SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 28, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 000-10030

Apple Inc.

(Exact name of Registrant as specified in its charter)

California
(State or other jurisdiction
of incorporation or organization)

94-2404110
(I.R.S. Employer Identification No.)

1 Infinite Loop
Cupertino, California
(Address of principal executive offices)

95014
(Zip Code)

Registrant's telephone number, including area code: (408) 996-1010

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)

Accelerated filer
Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

892,109,834 shares of common stock issued and outstanding as of April 13, 2009

Apple Inc.

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1 – Summary of Significant Accounting Policies

Apple Inc. and its wholly-owned subsidiaries (collectively “Apple” or the “Company”) design, manufacture, and market personal computers, portable digital music players, and mobile communication devices and sell a variety of related software, third-party digital content and applications, services, peripherals, and networking solutions. The Company sells its products worldwide through its online stores, its retail stores, its direct sales force, and third-party wholesalers, resellers, and value-added resellers. In addition, the Company sells a variety of third-party Mac, iPod, and iPhone compatible products including application software, printers, storage devices, speakers, headphones, and various other accessories and supplies through its online and retail stores. The Company sells to consumer, small and mid-sized business (“SMB”), education, enterprise, government, and creative markets.

Basis of Presentation and Preparation

The accompanying Condensed Consolidated Financial Statements include the accounts of the Company. Intercompany accounts and transactions have been eliminated. The accompanying Condensed Consolidated Financial Statements include all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary to present fairly the Condensed Consolidated Financial Statements for all periods presented. The preparation of these Condensed Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in these Condensed Consolidated Financial Statements and accompanying notes. Actual results could differ materially from those estimates.

Certain prior year amounts in the Condensed Consolidated Financial Statements and notes thereto have been reclassified to conform to the current period’s presentation. During the first quarter of 2009, the Company reclassified \$2.4 billion of certain fixed-income securities from short-term marketable securities to long-term marketable securities in the September 27, 2008 Condensed Consolidated Balance Sheet. The reclassification resulted from a change in accounting presentation for certain investments based on contractual maturity dates, which more closely reflects the Company’s assessment of the timing of when such securities will be converted to cash. As a result of this change, marketable securities with maturities less than 12 months are classified as short-term and marketable securities with maturities greater than 12 months are classified as long-term. There have been no changes in the Company’s investment policies or practices associated with this change in accounting presentation. See Note 2, “Financial Instruments” of this Form 10-Q for additional information.

These Condensed Consolidated Financial Statements and accompanying notes should be read in conjunction with the Company’s annual Consolidated Financial Statements and the notes thereto for the fiscal year ended September 27, 2008, included in its Annual Report on Form 10-K (the “2008 Form 10-K”). Unless otherwise stated, references to particular years or quarters refer to the Company’s fiscal years ended in September and the associated quarters of those fiscal years.

Earnings Per Common Share

Basic earnings per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per common share is computed by dividing income available to common shareholders by the weighted-average number of shares of common stock outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the potentially dilutive securities had been issued. Potentially dilutive securities include outstanding options, shares to be purchased under the employee stock purchase plan, and unvested restricted stock units (“RSUs”). The dilutive effect of potentially dilutive securities is reflected in diluted earnings per share by application of the treasury stock method. Under the treasury stock method, an increase in the fair market value of the Company’s common stock can result in a greater dilutive effect from potentially dilutive securities.

The following table sets forth the computation of basic and diluted earnings per share for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in thousands, except net income in millions and per share amounts):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Numerator:				
Net income	\$ 1,205	\$ 1,045	\$ 2,810	\$ 2,626
Denominator:				
Weighted-average shares outstanding	891,180	879,546	890,161	877,704
Effect of dilutive securities	11,813	19,783	12,082	22,079
Denominator for diluted earnings per share	<u>902,993</u>	<u>899,329</u>	<u>902,243</u>	<u>899,783</u>
Basic earnings per share	<u>\$ 1.35</u>	<u>\$ 1.19</u>	<u>\$ 3.16</u>	<u>\$ 2.99</u>
Diluted earnings per share	<u>\$ 1.33</u>	<u>\$ 1.16</u>	<u>\$ 3.11</u>	<u>\$ 2.92</u>

Potentially dilutive securities representing approximately 19.2 million and 12.3 million shares of common stock for the three months ended March 28, 2009 and March 29, 2008, respectively, and 18.0 million and 8.6 million shares of common stock for the six months ended March 28, 2009 and March 29, 2008, respectively, were excluded from the computation of diluted earnings per share for these periods because their effect would have been antidilutive.

Fair Value Measurements

During the first quarter of 2009, the Company adopted Financial Accounting Standards Board (“FASB”) Statement of Financial Accounting Standards (“SFAS”) No. 157, *Fair Value Measurements*, which defines fair value, establishes guidelines for measuring fair value and expands disclosures regarding fair value measurements. SFAS No. 157 does not require any new fair value measurements, but rather eliminates inconsistencies in guidance found in various other accounting pronouncements. The adoption of SFAS No. 157 did not have a material effect on the Company’s financial condition or operating results.

SFAS No. 157 establishes a hierarchy for information and valuations used in measuring fair value, which is broken down into three levels. Level 1 valuations are based on quoted prices in active markets for identical assets or liabilities. Level 2 valuations are based on inputs that are observable, either directly or indirectly, other than quoted prices included within Level 1. Level 3 valuations are based on information that is unobservable and significant to the overall fair value measurement.

The Company also adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—including an amendment of FASB Statement No. 115*, during the first quarter of 2009. SFAS No. 159 allows companies to choose to measure eligible financial instruments and certain other items at fair value that are not required to be measured at fair value. SFAS No. 159 requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings at each reporting date. The Company adopted SFAS No. 159 but has not elected the fair value option for any eligible financial instruments.

Refer to Note 3, “Fair Value Measurements” of this Form 10-Q for additional information on the adoption of SFAS Nos. 157 and 159.

Derivative Financial Instruments

During the second quarter of 2009, the Company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*, which requires additional disclosures about the Company’s objectives and strategies for using derivative instruments, how the derivative instruments and related hedged items are accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and related interpretations, and how the derivative instruments and related hedged items affect the financial statements. The adoption of SFAS No. 161 had no financial impact on the Company’s Condensed Consolidated Financial Statements. Refer to Note 2, “Financial Instruments” of this Form 10-Q for additional information on the adoption of SFAS No. 161.

Note 2 – Financial Instruments

Cash, Cash Equivalents and Marketable Securities

The following table summarizes the fair value of the Company's cash and available-for-sale securities held in its marketable securities investment portfolio, recorded as cash, cash equivalents, short-term or long-term marketable securities as of March 28, 2009 and September 27, 2008 (in millions):

	<u>March 28, 2009</u>	<u>September 27, 2008</u>
Cash	\$ 622	\$ 368
Money market funds	1,808	1,536
U.S. Treasury securities	340	118
U.S. agency securities	777	2,798
Certificates of deposit and time deposits	610	2,560
Commercial paper	309	4,429
Corporate securities	—	66
Total cash equivalents	<u>3,844</u>	<u>11,507</u>
U.S. Treasury securities	1,116	343
U.S. agency securities	15,632	5,823
Non-U.S. government securities	54	83
Certificates of deposit and time deposits	196	486
Commercial paper	1,295	1,254
Corporate securities	2,249	2,247
Municipal securities	5	—
Total short-term marketable securities	<u>20,547</u>	<u>10,236</u>
U.S. Treasury securities	195	100
U.S. agency securities	1,375	751
Certificates of deposit and time deposits	—	32
Corporate securities	2,232	1,496
Municipal securities	63	—
Total long-term marketable securities	<u>3,865</u>	<u>2,379</u>
Total cash, cash equivalents and marketable securities	<u>\$ 28,878</u>	<u>\$ 24,490</u>

As of December 27, 2008, the Company changed its accounting presentation for certain fixed-income investments, which resulted in the reclassification of certain investments from short-term marketable securities to long-term marketable securities. As a result, prior period balances have been reclassified to conform to the current period's presentation. The Company classifies its marketable securities as either short-term or long-term based on each instrument's underlying contractual maturity date, while its prior classifications were based on the nature of the securities and their availability for use in current operations. As a result of this change, marketable securities with maturities of less than 12 months are classified as short-term and marketable securities with maturities greater than 12 months are classified as long-term. The Company's long-term marketable securities' maturities range from one year to five years. The Company believes this new presentation is preferable as it more closely reflects the Company's assessment of the timing of when such securities will be converted to cash. Accordingly, certain fixed-income investments totaling \$2.4 billion have been reclassified from short-term marketable securities to long-term marketable securities in the September 27, 2008 Condensed Consolidated Balance Sheet to conform to the current period's financial statement presentation. There have been no changes in the Company's investment policies or practices associated with this change in accounting presentation.

The Company had net unrealized losses on its investment portfolio of \$69 million and \$117 million as of March 28, 2009 and September 27, 2008, respectively. In both periods, the net unrealized losses related primarily to long-term marketable securities. The Company may sell certain of its marketable securities prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

The following table shows the gross unrealized losses and fair value for investments in an unrealized loss position as of March 28, 2009 and September 27, 2008, aggregated by investment category and the length of time that individual securities have been in a continuous loss position (in millions):

Security Description	March 28, 2009					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
U.S. agency securities	\$ 2,375	\$ (2)	\$ —	\$ —	\$2,375	\$ (2)
Corporate securities	1,422	(16)	1,109	(106)	2,531	(122)
Total	\$ 3,797	\$ (18)	\$ 1,109	\$ (106)	\$4,906	\$ (124)

Security Description	September 27, 2008					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
U.S. agency securities	\$ 6,822	\$ (13)	\$ —	\$ —	\$ 6,822	\$ (13)
Corporate securities	2,147	(31)	1,148	(77)	3,295	(108)
Total	\$ 8,969	\$ (44)	\$ 1,148	\$ (77)	\$10,117	\$ (121)

The Company considers the declines in market value of its marketable securities investment portfolio to be temporary in nature. The unrealized losses on the Company's marketable securities were caused primarily by changes in market interest rates, specifically, widening credit spreads. The Company typically invests in highly-rated securities, and its policy generally limits the amount of credit exposure to any one issuer. The Company's investment policy requires investments to be rated single-A or better, with the objective of minimizing the potential risk of principal loss. Fair values were determined for each individual security in the investment portfolio. When evaluating the investments for other-than-temporary impairment, the Company reviews factors such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer, and the Company's ability and intent to hold the investment for a period of time, which may be sufficient for anticipated recovery in market value. During the three- and six-month periods ended March 28, 2009 and March 29, 2008, the Company did not recognize any material impairment charges on outstanding securities. As of March 28, 2009, the Company does not consider any of its investments to be other-than-temporarily impaired.

Derivative Financial Instruments

The Company uses derivatives to partially offset its business exposure to foreign exchange risk. The Company may enter into foreign currency forward and option contracts to offset some of the foreign exchange risk of expected future cash flows on certain forecasted revenue and cost of sales, of net investments in certain foreign subsidiaries, and on certain existing assets and liabilities. To help protect gross margins from fluctuations in foreign currency exchange rates, certain of the Company's subsidiaries whose functional currency is the U.S. dollar, hedge a portion of forecasted foreign currency revenue. The Company's subsidiaries whose functional currency is not the U.S. dollar and who sell in local currencies, may hedge a portion of forecasted inventory purchases not denominated in the subsidiaries' functional currencies. The Company typically hedges portions of its forecasted foreign currency exposure associated with revenue and inventory purchases for three to six months. To help protect the net investment in a foreign operation from adverse changes in foreign currency exchange rates, the Company may enter into foreign currency forward and option contracts to offset the changes in the carrying amounts of these investments due to fluctuations in foreign currency exchange rates. The Company may also enter into foreign currency forward and option contracts to partially offset the foreign exchange gains and losses generated by the re-measurement of certain assets and liabilities denominated in non-functional currencies. However, the Company may choose not to hedge

certain foreign exchange exposures for a variety of reasons, including but not limited to immateriality, accounting considerations, and the prohibitive economic cost of hedging particular exposures. There can be no assurance the hedges will offset more than a portion of the financial impact resulting from movements in foreign exchange rates. As of the end of the second quarter of 2009, the general nature of the Company's risk management activities and the general nature and mix of the Company's derivative financial instruments have not changed materially from the end of 2008.

The Company's accounting policies for these instruments are based on whether the instruments are designated as hedge or non-hedge instruments in accordance with SFAS No. 133. The Company records all derivatives on the balance sheet at fair value. The effective portions of cash flow hedges are recorded in other comprehensive income until the hedged item is recognized in earnings. The effective portions of net investment hedges are recorded in other comprehensive income as a part of the cumulative translation adjustment. Derivatives that are not designated as hedging instruments and the ineffective portions of cash flow hedges and net investment hedges are adjusted to fair value through earnings in other income and expense.

The Company had a net deferred gain associated with cash flow hedges of approximately \$72 million and \$19 million, net of taxes, recorded in other comprehensive income as of March 28, 2009 and September 27, 2008, respectively. Other comprehensive income associated with cash flow hedges of foreign currency revenue is recognized as a component of net sales in the same period as the related revenue is recognized, and other comprehensive income related to cash flow hedges of inventory purchases is recognized as a component of cost of sales in the same period as the related costs are recognized. The portion of the Company's net deferred gain related to products under subscription accounting is expected to be recorded in earnings ratably over the related products' estimated economic lives beginning when the hedged transactions occur, while the portion of the net deferred gain related to other products is expected to be recorded in earnings at the time the hedged transactions occur. As of March 28, 2009, the hedged transactions are expected to occur within six months.

Derivative instruments designated as cash flow hedges must be de-designated as hedges when it is probable the forecasted hedged transaction will not occur in the initially identified time period or within a subsequent two month time period. Deferred gains and losses in other comprehensive income associated with such derivative instruments are reclassified immediately into earnings through other income and expense. Any subsequent changes in fair value of such derivative instruments also are reflected in current earnings unless they are re-designated as hedges of other transactions. The Company did not recognize any material net gains related to the loss of hedge designation on discontinued cash flow hedges during the three- and six-month periods ended March 28, 2009 and March 29, 2008, respectively.

The Company had an unrealized net gain on net investment hedges of \$6 million, net of tax, and an unrealized net loss on net investment hedges of \$1 million, net of tax, included in the cumulative translation adjustment account of accumulated other comprehensive income ("AOCI") as of March 28, 2009 and September 27, 2008, respectively. The ineffective portions and amounts excluded from the effectiveness test of net investment hedges are recorded in current earnings in other income and expense.

The Company recognized in earnings a total net gain on foreign currency forward and option contracts not designated as hedging instruments in accordance with SFAS No. 133 of \$15 million and \$173 million during the three- and six-month periods ended March 28, 2009, respectively.

The following table shows the notional principal and credit risk amounts of the Company's derivative instruments as of March 28, 2009 (in millions):

	March 28, 2009	
	Notional Principal	Credit Risk Amounts
Instruments qualifying as accounting hedges:		
Foreign exchange contracts	\$ 2,981	\$ 75
Instruments other than accounting hedges:		
Foreign exchange contracts	\$ 2,351	\$ 29

The notional principal amounts for derivative instruments provide one measure of the transaction volume outstanding as of March 28, 2009, and do not represent the amount of the Company's exposure to credit or market loss. The credit risk amounts shown in the table above represent the Company's gross exposure to potential accounting loss on these transactions if all counterparties failed to perform according to the terms of the contract, based on then-current currency exchange rates. The Company's exposure to credit loss and market risk will vary over time as a function of currency exchange rates. Although the table above reflects the notional principal and credit risk amounts of the Company's foreign exchange instruments, it does not reflect the gains or losses associated with the exposures and transactions that the foreign exchange instruments are intended to hedge. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

The estimates of fair value are based on applicable and commonly used pricing models and prevailing financial market information as of March 28, 2009. Refer to Note 3, "Fair Value Measurements" of this Form 10-Q, for additional information on the fair value measurements for all financial assets and liabilities, including derivative assets and derivative liabilities, that are measured at fair value in the Condensed Consolidated Financial Statements on a recurring basis. The following table shows the Company's derivative instruments measured at gross fair value as reflected in the Condensed Consolidated Balance Sheet as of March 28, 2009 (in millions):

	March 28, 2009	
	Fair Value of Derivatives Designated as Hedge Instruments	Fair Value of Derivatives Not Designated as Hedge Instruments
Derivative assets (a):		
Foreign exchange contracts	\$ 70	\$ 30
Derivative Liabilities (b):		
Foreign exchange contracts	\$ 34	\$ 16

- (a) All derivative assets are recorded as other current assets in the Condensed Consolidated Balance Sheet.
(b) All derivative liabilities are recorded as accrued expenses in the Condensed Consolidated Balance Sheet.

The following tables show the effect of the Company's derivative instruments designated as cash flow and net investment hedges in the Condensed Consolidated Statement of Operations for the three- and six-month periods ended March 28, 2009 (in millions):

Three Months Ended March 28, 2009					
	Gain or (Loss) Recognized in AOCI - Effective Portion (a)	Location of Gain or (Loss) Reclassified from AOCI into Income - Effective Portion	Gain or (Loss) Reclassified from AOCI into Income - Effective Portion (a)	Location of Gain or (Loss) Recognized - Ineffective - Portion and Amount Excluded from Effectiveness Testing	Gain or (Loss) Recognized - Ineffective Portion and Amount Excluded from Effectiveness Testing
Cash flow hedges:

(a) Refer to Note 6, "Shareholders' Equity" of this Form 10-Q, which summarizes the activity in other comprehensive income related to derivatives.

Note 3 – Fair Value Measurements

In the first quarter of 2009, the Company adopted SFAS No. 157 for all financial assets and liabilities and non-financial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a recurring basis. SFAS No. 157 defines fair value as the price that would be received from selling an asset or paid to transfer a

liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which the Company would transact and the market-based risk measurements or assumptions that market participants would use in pricing the asset or liability, such as inherent risk, transfer restrictions, and credit risk.

SFAS No. 157 also establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three levels. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is available and significant to the fair value measurement. SFAS No. 157 establishes and prioritizes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Inputs that are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability.

Assets/Liabilities Measured at Fair Value on a Recurring Basis

The following table presents the Company's assets and liabilities measured at fair value on a recurring basis as of March 28, 2009 (in millions):

	March 28, 2009			Total
	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Money market funds	\$ 1,808	\$ —	\$ —	\$ 1,808
U.S. Treasury securities	—	1,651	—	1,651
U.S. agency securities	—	17,784	—	17,784
Non-U.S. government securities	—	54	—	54

Note 4 – Condensed Consolidated Financial Statement Details

The following tables show the Company's Condensed Consolidated Financial Statement details as of March 28, 2009 and September 27, 2008 (in millions):

Other Current Assets

	March 28, 2009	September 27, 2008
Deferred costs under subscription accounting - current	\$ 2,701	\$ 1,931
Vendor non-trade receivables	1,104	2,282
Inventory component prepayments	306	475
Other current assets	946	1,134
Total other current assets	<u>\$ 5,057</u>	<u>\$ 5,822</u>

Property, Plant, and Equipment

	March 28, 2009	September 27, 2008
Land and buildings	\$ 899	\$ 810
Machinery, equipment, and internal-use software	1,679	1,491
Office furniture and equipment	131	122
Leasehold improvements	1,388	1,324
	4,097	3,747
Accumulated depreciation and amortization	(1,551)	(1,292)
Net property, plant, and equipment	<u>\$ 2,546</u>	<u>\$ 2,455</u>

Other Assets

	<u>March 28, 2009</u>	<u>September 27, 2008</u>
Deferred costs under subscription accounting - non-current	\$ 1,191	\$ 1,089
Long-term inventory component prepayments	502	208
Deferred tax assets - non-current	180	138
Capitalized software development costs, net	98	67
Other assets	527	433
Total other assets	<u>\$ 2,498</u>	<u>\$ 1,935</u>

Accrued Expenses

	<u>March 28, 2009</u>	<u>September 27, 2008</u>
Deferred margin on component sales	\$ 383	\$ 681
Accrued compensation and employee benefits	309	320
Accrued warranty and related costs	247	267
Accrued marketing and distribution	236	329
Other accrued tax liabilities	100	100
Other current liabilities	1,486	2,022
Total accrued expenses	<u>\$ 2,761</u>	<u>\$ 3,719</u>

Other Non-Current Liabilities

	<u>March 28, 2009</u>	<u>September 27, 2008</u>
Deferred tax liabilities	\$ 863	\$ 675
Other non-current liabilities	852	746
Total other non-current liabilities	<u>\$ 1,715</u>	<u>\$ 1,421</u>

Note 5 – Income Taxes

As of March 28, 2009, the Company recorded gross unrecognized tax benefits of \$586 million, of which \$274 million, if recognized, would affect the Company's effective tax rate. As of September 27, 2008, the total amount of gross unrecognized tax benefits was \$506 million, of which \$253 million, if recognized, would affect the Company's effective tax rate. The Company's total gross unrecognized tax benefits are classified as other non-current liabilities in the Condensed Consolidated Balance Sheets. The Company had \$265 million and \$219 million of gross interest and penalties accrued as of March 28, 2009 and September 27, 2008, respectively, which are classified as other non-current liabilities in the Condensed Consolidated Balance Sheets.

