Forward-Looking Statements

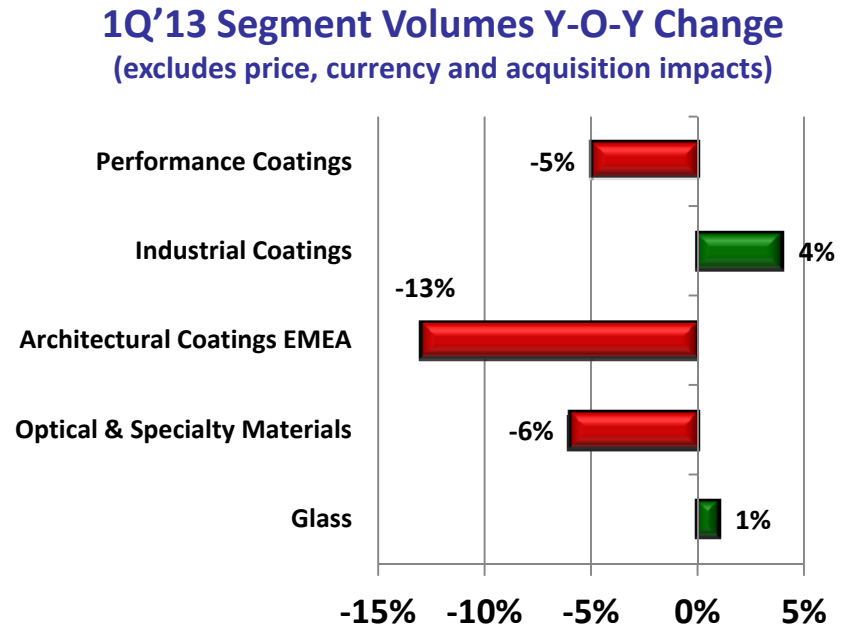

Statements contained herein relating to matters that are not historical facts are forward-looking statements reflecting PPG's current view with respect to future events and financial performance. These matters within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, involve risks and uncertainties that may affect PPG's operations, as discussed in PPG's filings with the Securities and Exchange Commission pursuant to Sections 13(a), 13(c) or 15(d) of the Exchange Act, and the rules and regulations promulgated thereunder. Accordingly, many factors could cause actual results to differ materially from the forward-looking statements contained herein. Such factors include global economic conditions, increasing price and product competition by foreign and domestic competitors, fluctuations in cost and availability of raw materials, the ability to maintain favorable supplier relationships and arrangements, the realization of anticipated cost savings from restructuring initiatives, difficulties in integrating acquired businesses and achieving expected synergies therefrom, economic and political conditions in international markets, the ability to penetrate existing, developing and emerging foreign and domestic markets, foreign exchange rates and fluctuations in such rates, fluctuations in tax rates, the impact of future legislation, the impact of environmental regulations, unexpected business disruptions, and the unpredictability of existing and possible future litigation, including litigation that could result if the asbestos settlement discussed in PPG's filings with the Securities and Exchange Commission does not become effective. Many factors could cause actual results to differ materially from the company's forward-looking statements including any unforeseen liabilities, future capital expenditures, revenues, expenses, earnings, synergies, economic performance, indebtedness, financial condition, losses and future prospects; business and management strategies for the management, expansion and growth of PPG's operations; and PPG's ability to integrate the North American architectural coatings business of AkzoNobel and to achieve anticipated synergies. However, it is not possible to predict or identify all such factors. Consequently, while the list of factors presented here and in PPG's Form 10-K for the year ended December 31, 2012 are considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements. Consequences of material differences in results compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, financial loss, legal liability to third parties and similar risks, any of which could have a material adverse effect on PPG's consolidated financial condition, results of operations or liquidity. All information in this presentation speaks only as of April 18, 2013, and any distribution of this presentation after that date is not intended and will not be construed as updating or confirming such information. PPG undertakes no obligation to update any forward-looking statement, except as otherwise required by applicable law.

- **Excellent earnings growth driven by strong operating performance**
 - Strong earnings performance in all major regions despite inconsistent demand trends
 - Aggregate coatings segment earnings growth of 13 percent aided by restructuring benefits
 - Optical results were aided by strong European debut of Generation VII Transitions® lenses, but below all-time record prior year results
 - Weaker Glass results continued reflecting lower fiber glass volumes and price

PPG Quarterly Sales (continuing operations)

2013

Lower volumes (primarily Europe), offset by price and acquisition impacts

Sales Volume Trends – Coatings Segments

PPG Coatings Y-O-Y Regional Volume Trends
(excludes price, currency and acquisition impacts)

1Q 2013 Commentary Y-O-Y (versus 1Q 2012):

U.S. & Canada:

Growth in most end-use markets versus difficult comparable period, reflecting positive regional economic momentum

Strongest end-use markets were automotive OEM, aerospace and U.S. architectural, with mixed general industrial demand

U.S. architectural sales improved in both company-owned stores and national retailers (DIY) versus difficult prior year comparable period (weather-aided and more sales days)

Europe:

Further demand weakness was evidenced broadly across most of the region and in most PPG end-use markets

Improved volumes in automotive OEM, aerospace and packaging more than offset by weakness in other businesses

Asia Pacific:

Notably improved regional activity, with mid-to-high single digit percentage growth in most markets, excluding Marine.

Higher regional demand in auto OEM, packaging, industrial and architectural. Offsetting these gains was a further decline in Asian marine new-build, which reduced the region's growth rate by over 700 basis points.

- ✓ Inflation stemming from higher Y-O-Y natural gas costs
- ✓ Lower licensing and equity earnings (i.e., personal computer end-market)
- ✓ Improved manufacturing performance and continued discretionary cost management activities resulting in lower costs

2Q, 2013 Outlook:

- ✓ Traditional sequential improvement due to seasonality
