2015 First-Quarter Financial Results

Forward-Looking Statements

Certain statements contained in this presentation are forward-looking statements. Pursuant to federal securities regulations, we have set forth cautionary statements relating to those forward-looking statements in our Annual Report on Form 10-K for the year ended December 31, 2014, in our Quarterly Report on Form 10-Q for the quarter ended March 30, 2015, and other filings with the Securities and Exchange Commission. We urge readers to review and carefully consider these cautionary statements and the other disclosures we make in our filings with the SEC.

This presentation contains non-GAAP financial measures that are not determined in accordance with United States GAAP. These non-GAAP financial measures should not be considered in isolation, as an alternative to, or more meaningful than measures of financial performance determined in accordance with United States GAAP. A reconciliation of those financial measures to United States GAAP financial measures is included under "Supplemental Information" in this presentation and is available on the company's website at www.tredegar.com under "Investors."

The report speaks as of the date thereof. Tredegar is not, and should not be deemed to be, updating or reaffirming any information contained therein. We do not undertake, and expressly disclaim any duty, to update any forward-looking statements made in this presentation to reflect any change in management's expectations or any change in conditions, assumptions or circumstances on which such statements are based.

1st Quarter Y-O-Y Sales Comparison

Net Sales Growth	(11)%
Volume/Mix	(3)%
Price	(3)%
Currency	(5)%

Performance Drivers

- Lower North American baby care elastic laminate volume (1Q profit impact of $(1.2)MM)
- Higher volume in flexible packaging and favorable mix in surface protection films
- Higher manufacturing expenses in flexible packaging films as challenging market conditions had an unfavorable impact on capacity utilization in Brazil
- Favorable impact of foreign exchange ($1.6MM) and resin lag ($2.2MM) compared to prior year

Business Outlook

- Loss of baby care elastic volume will be reflected in 1H2015 results: ~$(2.0)MM impact on operating profit
- In Flexible Packaging we expect gradual ramp up of the new line; continued pricing pressure
- Favorable market trends for surface protection films
- 2015 capital spending projection of $30MM

Performance Drivers

- Volume up with growth in nonresidential B&C, automotive, and specialty markets
- Automotive volume up year-over-year with roll out of new customer programs
- Temporarily took anodizing capacity out of the system to expand at Carthage, TN site – project expense of $.4MM
- Product mix-related production inefficiencies

Business Outlook

- Expecting continued volume growth in B&C and automotive
- Project expense associated with anodizing upgrade forecasted at $.6MM in second quarter
- Production inefficiencies expected to improve with ramp-up of new anodizing capacity
- 2015 capital spending projection of $10MM

Film Products results include the acquisition of Terphane Holdings LLC on October 24, 2011. Bonnell Aluminum results include the acquisition of AACOA, Inc. on October 1, 2012.

Notes:

1. Net sales represent sales less freight. Net sales is a financial measure that is not calculated in accordance with U.S. generally accepted accounting principles (U.S. GAAP), and it is not intended to represent sales as defined by U.S. GAAP. Net sales is a key measure used by the chief operating decision maker of each segment for purposes of assessing performance. A reconciliation of net sales to sales is shown below:

(In millions)	QTD Q1 2014	QTD Q2 2014	QTD Q3 2014	QTD Q4 2014	QTD Q1 2015
Film Products	$149.2	$146.0	$143.1	140.4	133.2
Aluminum Extrusions	79.3	84.5	89.6	90.9	93.6
Total net sales	**228.4**	**230.6**	**232.7**	**231.3**	**226.8**
Add back freight	6.8	6.4	7.7	7.9	7.3
Sales as shown in consolidated statements of income	**$235.2**	**$237.0**	**$240.4**	**$239.2**	**$234.2**

(In millions)	2011	2012	2013	2014	LTM Q1 2015
Film Products	$535.5	$611.9	$621.2	$578.7	$562.7
Aluminum Extrusions	240.4	245.5	309.5	344.3	358.7
Total net sales	**775.9**	**857.3**	**930.7**	**923.0**	**921.4**
Add back freight	18.5	24.8	28.6	28.8	29.3
Sales as shown in consolidated statements of income	**$794.4**	**$882.1**	**$959.3**	**$951.8**	**$950.8**

2. Adjusted EBITDA represents net income (loss) from continuing operations before interest, taxes, depreciation, amortization, unusual items, goodwill impairments, gains or losses associated with plant shutdowns, asset impairments and restructurings, gains or losses from the sale of assets, investment write-downs or write-ups, charges related to stock option awards accounted for under the fair value-based method and other items. Adjusted EBITDA is a non-GAAP financial measure that is not intended to represent net income (loss) or cash flow from operations as defined by U.S. GAAP and should not be considered as either an alternative to net income (loss) (as an indicator of operating performance) or to cash flow (as a measure of liquidity). Tredegar uses Adjusted EBITDA as a measure of unlevered (debt-free) operating cash flow.