Management believes that an adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company's tax audits are resolved in a manner not consistent with management's expectations, the Company could be required to adjust its provision for income tax in the period such resolution occurs. Although the timing of the resolution and/or closure of audits is highly uncertain, the Company does not believe it is reasonably possible that its unrecognized tax benefits would materially change in the next 12 months.

Note 6 – Shareholders' Equity

Preferred Stock

The Company has five million shares of authorized preferred stock, none of which is issued or outstanding. Under the terms of the Company's Restated Articles of Incorporation, the Board of Directors is authorized to determine or alter the rights, preferences, privileges and restrictions of the Company's authorized but unissued shares of preferred stock.

Comprehensive Income

Comprehensive income consists of two components, net income and other comprehensive income. Other comprehensive income refers to revenue, expenses, gains, and losses that under U.S. generally accepted accounting principles are recorded as an element of shareholders' equity but are excluded from net income. The Company's other comprehensive income consists of foreign currency translation adjustments from those subsidiaries whose functional currency is not the U.S. dollar, the effective portion of foreign currency net investment hedges, unrealized gains and losses on marketable securities categorized as available-for-sale, and net deferred gains and losses on certain derivative instruments accounted for as cash flow hedges.

The following table summarizes the components of total comprehensive income, net of taxes, during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>March 28, 2009</u>	<u>March 29, 2008</u>	<u>March 28, 2009</u>	<u>March 29, 2008</u>
Net income	\$ 1,205	\$ 1,045	\$ 2,810	\$ 2,626
Other comprehensive income:				
Net change in unrecognized gains on derivative instruments	(33)	(19)	53	(15)
Change in foreign currency translation	(3)	28	(77)	35
Net change in unrealized losses on marketable securities	(18)	(14)	31	(14)
Total comprehensive income	<u>\$ 1,151</u>	<u>\$ 1,040</u>	<u>\$ 2,817</u>	<u>\$ 2,632</u>

The following table summarizes activity in other comprehensive income related to derivatives, net of taxes, held by the Company during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>March 28, 2009</u>	<u>March 29, 2008</u>	<u>March 28, 2009</u>	<u>March 29, 2008</u>
Change in fair value of derivatives	\$ 32	\$ (15)	\$ 139	\$ (11)
Adjustment for net gains realized and included in net income	(65)	(4)	(86)	(4)
Change in unrealized gains on derivative instruments	<u>\$ (33)</u>	<u>\$ (19)</u>	<u>\$ 53</u>	<u>\$ (15)</u>

The following table summarizes the components of AOCI, net of taxes, as of March 28, 2009 and September 27, 2008 (in millions):

	<u>March 28, 2009</u>	<u>September 27, 2008</u>
Net unrealized losses on available-for-sale securities	\$ (39)	\$ (70)
Cumulative foreign currency translation	(18)	59
Net unrecognized gains on derivative instruments	72	19
Accumulated other comprehensive income	<u>\$ 15</u>	<u>\$ 8</u>

Employee Benefit Plans

Rule 10b5-1 Trading Plans

As of April 17, 2009, executive officers Timothy D. Cook, Peter Oppenheimer, Philip W. Schiller, and Bertrand Serlet have entered into trading plans pursuant to Rule 10b5-1(c)(1) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). A trading plan is a written document that pre-establishes the amounts, prices and dates (or formula for determining the amounts, prices and dates) of future purchases or sales of the Company's stock including the exercise and sale of employee stock options and shares acquired pursuant to the Company's employee stock purchase plan and upon vesting of RSUs.

Stock Option Activity

Historically, the Company used equity awards in the form of stock options as one of the means for recruiting and retaining highly skilled talent. Beginning in 2009, the Company changed its equity compensation program for eligible employees to RSUs as the primary type of long-term equity-based award. A summary of the Company's stock option activity and related information for the six months ended March 28, 2009 is as follows (in thousands, except per share amounts and contractual term in years):

	Shares Available for Grant	Number of Shares	Outstanding Options		
			Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at September 27, 2008	50,572	44,146	\$ 74.39		
Restricted stock units granted	(12,020)	—	\$ —		
Options granted	(192)	192	\$ 96.70		
Options cancelled	714	(714)	\$ 115.72		
Restricted stock units cancelled	684	—	\$ —		
Options exercised	—	(2,298)	\$ 30.29		
Plan shares expired	(3)	—	\$ —		
Balance at March 28, 2009	<u>39,755</u>	<u>41,326</u>	\$ 76.24	3.87	\$ 1,859,606
Exercisable at March 28, 2009		26,994	\$ 50.96	3.22	\$ 1,672,320
Expected to vest after March 28, 2009		13,913	\$ 93.78	5.09	\$ 181,817

Aggregate intrinsic value represents the value of the Company's closing stock price on the last trading day of the fiscal period in excess of the weighted-average exercise price multiplied by the number of options outstanding or exercisable. The aggregate intrinsic value excludes the effect of stock options that have a zero or negative intrinsic value. The total intrinsic value of options at the time of exercise was \$94 million and \$149 million for the three- and six-month periods ended March 28, 2009, respectively, and \$183 million and \$1.1 billion for the three- and six-month periods ended March 29, 2008, respectively.

RSUs granted are deducted from the shares available for grant under the Company's stock option plans utilizing a factor of two times the number of RSUs granted. Similarly, RSUs cancelled are added back to the shares available for grant under the Company's stock option plans utilizing a factor of two times the number of RSUs cancelled.

Restricted Stock Units

The Company's Board of Directors has granted RSUs to members of the Company's executive management team, excluding its Chief Executive Officer ("CEO"), as well as various employees within the Company. Beginning in 2009, the Company changed its equity compensation program for eligible employees to RSUs as the primary type of long-term equity-based award. RSUs generally vest over four years either at the end of the four-year service period, in two equal installments on the second and fourth anniversaries of the date of grant, in equal installments on each of the first through fourth anniversaries of the grant date, or in equal installments on each semi-annual anniversary of the grant date. Upon vesting, the RSUs are generally net share settled to cover the required withholding tax and the remaining amount is converted into an equivalent number of shares of common stock.

Outstanding RSU balances were not included in the outstanding options balances in the preceding table. A summary of the Company's RSU activity and related information for the six months ended March 28, 2009 is as follows (in thousands, except per share amounts):

	Number of Shares	Weighted- Average Grant Date Fair Value	Aggregate Intrinsic Value
Balance at September 27, 2008	7,040	\$ 134.91	
Restricted stock units granted	6,010	\$ 96.66	
Restricted stock units vested	(902)	\$ 149.95	
Restricted stock units cancelled	(342)	\$ 122.22	
Balance at March 28, 2009	<u>11,806</u>	\$ 114.66	\$ 1,261,472

The fair value as of the vesting date of RSUs that vested was \$2 million and \$88 million for the three- and six-month periods ended March 28, 2009, respectively, and \$257 million and \$300 million for the three- and six-month periods ended March 29, 2008, respectively.

Note 7 – Stock-Based Compensation

SFAS No. 123 (revised 2004), *Share-Based Payment*, requires the use of a valuation model to calculate the fair value of stock-based awards. The Company uses the Black-Scholes-Merton (“BSM”) option-pricing model to calculate the fair value of stock-based awards. The BSM option-pricing model incorporates various assumptions including expected volatility, expected life, and interest rates. The expected volatility is based on the historical volatility of the Company's common stock over the most recent period commensurate with the estimated expected life of the Company's stock options and other relevant factors including implied volatility in market traded options on the Company's common stock. The Company bases its expected life assumption on its historical experience and on the terms and conditions of the stock awards it grants to employees. Stock-based compensation cost is estimated at the grant date based on the award's fair-value as calculated by the BSM option-pricing model and is recognized as expense ratably on a straight-line basis over the requisite service period.

The compensation expense incurred by the Company for RSUs is based on the closing market price of the Company's common stock on the date of grant and is amortized ratably on a straight-line basis over the requisite service period.

The weighted average assumptions used for the three- and six-month periods ended March 28, 2009 and March 29, 2008 and the resulting estimates of weighted-average fair value per share of options granted and of employee stock purchase plan rights (“stock purchase rights”) during those periods are as follows:

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Expected life - stock options	3.4 years	3.4 years	3.4 years	3.4 years
Expected life - stock purchase rights	6 months	6 months	6 months	6 months
Interest rate - stock options	1.26%	2.60%	1.73%	3.55%
Interest rate - stock purchase rights	0.19%	3.40%	0.92%	4.17%
Expected volatility - stock options	51.00%	46.70%	53.26%	45.87%
Expected volatility - stock purchase rights	57.64%	38.08%	53.71%	34.57%
Expected dividend yields	—	—	—	—
Weighted-average fair value of stock options granted during the period	\$ 38.04	\$ 52.38	\$ 38.23	\$ 63.28
Weighted-average fair value of stock purchase rights during the period	\$ 24.92	\$ 49.01	\$ 32.18	\$ 37.95

The following table provides a summary of the stock-based compensation expense included in the Condensed Consolidated Statements of Operations for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Cost of sales	\$ 29	\$ 20	\$ 57	\$ 38
Research and development	67	47	127	86
Selling, general, and administrative	85	65	167	118
Total stock-based compensation expense	<u>\$ 181</u>	<u>\$ 132</u>	<u>\$ 351</u>	<u>\$ 242</u>

Stock-based compensation expense capitalized as part of software development costs was not significant as of March 28, 2009 and September 27, 2008. The income tax benefit related to stock-based compensation expense was \$66 million and \$132 million for the three- and six-month periods ended March 28, 2009, respectively, and was \$50 million and \$84 million for the three- and six-month periods ended March 29, 2008, respectively. As of March 28, 2009, the total unrecognized compensation cost related to outstanding stock options and RSUs expected to vest was \$1.6 billion, which the Company expects to recognize over a weighted-average period of 2.82 years.

Note 8 – Commitments and Contingencies

Lease Commitments

The Company leases various equipment and facilities, including retail space, under noncancelable operating lease arrangements. The Company does not currently utilize any other off-balance sheet financing arrangements. The major facility leases are for terms of 3 to 20 years and generally provide renewal options for terms of 1 to 5 years. Leases for retail space are generally for terms of 5 to 20 years, the majority of which are for 10 years, and often contain multi-year renewal options. As of September 27, 2008, the Company's total future minimum lease payments under noncancelable operating leases were \$1.8 billion, of which \$1.4 billion related to leases for retail space. As of March 28, 2009, total future minimum lease payments under noncancelable operating leases related to leases for retail space decreased \$21 million to \$1.3 billion.

Accrued Warranty and Indemnifications

The following table reconciles changes in the Company's accrued warranties and related costs for the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Beginning accrued warranty and related costs	\$ 265	\$ 237	\$ 267	\$ 230
Cost of warranty claims	(73)	(80)	(151)	(160)
Accruals for product warranties	55	61	131	148
Ending accrued warranty and related costs	<u>\$ 247</u>	<u>\$ 218</u>	<u>\$ 247</u>	<u>\$ 218</u>

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. However, the Company has not been required to make any significant payments resulting from such an infringement claim asserted against it or an indemnified third-party and, in the opinion of management, does not have a potential liability related to unresolved infringement claims subject to indemnification that would have a material adverse effect on its financial condition or operating results. Therefore, the Company did not record a liability for infringement costs as of either March 28, 2009 or September 27, 2008.

Concentrations in the Available Sources of Supply of Materials and Product

Although most components essential to the Company's business are generally available from multiple sources, certain key components including, but not limited to microprocessors, enclosures, certain liquid crystal displays ("LCDs"), certain optical drives, and application-specific integrated circuits ("ASICs") are currently obtained by the Company from single or limited sources, which subjects the Company to significant supply and pricing risks. Many of these and other key components that are available from multiple sources including, but not limited to NAND flash memory, dynamic random access memory ("DRAM"), and certain LCDs, are subject at times to industry-wide shortages and significant commodity pricing fluctuations. In addition, the Company has entered into certain agreements for the supply of key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable pricing, but there is no guarantee that the Company will be able to extend or renew these agreements on similar favorable terms, or at all, upon expiration or otherwise obtain favorable pricing in the future. Therefore, the Company remains subject to significant risks of supply shortages and/or price increases that can have a material adverse effect on its financial condition and operating results.

The Company and other participants in the personal computer, consumer electronics and mobile communication industries also compete for various components with other industries that have experienced increased demand for their products. In addition, the Company uses some custom components that are not common to the rest of the personal computer, consumer electronics and mobile communication industries, and new products introduced by the Company often utilize custom components available from only one source until the Company has evaluated whether there is a need for, and subsequently qualifies, additional suppliers. When a component or product uses new technologies, initial capacity constraints may exist until the suppliers' yields have matured. If the Company's supply of a key single-sourced component for a new or existing product were delayed or constrained, if such components were available only at significantly higher prices, or if a key manufacturing vendor delayed shipments of completed products to the Company, the Company's financial condition and operating results could be materially adversely affected. The Company's business and financial performance could also be adversely affected depending on the time required to obtain sufficient quantities from the original source, or to identify and obtain sufficient quantities from an alternative source. Continued availability of these components at acceptable prices, or at all, may be affected if those suppliers decided to concentrate on the production of common components instead of components customized to meet the Company's requirements.

Significant portions of the Company's Mac computers, iPods, iPhones, logic boards, and other assembled products are now manufactured by outsourcing partners, primarily in various parts of Asia. A significant concentration of this outsourced manufacturing is currently performed by only a few of the Company's outsourcing partners, often in single locations. Certain of these outsourcing partners are the sole-sourced supplier of components and manufacturing outsourcing for many of the Company's key products including but not limited to final assembly of substantially all of the Company's portable Mac computers, iPods, iPhones and most of the Company's iMacs. Although the Company works closely with its outsourcing partners on manufacturing schedules, the Company's operating results could be adversely affected if its outsourcing partners were unable to meet their production commitments. The Company's purchase commitments typically cover its requirements for periods ranging from 30 to 150 days.

Long-Term Supply Agreements

The Company has entered into prepaid long-term supply agreements to secure the supply of certain inventory components. During the first quarter of 2009, a long-term supply agreement with Intel Corporation was terminated and the remaining prepaid balance of \$167 million was repaid to the Company. During the second quarter of 2009, the Company made a prepayment of \$500 million to LG Display for the purchase of LCD panels. As of March 28, 2009, the Company had a total of \$808 million of inventory component prepayments outstanding.

Contingencies

The Company is subject to certain other legal proceedings and claims that have arisen in the ordinary course of business and have not been fully adjudicated, which are discussed in Part II, Item 1 of this Form 10-Q under the heading "Legal Proceedings". In the opinion of management, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect

on its financial condition or operating results. However, the results of legal proceedings cannot be predicted with certainty. If the Company failed to prevail in any of these legal matters or if several of these legal matters were resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Production and marketing of products in certain states and countries may subject the Company to environmental, product safety and other regulations including, in some instances, the requirement to provide customers the ability to return product at the end of its useful life, and place responsibility for environmentally safe disposal or recycling with the Company. Such laws and regulations have been passed in several jurisdictions in which the Company operates, including various countries within Europe and Asia, certain Canadian provinces and certain states within the U.S. Although the Company does not anticipate any material adverse effects in the future based on the nature of its operations and the thrust of such laws, there is no assurance that such existing laws or future laws will not have a material adverse effect on the Company's financial condition or operating results.

Note 9 – Segment Information and Geographic Data

In accordance with SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, the Company reports segment information based on the “management” approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of the Company's reportable segments.

The Company manages its business primarily on a geographic basis. Accordingly, the Company determined its operating segments, which are generally based on the nature and location of its customers, to be the Americas, Europe, Japan, Asia-Pacific, Retail, and FileMaker operations. The Company's reportable operating segments consist of Americas, Europe, Japan, and Retail operations. Other operating segments include Asia Pacific, which encompasses Australia and Asia except for Japan, and the Company's FileMaker, Inc. subsidiary. The Americas, Europe, Japan, and Asia Pacific segments exclude activities related to the Retail segment. The Americas segment includes both North and South America. The Europe segment includes European countries, as well as the Middle East and Africa. The Retail segment operates Apple-owned retail stores in the U.S. and in international markets. Each reportable operating segment provides similar hardware and software products and similar services to the same types of customers. The accounting policies of the various segments are the same as those described in Note 1, “Summary of Significant Accounting Policies” of this Form 10-Q and in the Notes to Consolidated Financial Statements in the Company's 2008 Form 10-K.

The Company evaluates the performance of its operating segments based on net sales and operating income. Net sales for geographic segments are generally based on the location of customers, while Retail segment net sales are based on sales from the Company's retail stores. Operating income for each segment includes net sales to third parties, related cost of sales, and operating expenses directly attributable to the segment. Advertising expenses are generally included in the geographic segment in which the expenditures are incurred. Operating income for each segment excludes other income and expense and certain expenses managed outside the operating segments. Costs excluded from segment operating income include various corporate expenses, such as manufacturing costs and variances not included in standard costs, research and development, corporate marketing expenses, stock-based compensation expense, income taxes, various nonrecurring charges, and other separately managed general and administrative costs. The Company does not include intercompany transfers between segments for management reporting purposes. Segment assets exclude corporate assets, such as cash, short-term and long-term investments, manufacturing and corporate facilities, miscellaneous corporate infrastructure, goodwill and other acquired intangible assets. Except for the Retail segment, capital asset purchases for long-lived assets are not reported to management by segment. Cash payments for capital asset purchases by the Retail segment were \$30 million and \$101 million during the three- and six-month periods ended March 28, 2009, respectively, and \$63 million and \$138 million during the three- and six-month periods ended March 29, 2008, respectively.

The Company has certain retail stores that have been designed and built to serve as high-profile venues to promote brand awareness and serve as vehicles for corporate sales and marketing activities. Because of their unique design elements, locations and size, these stores require substantially more investment than the Company's more typical retail stores. The Company allocates certain operating expenses associated with its high-profile stores to corporate marketing expense to reflect the estimated Company-wide benefit. The allocation of these operating costs to corporate expense is based on the amount incurred for a high-profile store in excess of that incurred by a more

typical Company retail location. The Company had opened a total of 11 high-profile stores as of March 28, 2009. Expenses allocated to corporate marketing resulting from the operations of high-profile stores were \$16 million and \$32 million during the three- and six-month periods ended March 28, 2009, respectively, and \$13 million and \$24 million during the three- and six-month periods ended March 29, 2008, respectively.

Summary information by operating segment for the three- and six-month periods months ended March 28, 2009 and March 29, 2008 is as follows (in millions):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>March 28, 2009</u>	<u>March 29, 2008</u>	<u>March 28, 2009</u>	<u>March 29, 2008</u>
Americas:				
Net sales	\$ 3,517	\$ 3,268	\$ 8,018	\$ 7,566
Operating income	\$ 1,027	\$ 918	\$ 2,297	\$ 2,091
Europe:				
Net sales	\$ 2,097	\$ 1,780	\$ 4,868	\$ 4,251
Operating income	\$ 611	\$ 485	\$ 1,420	\$ 1,245
Japan:				
Net sales	\$ 500	\$ 424	\$ 981	\$ 824
Operating income	\$ 190	\$ 125	\$ 317	\$ 233
Retail:				
Net sales	\$ 1,471	\$ 1,451	\$ 3,211	\$ 3,152
Operating income	\$ 308	\$ 334	\$ 661	\$ 739
Other Segments (a):				
Net sales	\$ 578	\$ 589	\$ 1,252	\$ 1,327
Operating income	\$ 159	\$ 143	\$ 343	\$ 342

(a) Other Segments consist of Asia-Pacific and FileMaker.

A reconciliation of the Company's segment operating income to the Condensed Consolidated Financial Statements for the three- and six-month periods months ended March 28, 2009 and March 29, 2008 is as follows (in millions):

	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>March 28, 2009</u>	<u>March 29, 2008</u>	<u>March 28, 2009</u>	<u>March 29, 2008</u>
Segment operating income	\$ 2,295	\$ 2,005	\$ 5,038	\$ 4,650
Stock-based compensation expense	(181)	(132)	(351)	(242)
Other corporate expenses, net (a)	(447)	(558)	(894)	(967)
Total operating income	<u>\$ 1,667</u>	<u>\$ 1,315</u>	<u>\$ 3,793</u>	<u>\$ 3,441</u>

(a) Other corporate expenses include research and development, corporate marketing expenses, manufacturing costs and variances not included in standard costs, and other separately managed general and administrative expenses, including certain corporate expenses associated with support of the Retail segment.

