

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended

MARCH 31, 2014

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number **000-30205**

CABOT MICROELECTRONICS CORPORATION

(Exact name of registrant as specified in its charter)

DELAWARE
(State of Incorporation)

36-4324765
(I.R.S. Employer Identification No.)

870 NORTH COMMONS DRIVE
AURORA, ILLINOIS
(Address of principal executive offices)

60504
(Zip Code)

Registrant's telephone number, including area code: **(630) 375-6631**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES _____ X _____ NO _____

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES _____ X _____ NO _____

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer _____ X _____ Accelerated filer _____ Non-accelerated filer _____ Smaller reporting company _____

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES _____ NO _____ X _____

As of April 30, 2014, the Company had 24,115,362 shares of Common Stock, par value \$0.001 per share, outstanding.

CABOT MICROELECTRONICS CORPORATION

CABOT MICROELECTRONICS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited and in thousands, except share and per share amounts)

1. BACKGROUND AND BASIS OF PRESENTATION

Cabot Microelectronics Corporation ("Cabot Microelectronics", "the Company", "us", "we" or "our") supplies high-performance polishing slurries and pads used in the manufacture of advanced integrated circuit (IC) devices within the semiconductor industry, in a process called chemical mechanical planarization (CMP). CMP is a polishing process used by IC device manufacturers to planarize or flatten many of the multiple layers of material that are deposited upon silicon wafers in the production of advanced ICs. Our products play a critical role in the production of advanced IC devices, thereby enabling our customers to produce smaller, faster and more complex IC devices with fewer defects. We develop, produce and sell CMP slurries for polishing many of the conducting and insulating materials used in IC devices, and also for polishing the disk substrates and magnetic heads used in hard disk drives. We also develop, manufacture and sell CMP polishing pads, which are used in conjunction with slurries in the CMP process. We also pursue other demanding surface modification applications through our Engineered Surface Finishes (ESF) business where we believe we can leverage our expertise in CMP consumables for the semiconductor industry to develop products for demanding polishing applications in other industries. For additional information, refer to Part 1, Item 1, "Business", in our annual report on Form 10-K for the fiscal year ended September 30, 2013.

The unaudited consolidated financial statements have been prepared by Cabot Microelectronics Corporation pursuant to the rules of the Securities and Exchange Commission (SEC) and accounting principles generally accepted in the United States of America. In the opinion of management, these unaudited consolidated financial statements include all normal recurring adjustments necessary for the fair presentation of Cabot Microelectronics' financial position as of March 31, 2014, cash flows for the six months ended March 31, 2014, and March 31, 2013, and results of operations for the three and six months ended March 31, 2014, and March 31, 2013. The results of operations for the three and six months ended March 31, 2014 may not be indicative of results to be expected for future periods, including the fiscal year ending September 30, 2014. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes thereto included in Cabot Microelectronics' annual report on Form 10-K for the fiscal year ended September 30, 2013.

The consolidated financial statements include the accounts of Cabot Microelectronics and its subsidiaries. All intercompany transactions and balances between the companies have been eliminated as of March 31, 2014.

Results of Operations

The results of operations for the six months ended March 31, 2014 include an asset impairment charge of \$2,111 (\$1,475 net of tax) related to certain manufacturing assets recorded in the quarter ended March 31, 2014. This asset impairment charge included in cost of goods sold reduced our gross profit percentage by 210 basis points during the second quarter of fiscal 2014 and by 100 basis points on a year-to-date basis. The impairment charge reduced diluted earnings per share by approximately \$0.06 during both the second quarter of fiscal 2014 and on a year-to-date basis.

With respect to the comparative period for the six months ended March 31, 2013, as noted in our Form 10-Q for the quarter ended March 31, 2013, the results of operations included a foreign tax adjustment, which was recorded during the first quarter of 2013, to correct prior period amounts, which we determined to be immaterial to the prior periods to which it related. This adjustment reduced net income for the first six months of fiscal 2013 by \$1,686 and diluted earnings per share by approximately \$0.07. This adjustment related to the reversal of a deferred tax asset for cumulative net operating losses (NOLs) associated with our facility in South Korea since its opening in fiscal year 2011, as these NOLs are expected to be consumed during periods in which a tax holiday is in effect for this facility.

2. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is defined as the price that would be received from the sale of an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The FASB established a three-level hierarchy for disclosure based on the extent and level of judgment used to estimate fair value. Level 1 inputs consist of valuations based on quoted market prices in active markets for identical assets or liabilities. Level 2 inputs consist of valuations based on quoted prices for similar assets or liabilities, quoted prices for identical assets or liabilities in an inactive market, or other observable inputs. Level 3 inputs consist of valuations based on unobservable inputs that are supported by little or no market activity.

The following table presents financial instruments, other than long-term debt, that we measured at fair value on a recurring basis at March 31, 2014 and September 30, 2013. See Note 7 for a detailed discussion of our long-term debt. We have chosen to not measure any of our other financial instruments at fair value as we believe their carrying value approximates their fair value. We have classified the following assets in accordance with the fair value hierarchy set forth in the applicable standards. In instances where the inputs used to measure the fair value of an asset fall into more than one level of the hierarchy, we have classified them based on the lowest level input that is significant to the determination of the fair value.

	March 31, 2014			Total Fair Value
	Level 1	Level 2	Level 3	
Cash and cash equivalents	\$ 239,147	\$ -	\$ -	\$ 239,147
Auction rate securities (ARS)	-	-	6,070	6,070
Other long-term investments	1,639	-	-	1,639
Total	<u>\$ 240,786</u>	<u>\$ -</u>	<u>\$ 6,070</u>	<u>\$ 246,856</u>

	September 30, 2013			Total Fair Value
	Level 1	Level 2	Level 3	
Cash and cash equivalents	\$ 226,029	\$ -	\$ -	\$ 226,029
Auction rate securities (ARS)	-	-	7,966	7,966
Other long-term investments	1,375	-	-	1,375
Total	<u>\$ 227,404</u>	<u>\$ -</u>	<u>\$ 7,966</u>	<u>\$ 235,370</u>

Our cash and cash equivalents consist of various bank accounts used to support our operations and investments in institutional money-market funds which are traded in active markets. The ARS and other long-term investments are included in other long-term assets on our Consolidated Balance Sheet. The fair value of our long-term ARS is determined through two discounted cash flow analyses, one using a discount rate based on a market index comprised of tax exempt variable rate demand obligations and one using a discount rate based on the LIBOR swap curve, adding a risk factor to reflect current liquidity issues in the ARS market. Our other long-term investments represent the fair value of investments under the Cabot Microelectronics Supplemental Employee Retirement Plan (SERP), which is a nonqualified supplemental savings plan. The fair value of the investments is determined through quoted market prices within actively traded markets. Although the investments are allocated to individual participants and investment decisions are made solely by those participants, the SERP is a nonqualified plan. Consequently, the Company owns the assets and the related offsetting liability for disbursement until such time a participant makes a qualifying withdrawal. The long-term asset was adjusted to \$1,639 in the second quarter of fiscal 2014 to reflect its fair value as of March 31, 2014.

We applied accounting standards regarding the classification and valuation of financial instruments to the valuation of our investment in ARS at March 31, 2014. Our ARS investments at March 31, 2014 consisted of two tax exempt municipal debt securities with a total par value of \$6,070. The ARS market began to experience illiquidity in early 2008, and this illiquidity continues. Despite this lack of liquidity, there have been no defaults in payment of the underlying securities and interest income on these holdings continues to be received on scheduled interest payment dates. Our ARS, when purchased, were issued by A-rated municipalities. Although the credit ratings of both municipalities have been downgraded since our original investment, one of the ARS is credit enhanced with bond insurance, and the other, as discussed below in this footnote, has become an obligation of the bond insurer. Both ARS currently carry a credit rating of AA- by Standard & Poor's.

Since an active market for ARS does not currently exist, we classify these investments as held-to-maturity and we determine the fair value of these investments using a Level 3 discounted cash flow analysis and also consider other factors such as the reduced liquidity in the ARS market and nature of the insurance backing. Key inputs to our discounted cash flow model include projected cash flows from interest and principal payments and the weighted probabilities of improved liquidity or debt refinancing by the issuer. We also incorporate certain Level 2 market indices into the discounted cash flow analysis, including published rates such as the LIBOR rate, the LIBOR swap curve and a municipal swap index published by the Securities Industry and Financial Markets Association. The following table presents a reconciliation of the activity in fiscal 2014 for fair value measurements using level 3 inputs:

Balance as of October 1, 2013	\$ 7,966
Net sales of ARS	(2,130)
Reversal of temporary impairment	234
Balance as of March 31, 2014	<u>\$ 6,070</u>

Based on our fair value assessment, we determined that one ARS continued to be impaired as of September 30, 2013. In November 2011, the municipality that issued our impaired ARS filed for bankruptcy protection. As a result of the approval of the municipality's reorganization plan, and our voting elections, we received 65 % of the par value outstanding, or \$2,113, during the quarter ended December 31, 2013, and we reversed the \$234 temporary impairment that we previously recorded. We believe that this ARS is no longer impaired as of March 31, 2014 based on: (1) the successful monetization of \$2,130 of the par value of the security in accordance with a bankruptcy plan during the six months ended March 31, 2014; (2) the fact that the bond insurer is now responsible for servicing all future interest and principal payments; (3) the fact that all interest payments have been received; and (4) our intention not to sell the security nor be required to sell the security until the value is collected in full, which may be at maturity. As of March 31, 2014, this security has a fair value equal to its par value of \$1,120. We determined that the fair value of the other ARS was not impaired as of March 31, 2014. See Note 5 for more information on these investments.

