45 million invoice to MHI for some costs through June 30, 2012, for all owners' repair costs
- October 2012, SONGS filed separate proofs of loss for Unit 2 and Unit 3 under NEIL outage policy

## Regulatory

- October 2012, CPUC issued Order Instituting Investigation (OII) to consolidate all SONGS issues in related regulatory proceedings and consider appropriate cost recovery
  - All SONGS-related costs after January 1 tracked in separate memorandum account
  - SCE will file its response by November 24 and must also file testimony by December 10 detailing costs subject to refund

# EMG Third Quarter Highlights

| EPS                          | Q3 11         | Q3 12           | Variance        | Key Core Earnings Drivers       |                 |
|------------------------------|---------------|-----------------|-----------------|---------------------------------|-----------------|
| Core <sup>1</sup>            | \$0.05        | \$(0.28)        | \$(0.33)        | Midwest Generation <sup>3</sup> | \$(0.21)        |

## Recent Developments

- September 2012, Homer City entered into Master Transaction Agreement and in October 2012 Plan Support Agreement – discontinued operations accounting treatment beginning third quarter 2012
- Waukegan 7 request to extend unit-specific retrofit requirements from December 31, 2013, to December 31, 2014, granted by IL Pollution Control Board

1 See Non-GAAP Reconciliations and Use of Non-GAAP Financial Measures in Appendix for reconciliation of core earnings per share to basic earnings per share.

2 Homer City's financial results are reported as non-core for both quarters, resulting in a \$(0.24) per share loss for the quarter ended September 30, 2012, and earnings of \$0.05 per share for the quarter ended September 30, 2011. Non-core items for the quarter ended September 30, 2012, also include a \$0.09 per share gain from Edison Capital's sale of its Beaver Valley lease interest, and other.

3 Includes per share impact of unrealized losses of \$(0.01) in both periods.

# Liquidity Profile

September 30, 2012  
(\$ millions)

| Sources                        | SCE            | EME & Subs <sup>2</sup> | Other EMG Subs | EIX parent co. & other |
|--------------------------------|----------------|-------------------------|----------------|------------------------|
| Credit Facility <sup>1</sup>   | \$2,750        | \$—                     | \$—            | \$1,250                |
| Credit Facility (availability) | \$2,174        | \$—                     | \$—            | \$1,222                |
| Cash & Cash Equivalents        | 96             | 698                     | 154            | 138                    |
| <b>Available Liquidity</b>     | <b>\$2,270</b> | <b>\$698</b>            | <b>\$154</b>   | <b>\$1,360</b>         |

- Recognized EME tax benefits of \$1.0 billion available under EIX tax-allocation agreement
  - EME recognized tax-allocation benefits related to net operating loss carryforwards of \$790 million and production tax and other credit carryforwards of \$236 million
  - EMG made approximately \$185 million tax-allocation payment to EIX. EME expects to receive \$160 million tax-allocation payments from EIX during next six months

1 Credit facilities expire May 2017.

2 EME had corporate cash of \$627 million at September 30, 2012. Corporate cash is defined as cash and cash equivalents of EME and its subsidiaries that do not have contractual third-party dividend restrictions.

## EME Financial Status

- October 2012, EME and EIX entered into non-disclosure agreements with certain EME unsecured bondholders
- Based on current projections, EME is not expected to have sufficient liquidity to repay \$500 million debt obligation due June 2013
- No assurance \$97 million interest payments due on 2017, 2019, and 2027 EME unsecured bonds will be paid on November 15
  - Failure to pay will likely result in EME's filing for protection under Chapter 11 of the U.S. Bankruptcy Code
  - Chapter 11 filing will trigger cross defaults under other outstanding EME obligations
- October 2012, EME and MWG entered into a non-disclosure agreement with an advisor representing a majority in principal amount of MWG's senior lease obligation bonds

# Appendix

# Updates Since Our Last Presentation

- Q3 2012 results and standard information
- SCE 2012 CPUC General Rate Case (p. 4)
- SCE Capital Expenditures Forecast (p. 5)
- SCE Rate Base Forecast (p. 6)
- SONGS Update (p. 7) – New Slide
- EME Financial Status (p. 10)
- SCE 2013 Cost of Capital Application (p. 21)
- SONGS – Net Investment and Rate Base (p. 22) – New Slide
- SONGS – Supplemental Data (p. 23)

# Dividend Growth

## 2006 – 2011 CAGR

|                           |     |
|---------------------------|-----|
| SCE Core EPS <sup>1</sup> | 12% |
| EIX Dividend              | 4%  |