Note 10 – Related Party Transactions and Certain Other Transactions

The Company entered into a Reimbursement Agreement with its CEO, Steve Jobs, for the reimbursement of expenses incurred by Mr. Jobs in the operation of his private plane when used for Apple business. The Company did not recognize any expenses pursuant to the Reimbursement Agreement during the three months ended March 28, 2009 and recognized a total of \$4,000 in expenses pursuant to the Reimbursement Agreement during the six months ended March 28, 2009. The Company recognized a total of \$30,000 and \$580,000 in expenses pursuant to the Reimbursement Agreement during the three- and six-month periods ended March 29, 2008, respectively. All expenses recognized pursuant to the Reimbursement Agreement have been included in selling, general, and administrative expenses in the Condensed Consolidated Statements of Operations.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This section and other parts of this Form 10-Q contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can be identified by words such as “anticipates,” “expects,” “believes,” “plans,” “predicts,” and similar terms. Forward-looking statements are not guarantees of future performance and the Company’s actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part II, Item 1A, “Risk Factors,” which are incorporated herein by reference. The following discussion should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended September 27, 2008 (the “2008 Form 10-K”) filed with the U.S. Securities and Exchange Commission (“SEC”) and the Condensed Consolidated Financial Statements and notes thereto included elsewhere in this Form 10-Q. All information presented herein is based on the Company’s fiscal calendar. Unless otherwise stated, references in this report to particular years or quarters refer to the Company’s fiscal years ended in September and the associated quarters of those fiscal years. The Company assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

Available Information

The Company’s Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to reports filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended (“Exchange Act”) are filed with the SEC. Such reports and other information filed by the Company with the SEC are available on the Company’s website at <http://www.apple.com/investor> when such reports are available on the SEC website. The public may read and copy any materials filed by the Company with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Room 1580, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy, and information statements and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>. The contents of these websites are not incorporated into this filing. Further, the Company’s references to the URLs for these websites are intended to be inactive textual references only.

Executive Overview

The Company designs, manufactures, and markets personal computers, portable digital music players, and mobile communication devices and sells a variety of related software, services, peripherals, and networking solutions. The Company’s products and services include the Mac® line of desktop and portable computers, the iPod® line of portable digital music players, iPhone™, Apple TV®, Xserve®, a portfolio of consumer and professional software applications, the Mac OS® X operating system, third-party digital content and applications through the iTunes Store®, and a variety of accessory, service and support offerings. The Company sells its products worldwide through its online stores, its retail stores, its direct sales force, and third-party wholesalers, retailers, and value-added resellers. In addition, the Company sells a variety of third-party Mac, iPod and iPhone compatible products, including application software, printers, storage devices, speakers, headphones, and various other accessories and peripherals through its online and retail stores. The Company sells to consumer, small and mid-sized business (“SMB”), education, enterprise, government, and creative markets. A further description of the Company’s products may be found below under the heading “Products” and Part II, Item 1A, “Risk Factors,” as well as in Part I, Item 1, “Business,” of the Company’s 2008 Form 10-K.

The Company is focused on providing innovative products and solutions to consumer, SMB, education, enterprise, government and creative customers that greatly enhance their evolving digital lifestyles and work environments. The Company is the only participant in the personal computer industry that controls the design and development of the entire personal computer, including the hardware, operating system, and sophisticated software applications. Additionally, the Company controls the design and development of hardware and system software for its portable digital music players and mobile communication devices, and hosts a robust platform for the discovery and delivery of third-party digital content and applications for these devices through the iTunes Store. The Company is therefore uniquely positioned to offer superior and well-integrated digital lifestyle and productivity solutions, which are further enhanced by the Company’s emphasis on ease-of-use and creative industrial designs.

The Company participates in several highly competitive markets, including personal computers with its Mac line of personal computers, consumer electronics with its iPod product families, mobile communications with iPhone, and distribution of third-party digital content and applications through its online iTunes Store. While the Company is widely recognized as a leading innovator in the personal computer and consumer electronics markets as well as a

leader in the emerging market for distribution of third-party digital content and applications, these markets are highly competitive and subject to aggressive pricing. To remain competitive, the Company believes that increased investment in research and development and marketing and advertising is necessary to maintain or expand its position in the markets where it competes. The Company's research and development spending is focused on further developing its existing Mac line of personal computers, its operating system, application software, iPhone and iPods; developing new digital lifestyle consumer and professional software applications; and investing in new product areas and technologies. The Company also believes increased investment in marketing and advertising programs is critical to increasing product and brand awareness.

The Company utilizes a variety of direct and indirect distribution channels. The Company believes that sales of its innovative and differentiated products are enhanced by knowledgeable salespersons who can convey the value of the hardware, software, and peripheral integration, demonstrate the unique digital lifestyle solutions that are available on Mac computers, and demonstrate the compatibility of the Mac with the Windows platform and networks. The Company further believes providing a high-quality sales and after-sales support experience is critical to attracting new and retaining existing customers. To ensure a high-quality buying experience for its products in which service and education are emphasized, the Company continues to expand and improve its distribution capabilities by opening its own retail stores in the U.S. and internationally. The Company had 252 stores open as of March 28, 2009.

The Company has also invested in programs to enhance reseller sales, including the Apple Sales Consultant Program, which places Apple employees and contractors at selected third-party reseller locations. The Company believes providing direct contact with its targeted customers is an efficient way to demonstrate the advantages of its Mac computers and other products over those of its competitors. The Company also sells to customers directly through its online stores around the world and through its direct sales force.

The Company's iPods are sold through a significant number of distribution points to provide broad access. iPods can be purchased in certain department stores, member-only warehouse stores, large retail chains, and specialty retail stores, as well as through the channels for Mac distribution listed above.

iPhone is distributed through the Company, its cellular network carriers' distribution channels, and certain third-party resellers in over 80 countries. The Company has signed multi-year agreements with various cellular network carriers authorizing them to distribute and provide cellular network services for iPhone 3G. These agreements are generally not exclusive with a specific carrier, except in the U.S., U.K., Germany, Spain, Ireland, and certain other countries.

Products

The Company offers a range of personal computing products including desktop and portable personal computers, related devices and peripherals, and various third-party hardware and software products. In addition, the Company offers its own software products, including Mac OS X, the Company's proprietary operating system software for the Mac; server software and related solutions; professional application software; and consumer, education, and business oriented application software. The Company also designs, develops, and markets to Mac and Windows users its family of iPod digital music players and its iPhone mobile communication device, along with related accessories and services, including the online distribution of third-party digital content through the Company's iTunes Store.

In March 2009, the Company introduced updates to its iMac[®], Mac Pro, and Mac mini desktop computers and in April 2009 the Company introduced an updated Xserve.

In March 2009, the Company introduced the new iPod shuffle, which is nearly half the size of the previous model and is the first music player with the VoiceOver feature enabling it to speak song titles, artists and playlist names. iPod shuffle features a new aluminum design, holds up to 1,000 songs and is the first iPod shuffle to accommodate playlists.

A detailed discussion of the Company's other products as of the end of 2008 may be found in Part I, Item 1, "Business," of the Company's 2008 Form 10-K.

Critical Accounting Policies and Estimates

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles and the Company's discussion and analysis of its financial condition and operating results

require the Company's management to make judgments, assumptions, and estimates that affect the amounts reported in its Condensed Consolidated Financial Statements and accompanying notes. Note 1, "Summary of Significant Accounting Policies" of this Form 10-Q and the Notes to Consolidated Financial Statements in the Company's 2008 Form 10-K describes the significant accounting policies and methods used in the preparation of the Company's Condensed Consolidated Financial Statements. Management bases its estimates on historical experience and on various other assumptions it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates and such differences may be material.

Management believes the Company's critical accounting policies and estimates are those related to revenue recognition, valuation of marketable securities, allowance for doubtful accounts, inventory valuation and inventory purchase commitments, warranty costs, stock-based compensation, income taxes, and legal and other contingencies. Management considers these critical policies because they are both important to the portrayal of the Company's financial condition and operating results, and they require management to make judgments and estimates about inherently uncertain matters. The Company's senior management has reviewed these critical accounting policies and related disclosures with the Audit and Finance Committee of the Company's Board of Directors.

Revenue Recognition

Net sales consist primarily of revenue from the sale of hardware, software, music products, third-party digital content and applications, peripherals, and service and support contracts. The Company recognizes revenue for software products (operating system software and applications software), or any product that is considered to be software-related, in accordance with the guidance in Emerging Issues Task Force ("EITF") No. 03-5, *Applicability of AICPA Statement of Position 97-2 to Non-Software Deliverables in an Arrangement Containing More-Than-Incidental Software*, (e.g., Mac computers, iPod portable digital music players and iPhone) pursuant to American Institute of Certified Public Accountants ("AICPA") Statement of Position ("SOP") No. 97-2, *Software Revenue Recognition*, as amended. For products that are not software or software-related, (e.g., third-party digital content sold on the iTunes Store and certain Mac, iPod and iPhone supplies and accessories), the Company recognizes revenue pursuant to the SEC Staff Accounting Bulletin ("SAB") No. 104, *Revenue Recognition*.

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is probable. Product is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers revenue until the customer receives the product because the Company retains a portion of the risk of loss on these sales during transit. If at the outset of an arrangement the Company determines the arrangement fee is not, or is presumed not to be, fixed or determinable, revenue is deferred and subsequently recognized as amounts become due and payable and all other criteria for revenue recognition have been met.

For both Apple TV and iPhone, the Company has indicated that from time-to-time it may provide future unspecified features and additional software products free of charge to customers. Therefore, sales of Apple TV and iPhone handsets are recognized under subscription accounting in accordance with SOP No. 97-2. The Company recognizes the associated revenue and cost of goods sold on a straight-line basis over the currently estimated 24-month economic lives of these products, with any loss recognized at the time of sale. Costs incurred by the Company for engineering, sales, marketing, and warranty are expensed as incurred.

The Company records reductions to revenue for estimated commitments related to price protection and for customer incentive programs, including reseller and end-user rebates, and other sales programs and volume-based incentives. For transactions involving price protection, the Company recognizes revenue net of the estimated amount to be refunded, provided the refund amount can be reasonably and reliably estimated and the other conditions for revenue recognition have been met. The Company's policy requires that, if refunds cannot be reliably estimated, revenue is not recognized until reliable estimates can be made or the price protection lapses. For customer incentive programs, the estimated cost of these programs is recognized at the later of the date at which the Company has sold the product or the date at which the program is offered. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Future market conditions and product transitions may require the Company to increase customer incentive programs and incur incremental price protection obligations that could result in additional reductions to revenue at the time such programs are offered. Additionally, certain customer

incentive programs require management to estimate the number of customers who will actually redeem the incentive based on historical experience and the specific terms and conditions of particular incentive programs. If a greater than estimated proportion of customers redeem such incentives, the Company would be required to record additional reductions to revenue, which would have a negative impact on the Company's results of operations.

Valuation of Marketable Securities

The Company's investments in available-for-sale securities are reported at fair value. Unrealized gains and losses related to changes in the fair value of investments are included in accumulated other comprehensive income, net of tax, as reported in the Company's Condensed Consolidated Balance Sheets. Changes in the fair value of investments impact the Company's net income only when such investments are sold or an other-than-temporary impairment is recognized. Realized gains and losses on the sale of securities are determined by specific identification of each security's cost basis. The Company regularly reviews its investment portfolio to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns, which would require the Company to record an impairment charge in the period any such determination is made. In making this judgment, the Company evaluates, among other things, the duration and extent to which the fair value of an investment is less than its cost, the credit rating of the investment and any changes thereto, and the Company's ability and intent to hold the investment until the earlier of market price recovery or maturity. The Company's assessment on whether an investment is other-than-temporarily impaired or not, could change in the future due to new developments or changes in assumptions related to any particular investment.

Allowance for Doubtful Accounts

The Company distributes its products through third-party distributors, cellular network carriers, and resellers and directly to certain education, consumer, and enterprise customers. The Company generally does not require collateral from its customers; however, the Company will require collateral in certain instances to limit credit risk. In addition, when possible the Company does attempt to limit credit risk on trade receivables with credit insurance for certain customers in Latin America, Europe, Asia, and Australia and by arranging with third-party financing companies to provide flooring arrangements and other loan and lease programs to the Company's direct customers. These credit-financing arrangements are directly between the third-party financing company and the end customer. As such, the Company generally does not assume any recourse or credit-risk-sharing related to any of these arrangements. However, considerable trade receivables that are not covered by collateral, third-party flooring arrangements, or credit insurance are outstanding with the Company's distribution and retail channel partners.

The allowance for doubtful accounts is based on management's assessment of the ability to collect specific customer accounts and includes consideration of the credit-worthiness and financial condition of those specific customers. The Company records an allowance to reduce the specific receivables to the amount that it reasonably believes to be collectible. The Company also records an allowance for all other trade receivables based on multiple factors, including historical experience with bad debts, the general economic environment, the financial condition of the Company's distribution channels, and the aging of such receivables. If there is a deterioration of a major customer's financial condition, if the Company becomes aware of additional information related to the credit-worthiness of a major customer, or if future actual default rates on trade receivables in general differ from those currently anticipated, the Company may have to adjust its allowance for doubtful accounts, which would affect earnings in the period the adjustments are made.

Inventory Valuation and Inventory Purchase Commitments

The Company must order components for its products and build inventory in advance of product shipments. The Company records a write-down for inventories of components and products, including third-party products held for resale, which have become obsolete or are in excess of anticipated demand or net realizable value. The Company performs a detailed review of inventory each fiscal quarter that considers multiple factors including demand forecasts, product life cycle status, product development plans, current sales levels, and component cost trends. The personal computer, consumer electronics and mobile communications industries are subject to a rapid and unpredictable pace of product and component obsolescence and demand changes. If future demand or market conditions for the Company's products are less favorable than forecasted or if unforeseen technological changes negatively impact the utility of component inventory, the Company may be required to record additional write-downs, which would negatively affect gross margins in the period when the write-downs were recorded.

The Company accrues reserves for estimated cancellation fees related to component orders that have been cancelled or are expected to be cancelled. Consistent with industry practice, the Company acquires components through a

combination of purchase orders, supplier contracts, and open orders based on projected demand information. These commitments typically cover the Company's requirements for periods ranging from 30 to 150 days. If there is an abrupt and substantial decline in demand for one or more of the Company's products or an unanticipated change in technological requirements for any of the Company's products, the Company may be required to record additional reserves for cancellation fees that would negatively affect gross margins in the period when the cancellation fees are identified and recorded.

Warranty Costs

The Company provides for the estimated cost for hardware and software warranties at the time the related revenue is recognized based on historical and projected warranty claim rates, historical and projected cost-per-claim, and knowledge of specific product failures that are outside of the Company's typical experience. Each quarter, the Company reevaluates its estimates to assess the adequacy of its recorded warranty liabilities considering the size of the installed base of products subject to warranty protection and adjusts the amounts as necessary. For products accounted for under subscription accounting pursuant to SOP No. 97-2, the Company recognizes warranty expense as incurred. If actual product failure rates or repair costs differ from estimates, revisions to the estimated warranty liability would be required and could negatively affect the Company's results of operations.

The Company periodically provides updates to its applications and operating system software to maintain the software's compliance with specifications. The estimated cost to develop such updates is accounted for as warranty cost that is recognized at the time related software revenue is recognized. Factors considered in determining appropriate accruals related to such updates include the number of units delivered, the number of updates expected to occur, and the historical cost and estimated future cost of the resources necessary to develop these updates.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with Statement of Financial Accounting Standards ("SFAS") No. 123 (revised 2004), *Share-Based Payment*. Under the provisions of SFAS No. 123R, stock-based compensation cost is estimated at the grant date based on the award's fair-value as calculated by the Black-Scholes-Merton ("BSM") option-pricing model and is recognized as expense ratably on a straight-line basis over the requisite service period. The BSM option-pricing model requires various judgmental assumptions including expected volatility, forfeiture rates, and expected option life. Significant changes in any of these assumptions could materially affect the fair value of stock-based awards granted in the future.

Income Taxes

The Company records a tax provision for the anticipated tax consequences of the reported results of operations. In accordance with SFAS No. 109, *Accounting for Income Taxes*, the provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets are expected to be realized or settled. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

The Company recognizes and measures uncertain tax positions in accordance with the Financial Accounting Standards Board ("FASB") issued Financial Interpretation No. ("FIN") 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*, whereby the Company only recognizes the tax benefit from an uncertain tax position if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Management believes it is more likely than not that forecasted income, including income that may be generated as a result of certain tax planning strategies, together with the tax effects of the deferred tax liabilities, will be sufficient to fully recover the remaining deferred tax assets. In the event that the Company determines all or part of the net deferred tax assets are not realizable in the future, the Company will make an adjustment to the valuation allowance that would be charged to earnings in the period such determination is made. In addition, the calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of FIN 48 and other complex tax laws. Resolution of these uncertainties in a manner inconsistent with management's expectations could have a material impact on the Company's financial condition and operating results.

Legal and Other Contingencies

As discussed in Part II, Item 1 of this Form 10-Q under the heading “Legal Proceedings” and in Note 8 “Commitments and Contingencies” in Notes to Condensed Consolidated Financial Statements, the Company is subject to various legal proceedings and claims that arise in the ordinary course of business. In accordance with SFAS No. 5, *Accounting for Contingencies*, the Company records a contingent liability when it is probable that a loss has been incurred and the amount is reasonably estimable. There is significant judgment required in both the probability determination and as to whether an exposure can be reasonably estimated. In management’s opinion, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect on its financial condition or operating results. However, the outcomes of legal proceedings and claims brought against the Company are subject to significant uncertainty. Should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Net Sales

The following table summarizes net sales and Mac unit sales by operating segment and net sales and unit sales by product during the three- and six-month periods ended March 28, 2009 and March 29, 2008 (in millions, except unit sales in thousands and per unit amounts):

	Three Months Ended			Six Months Ended		
	March 28, 2009	March 29, 2008	Change	March 28, 2009	March 29, 2008	Change

Net sales per Mac unit sold (h)	<u>\$ 1,329</u>	<u>\$ 1,526</u>	(13)%	<u>\$ 1,371</u>	<u>\$ 1,529</u>	(10)%
iPod unit sales	<u>11,013</u>	<u>10,644</u>	3%	<u>33,740</u>	<u>32,765</u>	3%
Net sales per iPod unit sold (i)	<u>\$ 151</u>	<u>\$ 171</u>	(12)%	<u>\$ 149</u>	<u>\$ 177</u>	(16)%
iPhone unit sales	<u>3,793</u>	<u>1,703</u>	123%	<u>8,156</u>	<u>4,018</u>	103%

(a) Other Segments include Asia Pacific and FileMaker.

(b) Includes iMac, Mac mini, Mac Pro, and Xserve product lines.

(c) Includes MacBook, MacBook Air, and MacBook Pro product lines.

(d) Consists of iTunes Store sales, iPod services, and Apple-branded and third-party iPod accessories.

(e) Derived from handset sales, carrier agreements, and Apple-branded and third-party iPhone accessories.

(f) Includes sales of Apple-branded and third-party displays, wireless connectivity and networking solutions, and other hardware accessories.

(g) Includes sales of Apple-branded operating system, application software, third-party software, AppleCare, and Internet services.

(h) Derived by dividing total Mac net sales by total Mac unit sales.

(i) Derived by dividing total iPod net sales by total iPod unit sales.

Net sales during the second quarter of 2009 and the first six months of 2009 increased \$651 million or 9% and \$1.2 billion or 7%, respectively, compared to the same periods in 2008. Several factors contributed positively to these increases, including the following:

- iPhone revenue and net sales of related products and services were \$1.5 billion and \$2.8 billion in the second quarter of 2009 and first six months of 2009, respectively, with iPhone handset unit sales totaling 3.8 million and 8.2 million during the second quarter of 2009 and first six months of 2009, respectively. Unit sales of iPhone increased 2.1 million or 123% during the second quarter of 2009 and 4.1 million or 103% during the first six months of 2009 compared to the same periods in 2008. iPhone revenue includes the portion of handset revenue recognized in accordance with subscription accounting over the product's 24-month estimated economic life, as well as revenue from sales of iPhone accessories and carrier agreements. The Company was shipping iPhone 3G in over 80 countries as of March 2009.
- Net sales of other music-related products and services increased \$168 million or 19% and \$371 million or 22% during the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008. The increase was due predominantly to increased net sales of third-party digital content and applications from the iTunes Store, which experienced double-digit growth in each of the Company's geographic segments for both the second quarter of 2009 and first six months of 2009. The Company believes this continued growth is the result of heightened consumer interest in downloading third-party digital content and applications, the expansion of third-party audio and video content available for sale and rent via the iTunes Store, and the launch and continued interest and growth of the iTunes App Store. The Company continues to expand its iTunes content and applications offerings around the world.
- Net sales of software, service, and other sales increased \$96 million or 18% during the second quarter of 2009 and increased \$74 million or 6% during the first six months of 2009 compared to the same periods in 2008. These increases were due primarily to hedge gains recognized during the second quarter of 2009 and the first six months of 2009, as well as increased software sales during the second quarter of 2009, which was attributed to the launch of iLife® '09 and iWork® '09.