3. INVENTORIES

Inventories consisted of the following:

	<u>March 31,</u> <u>2014</u>	<u>September</u> <u>30, 2013</u>
Raw materials	\$ 42,331	\$ 38,004
Work in process	4,285	5,001
Finished goods	24,958	20,781
Total	<u>\$ 71,574</u>	<u>\$ 63,786</u>

The increase in raw material and finished goods inventory is primarily due to higher raw material costs incurred and greater volume levels of certain raw materials maintained in fiscal 2014 in conjunction with certain Company sourcing initiatives, as well as an inventory build in expectation of higher sales in the second half of fiscal 2014 compared to the first half.

4. GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill was \$43,114 as of March 31, 2014, and \$44,306 as of September 30, 2013. The decrease in goodwill was due to foreign exchange fluctuations of the New Taiwan dollar.

The components of other intangible assets are as follows:

	March 31, 2014		September 30, 2013	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Other intangible assets subject to amortization:				
Product technology	\$ 8,271	\$ 6,269	\$ 8,362	\$ 5,853
Acquired patents and licenses	8,270	7,378	8,270	7,196
Trade secrets and know-how	2,550	2,550	2,550	2,550
Distribution rights, customer lists and other	12,169	7,906	12,496	7,484
Total other intangible assets subject to amortization	31,260	24,103	31,678	23,083
Total other intangible assets not subject to amortization*	1,190		1,190	
Total other intangible assets	\$ 32,450	\$ 24,103	\$ 32,868	\$ 23,083

* Total other intangible assets not subject to amortization consist primarily of trade names.

Amortization expense on our other intangible assets was \$613 and \$1,269 for the three and six months ended March 31, 2014, respectively. Amortization expense on our other intangible assets was \$658 and \$1,319 for the three and six months ended March 31, 2013, respectively. Estimated future amortization expense for the five succeeding fiscal years is as follows:

Fiscal Year	Estimated Amortization Expense
Remainder of 2014	\$ 1,195
2015	2,380
2016	1,970
2017	1,144
2018	452

Goodwill and indefinite-lived intangible assets are tested for impairment annually in the fourth quarter of the fiscal year or more frequently if indicators of potential impairment exist, using a fair-value-based approach. The recoverability of goodwill is measured at the reporting unit level, which is defined as either an operating segment or one level below an operating segment. An entity has the option to assess the fair value of a reporting unit either using a qualitative analysis ("step zero") or a discounted cash flow analysis ("step one"). Similarly, an entity has the option to use a step zero or a step one approach to determine the recoverability of indefinite-lived intangible assets. In fiscal 2012, we used a step zero approach to assess the fair value of our reporting units and the recoverability of indefinite-lived intangible assets. In fiscal 2013, we chose to refresh our step one analysis for both goodwill impairment and for indefinite-lived intangible asset impairment. Changes in economic and operating conditions that occur after the annual impairment analysis or an interim impairment analysis that impact these assumptions may result in future impairment charges.

We completed our annual impairment test during our fourth quarter of fiscal 2013 and concluded that no impairment existed. There were no indicators of potential impairment during the six months ended March 31, 2014, so it was not necessary to perform an impairment review for goodwill and indefinite-lived intangible assets during the first six months of fiscal year 2014. There have been no cumulative impairment charges recorded on the goodwill for any of our reporting units.

5. OTHER LONG-TERM ASSETS

Other long-term assets consisted of the following:

	March 31, 2014	September 30, 2013
Auction rate securities	\$ 6,070	\$ 7,966
Other long-term assets	2,623	3,086
Other long-term investments	1,639	1,375
Total	<u>\$ 10,332</u>	<u>\$ 12,427</u>

As discussed in Note 2 of this Form 10-Q, the two ARS that we owned as of March 31, 2014 are classified as long-term investments. One of the securities is credit enhanced with bond insurance and the other is now an obligation of the bond insurer, and all interest payments continue to be received on a timely basis. Although we believe these securities will ultimately be collected in full, we believe that it is not likely that we will be able to monetize the securities in our next business cycle (which for us is generally one year). As discussed in Note 2, we received 65 % of the par value outstanding of one of the ARS, or \$2,113, during the quarter ended December 31, 2013, and we reversed the \$234 pretax reduction (\$151 net of tax) in fair value on that ARS that we first recognized in fiscal 2008. We believe this security is no longer impaired based on: (1) the successful monetization of 65% of the par value of the security in accordance with a bankruptcy plan during the quarter ended December 31, 2013; (2) the fact that the bond insurer is now responsible for servicing all future interest and principal payments; (3) the fact that all interest payments have been received; and (4) our intention not to sell the security nor be required to sell the security until the value is collected in full, which may be at maturity.

As discussed in Note 2 of this Form 10-Q, we recorded a long-term asset and a corresponding long-term liability of \$1,639 representing the fair value of our SERP investments as of March 31, 2014.

6. ACCRUED EXPENSES, INCOME TAXES PAYABLE AND OTHER CURRENT LIABILITIES

Accrued expenses, income taxes payable and other current liabilities consisted of the following:

	March 31, 2014	September 30, 2013
Accrued compensation	\$ 11,314	\$ 24,601
Goods and services received, not yet invoiced	3,729	4,681
Deferred revenue and customer advances	372	458
Warranty accrual	250	324
Income taxes payable	4,762	6,931
Taxes, other than income taxes	1,416	951
Other	2,348	1,953
Total	<u>\$ 24,191</u>	<u>\$ 39,899</u>

The decrease in accrued compensation was primarily due to the payment of our annual incentive bonus program earned in fiscal 2013, partially offset by six months of accrual under our annual incentive bonus program related to fiscal 2014.

8. DEBT

On February 13, 2012, we entered into a credit agreement (the "Credit Agreement") among the Company, as Borrower, Bank of America, N.A., as administrative agent, swing line lender and an L/C issuer, Bank of America Merrill Lynch and J.P. Morgan Securities LLC, as joint lead arrangers and joint book managers, JPMorgan Chase Bank, N.A., as syndication agent, and Wells Fargo Bank, N.A. as documentation agent. The Credit Agreement provided us with a \$175,000 term loan (the "Term Loan"), which we drew on February 27, 2012 to fund approximately half of the special cash dividend we paid to our stockholders on March 1, 2012, and a \$100,000 revolving credit facility (the "Revolving Credit Facility"), which remains undrawn, with sub-limits for multicurrency borrowings, letters of credit and swing-line loans. The Term Loan and the Revolving Credit Facility are referred to as the "Credit Facilities." The Credit Agreement provides for an uncommitted accordion feature that allows us to request the existing lenders or, if necessary, third-party financial institutions to provide additional capacity in the Revolving Credit Facility, in an amount not to exceed \$75,000. The Credit Facilities are scheduled to expire on February 13, 2017.

Borrowings under the Credit Facilities (other than in respect of swing-line loans) bear interest at a rate per annum equal to the "Applicable Rate" (as defined below) plus, at our option, either (1) a LIBOR rate determined by reference to the cost of funds for deposits in the relevant currency for the interest period relevant to such borrowing or (2) the "Base Rate", which is the highest of (x) the prime rate of Bank of America, N.A., (y) the federal funds rate plus 1/2 of 1.00% and (z) the one-month LIBOR rate plus 1.00%. The initial Applicable Rate for borrowings under the Credit Facilities was 1.75% with respect to LIBOR borrowings and 0.25% with respect to Base Rate borrowings, with such Applicable Rate subject to adjustment based on our consolidated leverage ratio. Swing-line loans bear interest at the Base Rate plus the Applicable Rate for Base Rate loans under the Revolving Credit Facility. In addition to paying interest on outstanding principal under the Credit Agreement, we pay a commitment fee to the lenders under the Revolving Credit Facility in respect of the unutilized commitments thereunder at a rate ranging from 0.25% to 0.35%, based on our consolidated leverage ratio. Interest expense and commitment fees are paid according to the relevant interest period and no less frequently than at the end of each calendar quarter. We paid \$2,658 in customary arrangement fees, upfront fees and administration fees, of which \$550 and \$1,010 remains in prepaid expenses and other current assets and other long-term assets, respectively, on our Consolidated Balance Sheet as of March 31, 2014. We must also pay letter of credit fees as necessary. The Term Loan has periodic scheduled repayments; however, we may voluntarily prepay the Credit Facilities without premium or penalty, subject to customary "breakage" fees and reemployment costs in the case of LIBOR borrowings. All obligations under the Credit Agreement are guaranteed by each of our existing and future direct and indirect domestic subsidiaries (the "Guarantors"). The obligations under the Credit Agreement and guarantees of those obligations are secured, subject to certain exceptions, by first priority liens and security interests in the assets of the Company and its domestic subsidiaries.

The Credit Agreement contains covenants that restrict the ability of the Company and its subsidiaries to take certain actions, including, among other things and subject to certain significant exceptions: creating liens, incurring indebtedness, making investments, engaging in mergers, selling property, paying dividends or amending organizational documents. The Credit Agreement requires us to comply with certain financial ratio maintenance covenants, including a maximum consolidated leverage ratio of 2.75 to 1.00 through June 30, 2014 and a minimum consolidated fixed charge coverage ratio of 1.25 to 1.00. The maximum consolidated leverage ratio will decrease to 2.50 to 1.00 from July 1, 2014 through the termination of the Credit Agreement. As of March 31, 2014, our consolidated leverage ratio was 1.48 to 1.00 and our consolidated fixed charge coverage ratio was 4.18 to 1.00. The Credit Agreement also contains customary affirmative covenants and events of default. We believe we are in compliance with these covenants.

At March 31, 2014, the fair value of the Term Loan, using level 2 inputs, approximates its carrying value of \$157,500 as the loan bears a floating market rate of interest. As of March 31, 2014, \$13,125 of the debt outstanding is classified as short-term.