- EIX targets paying out 45 – 55% of SCE earnings
- Dividend not growing at same rate as SCE core earnings and is below target payout ratio due to large utility capital program
- EIX plans to return to target dividend range over time as SCE capital spending program declines from its peak, but there can be no assurance

**SCE earnings and rate base growth have expanded faster than EIX's dividend as a result of utility's capital program**

<sup>1</sup> See Use of Non-GAAP Financial Measures in Appendix for reconciliation of core earnings per share to basic earnings per share.

| Core Earnings <sup>2</sup> | \$1.89 | \$2.07 | \$2.25 | \$2.68 | \$3.01 | \$3.33 |

1 Recorded rate base, year-end basis.

2 See Non-GAAP Reconciliations and Use of Non-GAAP Financial Measures in Appendix.

# SCE 2013 Cost of Capital Application

- On April 20, 2012, SCE filed its application to set the capital structure and cost of capital (A.12-04-015)
- Requested Return on Common Equity (ROE) of 11.1%:
  - Capital needs are relatively high compared to other electrics
  - Financial strength needed to attract capital for aggressive State policy goals
  - Relatively lower ROE in other jurisdictions does not reflect SCE business and financial risks

### Proposed Phase I Schedule

|                                  |                   |

<sup>1</sup> Net of accumulated depreciation. Includes Construction Work in Progress, nuclear fuel, and materials and supplies.

# SONGS – Supplemental Data

September 30, 2012  
(\$ millions)

## 2012 Outage Impacts (SCE share)

|  |       |
|--|-------|
| Inspection & Repair Costs – Incurred     | \$96  |
| Net Market Costs – Incurred <sup>1</sup> | \$221 |

## Regulatory (SCE share)

|   |       |
|---|-------|
| Steam Generator Replacement (SGR) Project – Approved <sup>2</sup> | \$665 |
| SGR Project – Incurred <sup>3</sup>                               | \$594 |
| Estimated 2012 Annual Revenue Requirement <sup>4</sup>            | \$820 |

## Physical (Total)

|                               |        |
|-------------------------------|--------|
| SCE Ownership                 | 78.21% |
| Capacity (MW)                 | 2,150  |
| 2011 Generation (million kWh) | 18,097 |

1 Energy and capacity net of avoided nuclear fuel costs. Represents about 7% of SCE's total fuel and purchased power expense incurred year to date September 30, 2012.

2 Adjusted for inflation from \$525 million (2004\$) authorized by CPUC in 2005.

3 Includes \$95 million CWIP primarily related to disposal of old steam generators.

4 Includes \$170 million nuclear fuel-related and decommissioning costs, and \$650 million direct operations and maintenance costs, depreciation and return on investment.

# SONGS – Warranty and Insurance

## MHI Warranty

- 20-year warranty with Mitsubishi Heavy Industries
  - Repair or replace defective items
  - Specified damages for certain repairs
  - \$138 million liability limit and excludes consequential damages (e.g., replacement power)
  - Limits subject to applicable exceptions
  - September 2012, SCE submitted \$45 million invoice to MHI for some costs through June 30, 2012 for all owners' repair costs