Partially offsetting the favorable factors, discussed above, net sales during the second quarter of 2009 and the first six months of 2009 were negatively impacted by certain factors, including the following:

- Mac net sales and unit sales decreased by 16% and 3%, respectively, for the second quarter of 2009 compared to the same period in 2008. During the first six months of 2009 Mac net sales declined 8% year-over-year, while Mac unit sales increased by 3%. Net sales of the Company's Macs accounted for 36% and 35% of the Company's total net revenue for the second quarter of 2009 and first six months of 2009, respectively. Net sales per Mac unit sold decreased by 13% and 10% during the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008, due primarily to product mix and lower average selling prices across Mac portable systems and most Mac desktop systems.

Net sales and unit sales of the Company's Mac portable systems decreased by 12% and 2%, respectively, for the second quarter of 2009, while net sales and unit sales increased by 5% and 15%, respectively, for the first six months of 2009 compared to the same periods in 2008. The decline in Mac portable systems during the second quarter of 2009 was attributable to lower sales of most Mac portables with the exception of MacBooks, which experienced year-over-year unit sales and net sales growth in each of the Company's reportable operating segments. For the first six months of 2009, total Mac portable systems net sales and unit sales increased due primarily to higher demand for MacBooks, which experienced double digit growth in net sales and unit sales in each of the Company's reportable operating segments.

Net sales and unit sales of the Company's Mac desktop systems decreased by 22% and 4%, respectively, during the second quarter of 2009, and decreased 27% and 16%, respectively, during the first six months of 2009. The Mac desktop systems decrease for the second quarter of 2009 was due mainly to lower net sales and unit sales of Mac Pro, which declined in each of the Company's reportable operating segments, and overall lower net sales of iMac. Similarly, for the first six months of 2009, the Company's Mac desktop systems decreased due to a decline in sales of iMac and Mac Pro, both of which generated lower sales in each of the Company's reportable operating segments.

- Net sales of iPods decreased \$153 million or 8% during the second quarter of 2009 and decreased \$779 million or 13% during the first six months of 2009 compared to the same periods in 2008. Conversely, iPod unit sales increased by 3% in both the second quarter of 2009 and first six months of 2009 compared to the same periods in 2008. Net sales per iPod unit sold decreased 12% and 16% in the second quarter of 2009 and first six months of 2009, respectively, compared to the same periods in 2008 resulting from lower average selling prices across each of the iPod product lines due primarily to price reductions taken with the introduction of new iPods in September 2008 and the price reduction taken on iPod shuffle in February 2008.

Segment Operating Performance

The Company manages its business primarily on a geographic basis. The Company's reportable operating segments consist of the Americas, Europe, Japan, and Retail. The Americas, Europe, and Japan reportable segments do not include activities related to the Retail segment. The Americas segment includes both North and South America. The Europe segment includes European countries as well as the Middle East and Africa. The Retail segment operates Apple-owned retail stores in the U.S. and in international markets. Each reportable geographic operating segment and the Retail operating segment provide similar hardware and software products and similar services.

Americas

Net sales in the Americas segment during the second quarter of 2009 increased \$249 million or 8% compared to the second quarter of 2008, while Americas Mac unit sales decreased 8% year-over-year. The increase in net sales during the second quarter of 2009 was attributable to increased iPhone revenue and higher sales of third-party digital content and applications from the iTunes Store, which were offset partially by a decrease in sales of iPods and Mac portable and desktop systems. Sales of Mac portable and desktop systems decreased due largely to lower sales of MacBook Pro, MacBook Air, and Mac Pro. The Americas segment represented 43% and 44% of the Company's total net sales in the second quarters of 2009 and 2008, respectively.

During the first six months of 2009, net sales in the Americas segment increased \$452 million or 6% compared to the same period in 2008, while Americas Mac unit sales were flat on a year-over-year basis. The increase in net sales during the first six months of 2009 was attributable primarily to the significant year-over-year increase in iPhone revenue and higher sales of third-party digital content and applications from the iTunes Store, which was partially offset by a decrease in sales of iPods, Mac portable and desktop systems, and lower software sales. The Americas segment represented approximately 44% of the Company's total net sales for the first six months of both 2009 and 2008.

Europe

Net sales in Europe increased \$317 million or 18% during the second quarter of 2009 compared to the second quarter of 2008. The key contributors to this growth were iPhone revenue and sales of third-party digital content and applications from the iTunes Store. The increase in net sales was offset partially by lower year-over-year net sales of Mac desktop and portable systems and iPods. Total Mac unit sales increased 5% year-over-year, due primarily to an increase in unit sales of MacBook and iMac, while total Mac net sales in Europe decreased resulting from lower average selling prices.

For the first six months of 2009, net sales and unit sales in Europe increased 15% and 9%, respectively, compared to the same periods in 2008. These increases were due mainly to increased iPhone revenue and strong sales of third-party digital content and applications from the iTunes Store, which were offset partially by lower net sales of Mac desktop systems and iPods. Unit sales of iPods increased due to the strong demand for iPod touch, iPod shuffle and iPod nano, while net sales of iPods decreased due to lower average selling prices during the first six months of 2009 compared to the same period in 2008.

Japan

Japan's net sales increased \$76 million or 18% during the second quarter of 2009 and increased \$157 million or 19% during the first six months of 2009 compared to the same periods in 2008. The key contributors to Japan's net sales growth for both the second quarter and first six months of 2009 were increased iPhone and iPod revenue, and higher sales of third-party digital content and applications from the iTunes Store. Net sales and unit sales of iPods increased during the second quarter of 2009 and first six months of 2009 compared to the same periods in 2008, driven predominantly by strong demand for iPod nano and iPod touch.

Retail

Retail net sales increased \$20 million or 1% during the second quarter of 2009 compared to the second quarter in 2008. The increase in net sales was due predominantly to increased iPhone revenue and strong demand for MacBook, offset partially by a decrease in sales of most other Mac portable and desktop systems and iPods. Retail Mac net sales and unit sales decreased due to lower sales across most Mac portable and desktop systems, partially offset by increased sales of MacBook and Mac mini. The Company opened one new retail store during the second quarter of 2009, ending the quarter with 252 stores open, as compared to 208 stores at the end of the second quarter of 2008. The year-over-year growth rate of Retail net sales was less than the increase in the average number of stores open during the same period, which reflects the challenging consumer-spending environment and continued third-party channel expansion. As a result, with an average of 251 stores and 205 stores open during the second quarters of 2009 and 2008, respectively, average revenue per store declined to \$5.9 million for the second quarter of 2009 from \$7.1 million in the second quarter of 2008.

Retail net sales grew \$59 million or 2% during the first six months of 2009 compared to the same period in 2008 due primarily to increased iPhone revenue and strong demand for MacBook, offset partially by a decrease in sales of iPods, Mac desktop systems, MacBook Air, and MacBook Pro. Average revenue per store decreased to \$12.8 million for the first six months of 2009 based on an average of 250 stores, down from \$15.5 million in the first six months of 2008 based on an average of 203 stores.

The Retail segment reported operating income of \$308 million during the second quarter of 2009 compared to operating income of \$334 million during the second quarter of 2008, and reported operating income of \$661 million during the first six months of 2009 compared to \$739 million during the first six months of 2008. The decline in operating income during the second quarter of 2009 and first six months of 2009 was attributable primarily to lower average revenue per store.

Expansion of the Retail segment has required and will continue to require a substantial investment in fixed assets and related infrastructure, operating lease commitments, personnel, and other operating expenses. Capital asset purchases associated with the Retail segment since its inception totaled \$1.5 billion through the end of the second quarter of 2009. As of March 28, 2009, the Retail segment had approximately 14,000 full-time equivalent employees and had outstanding lease commitments associated with retail space of \$1.3 billion. The Company would incur substantial costs if it were to close multiple retail stores and such costs could adversely affect the Company's financial condition and operating results.

Other Segments

The Company's Other Segments, which consist of its Asia Pacific and FileMaker operations, experienced a decrease in net sales of \$11 million or 2% during the second quarter of 2009 compared to the second quarter of 2008, and a decrease of \$75 million or 6% during the first six months of 2009 compared to the same period in 2008. These decreases were related primarily to lower net sales of most iPod products, Mac desktop systems, and MacBook Pro, offset partially by increased iPhone revenue and net sales of MacBook and iPod touch in the Company's Asia Pacific region.

Gross Margin

Gross margin for the three- and six-month periods ended March 28, 2009 and March 29, 2008 was as follows (in millions, except gross margin percentages):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Net sales	\$ 8,163	\$ 7,512	\$ 18,330	\$ 17,120
Cost of sales	5,192	5,038	11,827	11,314
Gross margin	\$ 2,971	\$ 2,474	\$ 6,503	\$ 5,806
Gross margin percentage	36.4%	32.9%	35.5%	33.9%

The gross margin percentage for the second quarter of 2009 was 36.4% compared to 32.9% for the second quarter of 2008 and the gross margin percentage for the first six months of 2009 was 35.5% compared to 33.9% for the first six months of 2008. The gross margin percentage for the second quarter of 2009 and the first six months of 2009 increased largely as a result of significantly lower commodity and other product costs, which were partially offset by price reductions and a strengthening U.S. dollar.

The Company expects its gross margin percentage to decrease in future periods compared to levels achieved during 2008 and the first half of 2009, and anticipates gross margin levels of about 33% in the third quarter of 2009 and about 30% in the fourth quarter of 2009. This expected decline is due largely to the anticipated impact of product transitions, flat or reduced pricing on new and innovative products that have higher cost structures, both expected and potential future cost increases for key components, and a stronger U.S. dollar.

The foregoing statements regarding the Company's expected gross margin percentage are forward-looking and could differ from anticipated levels because of several factors, including but not limited to certain of those set forth below in Part II, Item 1A, "Risk Factors" under the subheading "*Future operating results depend upon the Company's ability to obtain key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable prices and in sufficient quantities.*" which is incorporated herein by reference. There can be no assurance that targeted gross margin percentage levels will be achieved. In general, gross margins and margins on individual products will remain under downward pressure due to a variety of factors, including continued industry wide global product pricing pressures, increased competition, compressed product life cycles, product transitions and expected increases in the cost of key components including, but not limited to microprocessors, NAND flash memory, dynamic random access memory ("DRAM") and liquid crystal displays ("LCDs"), as well as potential increases in the costs of outside manufacturing services and a potential shift in the Company's sales mix towards products with lower gross margins. In response to these competitive pressures, the Company expects it will continue to take product pricing actions, which would adversely affect gross margins. Gross margins could also be affected by the Company's ability to manage product quality and warranty costs effectively and to stimulate demand for certain of its products. Due to the Company's significant international operations, financial results can be significantly affected in the short-term by fluctuations in exchange rates.

Operating Expenses

Operating expenses for the three- and six-month periods ended March 28, 2009 and March 29, 2008 were as follows (in millions, except for percentages):

	Three Months Ended		Six Months Ended	
	March 28, 2009	March 29, 2008	March 28, 2009	March 29, 2008
Research and development	\$ 319	\$ 273	\$ 634	\$ 519
Percentage of net sales	4%	4%	3%	3%
Selling, general, and administrative	\$ 985	\$ 886	\$ 2,076	\$ 1,846
Percentage of net sales	12%	12%	11%	11%

Research and Development (“R&D”)

Expenditures for R&D increased 17% or \$46 million to \$319 million in the three months ended March 28, 2009 compared to the same period in 2008, and increased 22% or \$115 million to \$634 million during the six months ended March 28, 2009 compared to the same period in 2008. These increases were due primarily to higher stock-based compensation expenses and an increase in R&D headcount in the current year to support expanded R&D activities. In addition, \$23 million and \$45 million of software development costs were capitalized related to Mac OS X Version 10.6 Snow Leopard and excluded from R&D expense during the three- and six-month periods ended March 28, 2009, respectively, while no software development costs were capitalized during the same periods of 2008. Although total R&D expense increased 17% and 22% during the three- and six-month periods ended March 28, 2009, respectively, it remained relatively flat as a percentage of net sales given the revenue growth of 9% and 7%, respectively, during the same periods in 2008. The Company continues to believe that focused investments in R&D are critical to its future growth and competitive position in the marketplace and are directly related to timely development of new and enhanced products that are central to the Company’s core business strategy. As such, the Company expects to make further investments in R&D to remain competitive.

Selling, General, and Administrative (“SG&A”)

SG&A expenditures increased \$99 million or 11% and \$230 million or 12%, respectively, for the three- and six-month periods ended March 28, 2009 compared to the same periods in 2008. These increases are due primarily to the Company’s continued expansion of its Retail segment, higher stock-based compensation expenses and higher spending on marketing and advertising.

Other Income and Expense

Total other income and expense decreased \$99 million or 61% to \$63 million during the three months ended March 28, 2009 compared to \$162 million in the same period of 2008, and decreased \$141 million or 39% during the six months ended March 28, 2009 compared to the same period in 2008. The overall decrease in other income and expense is attributable to the decline in interest rates during the first six months of 2009 compared to the first six months of 2008, partially offset by the Company’s higher cash, cash equivalents and marketable securities balances. The weighted-average interest rate earned by the Company on its cash, cash equivalents and marketable securities decreased to 1.53% in the second quarter of 2009 from 3.93% in the second quarter of 2008.

The Company’s investment portfolio had gross unrealized losses of \$124 million and \$121 million as of March 28, 2009 and September 27, 2008, respectively, which were partially offset by gross unrealized gains of \$55 million and \$4 million as of March 28, 2009 and September 27, 2008, respectively. In both periods, the gross unrealized losses primarily related to long-term marketable securities. The Company considers the declines in market value of its marketable securities investment portfolio to be temporary in nature. The unrealized losses on the Company’s marketable securities were caused primarily by changes in market interest rates, specifically widening credit spreads. The Company has the intent and ability to hold such investments for a sufficient period of time to allow for recovery of the principal amounts invested. Accordingly, no declines in fair value were recognized in the Company’s Condensed Statements of Operations during the three- and six-month periods ended March 28, 2009 and March 29, 2008. The Company may sell certain of its marketable securities prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

Provision for Income Taxes

The Company’s effective tax rate was 30% for both the three- and six-month periods ended March 28, 2009, compared to approximately 29% and 31% for the three- and six-month periods ended March 29, 2008, respectively. The Company’s effective rate for these periods differs from the statutory federal income tax rate of 35% due primarily to certain undistributed foreign earnings for which no U.S. taxes are provided because such earnings are intended to be indefinitely reinvested outside the U.S.

The Internal Revenue Service (the “IRS”) has completed its field audit of the Company’s federal income tax returns for the years 2002 through 2003 and proposed certain adjustments. The Company has contested certain of these adjustments through the IRS Appeals Office. All IRS audit issues for years prior to 2002 have been resolved. In addition, the Company is subject to audits by state, local, and foreign tax authorities. Management believes that adequate provision has been made for any adjustments that may result from tax examinations. However, the outcome of tax audits cannot be predicted with certainty. If any issues addressed in the Company’s tax audits are resolved in a manner not consistent with management’s expectations, the Company could be required to adjust its provision for income tax in the period such resolution occurs.

Recent Accounting Pronouncements

During the first quarter of 2009, the Company adopted SFAS No. 157, *Fair Value Measurements*, which defines fair value, provides a framework for measuring fair value, and expands the disclosures required for fair value measurements. In February 2008, the FASB issued FASB Staff Position (“FSP”) No. FAS 157-2, *Effective Date of FASB Statement No. 157*. FSP No. 157-2 delays the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) and will be adopted by the Company beginning in the first quarter of 2010. In April 2009, the FASB issued FSP No. FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which provides guidance on determining fair value when there is no active market or where the price inputs being used represent distressed sales. FSP No. 157-4 is effective for interim and annual periods ending after June 15, 2009 and will be adopted by the Company beginning in the third quarter of 2009. Although the Company will continue to evaluate the application of FSP No. 157-2 and FSP No. 157-4, management does not currently believe adoption of these accounting pronouncements will have a material impact on the Company’s financial condition or operating results.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations*, which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree in a business combination. SFAS No. 141R also establishes principles around how goodwill acquired in a business combination or a gain from a bargain purchase should be recognized and measured, as well as provides guidelines on the disclosure requirements on the nature and financial impact of the business combination. SFAS No. 141R is effective for fiscal years beginning on or after December 15, 2008 and will be adopted by the Company beginning in the first quarter of 2010. Although the Company will continue to evaluate the application of SFAS No. 141R, management does not currently believe adoption of this accounting pronouncement will have a material impact on the Company’s financial condition or operating results.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*, which provides operational guidance for determining other-than-temporary impairments (“OTTI”) for debt securities. FSP No. 115-2 and 124-2 is effective for interim and annual periods ending after June 15, 2009 and will be adopted by the Company beginning in the third quarter of 2009. Although the Company will continue to evaluate the application of FSP No. 115-2 and 124-2, management does not currently believe adoption of this accounting pronouncement will have a material impact on the Company’s financial condition or operating results.

Liquidity and Capital Resources

The following table presents selected financial information and statistics as of March 28, 2009 and September 27, 2008 (in millions):

	March 28, 2009	September 27, 2008
Cash, cash equivalents, and marketable securities	\$ 28,878	\$ 24,490
Accounts receivable, net	\$ 1,932	\$ 2,422
Inventory	\$ 312	\$ 509
Working capital	\$ 20,102	\$ 18,219

As of March 28, 2009, the Company had \$28.9 billion in cash, cash equivalents, and marketable securities, an increase of \$4.4 billion from September 27, 2008. The principal component of this net increase was the cash generated by operating activities of \$4.8 billion, which was partially offset by payments for acquisitions of property, plant, and equipment of \$439 million. The Company’s cash generated by operating activities significantly exceeded its net income due primarily to the increase in deferred revenue, net of deferred costs, associated with subscription accounting for iPhone.

The Company's marketable securities investment portfolio is invested primarily in highly rated securities with a minimum rating of single-A. As of March 28, 2009 and September 27, 2008, \$14.0 billion and \$11.3 billion, respectively, of the Company's cash, cash equivalents, and marketable securities were held by foreign subsidiaries and are generally based in U.S. dollar-denominated holdings. The Company believes its existing balances of cash, cash equivalents, and marketable securities will be sufficient to satisfy its working capital needs, capital asset purchases, outstanding commitments, and other liquidity requirements associated with its existing operations over the next 12 months.

Capital Assets

The Company's cash payments for capital asset purchases were \$439 million during the first six months of 2009, consisting of approximately \$101 million for Retail store facilities and \$338 million for corporate facilities and infrastructure, including information systems enhancements. The Company anticipates utilizing approximately \$1.2 billion for capital asset purchases during 2009, including approximately \$350 million for Retail facilities and approximately \$850 million for corporate facilities and infrastructure.

Off-Balance Sheet Arrangements and Contractual Obligations

The Company has not entered into any transactions with unconsolidated entities whereby the Company has financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose the Company to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company.

Lease Commitments

As of September 27, 2008, the Company had total outstanding commitments on noncancelable operating leases of \$1.8 billion, \$1.4 billion of which related to the lease of retail space and related facilities. The Company's major facility leases are generally for terms of 3 to 20 years and generally provide renewal options for terms of 1 to 5 years. Leases for retail space are for terms of 5 to 20 years, the majority of which are for 10 years, and often contain multi-year renewal options. Total outstanding commitments on noncancelable operating leases related to the lease of retail space decreased to \$1.3 billion as of March 28, 2009.

Purchase Commitments with Contract Manufacturers and Component Suppliers

The Company utilizes several contract manufacturers to manufacture sub-assemblies for the Company's products and to perform final assembly and test of finished products. These contract manufacturers acquire components and build product based on demand information supplied by the Company, which typically covers periods ranging from 30 to 150 days. The Company also obtains individual components for its products from a wide variety of individual suppliers. Consistent with industry practice, the Company acquires components through a combination of purchase orders, supplier contracts, and open orders based on projected demand information. Such purchase commitments typically cover the Company's forecasted component and manufacturing requirements for periods ranging from 30 to 150 days. In addition, the Company has an off-balance sheet warranty obligation for products accounted for under subscription accounting pursuant to SOP No. 97-2 whereby the Company recognizes warranty expense as incurred. As of March 28, 2009, the Company had outstanding off-balance sheet third-party manufacturing commitments, component purchase commitments, and estimated warranty commitments of \$3 billion.

The Company has entered into prepaid long-term supply agreements to secure the supply of certain inventory components. During the first quarter of 2009, a long-term supply agreement with Intel Corporation was terminated and the remaining prepaid balance of \$167 million was repaid to the Company. During the second quarter of 2009, the Company made a prepayment of \$500 million to LG Display for the purchase of LCD panels. As of March 28, 2009, the Company had a total of \$808 million of inventory component prepayments outstanding.