Principal repayments of the Term Loan are generally made on the last calendar day of each quarter if that day is considered to be a business day. As of March 31, 2014, scheduled principal repayments of the Term Loan were as follows:

Fiscal Year	Principal Repayments
Remainder of 2014	\$ 6,563
2015	15,312
2016	21,875
2017	113,750
Total	<u>\$ 157,500</u>

8. DERIVATIVE FINANCIAL INSTRUMENTS

Periodically we enter into forward foreign exchange contracts in an effort to mitigate the risks associated with currency fluctuations on certain foreign currency balance sheet exposures. Our foreign exchange contracts do not qualify for hedge accounting; therefore, the gains and losses resulting from the impact of currency exchange rate movements on our forward foreign exchange contracts are recognized as other income or expense in the accompanying consolidated income statements in the period in which the exchange rates change. We do not use derivative financial instruments for trading or speculative purposes. In addition, all derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. At March 31, 2014, we had forward foreign exchange contracts to sell Japanese yen and British pound for the purpose of hedging the risk associated with a net transactional exposure in those currencies.

The fair value of our derivative instruments included in the Consolidated Balance Sheet, which was determined using level 2 inputs, was as follows:

Balance Sheet Location	Asset Derivatives		Liability Derivatives	
	Fair Value at March 31, 2014	Fair Value at September 30, 2013	Fair Value at March 31, 2014	Fair Value at September 30, 2013
Derivatives not designated as hedging instruments				
Prepaid expenses and other current assets	\$ 40	\$ 60	\$ 101	\$ -
Accrued expenses and other current liabilities	\$ -	\$ -	\$ -	\$ -

The following table summarizes the effect of our derivative instruments on our Consolidated Statement of Income for the three and six months ended March 31:

Statement of Income Location	Gain (Loss) Recognized in Statement of Income			
	Three Months Ended		Six Months Ended	
	March 31, 2014	March 31, 2013	March 31, 2014	March 31, 2013
Derivatives not designated as hedging instruments				
Foreign exchange contracts	\$ 55	\$ 82	\$ (337)	\$ 323

9. COMMITMENTS AND CONTINGENCIES

LEGAL PROCEEDINGS

While we are not involved in any legal proceedings that we believe will have a material impact on our consolidated financial position, results of operations or cash flows, we periodically become a party to legal proceedings in the ordinary course of business.

Refer to Note 16 of "Notes to the Consolidated Financial Statements" in Item 8 of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013, for additional information regarding commitments and contingencies.

PRODUCT WARRANTIES

We maintain a warranty reserve that reflects management's best estimate of the cost to replace product that does not meet our specifications and customers' performance requirements, and costs related to such replacement. The warranty reserve is based upon a historical product replacement rate, adjusted for any specific known conditions or circumstances. Additions and deductions to the warranty reserve are recorded in cost of goods sold. Our warranty reserve activity during the first six months of fiscal 2014 was as follows:

Balance as of September 30, 2013	\$	324
Reserve for product warranty during the reporting period		360
Settlement of warranty		(434)
Balance as of March 31, 2014	\$	<u>250</u>

PURCHASE OBLIGATIONS

Purchase obligations include our take-or-pay arrangements with suppliers, and purchase orders and other obligations entered into in the normal course of business regarding the purchase of goods and services. We operate under a fumed silica supply agreement with Cabot Corporation, our former parent Company, which is not a related party, which requires us to purchase certain minimum quantities of fumed silica each year of the agreement, and to pay a shortfall if we purchase less than the minimum. The agreement became effective as of January 1, 2013 and has an initial term of four years. Purchase obligations include \$89,547 of contractual commitments related to our Cabot Corporation agreement for fumed silica.

POSTRETIREMENT OBLIGATIONS IN FOREIGN JURISDICTIONS

As required by local law, we have defined benefit plans covering employees in certain foreign jurisdictions, which are unfunded. Benefit costs, consisting primarily of service costs, are recorded as fringe benefit expense under cost of goods sold and operating expenses in our Consolidated Statements of Income. The projected benefit obligations and accumulated benefit obligations under all such unfunded plans are updated annually during the fourth quarter of the fiscal year. Benefit payments under all such unfunded plans to be paid over the next 10 years are expected to be immaterial. For more information regarding these plans, refer to Note 16 of "Notes to the Consolidated Financial Statements" included in Item 8 of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013.

10. SHARE-BASED COMPENSATION PLANS

We issue share-based awards under the following programs: our Cabot Microelectronics Corporation 2012 Omnibus Incentive Plan (OIP), our Cabot Microelectronics Corporation 2007 Employee Stock Purchase Plan, as Amended and Restated January 1, 2010 (ESPP), and, pursuant to the OIP, our Directors' Deferred Compensation Plan, as amended September 23, 2008 (DDCP), and our 2001 Executive Officer Deposit Share Program (DSP). Prior to March 2012, when our stockholders approved the OIP, we issued share-based payments under our Second Amended and Restated Cabot Microelectronics Corporation 2000 Equity Incentive Plan, as amended and restated September 23, 2008 (EIP); our ESPP, and, pursuant to the EIP, the DDCP and DSP. For additional information regarding these programs, refer to Note 11 of "Notes to the Consolidated Financial Statements" included in Item 8 of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013. Other than the ESPP, all share-based payments granted beginning March 6, 2012 are made from the OIP, and the EIP is no longer available for any awards.

We record share-based compensation expense for all share-based awards, including stock option grants, restricted stock and restricted stock unit awards and employee stock purchase plan purchases. We calculate share-based compensation expense using the straight-line approach based on awards ultimately expected to vest, which requires the use of an estimated forfeiture rate. Our estimated forfeiture rate is primarily based on historical experience, but may be revised in future periods if actual forfeitures differ from the estimate. We use the Black-Scholes option-pricing model to estimate the grant date fair value of our stock options and employee stock purchase plan purchases. This model requires the input of highly subjective assumptions, including the price volatility of the underlying stock, the expected term of our stock options and the risk-free interest rate. We estimate the expected volatility of our stock options based on a combination of our stock's historical volatility and the implied volatilities from actively-traded options on our stock. We calculate the expected term of our stock options using historical stock option exercise data, and we add a slight premium to this expected term for employees who meet the definition of retirement eligible pursuant to their grants during the contractual term of the grant. The risk-free rate is derived from the U.S. Treasury yield curve in effect at the time of grant.

Share-based compensation expense for the three and six months ended March 31, 2014, and 2013, was as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2014	2013	2014	2013
Cost of goods sold	\$ 449	\$ 403	\$ 929	\$ 915
Research, development and technical	352	310	718	676
Selling and marketing	307	324	660	710
General and administrative	3,317	2,772	5,484	5,002
Total share-based compensation expense	4,425	3,809	7,791	7,303
Tax benefit	(1,593)	(1,345)	(2,685)	(2,531)
Total share-based compensation expense, net of tax	<u>\$ 2,832</u>	<u>\$ 2,464</u>	<u>\$ 5,106</u>	<u>\$ 4,772</u>

Our non-employee directors received annual equity awards in March 2014, pursuant to the OIP. The award agreements provide for immediate vesting of the award at the time of termination of service for any reason other than by reason of Cause, Death, Disability or a Change in Control, as defined in the OIP, if at such time the non-employee director has completed an equivalent of at least two full terms as a director of the Company, as defined in the Company's bylaws. Seven of the Company's non-employee directors had completed at least two full terms of service as of the date of the March 2014 award. Consequently, the requisite service period for the award has already been satisfied and we recorded the fair value of \$1,325 of the awards to these seven directors to share-based compensation expense in the fiscal quarter ended March 31, 2014 rather than recording that expense over the one-year vesting period stated in the award agreement, as is done for the other non-employee director.

For additional information regarding the estimation of fair value, refer to Note 11 of "Notes to the Consolidated Financial Statements" included in Item 8 of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013.

12. OTHER INCOME, NET

Other income, net, consisted of the following:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2014	2013	2014	2013
Interest income	\$ 21	\$ 33	\$ 79	\$ 78
Other income (expense)	82	430	641	1,239
Total other income, net	<u>\$ 103</u>	<u>\$ 463</u>	<u>\$ 720</u>	<u>\$ 1,317</u>

Other income (expense) primarily represents the gains and losses recorded on transactions denominated in foreign currencies. The decrease in other income was primarily due to the impact of foreign currency fluctuations on monetary assets and liabilities denominated in currencies other than the functional currency, net of the gains and losses incurred on forward foreign exchange contracts discussed in Note 8 of this Form 10-Q.

12. INCOME TAXES

Our effective income tax rate was 27.2 % and 27.0 % for the three and six months ended March 31, 2014 compared to a 30.4 % and 36.4 % effective income tax rate for the three and six months ended March 31, 2013. The decrease in the effective tax rate during the first six months of fiscal 2014 was primarily due to lower income tax expense on foreign earnings resulting from our election to permanently reinvest the earnings of our foreign subsidiaries, the absence of a \$1,686 foreign tax adjustment, as discussed in Note 1 under the heading "Results of Operations", recorded in the first quarter of fiscal 2013, and the absence of a \$1,015 valuation allowance on a deferred tax asset related to a former equity investment recorded in the second quarter of fiscal 2013.

The Company was awarded a tax holiday in South Korea in conjunction with our investment in research, development and manufacturing facilities there. Subject to certain conditions, which we believe we have met, this arrangement allows for a 0 % tax rate in fiscal years 2013, 2014 and 2015, and a tax at 50 % of the local statutory rate in effect for fiscal years 2016 and 2017. This tax holiday reduced our income tax provision by approximately \$1,643 in the first six months of fiscal 2014.

13. EARNINGS PER SHARE

Basic earnings per share (EPS) is calculated by dividing net income available to common stockholders by the weighted-average number of common shares outstanding during the period, excluding the effects of unvested restricted stock awards with a right to receive non-forfeitable dividends, which are considered participating securities as prescribed by the two-class method under ASC 260. Diluted EPS is calculated in a similar manner, but the weighted-average number of common shares outstanding during the period is increased to include the weighted-average dilutive effect of "in-the-money" stock options and unvested restricted stock shares using the treasury stock method.