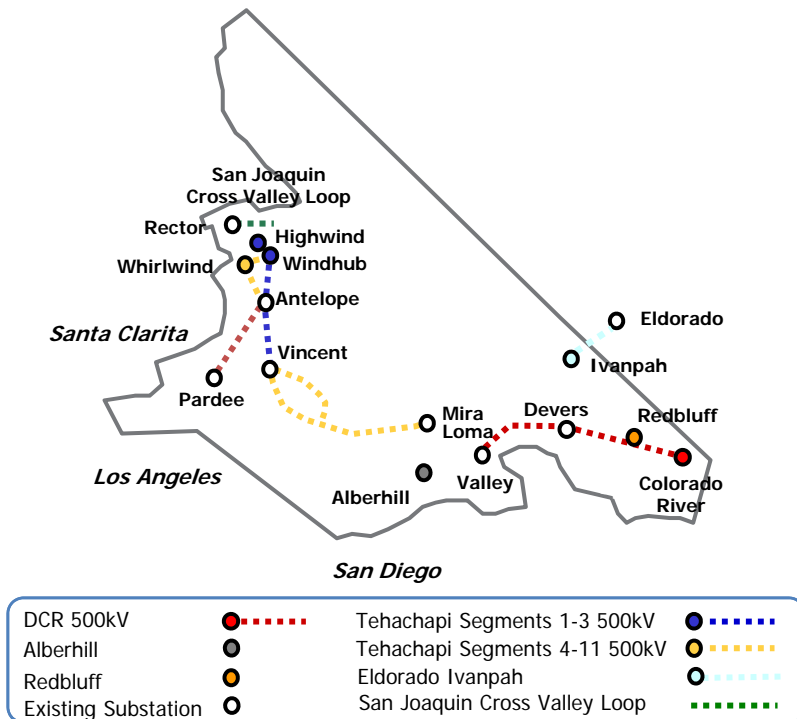

## NEIL Insurance

- Property damage and outage insurance through Nuclear Electric Insurance Limited ("NEIL")
  - "Accidental Property Damage" – \$2.5 million deductible; \$2.75 billion liability limit
  - Outage from "Accidental Property Damage" – up to \$3.5 million per week for each unit after 12-week deductible period (\$2.8 million per unit per week if both are out due to same "accident"); \$490 million limit per unit (\$392 million each if both units are out due to the same "accident")
  - Exclusions and limitations may reduce or eliminate coverage
  - Proof of loss must be submitted within 12 months of damage or outage
  - October 2012, SONGS filed separate proofs of loss for Unit 2 and Unit 3 under NEIL outage policy

**There is no assurance that SCE will recover all of its applicable costs pursuant to these arrangements**

# SCE Transmission Program

September 30, 2012

| Project Name                       | Project Lifecycle Phase    | In Service Date | Direct Project Costs <sup>1</sup> | % of Spend Complete | 2012-2014 Forecast <sup>1</sup> |

| Alberhill                          | Licensing                  | 2015            | 315                               | 8%                  | 242                             |
| San Joaquin Cross Valley Loop      | Engineering / Construction | 2014            | 190                               | 14%                 | 170                             |

**Transmission expenditures are needed to improve system reliability and increase access to renewable energy**

1 FERC and CPUC jurisdictional assets. Direct expenditures include direct labor, land and contract (materials & contractor) costs incurred for each project and excludes allocated overhead costs included in the SCE Capital Expenditures Forecast for 2012 - 2014. Subject to timely receipt of permitting, licensing, and regulatory approvals.  
 2 Tehachapi segments 1-3A were energized and in-service in 2009. The remainder is under construction and will be phased into service through 2015.  
 3 SCE has experienced significant cost pressures on its Tehachapi and Devers-Colorado River Transmission Projects, primarily related to environmental monitoring and mitigation costs, scope changes, and schedule delays. Related CPUC filings will be updated when final engineering is completed.  
 4 Eldorado-Ivanpah Project received CPUC approval at \$411 million related to reduced contingency. SCE has the ability to file an updated cost when final engineering is completed.

**4,314 MW<sup>4</sup> – Four mid-merit facilities**

**Utilize Powder River Basin (PRB) coal**

## All-in Average Realized Prices<sup>1,3</sup>

■ Average realized gross margin (\$/MWh)<sup>2</sup>  
■ Average realized fuel cost (\$/MWh)<sup>3</sup>

1 Includes the price of energy, capacity, ancillary services, etc.

2 Average realized gross margin is equal to all-in average realized price less average fuel and emission costs.

3 See Other Non-GAAP Reconciliations and Use of Non-GAAP Financial Measures in Appendix.

4 Excludes Fisk (326 MW) and Crawford (532 MW) stations shut down in September 2012.

| June 1, 2015 to May 31, 2016    | 3,620   | \$136.00            | —   | —                           | \$136.00                                 |

<sup>1</sup> See "Market Risk Exposures – Commodity Price Risk" in EME's quarterly report on Form 10-Q for complete descriptions and definitions of hedging programs.

<sup>2</sup> Change from Q2 for 2012 includes 69 GWh of new hedges.

<sup>3</sup> In July 2012 Midwest Generation agreed to sell one million tons of coal scheduled to be delivered in the second half of 2012 in order to better manage coal inventories. This transaction resulted in a \$6 million loss the quarter ended September 30, 2012.

# EME 2006 Illinois CPS Agreement

1 Based on tests administered closest to year ended December 31, 2011, and submitted to Illinois EPA for compliance.

2 Actual mercury requirement for 2011 under the CPS was 5 lb/MMacf ACI injection, which has been met. Percent reduction requirement is based on mercury concentration in coal before and after treatment system. Reduction is across all units, including Waukegan 7 and Will County 3, which will require particulate removal upgrades to meet fleet-wide emission and unit-specific requirements. Midwest Generation believes that currently installed ACI and particulate removal equipment is sufficient to achieve or exceed the requirements outlined in the final MATS Rule.