Asset Retirement Obligations

The Company's asset retirement obligations are associated with commitments to return property subject to operating leases to original condition upon lease termination. As of March 28, 2009, the Company estimated that gross expected future cash flows of approximately \$28 million would be required to fulfill these obligations.

Other Obligations

Other outstanding obligations were approximately \$323 million as of March 28, 2009, primarily related to advertising, research and development, Internet and telecommunications services, and other obligations.

As of March 28, 2009, the Company had gross unrecognized tax benefits of \$586 million and an additional \$265 million for gross interest and penalties classified as non-current liabilities in the Condensed Consolidated Balance Sheet. At this time, the Company is unable to make a reasonably reliable estimate of the timing of payments in individual years due to uncertainties in the timing of tax audit outcomes.

Indemnifications

The Company generally does not indemnify end-users of its operating system and application software against legal claims that the software infringes third-party intellectual property rights. Other agreements entered into by the Company sometimes include indemnification provisions under which the Company could be subject to costs and/or damages in the event of an infringement claim against the Company or an indemnified third-party. However, the Company has not been required to make any significant payments resulting from such an infringement claim asserted against it or an indemnified third-party and, in the opinion of management, does not have a liability related to unresolved infringement claims subject to indemnification that would have a material adverse effect on its financial condition or operating results.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's market risk profile has not changed significantly during the first six months of 2009.

Interest Rate and Foreign Currency Risk Management

The Company regularly reviews its foreign exchange forward and option positions, both on a stand-alone basis and in conjunction with its underlying foreign currency and interest rate related exposures. However, given the effective horizons of the Company's risk management activities and the anticipatory nature of the exposures, there can be no assurance the hedges will offset more than a portion of the financial impact resulting from movements in either foreign exchange or interest rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect the Company's financial condition and operating results.

Interest Rate Risk

While the Company is exposed to interest rate fluctuations in many of the world's leading industrialized countries, the Company's interest income and expense is most sensitive to fluctuations in the general level of U.S. interest rates. As such, changes in U.S. interest rates affect the interest earned on the Company's cash, cash equivalents, and marketable securities, the fair value of those marketable securities, as well as costs associated with foreign currency hedges.

The Company's investment policy and strategy are focused on preservation of capital and supporting the liquidity requirements of the Company. A portion of the Company's cash is managed by external managers within the guidelines of the Company's investment policy and to objective market benchmarks. The Company's internal portfolio is benchmarked against external manager performance.

The Company's exposure to market risk for changes in interest rates relates primarily to the Company's investment portfolio. The Company typically invests in highly rated securities and its policy generally limits the amount of credit exposure to any one issuer. The Company's investment policy requires investments to be rated single-A or better with the objective of minimizing the potential risk of principal loss. All highly liquid investments with initial maturities of three months or less at the date of purchase are classified as cash equivalents. The Company classifies its marketable securities as either short-term or long-term based on each instrument's underlying contractual maturity date. All short-term marketable securities have maturities less than 12 months, while all long-term marketable securities have maturities ranging from one to five years. The Company may sell its investments prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. The Company recognized no material net gains or losses during the three- and six-month periods ended March 28, 2009 and March 29, 2008 related to such sales.

Foreign Currency Risk

In general, the Company is a net receiver of currencies other than the U.S. dollar. Accordingly, changes in exchange rates, and in particular a strengthening of the U.S. dollar, will negatively affect the Company's net sales and gross margins as expressed in U.S. dollars. There is also a risk that the Company will have to adjust local currency product pricing due to competitive pressures when there has been significant volatility in foreign currency exchange rates.

The Company may enter into foreign currency forward and option contracts with financial institutions to protect against foreign exchange risks associated with certain existing assets and liabilities, certain firmly committed transactions, forecasted future cash flows, and net investments in foreign subsidiaries. Generally, the Company's practice is to hedge a majority of its material foreign exchange exposures, typically for three to six months. However, the Company may choose not to hedge certain foreign exchange exposures for a variety of reasons, including but not limited to immateriality, accounting considerations, and the prohibitive economic cost of hedging particular exposures.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on an evaluation under the supervision and with the participation of the Company's management, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act") were effective as of March 28, 2009 to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the second quarter of 2009, which were identified in connection with management's evaluation required by paragraph (d) of Rules 13a-15 and 15d-15 under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

As of March 28, 2009, the end of the quarterly period covered by this report, the Company was subject to the various legal proceedings and claims discussed below, as well as certain other legal proceedings and claims that have not been fully resolved and that have arisen in the ordinary course of business. In the opinion of management, the Company does not have a potential liability related to any current legal proceedings and claims that would individually or in the aggregate have a material adverse effect on its financial condition or operating results. However, the results of legal proceedings cannot be predicted with certainty. Should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, the operating results of a particular reporting period could be materially adversely affected. The Company settled certain matters during the second quarter of 2009 that did not individually or in the aggregate have a material impact on the Company's results of operations.

Bader v. Anderson, et al.

Plaintiff filed this purported shareholder derivative action against the Company and each of its then current executive officers and members of its Board of Directors on May 19, 2005 in Santa Clara County Superior Court asserting claims for breach of fiduciary duty, material misstatements and omissions and violations of California Business & Professions Code §17200 (unfair competition). The complaint alleged that the Company's March 14, 2005, proxy statement was false and misleading for failure to disclose certain information relating to the Apple Computer, Inc. Performance Bonus Plan, which was approved by shareholders at the annual meeting held on April 21, 2005. Plaintiff, who ostensibly brought suit on the Company's behalf, made no demand on the Board of Directors and alleged that such demand was excused. The complaint sought injunctive and other relief for purported injury to the Company. On July 27, 2005, plaintiff filed an amended complaint alleging that, in addition to the purported derivative claims, adoption of the bonus plan and distribution of the proxy statement describing that plan also inflicted injury on her directly as an individual shareholder. On January 10, 2006, the Court sustained defendants' demurrer to the amended complaint, with leave to amend. Plaintiff filed a second amended complaint on February 7, 2006, and the Company filed a demurrer. After a hearing on June 13, 2006, the Court sustained the demurrer without leave to amend as to the non-director officers and with leave to amend as to the directors. On July 24, 2006, plaintiff filed a third amended complaint, which purported to bring claims derivatively as well as directly on behalf of a class of common stockholders who have been or will be harmed by virtue of the allegedly misleading proxy statement. In addition to reasserting prior causes of action, the third amended complaint included a claim that the Company violated the terms of the plan, and a claim for waste related to restricted stock unit grants to certain officers in 2003 and 2004 and an option grant to the Company's CEO in January 2000. The Company filed a demurrer to the third amended complaint. On January 30, 2007, the Court sustained the Company's demurrer with leave to amend. On May 8, 2007, plaintiff filed a fourth amended complaint. The Company filed a demurrer to the fourth amended complaint, which the Court sustained, without leave to amend, on October 12, 2007. On October 25, 2007, the Court entered a final judgment in favor of defendant and ordered the case dismissed with prejudice. On November 26, 2007, plaintiff filed a notice of appeal. Plaintiffs' appeal is pending.

Birdsong v. Apple Computer, Inc.

This action alleges that the Company's iPod music players, and the ear bud headphones sold with them, are inherently defective in design and are sold without adequate warnings concerning the risk of noise-induced hearing loss by iPod users. The Birdsong action was initially filed on January 30, 2006 in the United States District Court for the Western District of Louisiana asserting Louisiana causes of action on behalf of a purported Louisiana class of iPod purchasers. A similar action (*Patterson v. Apple Computer, Inc.*) was filed on January 31, 2006 in the United States District Court for the Northern District of California asserting California causes of action on behalf of a purported class of all iPod purchasers within the four-year period before January 31, 2006. The Birdsong action was transferred to the Northern District of California, and the Patterson action was dismissed. An amended complaint was subsequently filed in Birdsong, dropping the Louisiana law-based claims and adding California law-based claims equivalent to those in Patterson. After the Company filed a motion to dismiss on November 3, 2006, plaintiffs agreed not to oppose the motion and filed a second amended complaint on January 16, 2007. That complaint alleges California law-based claims for breaches of implied and express warranties, violations of California Business & Professions Code §17200 (unfair competition), California Business & Professions Code §17500 (false advertising), the Consumer Legal Remedies Act and negligent misrepresentation on behalf of a putative nationwide class and a

Louisiana law-based claim for redhibition for a Louisiana sub-class. On March 1, 2007, the Company filed a motion to dismiss the California law-based claims, which was heard on June 4, 2007. On December 14, 2007, the Court issued an order granting the Company's motion, with leave to amend the complaint. Plaintiffs filed a third amended complaint on January 11, 2008. On February 15, 2008, the Company filed a motion to dismiss the third amended complaint. On June 16, 2008, the Court granted the Company's motion to dismiss the third amended complaint with prejudice. On July 11, 2008, plaintiffs filed a notice of appeal. Plaintiffs' appeal is pending.

A similar complaint, *Royer-Brennan v. Apple Computer, Inc. and Apple Canada, Inc.*, was filed in Montreal, Quebec, Canada, on February 1, 2006, seeking authorization to institute a class action on behalf of iPod purchasers in Quebec. Plaintiffs filed a motion to amend their complaint to add a minor plaintiff and claims regarding alleged risks of hearing loss to young people. The hearing on the motion to amend is scheduled for April 24, 2009.

Boston Retirement Board v. Apple Computer, Inc.

On November 3, 2006, the Boston Retirement Board, a purported shareholder, filed a petition for writ of mandate against the Company in California Superior Court for the County of Santa Clara (*Boston Retirement Board v. Apple Computer Inc.*). The petition sought to compel the Company to allow inspection of certain corporate records relating to the Company's option practices and the Special Committee's investigation. Following a trial held on September 24, 2007, the Court granted the petition for inspection but narrowed the scope of the records to be produced. On April 16, 2008, the Boston Retirement Board filed a derivative action in California Superior Court for the County of Santa Clara. On July 31, 2008, Boston Retirement Board attempted to serve the new complaint on the Company. On September 15, 2008, defendants filed a motion to quash service of summons. On October 17, 2008, the Court denied defendants' motion to quash. On October 20, 2008, defendants requested consolidation of this action with *In re Apple Computer, Inc. Derivative Litigation*, No. 1:06CV066692, and a stay of the action. On November 6, 2008, Boston Retirement Board filed a motion for fees. On November 7, 2008, the Court issued an order relating this action to the State Derivative Litigation. A stipulation for dismissal was filed on December 10, 2008, in which Boston Retirement Board agreed to dismiss the case with prejudice upon a final order regarding its fees motion. On January 15, 2009, the Court denied Boston Retirement Board's motion for fees. On April 8, 2009, the Court granted the parties' Stipulation and Proposed Order of Dismissal with Prejudice.

On March 3, 2009, Boston Retirement Board filed a new complaint against the Company in Santa Clara Superior Court, alleging breach of a purported oral agreement to pay its' attorneys' fees and costs. The Company filed a demurrer to the Complaint on April 6, 2009.

Branning et al. v. Apple Computer, Inc.

Plaintiffs originally filed this purported class action in San Francisco County Superior Court on February 17, 2005. The initial complaint alleged violations of California Business & Professions Code §17200 (unfair competition) and violation of the Consumer Legal Remedies Act regarding a variety of purportedly unfair and unlawful conduct including, but not limited to, allegedly selling used computers as new and failing to honor warranties. Plaintiffs also brought causes of action for misappropriation of trade secrets, breach of contract and violation of the Song-Beverly Consumer Warranty Act. Plaintiffs requested unspecified damages and other relief. On May 2, 2005, plaintiffs filed an amended complaint adding two new named plaintiffs and three new causes of action including a claim for treble damages under the Cartwright Act (California Business & Professions Code §16700 et seq.) and a claim for false advertising. On May 9, 2005, the Court granted the Company's motion to transfer the case to Santa Clara County Superior Court. The Company filed a demurrer to the amended complaint, which the Court sustained in its entirety on November 10, 2005. The Court granted plaintiffs leave to amend and they filed an amended complaint on December 29, 2005. Plaintiffs' amended complaint added three plaintiffs and alleged many of the same factual claims as the previous complaints, such as alleged selling of used equipment as new, alleged failure to honor warranties and service contracts for the consumer plaintiffs, and alleged fraud related to the opening of the Apple retail stores. Plaintiffs continued to assert causes of action for unfair competition (§17200), violations of the Consumer Legal Remedies Act, breach of contract, misappropriation of trade secrets, violations of the Cartwright Act, and alleged new causes of action for fraud, conversion, and breach of the implied covenant of good faith and fair dealing. The Company filed a demurrer to the amended complaint on January 31, 2006, which the Court sustained on March 3, 2006 on sixteen of seventeen causes of action. Plaintiffs filed an amended complaint adding one new plaintiff. The Company filed a demurrer, which was granted in part on September 9, 2006. Plaintiffs filed a further amended complaint on September 21, 2006. On October 2, 2006, the Company filed an answer denying all allegations and asserting numerous affirmative defenses. On November 30, 2007, the Company filed a motion for judgment on the pleadings, which the Court denied. Plaintiffs filed a Fifth Amended Complaint on March 19, 2008 and a Corrected Fifth Amended Complaint on April 1, 2008. The Company filed an answer to the Corrected Fifth Amended Complaint on April 18, 2008. The Company filed a motion for judgment on the pleadings for an order dismissing plaintiffs' fraud claim based upon the statute of limitations, which was granted by the Court on June 24, 2008, with leave to amend. Plaintiffs filed a Sixth Amended

Complaint on July 14, 2008 and a Seventh Amended Complaint on August 22, 2008, adding three new reseller plaintiffs. On August 22, 2008, plaintiffs also filed a motion to certify the consumer class. On September 22, 2008, the Company filed its answer to the consumer-related claims denying all allegations and asserting numerous affirmative defenses, and also filed a demurrer to the new reseller claims, which the Court heard on January 30, 2009. The Court sustained the demurrer as to all plaintiffs except one, with leave to amend. Plaintiffs filed an Eighth Amended Complaint further amending the reseller claims on February 24, 2009, and on March 26, 2009 Apple filed a demurrer and a motion to strike. The Company filed motions for summary adjudication for certain claims of two named plaintiffs, which the Court granted on November 10, 2008. Plaintiffs petitioned the Court of Appeal for a writ of certiorari from the summary adjudication ruling and a motion to stay the class certification hearing, which the Court of Appeal denied on December 17, 2008. On December 19, 2008, the Court held a hearing on plaintiffs' class certification motion. The Court requested further briefing and an additional hearing, which did not take place because on February 23, 2009, Hon. Jamie A. Jacobs-May disqualified herself from the case. The Company has filed a petition for a writ of mandate from this order. The case has been reassigned to Hon. Joseph H. Huber.

Harvey v. Apple Inc.

Plaintiff filed this action on August 6, 2007 in the United States District Court for the Eastern District of Texas, Marshall Division, alleging infringement by the Company of U.S. Patent No. 6,753,671 entitled "Recharger for use with a portable electronic device and which includes a proximally located light emitting device" and U.S. Patent No. 6,762,584 entitled "Recharger for use with a portable electronic device and which includes a connector terminus for communicating with rechargeable batteries contained within the device." The complaint seeks unspecified damages and other relief. The Company filed an answer on October 12, 2007 denying all material allegations and asserting numerous affirmative defenses. The Company also asserted counterclaims for declaratory judgment of non-infringement and invalidity. On April 7, 2008, plaintiff filed an amended complaint further alleging infringement of the reissue patent of U.S. Patent No. 6,753,671. On April 28, 2008, the Company filed an answer denying all material allegations and asserting numerous affirmative defenses. The Company also asserted counterclaims for declaratory judgment of non-infringement and invalidity. The Markman hearing is set for October 28, 2009, and trial is scheduled for April 5, 2010. On February 3, 2009, the Court stayed the proceedings pending the U.S. Patent and Trademark Office's allowance of the '671 reissue patent.

Honeywell International, Inc., et al. v. Apple Computer, Inc., et al.

Plaintiffs Honeywell International, Inc. and Honeywell Intellectual Properties, Inc. filed this action on October 6, 2004 in the United States District Court in Delaware alleging infringement by the Company and other defendants of U.S. Patent No. 5,280,371 entitled "Directional Diffuser for a Liquid Crystal Display." Plaintiffs seek unspecified damages and other relief. The Company filed an answer on December 21, 2004 denying all material allegations and asserting numerous affirmative defenses. The Company has tendered the case to several liquid crystal display manufacturer suppliers. On May 18, 2005 the Court stayed the case against the Company and the other non-manufacturer defendants. Plaintiffs filed an amended complaint on November 7, 2005 adding additional defendants and expanding the scope of the accused products. The Company's response to the amended complaint is not yet due. On April 2, 2008, the Court lifted the stay for the purpose of determining whether the liquid crystal display manufacturer suppliers used by the Company and certain other defendants are licensed under the '371 patent. On October 31, 2008, the Company filed a motion for summary judgment of non-infringement based on the contention that its suppliers are licensed under the '371 patent. A hearing on the motion has been postponed and has not been rescheduled.

In re Apple iPod Nano Products Liability Litigation (formerly Wimmer v. Apple Computer, Inc.; Moschella, et al., v. Apple Computer, Inc.; Calado, et al. v. Apple Computer, Inc.; Kahan, et al., v. Apple Computer, Inc.; Jennings, et al., v. Apple Computer, Inc.; Rappel v. Apple Computer, Inc.; Mayo v. Apple Computer, Inc.; Valencia v. Apple Computer, Inc.; Williamson v. Apple Computer, Inc.; Sioson v. Apple Computer, Inc.

Beginning on October 19, 2005, eight complaints were filed in various United States District Courts and two complaints were filed in California State Court alleging that the Company's iPod nano was defectively designed so that it scratches excessively during normal use, rendering the screen unreadable.

The federal actions were coordinated in the United States District Court for the Northern District of California and assigned to the Hon. Ronald Whyte pursuant to an April 17, 2006 order of the Judicial Panel on Multidistrict Litigation. Plaintiffs filed a First Consolidated and Amended Master Complaint on September 21, 2006, alleging violations of California and other states' consumer protection and warranty laws and claiming unjust enrichment. The Master Complaint alleges two putative plaintiff classes: (1) all U.S. residents (excluding California residents) who purchased an iPod nano that was not manufactured or designed using processes necessary to ensure normal resistance to scratching of the screen; and (2) all iPod nano purchasers other than U.S. residents who purchased an iPod nano that was not manufactured or designed using processes necessary to ensure normal resistance to scratching of the screen. The Company answered the Master Complaint on November 20, 2006.

The two California State Court actions were coordinated on May 4, 2006, and assigned to the Hon. Carl West in Los Angeles Superior Court. Plaintiffs filed a Consolidated Amended Class Action Complaint on June 8, 2006, alleging violations of California state consumer protection, unfair competition, false advertising and warranty laws and claiming unjust enrichment. The Consolidated Complaint alleges a putative plaintiff class of all California residents who own an iPod nano containing a manufacturing defect that results in the nano being susceptible to excessive scratching. The Company answered the Consolidated Amended Complaint on October 6, 2006. The parties have reached a settlement and the Court has granted preliminary approval of the settlement. The parties' request for final approval of the settlement is pending.

Individual Networks, LLC v. Apple, Inc.

Plaintiff filed this action against the Company on April 24, 2007 in the United States District Court for the Eastern District of Texas, Marshall Division, alleging infringement of U.S. Patent No. 7,117,516, entitled "Method and System for Providing a Customized Media List." Plaintiff alleges certain features of the iTunes store infringe the patent. The complaint seeks unspecified damages and other relief. The Company filed an answer on July 2, 2007, denying all material allegations and asserting numerous affirmative defenses. The Company also asserted counterclaims for declaratory judgment of non-infringement and invalidity, as well as a counterclaim against Individual Networks LLC for infringement of U.S. Patent No. 5,724,567. The trial is scheduled for November 9, 2009. The Company has filed a petition with the United States Patent and Trademark Office requesting reexamination of U.S. Patent No. 7,117,516. The Markman hearing took place on October 8, 2008, and the Court issued its Markman ruling on January 12, 2009.

Mediostream, Inc. v. Acer America Corp. et al.

Plaintiff filed this action against the Company, Acer America Corp., Dell, Inc. and Gateway, Inc. on August 28, 2007 in the United States District Court for the Eastern District of Texas, Marshall Division, alleging infringement of U.S. Patent No. 7,009,655, entitled "Method and System for Direct Recording of Video Information onto a Disk Medium." An amended complaint was served on November 7, 2007. The amended complaint seeks unspecified damages and other relief. On January 25, 2008, the Company filed an answer to the complaint denying all material allegations and asserting numerous affirmative defenses and also filed a motion to transfer the case to the Northern District of California, which the Court denied. On December 4, 2008, the Company moved for reconsideration of the Court's denial of the motion to transfer. The Markman hearing is set for August 4, 2010 and trial is scheduled for January 4, 2011.

OPTi Inc. v. Apple Inc.