The standards of accounting for earnings per share require companies to provide a reconciliation of the numerator and denominator of the basic and diluted earnings per share computations. Basic and diluted earnings per share were calculated as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2014	2013	2014	2013
Numerator:				
Net income	\$ 10,095	\$ 9,420	\$ 21,403	\$ 19,123
Less: income attributable to participating securities	(133)	-	(203)	-
Earnings available to common shares	<u>\$ 9,962</u>	<u>\$ 9,420</u>	<u>\$ 21,200</u>	<u>\$ 19,123</u>
Denominator:				
Weighted average common shares (Denominator for basic calculation)	23,981,506	22,973,631	23,775,049	22,914,133
Weighted average effect of dilutive securities:				
Share-based compensation	915,831	897,394	973,992	840,539
Diluted weighted average common shares (Denominator for diluted calculation)	<u>24,897,337</u>	<u>23,871,025</u>	<u>24,749,041</u>	<u>23,754,672</u>
Earnings per share:				
Basic	<u>\$ 0.42</u>	<u>\$ 0.41</u>	<u>\$ 0.89</u>	<u>\$ 0.84</u>
Diluted	<u>\$ 0.40</u>	<u>\$ 0.40</u>	<u>\$ 0.86</u>	<u>\$ 0.81</u>

For the three months ended March 31, 2014 and 2013, approximately 0.5 million and 1.5 million shares, respectively, attributable to outstanding stock options were excluded from the calculation of diluted earnings per share because the exercise price of the options was greater than the average market price of our common stock and, therefore, their inclusion would have been anti-dilutive.

For the six months ended March 31, 2014 and 2013, approximately 0.5 million and 2.0 million shares, respectively, attributable to outstanding stock options were excluded from the calculation of diluted earnings per share because the exercise price of the options was greater than the average market price of our common stock and, therefore, their inclusion would have been anti-dilutive.

14. FINANCIAL INFORMATION BY INDUSTRY SEGMENT AND PRODUCT LINE

We operate predominantly in one industry segment – the development, manufacture, and sale of CMP consumables.

Revenue generated by product line for the three and six months ended March 31, 2014, and 2013, was as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2014	2013	2014	2013
Revenue:				
Tungsten slurries	\$ 37,559	\$ 36,819	\$ 74,928	\$ 77,525
Dielectric slurries	29,121	29,734	59,067	60,092
Other Metals slurries	17,336	17,057	35,141	35,041
Polishing pads	7,760	7,402	15,170	15,866
Data storage slurries	4,486	5,424	9,468	10,486
Engineered Surface Finishes	3,194	3,928	6,197	7,887
Total revenue	<u>\$ 99,456</u>	<u>\$ 100,364</u>	<u>\$ 199,971</u>	<u>\$ 206,897</u>

In past years, we have referred to "Other Metals slurries" as "Copper slurries", which included slurries for polishing copper, barrier and aluminum. To more accurately reflect changes within this product family, and in particular, growth in revenue for polishing aluminum, we now refer to this product family as "Other Metals slurries".

15. NEW ACCOUNTING PRONOUNCEMENTS

In July 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-11, "Income Taxes (Topic 740) – Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists" (ASU 2013-11). The provisions of ASU 2013-11 require an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward when the related deferred tax asset is available to be utilized. ASU 2013-11 is effective for us beginning October 1, 2014. We do not expect the adoption of ASU 2013-11 will have a material impact on our financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following "Management's Discussion and Analysis of Financial Condition and Results of Operations", as well as disclosures included elsewhere in this Form 10-Q, include "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. This Act provides a safe harbor for forward-looking statements to encourage companies to provide prospective information about themselves so long as they identify these statements as forward-looking and provide meaningful cautionary statements identifying important factors that could cause actual results to differ from the projected results.

All statements other than statements of historical fact we make in this Form 10-Q are forward-looking. In particular, the statements herein regarding future sales and operating results; Company and industry growth, contraction or trends; growth or contraction of the markets in which the Company participates; international events, regulatory or legislative activity, or various economic factors; product performance; the generation, protection and acquisition of intellectual property, and litigation related to such intellectual property; new product introductions; development of new products, technologies and markets; natural disasters; the acquisition of or investment in other entities; uses and investment of the Company's cash balance; financing facilities and related debt, payment of principal and interest, and compliance with covenants and other terms; the Company's capital structure; the construction and operation of facilities by the Company; and statements preceded by, followed by or that include the words "intends," "estimates," "plans," "believes," "expects," "anticipates," "should," "could" or similar expressions, are forward-looking statements. Forward-looking statements reflect our current expectations and are inherently uncertain. Our actual results may differ significantly from our expectations. We assume no obligation to update this forward-looking information. The section entitled "Risk Factors" describes some, but not all, of the factors that could cause these differences.

This section, "Management's Discussion and Analysis of Financial Condition and Results of Operations" (MD&A), should be read in conjunction with our annual report on Form 10-K for the fiscal year ended September 30, 2013, including the consolidated financial statements and related notes thereto.

SECOND QUARTER OF FISCAL 2014 OVERVIEW

As we discussed in our Form 10-K for fiscal 2013 and in our Form 10-Q for the first quarter of fiscal 2014, as the semiconductor industry is becoming driven more by consumer demand for mobile devices such as smart phones and tablets, and less by corporate demand for personal computers (PCs), the semiconductor industry appears to be demonstrating greater seasonality of demand around consumer-oriented "back-to-school" and "holiday" calendar periods. Consistent with this trend, we saw a continued softness in demand within the semiconductor industry and for our products during the first six months of fiscal 2014, similar to what we experienced during the same period of both fiscal 2013 and fiscal 2012. However, based on forecasts by some industry analysts and some of our customers, as well as what appears to be firming of demand that we have seen in the early part of our third quarter, we expect stronger overall semiconductor industry demand in the second half of our fiscal year. Industry analysts expect growth in overall semiconductor demand will continue to be fueled by growth in demand for mobile electronic devices, but likely muted by weak demand for PCs. There are many factors, however, that make it difficult for us to predict future revenue trends for our business, including those discussed in Part II, Item 1A entitled "Risk Factors" in this Form 10-Q.

Revenue for our second quarter of fiscal 2014 was \$99.5 million, which represented a decrease of 0.9% from the second quarter of fiscal 2013. We believe the decrease from the comparable quarter of fiscal 2013 was primarily due to the continued soft demand conditions within the global semiconductor industry noted above, as well as adverse impacts associated with foreign exchange rate changes, primarily related to the Japanese yen. Revenue for the first six months of fiscal 2014 was \$200.0 million, which represented a decrease of 3.3% from the comparable period of fiscal 2013, also due to the same factors.

Gross profit expressed as a percentage of revenue for our second quarter of fiscal 2014 was 46.8%, which represented a decrease from 48.2% reported in the second quarter of fiscal 2013. The decrease in gross profit percentage from the second quarter of fiscal 2013 was primarily due to a \$2.1 million asset impairment charge related to certain manufacturing assets, which reduced the gross profit percentage by 210 basis points, and higher variable manufacturing costs, including higher raw material costs, partially offset by favorable net impacts associated with a weaker Japanese yen versus the U.S. dollar and lower costs associated with our annual incentive bonus program (AIP). Our gross profit percentage was 47.1% on a year-to-date basis, including a 100 basis point reduction due to the effect of the asset impairment charge. We currently expect our gross profit percentage for full fiscal year 2014 to be near the lower end of our guidance range of 48% to 50%, including the effect of the asset impairment charge. However, we may continue to experience fluctuations in our gross profit due to a number of factors, including the extent to which we utilize our manufacturing capacity and fluctuations in our product mix, which may cause our quarterly gross profit to be above or below this annual guidance range, as we have seen in the first two quarters of fiscal 2014.

Operating expenses were \$31.9 million in our second quarter of fiscal 2014, compared to \$34.4 million in the second quarter of fiscal 2013. The decrease in operating expenses from the comparable quarter of fiscal 2013 was primarily due to lower staffing-related costs, including costs associated with our AIP. We are lowering our full fiscal year 2014 guidance range for operating expenses to be in the range of \$127.0 million to \$131.0 million, down \$4.0 million from our prior guidance range of \$131.0 million to \$135.0 million.

Diluted earnings per share for our second fiscal quarter were \$0.40 compared to \$0.40 reported in the second quarter of fiscal 2013. Diluted earnings per share in the second quarter of fiscal 2014 included a \$0.06 adverse impact of the previously mentioned asset impairment charge, offset by lower operating expenses and a lower effective tax rate. On a year-to-date basis, diluted earnings per share were \$0.86, including the \$0.06 adverse effect of the asset impairment charge, an increase from \$0.81 during the same period of fiscal 2013. The increase was primarily due to lower operating expenses and lower income tax expenses, partially offset by lower revenue and a lower gross profit percentage. Diluted earnings per share in fiscal 2013 included a \$0.07 adverse impact of a foreign tax adjustment recorded in the first quarter of fiscal 2013.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES AND EFFECTS OF RECENT ACCOUNTING PRONOUNCEMENTS

We discuss our critical accounting estimates and effects of recent accounting pronouncements in "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in Item 7 of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013. We believe there have been no material changes in our critical accounting estimates during the first six months of fiscal 2014. See Note 15 of the Notes to the Consolidated Financial Statements for a discussion of new accounting pronouncements.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2014, VERSUS THREE MONTHS ENDED MARCH 31, 2013

REVENUE

Revenue was \$99.5 million for the three months ended March 31, 2014, which represented a 0.9%, or \$0.9 million, decrease from the three months ended March 31, 2013. The decrease in revenue was primarily due to adverse impacts of foreign exchange fluctuations, primarily due to the weakening of the Japanese yen. We believe the decrease in revenue reflects continued soft demand conditions within the global semiconductor industry.