# Midwest Generation Compliance Cost

| Unit                          | Operating Capacity (MW) | 2011 Generation (GWh) | % of Regional Fleet | Total Large Unit Est. Capex (\$MM) <sup>2</sup> | Total Small Unit Est. Capex (\$MM) <sup>2</sup> |
|-------------------------------|-------------------------|-----------------------|---------------------|---|---|
| Waukegan 7, 8                 | 689                     | 3,898                 | 13.9%               |   | \$160   |
| Joliet 6                      | 290                     | 1,675                 | 5.9%                |   | \$75  |
| Joliet 7, 8                   | 1,036                   | 5,907                 | 21.0%               | \$200   |   |
| Will County 3, 4 <sup>1</sup> | 761                     | 3,492                 | 12.4%               | \$194   |   |
| Powerton 5, 6                 | 1,538                   | 9,184                 | 32.7%               | \$234   |   |
| <b>Total</b>                  | <b>4,314</b>            | <b>24,156</b>         |                     | <b>\$628</b>                                    | <b>\$235</b>                                    |

1 Will County 3 requires particulate removal upgrades in 2015 to comply with the CPS requirements.

2 No decision has been made to retrofit particular units. Capital expenditure forecast provides for large unit retrofits. It is less likely that retrofits will be made to Joliet 6 and the Waukegan Station.

# EME Wind Strategy & Financing

## Refocused Wind Strategy

- Capistrano Wind Partners (CWP) formed February 13, 2012, by EME, TIAA-CREF, CIRI (an Alaskan native corporation). \$460 million commitment for wind development:
  - Operating projects transferred – Cedro Hill, Texas (150 MW) and Mountain Wind I and II, Wyoming (141 MW) – EME received \$242 million in March 2012
  - Projects to be transferred after completion – Broken Bow I, Nebraska (80 MW) and Crofton Bluffs, Nebraska (40 MW) – EME expects to receive \$140 million upon transfer of completed projects
  - EME retains an economic interest and will continue to operate and consolidate projects
- 700 MW development pipeline
- New wind projects to be developed or acquired only with third-party capital

## Other Recent Wind Developments

- Continuing Big Sky vendor dispute regarding timing of repayment of \$206 million in project debt; no recourse to EME
- Broken Bow I, Nebraska (80 MW) and Crofton Bluffs, Nebraska (40 MW) expected completion in fourth quarter 2012

## Wind Project Financing Capacity

- 575 MW not financed:
  - 387 MW contracted<sup>1</sup>
  - 188 MW merchant – Goat Wind, Texas (150 MW), Lookout, Pennsylvania (38 MW)

<sup>1</sup> Includes Storm Lake project (108 MW) that was impaired in the quarter ended December 31, 2011.

| Segment revenues as reported | <u>\$161</u> | <u>\$187</u> | <u>\$402</u>   | <u>\$458</u>   |

## Use of Non-GAAP Financial Measures

Edison International's earnings are prepared in accordance with generally accepted accounting principles used in the United States and represent the company's earnings as reported to the Securities and Exchange Commission. Our management uses core earnings and EPS by principal operating subsidiary internally for financial planning and for analysis of performance. We also use core earnings and EPS by principal operating subsidiary when communicating with analysts and investors regarding our earnings results and outlook, to facilitate the company's performance from period to period.

Core earnings is a Non-GAAP financial measure and may not be comparable to those of other companies. Core earnings and core earnings per share are defined as GAAP earnings and basic earnings per share excluding income or loss from discontinued operations and income or loss from significant discrete items that management does not consider representative of ongoing earnings. GAAP earnings refer to net income attributable to Edison International common shareholders or attributable to the common shareholders of each subsidiary. EPS by principal operating subsidiary is based on the principal operating subsidiaries' net income attributable to the common shareholders of each subsidiary, respectively, and Edison International's weighted average outstanding common shares. The impact of participating securities (vested stock options that earn dividend equivalents that may participate in undistributed earnings with common stock) for each principal operating subsidiary is not material to each principal operating subsidiary's EPS and is therefore reflected in the results of the Edison International holding company, which we refer to as EIX parent company and other.

EBITDA is defined as earnings before interest, income taxes, depreciation and amortization. Adjusted EBITDA includes production tax credits from EME's wind projects and excludes amounts from gain on the sale of assets, loss on early extinguishment of debt and leases, and impairment of assets and investments. Our management uses Adjusted EBITDA as an important financial measure for evaluating EME which represents substantially all of the EMG business segment.

The average realized energy price and average realized fuel cost is a non-GAAP performance measure since such statistical measures exclude unrealized gains or losses recorded as operating revenues and unrealized gains or losses recorded as fuel expenses. Management believes that the average realized energy price and average realized fuel cost is more meaningful for investors as it reflects the impact of hedge contracts at the time of actual generation in period-over-period comparisons or as compared to real-time market prices.

A reconciliation of Non-GAAP information to GAAP information, including the impact of participating securities, is included either on the slide where the information appears or on another slide referenced in this presentation.