Plaintiff filed this action against the Company on January 16, 2007 in the United States District Court for the Eastern District of Texas, Marshall Division, alleging infringement of U.S. Patent Nos. 5,710,906, 5,813,036 and 6,405,291, all entitled "Predictive Snooping of Cache Memory for Master-Initiated Accesses." The complaint seeks unspecified damages and other relief. The Company filed an answer on April 17, 2007 denying all material allegations and asserting numerous affirmative defenses. The Company also asserted counterclaims for declaratory judgment of non-infringement and invalidity. The Markman hearing took place on November 26, 2008 and the Court issued its Markman ruling on December 5, 2008. On April 3, 2009, the Court ruled that the accused computers sold between 2005 and 2007 infringed the '291 patent. The Company requested a ruling as a matter of law that the infringement was not willful, and the Court will issue a ruling on that motion before trial. Trial on the issues of invalidity and damages commenced on April 17, 2009.

Saito Shigeru Kenchiku Kenkyusho (Shigeru Saito Architecture Institute) v. iPod; Apple Japan Inc. v. Shigeru Saito Architecture Institute

Plaintiff Saito filed a petition in the Japan Customs Office in Tokyo on January 23, 2007 alleging infringement by the Company of Japanese Patent No. 3852854, entitled “Touch Operation Input Device and Electronic Parts Thereof.” The petition sought an order barring the importation into Japan of fifth generation iPods and second generation iPod nanos. The Customs Office held a hearing on March 22, 2007. The Customs Office rejected the petition to bar importation and dismissed plaintiff’s case.

Apple Japan, Inc. filed a Declaratory Judgment action against Saito on February 6, 2007 in the Tokyo District Court, seeking a declaration that the ‘854 patent is invalid and not infringed. Saito filed a Counter Complaint for infringement seeking damages.

St-Germain v. Apple Canada, Inc.

Plaintiff filed this case in Montreal, Quebec, Canada, on August 5, 2005, seeking authorization to institute a class action for the refund by the Company of the Canadian Private Copying Levy that was applied to the iPod purchase price in Quebec between December 12, 2003 and December 14, 2004 but later declared invalid by the Canadian Court. The Company has completed a refund program for this levy. A class certification hearing took place January 13, 2006. On February 24, 2006, the Court granted class certification and notice was published during the last week of March 2006. The trial was conducted on October 15 and 16, 2007. On January 11, 2008, the Court issued a ruling in plaintiff’s favor. The Court ruled that despite the Company’s good faith efforts with the levy refund program, the Company must pay the amount claimed, and that the class is comprised of 20,000 persons who purchased an iPod in Quebec between December 12, 2003 and December 14, 2004. The Court ordered the Company to submit a statement of account showing the amount received by the Canadian Private Copying Collective, and the amount that has already been paid to class members in Quebec under the Company’s levy refund program. The Court also ordered the parties to submit further briefing regarding the collective recovery award by February 23, 2008. On February 11, 2008, the Company filed an appeal. The Company’s appeal is pending.

Texas MP3 Technologies Ltd v. Apple Inc. et al.

Plaintiff filed this action against the Company and other defendants on February 16, 2007 in the United States District Court for the Eastern District of Texas, Marshall Division, alleging infringement of U.S. Patent No. 7,065,417 entitled “MPEG Portable Sound Reproducing System and A Reproducing Method Thereof.” The complaint seeks unspecified damages and other relief. On July 12, 2007, the Company filed a petition for reexamination of the patent, which the U.S. Patent and Trademark Office granted. Plaintiff filed an amended complaint on August 1, 2007, adding the iPhone as an accused device. On August 2, 2007, the Company filed a motion to stay the litigation pending the outcome of the reexamination, which the Court denied. The Company filed an answer on August 20, 2007, denying all material allegations and asserting numerous affirmative defenses. The Company also asserted counterclaims for declaratory judgment of non-infringement and invalidity. The parties have reached a settlement.

The Apple iPod iTunes Antitrust Litigation (formerly Charoensak v. Apple Computer, Inc. and Tucker v. Apple Computer, Inc.); Somers v. Apple Inc.

The first-listed action is a consolidated case combining two cases previously pending under the names *Charoensak v. Apple Computer Inc.* (formerly *Slattery v. Apple Computer Inc.*) and *Tucker v. Apple Computer, Inc.* The original plaintiff (Slattery) in the Charoensak case filed a purported class action on January 3, 2005 in the United States District Court for the Northern District of California alleging various claims including alleged unlawful tying of music purchased on the iTunes Store with the purchase of iPods and unlawful acquisition or maintenance of monopoly market power. Plaintiff’s complaint alleged violations of §§1 and 2 of the Sherman Act (15 U.S.C. §§1 and 2), California Business & Professions Code §16700 et seq. (the Cartwright Act), California Business & Professions Code §17200 (unfair competition), common law unjust enrichment and common law monopolization. Plaintiff sought unspecified damages and other relief. The Company filed a motion to dismiss on February 10, 2005. On September 9, 2005, the Court denied the motion in part and granted it in part. Plaintiff filed an amended complaint on September 23, 2005 and the Company filed an answer on October 18, 2005. In August 2006, the Court dismissed Slattery without prejudice and allowed plaintiffs to file an amended complaint naming two new plaintiffs (Charoensak and Rosen). On November 2, 2006, the Company filed an answer to the amended complaint denying all material allegations and asserting numerous affirmative defenses.

The Tucker case was filed as a purported class action on July 21, 2006 in the United States District Court for the Northern District of California alleging various claims including alleged unlawful tying of music and videos purchased on the iTunes Store with the purchase of iPods and vice versa and unlawful acquisition or maintenance of

monopoly market power. The complaint alleges violations of §§1 and 2 of the Sherman Act (15 U.S.C. §§1 and 2), California Business & Professions Code §16700 et seq. (the Cartwright Act), California Business & Professions Code §17200 (unfair competition) and the California Consumer Legal Remedies Act. Plaintiff sought unspecified damages and other relief. On November 3, 2006, the Company filed a motion to dismiss the complaint. On December 20, 2006, the Court denied the motion to dismiss. On January 11, 2007, the Company filed an answer denying all material allegations and asserting numerous defenses.

On March 20, 2007, the Court consolidated the two cases. Plaintiffs filed a consolidated complaint on April 19, 2007. On June 6, 2007, the Company filed an answer to the consolidated complaint denying all material allegations and asserting numerous affirmative defenses. On July 17, 2008, plaintiffs filed a motion for class certification and on October 17, 2008, the Company filed its opposition to plaintiffs' motion. The class certification hearing took place on December 16, 2008. On December 22, 2008, the Court granted certification of the monopolization claims and denied without prejudice certification of the tying claims pending reconsideration of its denial of the Company's motion to dismiss. On February 13, 2009, the Company filed a motion for judgment on the pleadings as to plaintiffs' tying claims. The Court vacated the hearing date for this motion and the motion will be decided on the papers.

A related complaint, *Somers v. Apple Inc.*, was filed on December 31, 2007 in the United States District Court for the Northern District of California on behalf of a purported class of indirect purchasers, alleging various claims including alleged unlawful tying of music and videos purchased on the iTunes Store with the purchase of iPods and vice versa and unlawful acquisition or maintenance of monopoly market power. The complaint alleges violations of §§1 and 2 of the Sherman Act (15 U.S.C. §§1 and 2), California Business & Professions Code §16700 et seq. (the Cartwright Act), California Business & Professions Code §17200 (unfair competition) and the California Consumer Legal Remedies Act. Plaintiff seeks unspecified damages and other relief. On February 21, 2008, the Company filed an answer denying all material allegations and asserting numerous defenses. On February 23, 2009, plaintiff filed a motion for class certification. The Court has scheduled the class certification hearing for June 1, 2009.

Tse v. Apple Computer, Inc. et al.

Plaintiff Ho Keung Tse filed this action against the Company and other defendants on August 5, 2005 in the United States District Court for the District of Maryland alleging infringement of U.S. Patent No. 6,665,797 entitled "Protection of Software Again [sic] Against Unauthorized Use." The complaint seeks unspecified damages and other relief. The Company filed an answer on October 31, 2005 denying all material allegations and asserting numerous affirmative defenses. On October 28, 2005, the Company and the other defendants filed a motion to transfer the case to the Northern District of California, which was granted on August 31, 2006. On July 24, 2007, the Company filed a petition for reexamination of the patent, which the U.S. Patent and Trademark Office granted. On July 25, 2007, the Company filed a motion to stay the litigation pending the outcome of the reexamination, which the Court granted on October 4, 2007.

Union Fédérale des Consommateurs - Que Choisir v. Apple Computer France S.à.r.l. and iTunes S.à.r.l.

Plaintiff, a consumer association in France, filed this complaint on February 9, 2005 alleging that the above-listed entities are violating consumer law by (1) omitting to mention that the iPod is allegedly not compatible with music from online music services other than the iTunes Store and that the music from the iTunes Store is only compatible with the iPod and (2) allegedly tying the sales of iPods to the iTunes Store and vice versa. Plaintiff seeks damages, injunctive relief and other relief. The first hearing on the case took place on May 24, 2005. The Company's response to the complaint was served on November 8, 2005. Plaintiff's responsive pleading was filed on February 10, 2006. The Company filed a reply on June 6, 2006 and UFC filed a response on September 19, 2006. On April 7, 2009, the Court ordered the case withdrawn from its docket.

Vitt v. Apple Computer, Inc.

Plaintiff filed this purported class action on November 7, 2006 in the United States District Court for the Central District of California on behalf of a purported nationwide class of all purchasers of the iBook G4 alleging that the computer's logic board fails at an abnormally high rate. The complaint alleges violations of California Business & Professions Code §17200 (unfair competition) and California Business & Professions Code §17500 (false advertising). Plaintiff seeks unspecified damages and other relief. The Company filed a motion to dismiss on January 19, 2007, which the Court granted on March 13, 2007. Plaintiffs filed an amended complaint on March 26, 2007. The Company filed a motion to dismiss on August 16, 2007, which was heard on October 4, 2007. The Court has not yet issued a ruling.

Vogel v. Jobs et al. (2006 Action)

Plaintiffs filed this purported class action on August 24, 2006, in the United States District Court for the Northern District of California against the Company and certain of the Company's current and former officers and directors alleging improper backdating of stock option grants to maximize certain defendants' profits, failing to properly account for those grants and issuing false financial statements. On January 19, 2007, the Court appointed the New York City Employees' Retirement System as lead plaintiff. On March 23, 2007, plaintiffs filed a Consolidated Class Action Complaint. The Consolidated Complaint purports to be brought on behalf of several classes of holders of the Company's stock and asserts claims under Section 14(a) and 20(a) of the Securities Exchange Act as well as state law. The Consolidated Complaint seeks rescission of amendments to various stock option and other incentive compensation plans, an accounting and damages in an unspecified amount. Defendants filed a motion to dismiss on June 8, 2007, which was heard on September 7, 2007. On November 14, 2007, the Court issued an order dismissing all securities claims with prejudice, and held that any amended complaint could only be styled as a derivative case. On December 14, 2007, plaintiff filed a motion for leave to file a first amended consolidated class action complaint. On January 23, 2008, defendants filed an opposition to plaintiff's motion. Plaintiff's motion was heard on March 21, 2008. On May 14, 2008, the Court issued an order denying plaintiffs' motion for leave to amend. The court entered judgment dismissing the case on June 12, 2008. On June 17, 2008, plaintiffs filed a notice of appeal. Plaintiffs' appeal is pending.

Vogel v. Apple Inc., et al. (2008 Action)

Plaintiff filed this purported class action on June 27, 2008, in the United States District Court for the Northern District of California against the Company and certain of the Company's current and former officers and directors. The allegations, which arise out of the Company's past stock option practices, are similar to those in the 2006 *Vogel v. Jobs et al.* action that was dismissed on June 12, 2008, as described above. The complaint purports to be brought on behalf of several classes of holders of the Company's stock and asserts claims under Sections 10(b) and 20(a) of the Securities Exchange Act. The complaint seeks rescission of amendments to various stock option and other incentive compensation plans, an accounting and damages in an unspecified amount. On July 22, 2008, the Court stayed this case pending the appeal in the 2006 Action.

Item 1A. Risk Factors

Because of the following factors, as well as other factors affecting the Company's financial condition and operating results, past financial performance should not be considered to be a reliable indicator of future performance, and investors should not use historical trends to anticipate results or trends in future periods.

Economic conditions could materially adversely affect the Company.

The Company's operations and performance depend significantly on worldwide economic conditions. Uncertainty about current global economic conditions poses a risk as consumers and businesses may postpone spending in response to tighter credit, negative financial news and/or declines in income or asset values, which could have a material negative effect on demand for the Company's products and services. Demand also could differ materially from the Company's expectations since the Company generally raises prices on goods and services sold outside the U.S. to offset the effect of the strengthening of the U.S. dollar, a trend that has been very pronounced recently. Other factors that could influence demand include continuing increases in fuel and other energy costs, conditions in the residential real estate and mortgage markets, labor and healthcare costs, access to credit, consumer confidence, and other macroeconomic factors affecting consumer spending behavior. These and other economic factors could have a material adverse effect on demand for the Company's products and services and on the Company's financial condition and operating results.

The current financial turmoil affecting the banking system and financial markets and the possibility additional financial institutions may consolidate or go out of business have resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in fixed income, credit, currency, and equity markets. There could be a number of follow-on effects from the credit crisis on the Company's business, including the insolvency of key suppliers or their inability to obtain credit to finance development and/or manufacture products resulting in product delays; inability of customers, including channel partners, to obtain credit to finance purchases of the Company's products and/or customer, including channel partner, insolvencies; and failure of derivative counterparties and other financial institutions negatively impacting the Company's treasury operations. Other income and expense also could vary materially from expectations depending on gains or losses realized on the sale or

exchange of financial instruments; impairment charges resulting from revaluations of debt and equity securities and other investments; interest rates; cash balances; and changes in fair value of derivative instruments. The current volatility in the financial markets and overall economic uncertainty increase the risk the actual amounts realized in the future on the Company's financial instruments could differ significantly from the fair values currently assigned to them.

Uncertainty about current global economic conditions could also continue to increase the volatility of the Company's stock price.

The matters relating to the Company's past stock option practices and the restatement of the Company's consolidated financial statements may result in additional litigation.

The findings from the Company's investigation into its past stock option granting practices and the resulting restatement of prior financial statements in the Company's Annual Report on Form 10-K for the fiscal year September 30, 2006, gave rise to civil litigation and government investigations. As described in Part II, Item 1, "Legal Proceedings," several derivative and class action complaints have been filed in state and federal courts against the Company and certain current and former directors and officers pertaining to allegations relating to past stock option grants. The SEC also filed enforcement actions against two former officers of the Company. These enforcement actions have been settled.

No assurance can be given that additional actions will not be filed against the Company and current and former officers and directors as a result of past stock option practices. If the Company is subject to adverse findings, it could be required to pay damages and penalties and might face additional remedies that could have a material adverse effect on the Company's financial condition and operating results.

Global markets for personal computers, digital music devices, mobile communication devices, and related peripherals and services are highly competitive and subject to rapid technological change. If the Company is unable to compete effectively in these markets, its financial condition and operating results could be materially adversely affected.

The Company competes in global markets that are highly competitive and characterized by aggressive price cutting, with resulting downward pressure on gross margins, frequent introduction of new products, short product life cycles, evolving industry standards, continual improvement in product price/performance characteristics, rapid adoption of technological and product advancements by competitors, and price sensitivity on the part of consumers.

The Company's ability to compete successfully depends heavily on its ability to ensure a continuing and timely introduction of innovative new products and technologies to the marketplace. The Company believes it is unique in that it designs and develops nearly the entire solution for its personal computers, consumer electronics, and mobile communication devices, including the hardware, operating system, numerous software applications, and related services. As a result, the Company must make significant investments in research and development and as such, the Company currently holds a significant number of patents and copyrights and has registered and/or has applied to register numerous patents, trademarks and service marks. By contrast, many of the Company's competitors seek to compete primarily through aggressive pricing and very low cost structures. If the Company is unable to continue to develop and sell innovative new products with attractive margins or if other companies infringe on the Company's intellectual property, the Company's ability to maintain a competitive advantage could be negatively affected and its financial condition and operating results could be materially adversely affected.

In the market for personal computers and peripherals, the Company faces a significant number of competitors, many of which have broader product lines, lower priced products, and larger installed customer bases. Consolidation in this market has resulted in larger and potentially stronger competitors. Price competition has been particularly intense as competitors selling Windows-based personal computers have aggressively cut prices and lowered product margins. The Company also faces increased competition in key market segments, including consumer, SMB, education, enterprise, government, and creative markets. An increasing number of Internet devices that include software applications and are smaller and simpler than traditional personal computers compete for market share with the Company's existing products.

The Company is currently the only authorized maker of hardware using the Mac OS. The Mac OS has a minority market share in the personal computer market, which is dominated by makers of computers using competing operating systems, most notably Windows. The Company's financial condition and operating results depend substantially on the Company's ability to continually improve the Mac platform to maintain functional and design advantages. Use of unauthorized copies of the Mac OS on other companies' hardware products may result in decreased demand for the Company's hardware products, and could materially adversely affect the Company's financial condition and operating results.

The Company is currently focused on certain mobile communication devices, such as iPhone, consumer electronic devices, including the iPod family of digital music players, and third-party digital content and applications distribution. The Company faces substantial competition from companies that have significant technical, marketing, distribution, and other resources, as well as established hardware, software, and digital content supplier relationships. The Company also competes with illegitimate ways to obtain third-party digital content and applications. The Company has only recently entered the mobile communications market, and many of its competitors in the mobile communications market have significantly greater experience, product breadth, and distribution channels than the Company. Because some current and potential competitors have substantial resources and experience and a lower cost structure, they may be able to provide such products and services at little or no profit or even at a loss. The Company also expects competition to intensify as competitors attempt to imitate the Company's approach to providing these components seamlessly within their individual offerings or work collaboratively to offer integrated solutions.

The Company currently receives subsidies from its exclusive and non-exclusive carriers providing cellular network service for iPhone. There is no assurance that such subsidies will be continued at all or in the same amounts upon renewal of the Company's agreements with these carriers or in agreements the Company enters into with new carriers.

There can be no assurance the Company will be able to continue to provide products and services that compete effectively.

To remain competitive and stimulate customer demand, the Company must successfully manage frequent product introductions and transitions.

Due to the highly volatile and competitive nature of the personal computer, consumer electronics and mobile communication industries, the Company must continually introduce new products, services and technologies, enhance existing products and services, and effectively stimulate customer demand for new and upgraded products. The success of new product introductions depends on a number of factors, including timely and successful product development, market acceptance, the Company's ability to manage the risks associated with new products and production ramp issues, the availability of application software for new products, the effective management of purchase commitments and inventory levels in line with anticipated product demand, the availability of products in appropriate quantities and costs to meet anticipated demand, and the risk that new products may have quality or other defects in the early stages of introduction. Accordingly, the Company cannot determine in advance the ultimate effect of new product introductions and transitions on its financial condition and operating results.

The Company faces substantial inventory and other asset risk.

The Company records a write-down for product and component inventories that have become obsolete or exceed anticipated demand or net realizable value and accrues necessary cancellation fee reserves for orders of excess products and components. The Company also reviews its long-lived assets for impairment whenever events or changed circumstances indicate the carrying amount of an asset may not be recoverable. If the Company determines that impairment has occurred, it records a write-down equal to the amount by which the carrying value of the assets exceeds its fair market value. Although the Company believes its inventory, asset, and related provisions are currently adequate, no assurance can be given that, given the rapid and unpredictable pace of product obsolescence in the global personal computer, consumer electronics, and mobile communication industries, the Company will not incur additional inventory or asset related charges. Such charges have had, and could have, a material adverse effect on the Company's financial condition and operating results.

The Company must order components for its products and build inventory in advance of product announcements and shipments. Consistent with industry practice, components are normally acquired through a combination of purchase orders, supplier contracts, and open orders based on projected demand. Such purchase commitments typically cover forecasted component and manufacturing requirements for 30 to 150 days. Because the Company's markets are volatile, competitive and subject to rapid technology and price changes, there is a risk the Company will forecast incorrectly and order or produce excess or insufficient inventories of components or products. The Company's financial condition and operating results have been in the past and could be in the future materially adversely affected by the Company's ability to manage its inventory levels and respond to short-term shifts in customer demand patterns.

Future operating results depend upon the Company's ability to obtain key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable prices and in sufficient quantities.