COST OF GOODS SOLD

Total cost of goods sold was \$52.9 million for the three months ended March 31, 2014, which represented an increase of 1.8%, or \$0.9 million, from the three months ended March 31, 2013. The increase in cost of goods sold was primarily due to the \$2.1 million asset impairment charge related to certain manufacturing assets noted above, and \$1.6 million in higher variable manufacturing costs, including higher raw material costs. These increases in cost of goods sold were partially offset by a \$1.5 million decrease due to the effects of foreign exchange rate changes, primarily due to the weakening of the Japanese yen, and a \$0.6 million decrease in fixed manufacturing costs, primarily due to lower incentive compensation costs under our AIP.

Engineered abrasive particles are significant raw materials that we use in many of our CMP slurries. In an effort to mitigate our risk exposure to rising raw material costs and to increase supply assurance and quality performance requirements, we have entered into multi-year supply agreements with a number of suppliers. For more financial information about our supply contracts, see "Tabular Disclosure of Contractual Obligations" in this Quarterly Report on Form 10-Q as well as in Item 7 of Part II of our Annual Report on Form 10-K for the fiscal year ended September 30, 2013.

Our need for additional quantities or different kinds of key raw materials in the future has required, and will continue to require, that we enter into new supply arrangements with third parties. Future arrangements may result in costs that are different from those in the existing agreements. For example, we have had higher cost of goods sold associated with a contract with an existing raw material supplier, which became effective in 2013. In addition, a number of factors could impact the future cost of raw materials, packaging, freight and labor. We also expect to continue to invest in our supply chain to improve product quality, reduce variability and improve our manufacturing product yields.

GROSS PROFIT

Our gross profit as a percentage of revenue was 46.8% for the three months ended March 31, 2014, as compared to 48.2% for the three months ended March 31, 2013. The decrease in gross profit as a percentage of revenue was primarily due to the asset impairment charge noted above, which reduced our gross profit percentage by 210 basis points, and higher variable manufacturing costs, including higher raw material costs. These decreases in gross profit margin were partially offset by a favorable net impact associated with the weakening of the Japanese yen and a higher-valued product mix.

RESEARCH, DEVELOPMENT AND TECHNICAL

Total research, development and technical expenses were \$14.4 million for the three months ended March 31, 2014, which represented a decrease of 4.7%, or \$0.7 million, from the three months ended March 31, 2013. The decrease was primarily due to \$0.6 million in lower staffing-related costs, including costs associated with our AIP, and \$0.3 million in lower clean room material costs.

Our research, development and technical efforts are focused on the following main areas:

- Research related to fundamental CMP technology;
- Development and formulation of new and enhanced CMP consumables products, including collaboration on joint development projects with our customers;
- Process development to support rapid and effective commercialization of new products;
- Technical support of CMP products in our customers' research, development and manufacturing facilities; and,
- Evaluation and development of new polishing and metrology applications outside of the semiconductor industry.

SELLING AND MARKETING

Selling and marketing expenses were \$6.5 million for the three months ended March 31, 2014, which represented a decrease of 8.2%, or \$0.6 million, from the three months ended March 31, 2013. The decrease was primarily related to lower staffing-related costs.

GENERAL AND ADMINISTRATIVE

General and administrative expenses were \$11.1 million for the three months ended March 31, 2014, which represented a decrease of 9.9%, or \$1.2 million, from the three months ended March 31, 2013. The decrease was primarily due to \$1.0 million in lower staffing-related costs, including costs associated with our AIP, and \$0.3 million in lower professional fees.

INTEREST EXPENSE

Interest expense was \$0.8 million for the three months ended March 31, 2014 and was comparable to \$0.9 million for the three months ended March 31, 2013.

OTHER INCOME, NET

Other income was \$0.1 million for the three months ended March 31, 2014 compared to \$0.5 million during the three months ended March 31, 2013. The decrease in other income was primarily due to the impact of foreign currency fluctuations on monetary assets and liabilities denominated in currencies other than the functional currency, net of the gains and losses incurred on forward foreign exchange contracts discussed in Note 8 of the Notes to the Consolidated Financial Statements.

PROVISION FOR INCOME TAXES

Our effective income tax rate was 27.2% for the three months ended March 31, 2014 compared to a 30.4% effective income tax rate for the three months ended March 31, 2013. The decrease in the effective tax rate during the second quarter of fiscal 2014 was primarily due to lower income tax expense associated with foreign earnings in conjunction with our election to permanently reinvest the earnings of our foreign subsidiaries. In particular, as discussed in more detail in Note 12, the Company was awarded a tax holiday in South Korea in conjunction with our investment in research, development and manufacturing facilities there. This tax holiday reduced our income tax provision by approximately \$0.9 million in the second quarter of fiscal 2014, or \$1.6 million on a year-to-date basis.

NET INCOME

Net income was \$10.1 million for the three months ended March 31, 2014 which represented an increase of 7.2%, or \$0.7 million, from the three months ended March 31, 2013. The increase was primarily due to lower operating expenses and a lower effective tax rate, partially offset by decreased revenue and a lower gross profit percentage, including the previously mentioned asset impairment charge, which reduced net income in the quarter by \$1.5 million.

SIX MONTHS ENDED MARCH 31, 2014, VERSUS SIX MONTHS ENDED MARCH 31, 2013

REVENUE

Revenue was \$200.0 million for the six months ended March 31, 2014, which represented a 3.3%, or \$6.9 million, decrease from the six months ended March 31, 2013. The decrease in revenue was driven by a \$4.0 million decrease due to lower sales volume and a \$2.8 million decrease due to foreign exchange fluctuations, primarily due to the weakening of the Japanese yen. We believe the decrease in revenue reflects continued soft demand conditions within the global semiconductor industry, including continued soft demand for PCs reflected in decreased revenue from tungsten slurry products, and lower revenue earned in our Engineered Surface Finishes business, which is primarily capital equipment-oriented.

COST OF GOODS SOLD

Total cost of goods sold was \$105.7 million for the six months ended March 31, 2014, which represented a decrease of 2.6%, or \$2.8 million, from the six months ended March 31, 2013. The decrease in cost of goods sold was primarily due to a \$4.6 million decrease due to the effects of foreign exchange rate changes, primarily the weakening of the Japanese yen, a \$1.4 million decrease due to lower sales volume, a \$1.3 million decrease due to higher manufacturing yields and a \$0.7 million decrease in fixed manufacturing costs, primarily due to lower costs associated with our AIP. These decreases in cost of goods sold were partially offset by a \$3.0 million increase due to higher variable manufacturing costs, including higher raw material costs, and the \$2.1 million asset impairment charge on certain manufacturing assets recorded in the second quarter of fiscal 2014 noted above.

GROSS PROFIT

Our gross profit as a percentage of revenue was 47.1% for the six months ended March 31, 2014, as compared to 47.6% for the six months ended March 31, 2013. The decrease in gross profit as a percentage of revenue was primarily due to higher variable manufacturing costs, including higher raw material costs, lower sales volume, and the asset impairment charge noted above, which reduced our gross profit percentage by 100 basis points year-to-date. These decreases were partially offset by the favorable net impact associated with the weakening of the Japanese yen and higher manufacturing yields. In light of our year-to-date gross margin achievement, including the effect of the asset impairment charge, we currently expect our gross profit percentage for full year fiscal 2014 to be near the lower end of our guidance range of 48% to 50%.

RESEARCH, DEVELOPMENT AND TECHNICAL

Total research, development and technical expenses were \$28.9 million for the six months ended March 31, 2014, which represented a decrease of 4.8%, or \$1.5 million, from the six months ended March 31, 2013. The decrease was primarily due to \$0.8 million in lower clean room material costs, \$0.4 million in lower depreciation expense and \$0.3 million in lower staffing-related costs.

SELLING AND MARKETING

Selling and marketing expenses were \$13.2 million for the six months ended March 31, 2014, which represented a decrease of 6.9%, or \$1.0 million, from the six months ended March 31, 2013. The decrease was primarily related to lower staffing-related costs.

GENERAL AND ADMINISTRATIVE

General and administrative expenses were \$21.8 million for the six months ended March 31, 2014, which represented a decrease of 6.2%, or \$1.4 million, from the six months ended March 31, 2013. The decrease was primarily due to \$1.1 million in lower staffing-related costs, including costs associated with our AIP, and 0.3 million in lower bad debt expense.

INTEREST EXPENSE

Interest expense was \$1.7 million for the six months ended March 31, 2014 and was comparable to \$1.8 million for the six months ended March 31, 2013.

OTHER INCOME, NET

Other income was \$0.7 million for the six months ended March 31, 2014 compared to \$1.3 million during the six months ended March 31, 2013. The decrease in other income was primarily due to the impact of foreign currency fluctuations on monetary assets and liabilities denominated in currencies other than the functional currency, net of the gains and losses incurred on forward foreign exchange contracts discussed in Note 8 of the Notes to the Consolidated Financial Statements.

PROVISION FOR INCOME TAXES

Our effective income tax rate was 27.0% for the six months ended March 31, 2014 compared to a 36.4% effective income tax rate for the six months ended March 31, 2013. The decrease in the effective tax rate during the first six months of fiscal 2014 was primarily due to the absence of a \$1.7 million foreign tax adjustment, as discussed in Note 1 under the heading "Results of Operations", recorded in the first quarter of fiscal 2013, and lower income tax expense on foreign earnings in conjunction with our election to permanently reinvest the earnings of our foreign subsidiaries. In particular, as discussed in more detail in Note 12, the Company was awarded a tax holiday in South Korea in conjunction with our investment in research, development and manufacturing facilities there. This tax holiday reduced our income tax provision by approximately \$1.6 million in the first six months of fiscal 2014.

NET INCOME

Net income was \$21.4 million for the six months ended March 31, 2014 which represented an increase of 11.9%, or \$2.3 million, from the six months ended March 31, 2013. The increase was primarily due to lower operating expenses and lower income tax expense, including the absence of the previously noted tax adjustment, partially offset by decreased revenue and a lower gross profit percentage, including the previously mentioned asset impairment charge, which reduced net income by \$1.5 million in fiscal 2014.