   We also use it when comparing relative enterprise values of manufacturing companies and when measuring debt capacity. When comparing the valuations of a peer group of manufacturing companies, we express enterprise value as a multiple of Adjusted EBITDA. We believe Adjusted EBITDA is preferable to operating profit and other GAAP measures when applying a comparable multiple approach to enterprise valuation because it excludes the items noted above, measures of which may vary among peer companies.

   A reconciliation of ongoing operating profit (loss) from continuing operations to Adjusted EBITDA is shown on the next page. Amounts relating to corporate overhead for the prior years have been reclassified to conform with the current year's presentation. Adjusted EBITDA for Aluminum Extrusions in 2012 includes an adjustment of $2.4 million for accelerated depreciation associated with the shutdown of its manufacturing facility in Kentland, IN. Accelerated depreciation associated with the shutdown of the Kentland manufacturing facility was excluded from operating profit from ongoing operations. This amount has therefore been subtracted from the amount of depreciation expense added back in calculating Adjusted EBITDA.

GAAP to Non-GAAP Reconciliations

Notes (continued):

3. The after-tax effects of losses associated with plant shutdowns, asset impairments and restructurings and gains or losses from the sale of assets and other items (which includes unrealized gains and losses for an investment accounted for under the fair value method) have been presented separately and removed from income (loss) and earnings (loss) per share from continuing operations as reported under U.S. GAAP to determine Tredegar's presentation of net income and earnings per share from ongoing operations. Net income and earnings per share from ongoing operations are key financial and analytical measures used by Tredegar to gauge the operating performance of its ongoing operations. They are not intended to represent the stand-alone results for Tredegar's ongoing operations under GAAP and should not be considered as an alternative to net income or earnings per share from continuing operations as defined by U.S. GAAP. They exclude items that we believe do not relate to Tredegar's ongoing operations. A reconciliation is shown below:

Tredegar CORPORATION

GAAP to Non-GAAP Reconciliations

Notes (continued):

7. Return on invested capital (ROIC) is defined by Tredegar as Adjusted Net Income from Ongoing Operations divided by average Invested Capital where the individual components are defined as follows:

Adjusted Net Income from Ongoing Operations equals:

	Income from Ongoing Operations (as previously defined and reconciled in Note 2)
Plus	Pension expense excluding service costs, net of taxes
Plus	Interest expense, net of tax

Average Invested Capital is the average of the beginning and ending Invested Capital balance where Invested Capital is defined as follows:

	Shareholders equity
Plus	Long-term debt
Plus	Short-term portion of long-term debt
Plus	Accrued pension liability
Minus	Cash
Minus	Non-operating investments (investment in kaleo, Inc.; Harbinger Capital Special Situations Fund, L.P. and investment real estate property)

ROIC for the LTM ended March 31, 2015 is calculated as follows:

($ millions, except percentages)		LTM March 31, 2015
Income from Ongoing Operations		$ 36.9 *
Pension expense	7.6

Tredegar CORPORATION

GAAP to Non-GAAP Reconciliations

Notes (continued):

8. The pre-tax and after-tax effects of losses associated with plant shutdowns, asset impairments and restructurings and gains or losses from the sale of assets and other items (which includes unrealized gains and losses for an investment accounted for under the fair value method) have been presented separately and removed from income (loss) from continuing operations as reported under U.S. GAAP to determine Tredegar's presentation of net income from ongoing operations. Net income from ongoing operations is a key financial and analytical measure used by Tredegar to gauge the operating performance of its ongoing operations. It is not intended to represent the stand-alone results for Tredegar's ongoing operations under U.S. GAAP and should not be considered as an alternative to net income from continuing operations as defined by U.S. GAAP. It excludes items that we believe do not relate to Tredegar's ongoing operations. A reconciliation of the pre-tax and post-tax balances attributed to net income from ongoing operations for the quarters ended March 31, 2015 and 2014 are shown below in order to show its impact upon the effective tax rate:

(in millions)	Pre-Tax (a)	Taxes Expense (Benefit) (b)	After-Tax	Effective Tax Rate (b)/(a)