Because the Company currently obtains certain key components including, but not limited to microprocessors, enclosures, certain LCDs, certain optical drives, and ASICs, from single or limited sources, the Company is subject to significant supply and pricing risks. Many of these and other key components that are available from multiple sources including, but not limited to NAND flash memory, DRAM and certain LCDs, are subject at times to industry-wide shortages and significant commodity pricing fluctuations. The Company has entered into certain agreements for the supply of key components including, but not limited to microprocessors, NAND flash memory, DRAM and LCDs at favorable pricing, but there is no guarantee that the Company will be able to extend or renew these agreements on similar favorable terms, or at all, upon expiration or otherwise obtain favorable pricing in the future. The follow-on effects from the credit crisis on the Company's key suppliers, referred to in "*Economic conditions could materially adversely affect the Company*" above, which is incorporated herein by reference, also could affect the Company's ability to obtain key components. Therefore, the Company remains subject to significant risks of supply shortages and/or price increases that can have a material adverse effect on its financial condition and operating results. The Company expects to experience decreases in its gross margin percentage in future periods, as compared to levels achieved during 2008 and 2007, due largely to the anticipated impact of product transitions, flat or reduced pricing on new and innovative products that have higher cost structures, both expected and potential future cost increases for key components, and higher logistical costs. For additional information refer to Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," under the subheading "Gross Margin," which is incorporated herein by reference.

The Company and other participants in the personal computer, consumer electronics and mobile communication industries compete for various components with other industries that have experienced increased demand for their products. The Company uses some custom components that are not common to the rest of the personal computer, consumer electronics or mobile communication industries. The Company's new products often utilize custom components available from only one source until the Company has evaluated whether there is a need for, and subsequently qualifies, additional suppliers. When a component or product uses new technologies, initial capacity constraints may exist until the suppliers' yields have matured. Continued availability of these components at acceptable prices, or at all, may be affected if those suppliers decided to concentrate on the production of common components instead of components customized to meet the Company's requirements. If the supply of a key single-sourced component for a new or existing product were delayed or constrained, if such components were available only at significantly higher prices, or if a key manufacturing vendor delayed shipments of completed products to the Company, the Company's financial condition and operating results could be materially adversely affected.

The Company depends on component and product manufacturing and logistical services provided by third parties, many of whom are located outside of the U.S.

Most of the Company's components and products are manufactured in whole or in part by a few third-party manufacturers. Many of these manufacturers are located outside of the U.S., and are geographically concentrated in single locations. The Company has also outsourced much of its transportation and logistics management. While these arrangements may lower operating costs, they also reduce the Company's direct control over production and distribution. It is uncertain what effect such diminished control will have on the quality or quantity of products or services, or the Company's flexibility to respond to changing conditions. In addition, the Company relies on third-party manufacturers to adhere to the Company's supplier code of conduct. Although arrangements with such

manufacturers may contain provisions for warranty expense reimbursement, the Company may remain responsible to the consumer for warranty service in the event of product defects. Any unanticipated product defect or warranty liability, whether pursuant to arrangements with contract manufacturers or otherwise, could have a material adverse effect on the Company's reputation, financial condition and operating results.

Final assembly of the Company's products is currently performed in the Company's manufacturing facility in Ireland, and by external vendors in California, Korea, China, and the Czech Republic. Currently, the supply and manufacture of many critical components is performed by sole-sourced third-party vendors in the U.S., China, Japan, Korea, Malaysia, Philippines, Taiwan, Thailand and Singapore. Sole-sourced third-party vendors in China perform final assembly of substantially all of the Company's portable products, including MacBook Pro, MacBook, MacBook Air, iPods, iPhones, and most of the Company's iMacs. If manufacturing or logistics in these locations is disrupted for any reason, including natural disasters, information technology system failures, military actions or economic, business, labor, environmental, public health, or political issues, the Company's financial condition and operating results could be materially adversely affected.

The Company relies on third-party digital content and applications, which may not be available to the Company on commercially reasonable terms or at all.

The Company contracts with certain third parties to offer their digital content and applications through the Company's iTunes Store. The Company pays substantial fees to obtain the rights to audio and video content. The Company's licensing arrangements with these third parties are short-term and do not guarantee the continuation or renewal of these arrangements on reasonable terms, if at all. Some third-party content providers currently or in the future may offer competing products and services, and could take action to make it more difficult or impossible for the Company to license their content in the future. Other content owners, providers or distributors may seek to limit the Company's access to, or increase the total cost of, such content. If the Company is unable to continue to offer a wide variety of content at reasonable prices with acceptable usage rules, or continue to expand its geographic reach, the Company's financial condition and operating results may be materially adversely affected.

Many third-party content providers require that the Company provide certain digital rights management ("DRM") and other security solutions. If these requirements change, the Company may have to develop or license new technology to provide these solutions. There is no assurance the Company will be able to develop or license such solutions at a reasonable cost and in a timely manner. In addition, certain countries have passed or may propose legislation that would force the Company to license its DRM, which could lessen the protection of content and subject it to piracy and also could affect arrangements with the Company's content providers.

The Company relies on access to third-party patents and intellectual property, and the Company's future results could be materially adversely affected if it is alleged or found to have infringed intellectual property rights.

Many of the Company's products are designed to include third-party intellectual property, and in the future the Company may need to seek or renew licenses relating to various aspects of its products and business methods. Although the Company believes that, based on past experience and industry practice, such licenses generally could be obtained on reasonable terms, there is no assurance that the necessary licenses would be available on acceptable terms or at all.

Because of technological changes in the global personal computer, consumer electronics and mobile communication industries, current extensive patent coverage, and the rapid issuance of new patents, it is possible that certain components of the Company's products and business methods may unknowingly infringe the patents or other intellectual property rights of third parties. From time to time, the Company has been notified that it may be infringing such rights. Regardless of merit, responding to such claims can consume significant time and expense. At present, the Company is vigorously defending more than 30 patent infringement cases, 13 of which were filed during fiscal 2009, and several pending claims are in various stages of evaluation. In certain cases, the Company may consider the desirability of entering into licensing agreements, although no assurance can be given that such licenses can be obtained on acceptable terms or that litigation will not occur. If the Company is found to be infringing such rights, it may be required to pay substantial damages. If there is a temporary or permanent injunction prohibiting the Company from marketing or selling certain products or a successful claim of infringement against the Company requires it to pay royalties to a third party, the Company's financial condition and operating results could be materially adversely affected, regardless of whether it can develop non-infringing technology. While in

management's opinion the Company does not have a potential liability for damages or royalties from any known current legal proceedings or claims related to the infringement of patent or other intellectual property rights that would individually or in the aggregate have a material adverse effect on its financial condition and operating results, the results of such legal proceedings cannot be predicted with certainty. Should the Company fail to prevail in any of the matters related to infringement of patent or other intellectual property rights of others or should several of these matters be resolved against the Company in the same reporting period, the Company's financial condition and operating results could be materially adversely affected.

With the June 2007 introduction of iPhone, the Company has begun to compete with mobile communication device companies that hold significant patent portfolios. Regardless of the scope or validity of such patents or the merits of any potential patent claims by competitors, the Company may have to engage in protracted litigation, enter into expensive agreements or settlements and/or modify its products. Any of these events could have a material adverse impact on the Company's financial condition and operating results.

The Company's future performance depends on support from third-party software developers. If third-party software applications and services cease to be developed and maintained for the Company's products, customers may choose not to buy the Company's products.

The Company believes decisions by customers to purchase its hardware products, including its Macs, iPods, and iPhones, are often based to a certain extent on the availability of third-party software applications and services. There is no assurance that third-party developers will continue to develop and maintain applications and services for the Company's products on a timely basis or at all, and discontinuance or delay of these applications and services could have a material adverse effect on the Company's financial condition and operating results.

With respect to its Mac products, the Company believes the availability of third-party software applications and services depends in part on the developers' perception and analysis of the relative benefits of developing, maintaining, and upgrading such software for the Company's products compared to Windows-based products. This analysis may be based on factors such as the perceived strength of the Company and its products, the anticipated revenue that may be generated, continued acceptance by customers of Mac OS X, and the costs of developing such applications and services. If the Company's minority share of the global personal computer market causes developers to question the Company's prospects, developers could be less inclined to develop or upgrade software for the Company's products and more inclined to devote their resources to developing and upgrading software for the larger Windows market. The Company's development of its own software applications and services may also negatively affect the decisions of third-party developers, such as Microsoft, Adobe, and Google, to develop, maintain, and upgrade similar or competitive software and services for the Company's products. Mac OS X Leopard, which became available in October 2007, includes a new feature that enables Intel-based Mac systems to run Microsoft Windows XP and Windows Vista operating systems. This feature may deter developers from creating software applications for Mac OS X if such applications are already available for the Windows platform.

With respect to iPhone and iPod touch, the Company relies on the continued availability and development of compelling and innovative software applications. Unlike third-party software applications for Mac products, the software applications for the iPhone and iPod touch platforms are distributed through a single distribution channel, the iTunes Store. The absence of multiple distribution channels, which are available for competing platforms, may limit the availability and acceptance of third-party applications by the Company's customers, thereby causing developers to curtail significantly, or stop, development for the Company's platforms. In addition, iPhone and iPod touch are subject to rapid technological change, and, if third-party developers are unable to keep up with this pace of change, third-party applications might not successfully operate and may result in dissatisfied customers. Further, if the Company develops its own software applications and services, such development may negatively affect the decisions of third-party developers to develop, maintain, and upgrade similar or competitive applications for the iPhone and iPod touch platforms. As with applications for the Company's Mac products, the availability and development of these applications also depend on developers' perceptions and analysis of the relative benefits of developing software for the Company's products rather than its competitors' products, including devices that use competing platforms. If developers focus their efforts on these competing platforms, the availability and quality of applications for the Company's devices may suffer.

The Company's products and services experience quality problems from time to time that can result in decreased sales and operating margin.

The Company sells highly complex hardware and software products and services that can contain defects in design and manufacture. Sophisticated operating system software and applications, such as those sold by the Company, often contain “bugs” that can unexpectedly interfere with the software’s intended operation. Defects may also occur in components and products the Company purchases from third parties. There can be no assurance the Company will be able to detect and fix all defects in the hardware, software and services it sells. Failure to do so could result in lost revenue, harm to reputation, and significant warranty and other expenses, and could have a material adverse impact on the Company’s financial condition and operating results.

The Company expects its quarterly revenue and operating results to fluctuate for a variety of reasons.

The Company’s profit margins vary among its products and its distribution channels. The Company’s software, accessories, and service and support contracts generally have higher gross margins than certain of the Company’s other products. Gross margins on the Company’s hardware products vary across product lines and can change over time as a result of product transitions, pricing and configuration changes, and component, warranty, and other cost fluctuations. The Company’s direct sales generally have higher associated gross margins than its indirect sales through its channel partners. In addition, the Company’s gross margin and operating margin percentages, as well as overall profitability, may be materially adversely impacted as a result of a shift in product, geographic or channel mix, new products, component cost increases, strengthening U.S. dollar, or price competition. The Company has typically experienced greater net sales in the first and fourth fiscal quarters compared to the second and third fiscal quarters due to seasonal demand related to the holiday season and the beginning of the school year, respectively. Furthermore, the Company sells more products from time-to-time during the third month of a quarter than it does during either of the first two months. Developments late in a quarter, such as lower-than-anticipated demand for the Company’s products, an internal systems failure, or failure of one of the Company’s key logistics, components supply, or manufacturing partners, could have a material adverse impact on the Company’s financial condition and operating results.

In certain countries, including the U.S., the Company relies on a single cellular network carrier to provide service for iPhone.

In each of the U.S., U.K., Germany, Spain, Ireland, and certain other countries, the Company has contracted with a single carrier to provide cellular network services for iPhone on an exclusive basis. If these exclusive carriers cannot successfully compete with other carriers in their markets on any basis, including but not limited to the quality and coverage of wireless voice and data services, performance and timely build-out of advanced wireless networks, and pricing and other terms of conditions of end-user contracts, or if these exclusive carriers fail to promote iPhone aggressively or favor other handsets in their promotion and sales activities or service plans, sales may be materially adversely affected.

The Company is subject to risks associated with laws, regulations and industry-imposed standards related to mobile communications devices.

Laws and regulations related to mobile communications devices in the many jurisdictions in which the Company operates are extensive and subject to change. Such changes, which could include but are not limited to restrictions on production, manufacture, distribution, and use of the device, locking the device to a carrier’s network, or mandating the use of the device on more than one carrier’s network, could have a material adverse effect on the Company’s financial condition and operating results.

Mobile communication devices, such as iPhone, are subject to certification and regulation by governmental and standardization bodies, as well as by cellular network carriers for use on their networks. These certification processes are extensive and time consuming, and could result in additional testing requirements, product modifications or delays in product shipment dates, which could have a material adverse effect on the Company’s financial condition and operating results.

The Company may be subject to information technology system failures, network disruptions and breaches in data security.

Information technology system failures, network disruptions and breaches of data security could disrupt the Company's operations by causing delays or cancellation of customer, including channel partner, orders, negatively affecting the Company's online offerings and services, impeding the manufacture or shipment of products, processing transactions and reporting financial results, resulting in the unintentional disclosure of customer or Company information, or damage to the Company's reputation. While management has taken steps to address these concerns by implementing sophisticated network security and internal control measures, there can be no assurance that a system failure or data security breach will not have a material adverse effect on the Company's financial condition and operating results.

The Company's stock price continues to be volatile.

The Company's stock has at times experienced substantial price volatility due to a number of factors, including but not limited to, variations between its actual and anticipated financial results, announcements by the Company and its competitors, and uncertainty about current global economic conditions. The stock market as a whole also has experienced extreme price and volume fluctuations that have affected the market price of many technology companies in ways that may have been unrelated to these companies' operating performance. Furthermore, the Company believes its stock price reflects high future growth and profitability expectations. If the Company fails to meet these expectations its stock price may significantly decline.

Political events, war, terrorism, public health issues, natural disasters and other circumstances could materially adversely affect the Company.

War, terrorism, geopolitical uncertainties, public health issues, and other business interruptions have caused and could cause damage or disruption to international commerce and the global economy, and thus could have a strong negative effect on the Company, its suppliers, logistics providers, manufacturing vendors and customers, including channel partners. The Company's business operations are subject to interruption by natural disasters, fire, power shortages, terrorist attacks, and other hostile acts, labor disputes, public health issues, and other events beyond its control. Such events could decrease demand for the Company's products, make it difficult or impossible for the Company to make and deliver products to its customers, including channel partners, or to receive components from its suppliers, and create delays and inefficiencies in the Company's supply chain. Should major public health issues, including pandemics, arise, the Company could be negatively affected by more stringent employee travel restrictions, additional limitations in freight services, governmental actions limiting the movement of products between regions, delays in production ramps of new products, and disruptions in the operations of the Company's manufacturing vendors and component suppliers. The majority of the Company's research and development activities, its corporate headquarters, information technology systems, and other critical business operations, including certain component suppliers and manufacturing vendors, are located near major seismic faults. Because the Company does not carry earthquake insurance for direct quake-related losses and significant recovery time could be required to resume operations, the Company's financial condition and operating results could be materially adversely affected in the event of a major earthquake.

The Company's success depends largely on the continued service and availability of key personnel.

Much of the Company's future success depends on the continued service and availability of skilled personnel, including its CEO, its executive team and key employees in technical, marketing and staff positions. Experienced personnel in the technology industry are in high demand and competition for their talents is intense, especially in the Silicon Valley, where most of the Company's key employees are located. The Company's CEO has taken a medical leave of absence until the end of June and has been involved in major strategic decisions during his leave. There can be no assurance that the Company will continue to successfully retain key personnel.

In addition, the Company has relied on equity awards in the form of stock options and restricted stock units as one means for recruiting and retaining highly skilled talent. Significant adverse volatility in the Company's stock price could result in a stock option's exercise price exceeding the underlying stock's market value or a significant deterioration in the value of restricted stock units granted, thus lessening the effectiveness of stock-based awards for retaining employees.

Unfavorable results of legal proceedings could materially adversely affect the Company.

The Company is subject to various legal proceedings and claims that have arisen out of the ordinary conduct of its business and are not yet resolved and additional claims may arise in the future. Results of legal proceedings cannot be predicted with certainty. Regardless of its merit, litigation may be both time-consuming and disruptive to the Company's operations and cause significant expense and diversion of management attention. In recognition of these considerations, the Company may enter into material settlements. Should the Company fail to prevail in certain matters, or should several of these matters be resolved against the Company in the same reporting period, the Company may be faced with significant monetary damages or injunctive relief against it that would materially adversely affect a portion of its business and might materially affect the Company's financial condition and operating results.

The Company's business is subject to the risks of international operations.

The Company derives a large and growing portion of its revenue and earnings from its international operations. As a result, its financial condition and operating results could be significantly affected by risks associated with international activities, including economic and labor conditions, political instability, tax laws (including U.S. taxes on foreign subsidiaries), and changes in the value of the U.S. dollar versus local currencies. Margins on sales of the Company's products in foreign countries, and on sales of products that include components obtained from foreign suppliers, could be materially adversely affected by foreign currency exchange rate fluctuations and by international trade regulations, including tariffs and antidumping penalties.

The Company's primary exposure to movements in foreign currency exchange rates relate to non-U.S. dollar denominated sales in Europe, Japan, Australia, Canada, and certain parts of Asia, as well as non-U.S. dollar denominated operating expenses incurred throughout the world. Weakening of foreign currencies relative to the U.S. dollar will adversely affect the U.S. dollar value of the Company's foreign currency-denominated sales and earnings, and generally will lead the Company to raise international pricing, potentially reducing demand for the Company's products. In some circumstances, due to competition or other reasons, the Company may decide not to raise local prices to the full extent of the dollar's strengthening, or at all, which would adversely affect the U.S. dollar value of the Company's foreign currency denominated sales and earnings. Conversely, a strengthening of foreign currencies, while generally beneficial to the Company's foreign currency-denominated sales and earnings, could cause the Company to reduce international pricing, thereby limiting the benefit. Additionally, strengthening of foreign currencies may also increase the Company's cost of product components denominated in those currencies, thus adversely affecting gross margins.

The Company has used derivative instruments, such as foreign exchange forward and option positions, to hedge certain exposures to fluctuations in foreign currency exchange rates. The use of such hedging activities may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place.

The Company's retail business has required and will continue to require a substantial investment and commitment of resources and is subject to numerous risks and uncertainties.

Through March 28, 2009, the Company had opened 252 retail stores. The Company's retail stores have required substantial fixed investment in equipment and leasehold improvements, information systems, inventory, and personnel. The Company also has entered into substantial operating lease commitments for retail space with terms ranging from 5 to 20 years, the majority of which are for 10 years. Certain stores have been designed and built to serve as high-profile venues to promote brand awareness and serve as vehicles for corporate sales and marketing activities. Because of their unique design elements, locations and size, these stores require substantially more investment than the Company's more typical retail stores. Due to the high fixed cost structure associated with the Retail segment, a decline in sales or the closure or poor performance of individual or multiple stores could result in significant lease termination costs, write-offs of equipment and leasehold improvements, and severance costs that could have a material adverse effect on the Company's financial condition and operating results.

Many factors unique to retail operations, some of which are beyond the Company's control, pose risks and uncertainties that could have a material adverse effect on the Retail segment's future results, cause its actual results to differ from anticipated results and have a material adverse effect on the Company's financial condition and operating results. These risks and uncertainties include, among other things, macro-economic factors that could have a negative effect on general retail activity, as well as the Company's inability to manage costs associated with store

construction and operation, inability to sell third-party products at adequate margins, failure to manage relationships with existing retail channel partners, more challenging environment in managing retail operations outside the U.S., costs associated with unanticipated fluctuations in the value of retail inventory, and inability to obtain and renew leases in quality retail locations at a reasonable cost.

Investment in new business strategies and initiatives could disrupt the Company's ongoing business and present risks not originally contemplated.

The Company has invested, and in the future may invest, in new business strategies or acquisitions. Such endeavors may involve significant risks and uncertainties, including distraction of management from current operations, insufficient revenue to offset liabilities assumed and expenses associated with the strategy, inadequate return of capital, and unidentified issues not discovered in the Company's due diligence. Because these new ventures are inherently risky, no assurance can be given that such strategies and initiatives will be successful and will not have a material adverse effect on the Company's financial condition and operating results.

The Company's future operating performance depends on the performance of distributors, carriers, and other resellers.

The Company distributes its products through wholesalers, resellers, national and regional retailers, value-added resellers, and cataloguers, many of whom distribute products from competing manufacturers. The Company also sells many of its products and resells third-party products in most of its major markets directly to end-users, certain education customers, and certain resellers through its online and retail stores. iPhone is distributed through the Company, its cellular network carriers' distribution channels, and certain third-party resellers.

Many resellers operate on narrow product margins and have been negatively affected in the past by weak economic conditions. Some resellers have perceived the expansion of the Company's direct sales as conflicting with their business interests as distributors and resellers of the Company's products. Such a perception could discourage resellers from investing resources in the distribution and sale of the Company's products or lead them to limit or cease distribution of those products. The Company's financial condition and operating results could be materially adversely affected if the financial condition of these resellers weakens, if resellers stopped distributing the Company's products, or if uncertainty regarding demand for the Company's products caused resellers to reduce their ordering and marketing of the Company's products. The Company has invested and will continue to invest in programs to enhance reseller sales, including staffing selected resellers' stores with Company employees and contractors and improving product placement displays. These programs could require a substantial investment while providing no assurance of return or incremental revenue.