LIQUIDITY AND CAPITAL RESOURCES

We generated \$14.4 million in cash flows from operating activities in the first six months of fiscal 2014, compared to \$30.2 million in cash from operating activities in the first six months of fiscal 2013. Our cash flows provided by operating activities in the first six months of fiscal 2014 represented \$42.2 million in net income plus non-cash items and a \$27.8 million decrease in cash flow due to a net increase in working capital. The decrease in cash flows from operating activities compared to the first six months of fiscal 2013 was primarily due to changes in the timing and amount of payment for accrued expenses, including payments made in the first quarter of fiscal 2014 related to our fiscal 2013 AIP, net of the accruals for our fiscal 2014 AIP, an increase in our inventory balances related to higher raw material costs incurred and higher volumes maintained in conjunction with our sourcing initiatives, and changes in the amount of income tax payments.

In the first six months of fiscal 2014, cash flows used in investing activities were \$4.0 million representing \$7.3 million for purchases of property, plant and equipment, partially offset by \$2.1 million received from the liquidation of a portion of our auction rate securities and \$1.2 million received from other investing activities. In the first six months of fiscal 2013, cash flows used in investing activities were \$5.5 million for purchases of property, plant and equipment. We continue to estimate our total capital expenditures in fiscal 2014 will be approximately \$15.0 million.

In the first six months of fiscal 2014, cash flows provided by financing activities were \$3.7 million. We received \$35.9 million from the issuance of common stock related to the exercise of stock options granted under our Second Amended and Restated Cabot Microelectronics Corporation 2000 Equity Incentive Plan (EIP), our 2012 Omnibus Incentive Plan (OIP) and for the sale of shares to employees under our 2007 Employee Stock Purchase Plan, as amended and restated September 23, 2013 (ESPP), and we received \$2.2 million in tax benefits related to exercises of stock options and vesting of restricted stock granted under these plans. We used \$28.0 million to repurchase common stock under our share repurchase program and \$2.1 million to repurchase common stock pursuant to the terms of our EIP and OIP for shares withheld from award recipients to cover payroll taxes on the vesting of restricted stock granted under these plans. We also used \$4.4 million to repay long-term debt. In the first six months of fiscal 2013, cash flows used in financing activities were \$11.8 million. We used \$20.0 million to repurchase common stock under our share repurchase program and \$1.3 million to repurchase common stock pursuant to the terms of our EIP and OIP for shares withheld from award recipients to cover payroll taxes on the vesting of restricted stock granted under these plans. We also used \$4.4 million to repay long-term debt. We received \$13.2 million from the issuance of common stock related to the exercise of stock options granted under our EIP and the sale of shares to employees under our ESPP, and we received \$0.6 million in tax benefits related to exercises of stock options and vesting of restricted stock granted under our EIP.

In November 2010, our Board of Directors authorized a share repurchase program for up to \$125.0 million of our outstanding common stock, which became effective on the authorization date. In December 2011, we had \$82.9 million remaining under this share repurchase program. At that time, our Board of Directors authorized an increase in the amount available under our share repurchase program from \$82.9 million to \$150.0 million. Under this program, we repurchased 654,213 shares for \$28.0 million during the first six months of fiscal 2014 and we repurchased 597,382 shares for \$20.0 million during the first six months of fiscal 2013. As of March 31, 2014, \$62.0 million remained available under it. In April 2014, our Board of Directors authorized an increase in the amount available under our share repurchase program from the remaining \$62.0 million to \$150.0 million. Share repurchases are made from time to time, depending on market conditions, in open market transactions, at management's discretion. The timing, manner, price and amounts of repurchases will be determined at the Company's discretion, and the share repurchase program may be suspended, terminated or modified at any time for any reason. The repurchase program does not obligate the Company to acquire any specific number of shares. To date, we have funded share purchases under our share repurchase program from our available cash balance, and anticipate we will continue to do so. In addition, as part of the share repurchase program, on May 1, 2014, the Company entered into a "10b5-1" stock purchase plan agreement with an independent broker to repurchase shares of the Company's common stock in accordance with guidelines pursuant to Rule 10b5-1 of the Securities Exchange Act of 1934. A plan under Rule 10b5-1 allows a company to repurchase its shares at times when it otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. The agreement covers repurchases of shares pursuant to the agreement beginning no earlier than June 16, 2014 and expiring no later than July 25, 2015. Repurchases are subject to SEC regulations as well as certain conditions specified in the plan.

We entered into a Credit Agreement in February 2012, which provided us with a \$175.0 million Term Loan and a \$100.0 million Revolving Credit Facility, with sub-limits for multicurrency borrowings, letters of credit and swing-line loans. The Term Loan and Revolving Credit Facility are referred to as the "Credit Facilities". The Credit Agreement provides us an uncommitted accordion feature that allows us to request the existing lenders or, if necessary, third-party financial institutions to provide additional capacity in the Revolving Credit Facility, in an amount not to exceed \$75.0 million. The Term Loan has periodic scheduled principal repayments; however, we may prepay the loan without penalty. The Credit Facilities are scheduled to expire on February 13, 2017. The Term Loan was drawn on February 27, 2012 and the Revolving Credit Facility remains undrawn. The Term Loan has \$157.5 million outstanding as of March 31, 2014. The Credit Agreement contains covenants that restrict the ability of the Company and its subsidiaries to take certain actions, including, among other things and subject to certain significant exceptions: creating liens, incurring indebtedness, making investments, engaging in mergers, selling property, paying dividends or amending organizational documents. The Credit Agreement requires us to comply with certain financial ratio maintenance covenants, including a maximum consolidated leverage ratio of 2.75 to 1.00 through June 30, 2014 and a minimum consolidated fixed charge coverage ratio of 1.25 to 1.00. The maximum consolidated leverage ratio will decrease to 2.50 to 1.00 from July 1, 2014 through the termination of the Credit Agreement. As of March 31, 2014, our consolidated leverage ratio was 1.48 to 1.00 and our consolidated fixed charge coverage ratio was 4.18 to 1.00. The Credit Agreement also contains customary affirmative covenants and events of default. We believe we are in compliance with these covenants. See Note 7 of the Notes to the Consolidated Financial Statements for additional information regarding the Credit Agreement.

As of March 31, 2014, we had \$239.1 million of cash and cash equivalents, \$49.2 million of which was held in foreign subsidiaries in Japan, Singapore, South Korea and Taiwan where we have elected to permanently reinvest our earnings rather than repatriate the earnings to the U.S. If we choose to repatriate these earnings in the future through dividends or loans to the U.S. parent company, the earnings could become subject to additional income tax expense.

We believe that our current balance of cash and long-term investments, cash generated by our operations and available borrowing capacity under our Credit Facility will be sufficient to fund our operations, expected capital expenditures, merger and acquisition activities and share repurchases for the foreseeable future. However, in order to further expand our business, we may need to raise additional funds in the future through equity or debt financing, strategic relationships or other arrangements. Depending on future conditions in the capital and credit markets, we could encounter difficulty securing additional financing in the type or amount necessary to pursue these objectives.

OFF-BALANCE SHEET ARRANGEMENTS

At March 31, 2014, and September 30, 2013, we did not have any unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which might have been established for the purpose of facilitating off-balance sheet arrangements.

TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

The following summarizes our contractual obligations at March 31, 2014, and the effect such obligations are expected to have on our liquidity and cash flow in future periods.

CONTRACTUAL OBLIGATIONS (In millions)	Total	Less Than 1 Year	1-3 Years	3-5 Years	After 5 Years
Long-term debt	\$ 157.5	\$ 13.1	\$ 144.4	\$ -	\$ -
Interest expense and fees on long-term debt	8.1	3.2	4.9	-	-
Purchase obligations	111.7	53.3	57.9	0.3	0.2
Operating leases	7.8	1.7	1.4	0.8	3.9
Other long-term liabilities *	9.1	-	-	1.1	8.0
Total contractual obligations	\$ 294.2	\$ 71.3	\$ 208.6	\$ 2.2	\$ 12.1

* We have excluded \$1.1 million in deferred tax liabilities from other long-term liability amounts presented as the deferred taxes that will be settled in cash are not known and the timing of any such payments is uncertain.

During the six months ended March 31, 2014, we operated under a fumed silica supply agreement with Cabot Corporation, our former parent company, which is not a related party, which requires us to purchase certain minimum quantities of fumed silica each year of the agreement, and to pay a shortfall if we purchase less than the minimum. The agreement became effective as of January 1, 2013 and has an initial term of four years. The purchase obligations in the table above reflect management's expectation that we will meet the minimum purchase quantities each year of the contract. Purchase obligations include an aggregate amount of \$89.5 million of contractual commitments related to this agreement.

Interest payments on long-term, variable rate debt reflect LIBOR rates in effect at March 31, 2014. Commitment fees are based on our estimated consolidated leverage ratio in future periods. See Note 7 of the Notes to the Consolidated Financial Statements for additional information regarding our long-term debt.

Refer to Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" of Part II of our annual report on Form 10-K for the fiscal year ended September 30, 2013, for additional information regarding our contractual obligations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

EFFECT OF CURRENCY EXCHANGE RATES AND EXCHANGE RATE RISK MANAGEMENT

We conduct business operations outside of the United States through our foreign operations. Some of our foreign operations maintain their accounting records in their local currencies. Consequently, period to period comparability of results of operations is affected by fluctuations in exchange rates. The primary currencies to which we have exposure are the Japanese yen, the New Taiwan dollar and the Korean won. Approximately 15% of our revenue is transacted in currencies other than the U.S. dollar. However, we also incur expenses in foreign countries that are transacted in currencies other than the U.S. dollar, which mitigates the exposure on the Consolidated Statement of Income. We periodically enter into forward contracts in an effort to manage foreign currency exchange exposure. However, we are unlikely to be able to hedge these exposures completely. We do not currently enter into forward exchange contracts or other derivative instruments for speculative or trading purposes.

