

**Second Quarter 2015**

**Earnings Conference Call**

**August 4, 2015**

## Safe Harbor Statement

**Some of our comments constitute forward-looking statements that reflect management's current views and estimates of future economic circumstances, industry conditions, Company performance and financial results.**

**These statements are based on many assumptions and factors that are subject to risk and uncertainties. ADM has provided additional information in its reports on file with the SEC concerning assumptions and factors that could cause actual results to differ materially from those in this presentation, and you should carefully review the assumptions and factors in our SEC reports.**

**To the extent permitted under applicable law, ADM assumes no obligation to update any forward-looking statements as a result of new information or future events.**

# CEO's Perspective

**Demonstrated strength and value of our geographic and business-portfolio diversity**

- **Robust ethanol demand, but record production limited margins**
- **Sweeteners and starches delivered strong results**
- **Another strong Oilseeds performance**
- **WFSI had excellent quarter and continued progress on synergies**
- **Ag Services saw lower North American volumes and margins, late-quarter price moves, record second quarter for milling**

**Continued to advance strategic plan that's improving ROIC and growing EVA**

- **Closed global chocolate sale and Barcarena JV**
- **On track to close global cocoa sale and Eaststarch transaction later this year**
- **Great progress on operational excellence initiatives**

# Segment Operating Profit Demonstrates Power of Business Model

Segment operating profits in millions  
Excludes specified items and timing effects

- ROIC of 9.0% up 120bps year-over-year
- EVA up \$238M, increasing >60% year-over-year
- 1H15 operating profit similar to 1H14, despite >\$200M decline in ethanol

\*Segment operating profit as reported was \$808M

# Ag Services: Lower NA Export Volumes and Margins, Late-Quarter Price Move

Segment operating profits in millions  
Excludes specified items and timing effects

- More significant seasonal decline in NA margins and volumes
- Late-quarter commodity price move negatively impacted positions, reversed in Q3
- Lower U.S. barge freight volumes, high water increased cost
- Milling's best Q2 ever

\*Ag Services operating profit as reported was \$152M

# Corn: Sequential Improvement, Year-over-Year Decline

Segment operating profits in millions  
Excludes specified items and timing effects

- Overall S&S volumes up 3% year-over-year
- Very good NA sweetener margins and volumes
- Good demand for livestock feed
- Mexican and European JVs contributed solid results
- Robust domestic and export ethanol demand, but industry ran at record volumes, limiting margins

\*Corn operating profit as reported was \$204M

# Oilseeds: Another Solid Quarter

Segment operating profits in millions  
Excludes specified items and timing effects

- **Great global soy crush results**
- **1H soy crush record supported by switch capacity investments**
- **Good throughput at SA origination and ports**
- **RPBO results declined on absence of biodiesel credits; lower EU, SA margins**

\*Oilseeds operating profit as reported was \$344M

# WFSI: Excellent Performance in Second Reporting Quarter

*Segment operating profits in millions*

*Excludes specified items and timing effects*

*Includes WILD and SCI earnings starting Q4 2014*

- **WILD Flavors had strong results in North America**
- **Protein specialties among best quarters ever**
- **Growing project pipeline**
- **YTD achieved \$24 million in annualized run-rate cost synergies**

*\*WFSI operating profit as reported was \$104M*

# Notes: Non-GAAP Reconciliation

The Company uses certain “Non-GAAP” financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures.

- (1) **Adjusted earnings per share (EPS) and adjusted EPS excluding timing effects**  
Adjusted EPS and adjusted EPS excluding timing effects reflect ADM's fully diluted EPS after removal of the effect on Reported EPS of certain specified items and timing effects as more fully described above. Management believes that these are useful measures of ADM's performance because they provide investors additional information about ADM's operations allowing better evaluation of ongoing business performance. These non-GAAP financial measures are not intended to replace or be an alternative to Reported EPS, the most directly comparable GAAP financial measure, or any other measures of operating results under GAAP. Earnings amounts in the tables above have been divided by the company's diluted shares outstanding for each respective quarter in order to arrive at an adjusted EPS amount for each specified item and timing effect.
- (2) **Segment operating profit and adjusted segment operating profit**  
Segment operating profit is ADM's consolidated income from operations before income tax excluding corporate items. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items and timing effects. Timing effects relate to hedge ineffectiveness and mark-to-market hedge timing effects. Management believes that segment operating profit and adjusted segment operating profit are useful measures of ADM's performance because they provide investors information about ADM's business unit performance excluding corporate overhead costs, and specified items and timing effects. Segment operating profit and adjusted segment operating profit are non-GAAP financial measures and are not intended to replace earnings before income tax, the most directly comparable GAAP financial measure. Segment operating profit and adjusted segment operating profit are not measures of consolidated operating results under U.S. GAAP and should not be considered as alternatives to income before income taxes or any other measure of consolidated operating results under U.S. GAAP.
- (3) **Adjusted Return on Invested Capital (ROIC)**  
Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM's net earnings adjusted for the after tax effects of interest expense, changes in the LIFO reserve and other specified items. Adjusted ROIC invested capital is the sum of ADM's equity (excluding noncontrolling interests) and interest-bearing liabilities adjusted for the after tax effect of the LIFO reserve, and other specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM's returns excluding the impacts of LIFO inventory reserves and other specified items. Management uses Adjusted ROIC to measure ADM's performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures.
- (4) **Average ROIC**  
Average ROIC is ADM's trailing 4-quarter net earnings adjusted for the after-tax effects of interest expense and changes in the LIFO reserve divided by the sum of ADM's equity (excluding non-controlling interests) and interest-bearing liabilities adjusted for the after-tax effect of the LIFO reserve. Management uses average ROIC for investors as additional information about ADM's returns. Average ROIC is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (5) **Adjusted Economic Value Added**  
Adjusted economic value added is ADM's trailing 4-quarter economic value added adjusted for LIFO and other specified items. The Company calculates economic value added by comparing ADM's trailing 4-quarter adjusted returns to its Annual WACC multiplied by adjusted invested capital. Adjusted economic value added is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
