NON-GAAP FINANCIAL MEASURES

Certain statements in this report contain non-GAAP financial measures. GAAP refers to generally accepted accounting principles in the United States. A "non-GAAP financial measure" is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows of the company; or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. Operating and statistical measures are not non-GAAP financial measures.

Brunswick's management believes that non-GAAP financial measures and the information that they provide are useful to investors because they permit investors to view Brunswick's performance using the

same tools that Brunswick uses and to better evaluate its ongoing business performance. Diluted earnings per common share, as adjusted refers to diluted earnings per common share, excluding the earnings per share impact for restructuring, exit and impairment charges, as well as losses on early extinguishment of debt, reversal of deferred tax valuation allowance reserves and special tax items. Adjusted operating earnings refers to operating earnings, excluding the earnings impact for restructuring, exit and impairment charges, while adjusted pretax earnings refers to earnings before income taxes, excluding the earnings impact for restructuring, exit and impairment charges, as well as the loss on early extinguishment of debt. Lastly, free cash flow refers to cash flow from operating and investing activities (excluding cash provided by or used for acquisitions, investments, reductions in restricted cash and purchases or sales of marketable securities).