The significant weakening of the Japanese yen against the U.S. dollar in fiscal 2013 and during the first half of fiscal 2014 adversely affected our revenue, but had a net favorable impact on our gross profit percentage, as our yen-denominated cost of goods sold was greater than our yen-denominated revenue. The weakening of the yen accounted for an approximate 100 basis point increase in our gross profit percentage for fiscal 2013 compared to fiscal 2012, and accounted for an approximate 140 basis point increase in our gross profit percentage for the first half of fiscal 2014 compared to the same period of fiscal 2013. To a lesser extent, we have also seen a favorable foreign exchange impact on our yen-denominated operating expenses. The weakening of the yen also favorably impacted other income on our Consolidated Statement of Income, and significantly impacted accumulated other comprehensive income on our Consolidated Balance Sheet. Other income has been positively impacted based on the settlement or remeasurement of receivables and payables denominated in yen, including intercompany loans, net of the gains and losses incurred on forward foreign exchange contracts used to hedge the yen exposure. During the fiscal year ended September 30, 2013 and the six months ended March 31, 2014, we recorded \$13.0 million and \$5.2 million, respectively, in currency translation losses, net of tax, in other comprehensive income on our Consolidated Balance Sheet. These losses primarily relate to changes in the U.S. dollar value of assets and liabilities denominated in yen when these asset and liability amounts are translated at month-end exchange rates.

MARKET RISK AND SENSITIVITY ANALYSIS RELATED TO FOREIGN EXCHANGE RATE RISK

We have performed a sensitivity analysis assuming a hypothetical 10% additional adverse movement in foreign exchange rates. As of March 31, 2014, the analysis demonstrated that such market movements would not have a material adverse effect on our consolidated financial position, results of operations or cash flows over a one-year period. Actual gains and losses in the future may differ materially from this analysis based on changes in the timing and amount of foreign currency rate movements and our actual exposures.

INTEREST RATE RISK

At March 31, 2014, we had \$157.5 million in long-term debt at variable interest rates. Assuming a hypothetical 100 basis point increase in our current variable interest rate, our interest expense would increase by approximately \$0.4 million per quarter.

MARKET RISK RELATED TO INVESTMENTS IN AUCTION RATE SECURITIES

At March 31, 2014, we owned two auction rate securities (ARS) with a total estimated fair value and par value of \$6.1 million which were classified as other long-term assets on our Consolidated Balance Sheet. Beginning in 2008, general uncertainties in the global credit markets significantly reduced liquidity in the ARS market, and this illiquidity continues. For more information on our ARS, see Notes 2 and 5 of the Notes to the Consolidated Financial Statements.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our management, with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), has conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2014. Based on that evaluation, our CEO and CFO have concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to ensure that such information is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

While we believe the present design of our disclosure controls and procedures is effective enough to make known to our senior management in a timely fashion all material information concerning our business, we intend to continue to improve the design and effectiveness of our disclosure controls and procedures to the extent we believe necessary in the future to provide our senior management with timely access to such material information, and to correct deficiencies that we may discover in the future, as appropriate.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

INHERENT LIMITATIONS ON EFFECTIVENESS OF CONTROLS

Because of inherent limitations, our disclosure controls or our internal control over financial reporting may not prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must take into account the benefits of controls relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include possible faulty judgment in decision making and breakdowns due to a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

While we are not involved in any legal proceedings that we believe will have a material impact on our consolidated financial position, results of operations or cash flows, we periodically become a party to legal proceedings in the ordinary course of business.

ITEM 1A. RISK FACTORS

We do not believe there have been any material changes in our risk factors since the filing of our Annual Report on Form 10-K for the fiscal year ended September 30, 2013. However, we may update our risk factors, including adding or deleting them, in our SEC filings from time to time for clarification purposes or to include additional information, at management's discretion, even when there have been no material changes.

RISKS RELATING TO OUR BUSINESS

DEMAND FOR OUR PRODUCTS FLUCTUATES AND OUR BUSINESS MAY BE ADVERSELY AFFECTED BY WORLDWIDE ECONOMIC AND INDUSTRY CONDITIONS

Our business is affected by economic and industry conditions and our revenue is primarily dependent upon semiconductor demand. Semiconductor demand, in turn is impacted by changes in consumer demand such as the significant shift in demand in recent years from semiconductor devices for personal computers to those for mobile internet devices. Historically, semiconductor demand has fluctuated significantly due to industry cycles and seasonal shifts in demand, which can dramatically affect our business, causing demand for our products to fluctuate. For example, we experienced soft demand conditions in the semiconductor industry during the first half of fiscal years 2012 and 2013, followed by stronger demand in the second half of each of those years. During our first half of fiscal 2014, we again experienced relatively soft demand for our products, which we believe was primarily due to soft semiconductor industry demand, including traditional seasonal weakness that we typically have experienced in the first half of our fiscal year. Furthermore, competitive dynamics within the semiconductor industry may impact our business. Our limited visibility to future customer orders makes it difficult for us to predict industry trends. If the global economy or the semiconductor industry weakens, whether in general or as a result of specific factors, such as macroeconomic factors, or unpredictable natural disasters, we could experience material adverse impacts on our results of operations and financial condition.

Adverse global economic and industry conditions may have other negative effects on our Company. For instance, we may experience negative impacts on cash flows due to the inability of our customers to pay their obligations to us, as evidenced by the \$3.7 million bad debt expense we recorded in March 2012, related to a customer bankruptcy filing in Japan in the second quarter of fiscal 2012, or our production process may be harmed if our suppliers cannot fulfill their obligations to us. We may also have to reduce the carrying value of goodwill and other intangible assets, which could harm our financial position and results of operations.

Some additional factors that affect demand for our products include: the types of electronic devices that are in demand, such as smart phones and tablets versus PCs; products that our customers may produce, such as logic devices versus memory devices; the various technology nodes at which those products are manufactured; customers' specific manufacturing process integration schemes; the short order to delivery time for our products; quarter-to-quarter changes in customer order patterns; market share gains and losses; and pricing changes by us and our competitors.

WE HAVE A NARROW PRODUCT RANGE AND OUR PRODUCTS MAY BECOME OBSOLETE, OR TECHNOLOGICAL CHANGES MAY REDUCE OR LIMIT INCREASES IN THE CONSUMPTION OF CMP SLURRIES AND PADS

Our business is substantially dependent on a single class of products, CMP slurries, which account for the majority of our revenue. We also continue to develop our business in CMP pads. Our business would suffer if these products became obsolete or if consumption of these products decreased. Our success depends on our ability to keep pace with technological changes and advances in the semiconductor industry and to adapt, improve and customize our products for advanced IC applications in response to evolving customer needs and industry trends. Since its inception, the semiconductor industry has experienced rapid technological changes and advances in the design, manufacture, performance and application of IC devices, and our customers continually pursue lower cost of ownership and higher quality and performance of materials consumed in their manufacturing processes, including CMP slurries and pads, as a means to reduce the costs and increase the yield in their manufacturing facilities. We expect these technological changes and advances, and this drive toward lower costs, higher quality and performance and higher yields, will continue in the future. Potential technology developments in the semiconductor industry, as well as our customers' efforts to reduce consumption of CMP consumables, including through their possible reuse or recycle, could render our products less important to the IC device manufacturing process.

A SIGNIFICANT AMOUNT OF OUR BUSINESS COMES FROM A LIMITED NUMBER OF LARGE CUSTOMERS AND OUR REVENUE AND PROFITS COULD DECREASE SIGNIFICANTLY IF WE LOST ONE OR MORE OF THESE CUSTOMERS

Our CMP consumables customer base is concentrated among a limited number of large customers. The larger semiconductor manufacturers are generally growing at a faster rate than the smaller ones, and we have seen the number of semiconductor manufacturers decline both through mergers and acquisitions as well as through strategic alliances. Industry analysts predict that this trend will continue, which means the semiconductor industry will be comprised of fewer and larger participants if their prediction is correct. One or more of these principal customers could stop buying CMP consumables from us or could substantially reduce the quantity of CMP consumables purchased from us. Our principal customers also hold considerable purchasing power, which can impact the pricing and terms of sale of our products. Any deferral or significant reduction in CMP consumables sold to these principal customers, or a significant number of smaller customers, could seriously harm our business, financial condition and results of operations.

During the six months ended March 31, 2014 and 2013, our five largest customers accounted for approximately 56% and 54% of our revenue, respectively. During the six months ended March 31, 2014, Taiwan Semiconductor Manufacturing Company (TSMC) and Samsung were our largest customers accounting for approximately 21% and 14%, respectively, of our revenue. During the six months ended March 31, 2013, TSMC and Samsung accounted for approximately 21% and 14%, respectively, of our revenue. During full fiscal year 2013, our five largest customers accounted for approximately 53% of our revenue, with TSMC and Samsung accounting for approximately 21% and 13%, respectively.

OUR BUSINESS COULD BE SERIOUSLY HARMED IF OUR COMPETITORS DEVELOP SUPERIOR CMP CONSUMABLES PRODUCTS, OFFER BETTER PRICING, TERMS OR SERVICE, OR OBTAIN CERTAIN INTELLECTUAL PROPERTY RIGHTS

Competition from other CMP consumables manufacturers could seriously harm our business and results of operations. This competition could continue to increase, and opportunities exist for other companies to emerge as potential competitors by developing their own CMP consumables products. Increased competition has and may continue to impact the prices we are able to charge for our CMP consumables products, as well as our overall business. In addition, our competitors could have or obtain intellectual property rights which could restrict our ability to market our existing products and/or to innovate and develop new products.

ANY PROBLEM OR DISRUPTION IN OUR SUPPLY CHAIN, INCLUDING SUPPLY OF OUR MOST IMPORTANT RAW MATERIALS, OR IN OUR ABILITY TO MANUFACTURE AND DELIVER OUR PRODUCTS TO OUR CUSTOMERS, COULD ADVERSELY AFFECT OUR RESULTS OF OPERATIONS

We depend on our supply chain to enable us to meet the demands of our customers. Our supply chain includes the raw materials we use to manufacture our products, our production operations and the means by which we deliver our products to our customers. Our business could be adversely affected by any problem or interruption in our supply of the key raw materials we use in our CMP slurries and pads, or any problem or interruption that may occur during production or delivery of our products, such as weather-related problems or natural disasters. Our supply chain may also be negatively impacted by unanticipated price increases due to supply restrictions beyond the control of our Company or our raw materials suppliers.

We believe it would be difficult to promptly secure alternative sources of key raw materials in the event one of our suppliers becomes unable to supply us with sufficient quantities of raw materials that meet the quality and technical specifications required by us and our customers. In addition, new contract terms, contractual amendments to the existing agreements with, or non-performance by, our suppliers, including any significant financial distress our suppliers may suffer, could adversely affect us. Also, if we change the supplier or type of key raw materials we use to make our CMP slurries or pads, or are required to purchase them from a different manufacturer or manufacturing facility or otherwise modify our products, in certain circumstances our customers might have to requalify our CMP slurries and pads for their manufacturing processes and products. The requalification process could take a significant amount of time and expense to complete and could motivate our customers to consider purchasing products from our competitors, possibly interrupting or reducing our sales of CMP consumables to these customers.

WE ARE SUBJECT TO RISKS ASSOCIATED WITH OUR FOREIGN OPERATIONS

We currently have operations and a large customer base outside of the United States. Approximately 88% of our revenue was generated by sales to customers outside of the United States for both the six months ended March 31, 2014 and full fiscal year ended September 30, 2013. We may encounter risks in doing business in certain foreign countries, including, but not limited to, adverse changes in economic and political conditions, fluctuation in exchange rates, compliance with a variety of foreign laws and regulations, as well as difficulty in enforcing business and customer contracts and agreements, including protection of intellectual property rights. We also may encounter the risks that we may not be able to repatriate earnings from our foreign operations, derive anticipated tax benefits of our foreign operations or recover the investments made in our foreign operations.

BECAUSE WE RELY HEAVILY ON OUR INTELLECTUAL PROPERTY, OUR FAILURE TO ADEQUATELY OBTAIN OR PROTECT IT COULD SERIOUSLY HARM OUR BUSINESS

Protection of intellectual property is particularly important in our industry because we develop complex technical formulas and processes for CMP products that are proprietary in nature and differentiate our products from those of our competitors. Our intellectual property is important to our success and ability to compete. We attempt to protect our intellectual property rights through a combination of patent, trademark, copyright and trade secret laws, as well as employee and third-party nondisclosure and assignment agreements. Due to our international operations, we pursue protection in different jurisdictions, which may provide varying degrees of protection, and we cannot provide assurance that we can obtain adequate protection in each such jurisdiction. Our failure to obtain or maintain adequate protection of our intellectual property rights for any reason, including through the patent prosecution process or in the event of litigation related to such intellectual property, could seriously harm our business. In addition, the costs of obtaining or protecting our intellectual property could negatively affect our operating results.

WE MAY PURSUE ACQUISITIONS OF, INVESTMENTS IN, AND STRATEGIC ALLIANCES WITH OTHER ENTITIES, WHICH COULD DISRUPT OUR OPERATIONS AND HARM OUR OPERATING RESULTS IF THEY ARE UNSUCCESSFUL

We expect to continue to make investments in technologies, assets and companies, either through acquisitions, investments or alliances, in order to supplement our internal growth and development efforts. Acquisitions and investments, involve numerous risks, including the following: difficulties and risks in integrating the operations, technologies, products and personnel of acquired companies; diversion of management's attention from normal daily operations of the business; increased risk associated with foreign operations; potential difficulties and risks in entering markets in which we have limited or no direct prior experience and where competitors in such markets have stronger market positions; potential difficulties in operating new businesses with different business models; potential difficulties with regulatory or contract compliance in areas in which we have limited experience; initial dependence on unfamiliar supply chains or relatively small supply partners; insufficient revenues to offset increased expenses associated with acquisitions; potential loss of key employees of the acquired companies; or inability to effectively cooperate and collaborate with our alliance partners.

Further, we may never realize the perceived or anticipated benefits of a business combination, asset acquisition or investments in other entities. Acquisitions by us could have negative effects on our results of operations, in areas such as contingent liabilities, gross profit margins, amortization charges related to intangible assets and other effects of accounting for the purchases of other business entities. Investments in and acquisitions of technology-related companies or assets are inherently risky because these businesses or assets may never develop, and we may incur losses related to these investments. In addition, we may be required to impair the carrying value of these acquisitions or investments to reflect other than temporary declines in their value, which could harm our business and results of operations, as evidenced by the valuation allowance established in the second quarter of fiscal 2013 on a deferred tax asset related to a former equity investment.

BECAUSE WE HAVE LIMITED EXPERIENCE IN BUSINESS AREAS OUTSIDE OF CMP SLURRIES, EXPANSION OF OUR BUSINESS INTO NEW PRODUCTS AND APPLICATIONS MAY NOT BE SUCCESSFUL

An element of our strategy has been to leverage our current customer relationships, technological expertise and other capabilities to expand our business beyond CMP slurries into other areas, such as CMP polishing pads and, more broadly, into other electronic materials. Additionally, in our Engineered Surface Finishes business, we are pursuing other surface modification applications. Expanding our business into new product areas could involve technologies, production processes and business models in which we have limited experience, and we may not be able to develop and produce products or provide services that satisfy customers' needs or we may be unable to keep pace with technological or other developments. Also, our competitors may have or obtain intellectual property rights that could restrict our ability to market our existing products and/or to innovate and develop new products.

OUR INABILITY TO ATTRACT AND RETAIN KEY PERSONNEL COULD CAUSE OUR BUSINESS TO SUFFER

If we fail to attract and retain the necessary managerial, technical and customer support personnel, our business and our ability to maintain existing and obtain new customers, develop new products and provide acceptable levels of customer service could suffer. We compete with other industry participants for qualified personnel, particularly those with significant experience in the semiconductor industry. The loss of services of key employees could harm our business and results of operations.

RISKS RELATING TO THE MARKET FOR OUR COMMON STOCK**THE MARKET PRICE MAY FLUCTUATE SIGNIFICANTLY AND RAPIDLY**

The market price of our common stock has fluctuated and could continue to fluctuate significantly as a result of factors such as: economic and stock market conditions generally and specifically as they may impact participants in the semiconductor and related industries; changes in financial estimates and recommendations by securities analysts who follow our stock; earnings and other announcements by, and changes in market evaluations of, us or participants in the semiconductor and related industries; changes in business or regulatory conditions affecting us or participants in the semiconductor and related industries; announcements or implementation by us, our competitors, or our customers of technological innovations, new products or different business strategies; changes in our capital management strategy, including the incurrence of debt; and trading volume of our common stock.

ANTI-TAKEOVER PROVISIONS UNDER OUR CERTIFICATE OF INCORPORATION AND BYLAWS MAY DISCOURAGE THIRD PARTIES FROM MAKING AN UNSOLICITED BID FOR OUR COMPANY

Our certificate of incorporation, our bylaws, and various provisions of the Delaware General Corporation Law may make it more difficult or expensive to effect a change in control of our Company. For instance, our amended and restated certificate of incorporation provides for the division of our Board of Directors into three classes as nearly equal in size as possible with staggered three-year terms.

We have adopted change in control arrangements covering our executive officers and other key employees. These arrangements provide for a cash severance payment, continued medical benefits and other ancillary payments and benefits upon termination of service of a covered employee's employment following a change in control, which may make it more expensive to acquire our Company.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in thousands)
Jan. 1 through Jan. 31, 2014	48,000	\$ 40.85	48,000	\$ 80,039
Feb. 1 through Feb. 28, 2014	289,400	\$ 41.93	289,400	\$ 67,906
Mar. 1 through Mar. 31, 2014	132,025	\$ 44.73	132,025	\$ 62,000
Total	469,425	\$ 42.60	469,425	\$ 62,000

In November 2010, our Board of Directors authorized a share repurchase program for up to \$125.0 million of our outstanding common stock, which became effective on the authorization date. Under this program, as of December 13, 2011, we had \$82.9 million remaining. In December 2011, our Board of Directors authorized an increase in the amount available under this program from \$82.9 million to \$150.0 million. We repurchased 469,425 shares for \$20.0 million during the second quarter of fiscal 2014 under it. As of March 31, 2014, \$62.0 million remained outstanding under our share repurchase program. In April 2014, our Board of Directors authorized an increase in the amount available under our share repurchase program from the remaining \$62.0 million to \$150.0 million. The manner in which the Company repurchases its shares is discussed above in Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the heading "Liquidity and Capital Resources". To date, we have funded share purchases under our share repurchase program from our available cash balance, and anticipate we will continue to do so.

ITEM 6. EXHIBITS

The exhibit numbers in the following list correspond to the number assigned to such exhibits in the Exhibit Table of Item 601 of Regulation S-K:

Exhibit Number	Description
31.1	Certification of Chief Executive Officer pursuant to Rule 13a-14(a) and 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Chief Financial Officer pursuant to Rule 13a-14(a) and 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101.INS*	XBRL Instance Document.
101.SCH*	XBRL Taxonomy Extension Schema.
101.CAL*	XBRL Taxonomy Extension Calculation Linkbase.
101.DEF*	XBRL Taxonomy Extension Definition Linkbase.
101.LAB*	XBRL Taxonomy Extension Label Linkbase.
101.PRE*	XBRL Taxonomy Extension Presentation Linkbase.

CERTIFICATION

I, William P. Noglows, Chief Executive Officer of Cabot Microelectronics Corporation, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Cabot Microelectronics Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors:
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Cabot Microelectronics Corporation (the "Company") on Form 10-Q for the fiscal quarter ended March 31, 2014 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned officers of the Company certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