The Company is exposed to credit risk and fluctuations in the market values of its investment portfolio.

Although the Company has not recognized any material losses on its cash, cash equivalents and marketable securities, future declines in their market values could have a material adverse effect on the Company's financial condition and operating results. Given the global nature of its business, the Company has investments both domestically and internationally. Additionally, the Company's overall investment portfolio is often concentrated in the financial sector, which has been negatively impacted by the recent market liquidity conditions. Credit ratings and pricing of these investments can be negatively impacted by liquidity, credit deterioration or losses, financial results, or other factors. As a result, the value or liquidity of the Company's cash, cash equivalents and marketable securities could decline and result in a material impairment, which could have a material adverse effect on the Company's financial condition and operating results.

The Company is exposed to credit risk on its accounts receivable and prepayments related to long-term supply agreements. This risk is heightened during periods when economic conditions worsen.

A substantial majority of the Company's outstanding trade receivables are not covered by collateral or credit insurance. The Company also has unsecured non-trade receivables resulting from purchases of components by contract manufacturers and other vendors that manufacture sub-assemblies or assemble final products for the

Company. In addition, the Company has made prepayments associated with long-term supply agreements to secure supply of certain inventory components. While the Company has procedures to monitor and limit exposure to credit risk on its trade and non-trade receivables as well as long-term prepayments, there can be no assurance such procedures will effectively limit its credit risk and avoid losses, which could have a material adverse effect on the Company's financial condition and operating results.

The Company is subject to risks associated with laws and regulations related to health, safety and environmental protection.

The Company's products and services, and the production and distribution of those goods and services, are subject to a variety of laws and regulations. These may require the Company to offer customers the ability to return a product at the end of its useful life and place responsibility for environmentally safe disposal or recycling with the Company. Such laws and regulations have been passed in several jurisdictions in which the Company operates, including various countries within Europe and Asia, certain Canadian provinces and certain states within the U.S. Although the Company does not anticipate any material adverse effects based on the nature of its operations and the thrust of such laws, there is no assurance such existing laws or future laws will not have a material adverse effect on the Company's financial condition and operating results.

Changes in the Company's tax rates could affect its future results.

The Company's future effective tax rates could be affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, or changes in tax laws or their interpretation. The Company is subject to the continuous examination of its income tax returns by the Internal Revenue Service and other tax authorities. The Company regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of its provision for taxes. There can be no assurance that the outcomes from these examinations will not have a material adverse effect on the Company's financial condition and operating results.

The Company is subject to risks associated with the availability and coverage of insurance.

For certain risks, the Company does not maintain insurance coverage because of cost and/or availability. Because the Company retains some portion of its insurable risks, and in some cases self-insures completely, unforeseen or catastrophic losses in excess of insured limits could have a material adverse effect on the Company's financial condition and operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

The Annual Meeting of Shareholders ("Annual Meeting") was held on February 25, 2009. Management Proposal 1 was approved and shareholder Proposals 2, 3, 4 and 5 were not approved. The proposals below are described in detail in the Company's definitive proxy statement dated January 7, 2009, for the Annual Meeting held on February 25, 2009. Abstentions and broker non-votes were counted for purposes of determining whether a quorum was present. Shares not present at the Annual Meeting and abstentions had no effect on the election of directors (Proposal No. 1). For the purpose of determining whether the shareholders approved all other matters, abstentions had the same effect as "AGAINST" votes.

The results are as follows:

Proposal 1

The individuals listed below received the highest number of affirmative votes of the outstanding shares of the Company's common stock present or represented by proxy and voting at the Annual Meeting, in each case constituting a majority of the total outstanding shares, and were elected at the Annual Meeting to serve a one-year term on the Board of Directors.

	<u>For</u>	<u>Authority Withheld</u>
William V. Campbell	680,762,438	67,595,049
Millard S. Drexler	705,799,152	42,558,335
Albert A. Gore, Jr.	690,190,279	58,167,208
Steven P. Jobs	731,539,883	16,817,604
Andrea Jung	727,517,555	20,839,932
Arthur D. Levinson, Ph.D.	679,106,127	69,251,360
Eric E. Schmidt, Ph.D.	730,634,441	17,723,046
Jerome B. York	687,890,236	60,467,251

Proposal 2

The shareholder proposal requesting that the Board of Directors provide a report on political contributions and expenditures, as described in the proxy materials. This proposal was defeated with approximately 83.66% of the shares present or represented and voting at the Annual Meeting voting against or abstaining.

	<u>For</u>	<u>Against</u>	<u>Abstained</u>	<u>Broker Non-Vote</u>
Votes Cast	89,996,866	355,835,229	105,006,117	197,519,275

Proposal 3

The shareholder proposal requesting that the Board of Directors adopt principles for health care reform, as described in the proxy materials. This proposal was defeated with approximately 95.48% of the shares present or represented and voting at the Annual Meeting voting against or abstaining.

	<u>For</u>	<u>Against</u>	<u>Abstained</u>	<u>Broker Non-Vote</u>
Votes Cast	24,873,495	413,914,953	112,049,880	197,519,159

Proposal 4

The shareholder proposal requesting that the Board of Directors prepare a sustainability report, as described in the proxy materials. This proposal was defeated with approximately 93.63% of the shares present or represented and voting at the Annual Meeting voting against or abstaining.

	<u>For</u>	<u>Against</u>	<u>Abstained</u>	<u>Broker Non-Vote</u>
Votes Cast	35,088,343	405,326,486	110,423,508	197,519,150

Proposal 5

The shareholder proposal requesting that the Board of Directors adopt a policy to provide shareholders an advisory vote on compensation, as described in the proxy materials. This proposal was defeated with approximately 51.66% of the shares present or represented and voting at the Annual Meeting voting against or abstaining.

	<u>For</u>	<u>Against</u>	<u>Abstained</u>	<u>Broker Non-Vote</u>
Votes Cast	266,263,695	249,489,573	35,084,314	197,519,905

Business Conduct
The way we do business
worldwide

Business Conduct

The way we do business worldwide

Apple conducts business ethically, honestly, and in full compliance with all laws and regulations. This applies to every business decision in every area of the company worldwide.

Apple's Principles of Business Conduct

Apple's success is based on creating innovative, high-quality products and services and on demonstrating integrity in every business interaction. Apple's principles of business conduct define the way we do business worldwide. These principles are:

- **Honesty.** Demonstrate honesty and high ethical standards in all business dealings.
- **Respect.** Treat customers, suppliers, employees, and others with respect and courtesy.
- **Confidentiality.** Protect the confidentiality of Apple's information and the information of our customers, suppliers, and employees.
- **Community.** Conduct business in a way that benefits the communities in which we operate.
- **Compliance.** Ensure that business decisions comply with all applicable laws and regulations.

Making the Right Decisions

When facing a tough decision:

- **Use good judgment.** Apply Apple's principles of business conduct, review our policies, review legal requirements, and then decide what to do.
- **Need some help?** When in doubt about how to proceed, discuss pending decisions with your manager, your Human Resources representative, or the Legal Department. If you need more support, contact the Business Conduct Helpline.

Your Responsibilities

Apple's business conduct policy and principles apply to employees, independent contractors, consultants, and others who do business with Apple. All such individuals are expected to comply with Apple's business conduct policy and principles and with all applicable legal requirements. Apple retains the right to discipline (up to and including termination of employment) or end working relationships with those who do not comply.

To what extent may I use an existing customer list to market other Apple products or services?

Before using a customer list for marketing, sales, or other activities, talk to your manager or the Legal Department. Using an existing customer list may or may not be appropriate.

Where can I learn more about information protection and nondisclosure agreements?

View the Apple policy on Confidential, Proprietary, and Trade Secret Information.

Where can I get a nondisclosure agreement?

In the U.S., see the forms Apple provides for nondisclosure agreements. Outside the U.S., consult your local legal team.

Why is the source of business intelligence an issue, as long as the information helps Apple?

Obtaining information illegally or unethically could damage Apple's reputation and in some cases could subject Apple to legal liability. For example, using illegally or unethically obtained information in a bid to the government could result in disqualification from future bidding and in criminal charges.

May I keep my personal music on my computer at work?

If you are authorized to make copies of the music for personal use (for example, you own the original CD or you purchased the music on iTunes), you may keep the music on your computer.

Customer Focus

Every product we make and every service we provide is for our customers. Focus on providing innovative, high-quality products and services and on demonstrating integrity in every business interaction. Always apply Apple's principles of business conduct.

Customer and Third-Party Information

Customers, suppliers, and others disclose confidential information to Apple for business purposes. It is the responsibility of every Apple employee to protect and maintain the confidentiality of this information. Failure to protect customer and third-party information may damage relations with customers, suppliers, or others and may result in legal liability. See the Apple Customer Privacy Policy.

Nondisclosure Agreements

When dealing with a supplier, vendor, or other third party, never share confidential information without the approval of your manager. Also, never share confidential information outside Apple (for example, with vendors, suppliers, or others) unless a nondisclosure agreement is in place. These agreements document the need to maintain the confidentiality of the information. Original copies of nondisclosure agreements must be forwarded to the Legal Department. Always limit the amount of confidential information shared to the minimum necessary to address the business need.

Obtaining and Using Business Intelligence

Apple legitimately collects information on customers and markets in which we operate. Apple does not seek business intelligence by illegal or unethical means, and competitors may not be contacted for the purpose of obtaining business intelligence. Sometimes information is obtained accidentally or is provided to Apple by unknown sources. In such cases, it may be unethical to use the information, and you should immediately contact your manager, the Legal Department, or the Business Conduct Helpline to determine how to proceed.

Third-Party Intellectual Property

It is Apple's policy not to knowingly use the intellectual property of any third party without permission or legal right. If you are told or suspect that Apple may be infringing an intellectual property right, including patents, copyrights, trademarks, or trade secrets owned by a third party, you should contact the Legal Department.

Copyright-Protected Content

Never use or copy software, music, videos, publications, or other copyright-protected content at work or for business purposes unless you or Apple are legally permitted to use or make copies of the protected content. Never use Apple facilities or equipment to make or store unauthorized copies.

Are business meals, travel, and entertainment considered gifts?

Yes. Anything of value given or received is considered a gift.

Can I avoid these rules if I pay for gifts to customers or business associates myself?

No. If the gift is given for business reasons and you are representing Apple, the gift rules apply.

Giving and Receiving Business Gifts

Employees may not give or receive gifts or entertainment to or from current or potential vendors, suppliers, customers, or other business associates unless all of the following conditions are met:

- **Nominal value.** The value of the gift is less than US\$150. Exceptions must be approved by your Vice President (for Vice President–level employees, exceptions must be approved by your manager).
- **Customary.** The item is a customary business gift and would not embarrass Apple if publicly disclosed.
- **No favored treatment.** The purpose of the gift is not to obtain special or favored treatment.
- **Legal.** Giving or accepting the gift is legal in the location and under the circumstances where given.
- **Recipient is not a government official.** Never provide a gift, including meals, entertainment, and other items of value, to a U.S. or foreign government official without checking with Government Affairs in advance. See page 7 for more information on gifts to government officials.

This policy does not preclude Apple as an organization from receiving and evaluating complimentary products or services. It is not intended to preclude Apple from giving equipment to a company or organization, provided the gift is openly given, consistent with legal requirements, and in Apple's business interests. The policy also does not preclude the attendance of Apple employees at business-related social functions, if attendance is approved by management and does not create a conflict of interest.

What is an example of a kickback?

Apple provides discounts to certain customers. However, if a customer gets an inappropriate discount, and a sales representative gets a payment in return, this is a kickback.

What is an example of a side deal?

In a sales environment, a side deal may involve a guarantee to accept back unsold products or other special agreements to encourage certain customers to place larger orders. Such a side deal, whether written or oral, can impact Apple's potential liability with respect to that transaction and may make it inappropriate for Apple to recognize revenue on the products sold, affecting the accuracy of Apple's books and records. Side deals or side letters made outside of Apple's formal contracting and approvals process are prohibited.

Kickbacks

Kickbacks are payments or items of value given to individuals in connection with the purchase or sale of products or services, typically for providing a discount in a sales agreement. Employees are prohibited from giving or receiving kickbacks.

Side Deals or Side Letters

All of the terms and conditions of agreements entered into by Apple must be formally documented. Contract terms and conditions define the key attributes of Apple's rights, obligations, and liabilities and can also dictate the accounting treatment given to a transaction. Making business commitments outside of the formal contracting process, through side deals, "side letters," or otherwise, is unacceptable. You should not make any oral or written commitments that create a new agreement or modify an existing agreement without approval through the formal contracting process. In particular, all commitments must have visibility to Finance so Apple can ensure it is properly accounting for each transaction. If you have knowledge of any side deal, side letter, or agreement made outside of the formal contracting process, you should report it immediately to your manager, your Human Resources representative, or the Legal Department. You may also contact the Business Conduct Helpline.

What can I do if a reseller complains to me about low prices at another reseller?

Advise the reseller that you can't discuss or attempt to influence pricing of other parties, since this could violate antitrust laws.

Competition and Trade Practices

Laws regulating competition and trade practices vary around the world, but certain activities, such as price fixing and agreeing with a competitor to allocate customers, are almost always illegal.

You should not:

- Agree with competitors or exchange information with competitors on prices, policies, contract terms, costs, inventories, marketing plans, or capacity plans.
- Agree with a competitor that the competitor will sell goods and services to Customer A (and you will not), and that you will sell goods and services to Customer B (and your competitor will not).
- Agree with resellers on the resale pricing of Apple products without Legal Department approval.
- Require vendors to purchase Apple products in order to sell products or services to Apple.
- Describe the products or services of competitors inaccurately to promote Apple products or services.
- Engage in any pricing or other practices that could defraud a supplier or others.
- Violate fair bidding practices, including bidding quiet periods.

What is an example of an endorsement?

A friend writes a great book on software design and asks you to endorse the book by making a statement on the back cover. If you make such an endorsement, don't include your job title or affiliation with Apple.

Endorsements

When representing Apple, never endorse a product or service of another business or an individual, unless the endorsement has been approved by your manager. This does not apply to products of other businesses that are sold by Apple.

Open Source Software

Open source software is software for which the source code is available without charge under a free software or open source license. Before using or modifying any open source software for Apple infrastructure or as part of an Apple product or service development effort, you must a) review Apple's Open Source Policy and b) contact the Legal Department for approval using the forms referenced in that Policy.

Tell me more about pricing products that are sold to U.S. and non-U.S. governments.

Governments shouldn't be charged more for our products or services than Apple charges other customers for the same products or services. There are laws that make it a crime to overcharge the U.S. government. Some other countries have similar laws.

Can I avoid a gift limitation by paying for a gift, such as lunch or golf, myself?

No. If you are representing Apple, any gift to a government employee would be viewed as coming from Apple.

What is considered a gift to a U.S. or foreign official?

In most cases, anything of value that is given is considered a gift. This includes items such as meals, golf, entertainment, and product samples. Cash is never an acceptable gift. Typically, giving cash is viewed as a bribe or kickback and is against Apple policy.

What is the difference between a facilitating payment and an illegal payment?

A facilitating payment is anything of value given to a foreign official for the purpose of expediting performance of certain routine, nondiscretionary activities. An illegal payment is anything of value given to a foreign official for the purpose of obtaining or retaining business or to secure an improper advantage.

Who is considered a foreign official?

For purposes of the Foreign Corrupt Practices Act, a "foreign official" is any official or employee of a foreign government, a public international organization (such as the European Commission), any department or agency thereof, or any person acting in an official capacity. This could also include an official of a wholly or substantially state-owned business enterprise, such as a state-owned public utility.

Governments as Customers

Governments are unique customers for Apple. Governments often place special bidding, pricing, disclosure, and certification requirements on firms with which they do business. Discuss these requirements with the appropriate Apple attorney before bidding for government business. For example, Apple may have to certify that it is supplying the government with the lowest price charged to Apple's commercial customers. Apple may also have to certify that its prices have been arrived at independently—that is, without collaboration with a third party.

Gifts to U.S. Officials

It may be illegal to give a gift, even an inexpensive meal or a T-shirt, to a government employee. The rules vary depending on the location of the employee (for example, rules may vary by state, school district, and city) and the position held by the employee (for example, there may be different rules for various elected and nonelected officials).

To prevent violations, review planned gifts to government officials with Government Affairs in advance of giving a gift.

Gifts to Non-U.S. Officials

In many countries it is considered common courtesy to provide token/ceremonial gifts to government officials on certain occasions to help build relationships. Check local requirements and review any such gifts exceeding US\$25 in advance with the Legal Department. For meals, the US\$25 limit does not necessarily apply. Check here for value limits by country on meals to non-U.S. public officials and employees. Meals at any value should be avoided with officials from government agencies where Apple has a pending application, proposal, or other business.

Offering or giving anything of value to a foreign official for the purpose of obtaining or retaining business or to secure any improper advantage is illegal. There is a very limited exception for "facilitating payments" to foreign officials to expedite performance of routine activities such as obtaining permits or licenses; processing visas and work permits; or providing police, mail, or inspection services. All facilitating payments must be preauthorized by the Legal Department and properly recorded and accounted for. Check with your manager or finance representative to determine the appropriate manner of reporting them.

For more information on the facilitating payments exception, see Apple's Foreign Corrupt Practices Act Policy.

Political Contributions

Apple contributes selectively to political candidates and committees. All corporate political contributions, whether monetary or in-kind (such as the donation/lending of equipment or technical services to a campaign), must be approved in advance by Apple Government Affairs. Employees may not use Apple assets (including employee work time, or use of Apple premises, equipment, or funds) to personally support candidates and campaigns.

It is illegal for Apple to reimburse an employee for a contribution. For more information, see the Apple Corporate Political Compliance Policy and the Political Contributions and Expenditures Policy.

What if I'd like to explore hiring a current government employee as a consultant?

Contact the Legal Department before beginning any negotiations.

Hiring Government Employees

U.S. laws limit the duties and types of services that former U.S. government and military employees may perform as employees or consultants of Apple. In the U.S., employment negotiations with government employees are prohibited while the employees are participating in a matter involving Apple's interests.

Trade Restrictions and Export Controls

Many countries periodically impose restrictions on exports and other dealings with certain other countries, persons, or groups. Export laws may control trading of commodities or technologies that are considered to be strategically important because they have the potential to be used for military purposes. Laws may cover travel to or from a sanctioned country, imports or exports, new investments, and other related topics. Certain laws also prohibit support of boycott activities. See Apple's Export Control policy for more information.

If your work involves the sale or shipment of products, technologies, or services across international borders, check with the Export Department to ensure compliance with any laws or restrictions that apply.

How do I get more information regarding Apple's environmental, health, and safety programs?

Visit the Environment+Safety site.

Environment, Health, and Safety

Apple operates in a manner that conserves the environment and protects the safety and health of our employees. Conduct your job safely and consistent with applicable environmental, health, and safety requirements. Use good judgment and always put the environment, safety, and health first. Be proactive in anticipating and dealing with environmental, health, and safety risks.

What if I want to get more involved in community activities?

Contact Community Affairs. This group promotes, supports, and facilitates employees' involvement in community volunteer activities. Outside the U.S., check with your local Public Relations team.

Community Activities

At Apple, we comply with all laws and regulations and operate in ways that benefit the communities in which we conduct business. Apple encourages you to uphold this commitment to the community in all your activities.

If you hold an elected or appointed public office while employed at Apple, advise Government Affairs. Excuse yourself from involvement in any decisions that might create or appear to create a conflict of interest.

What are assets?

Assets include Apple's extremely valuable proprietary information (such as intellectual property, confidential business plans, unannounced product plans, sales and marketing strategies, and other trade secrets); as well as physical assets like cash, equipment, supplies, and product inventory.

Where can I learn more about information protection and nondisclosure agreements?

View the Apple policy on Confidential, Proprietary, and Trade Secret Information.

If I believe that it is appropriate to disclose confidential proprietary information to a vendor or other third party, what should I do?

First, verify that there is a business need for the disclosure. Second, obtain your manager's approval for the disclosure. Third, be sure that a nondisclosure agreement is in place with the vendor or third party, and that you forward the original copy of the agreement to the Legal Department. If you are still unsure, check with the Legal Department before making the disclosure.

How do I identify confidential Apple information in documents?

Mark these documents "Apple Confidential."

What if I have a specific question on the use of the Apple name, names of products or services, or the Apple logo?

Please direct questions about the Apple corporate identity to corpID@apple.com.

How can I find out more about patents?

Visit Apple's Patent Information site.

Protecting Apple's Assets and Information

Protect Apple's assets:

- As an Apple employee you have a personal responsibility to protect Apple's property. You should follow all security procedures, and be on the lookout for any instances you believe could lead to loss, misuse, or theft of company property. You should protect physical assets such as equipment, supplies, cash, and charge cards. And you should use extreme care to protect from disclosure to any third parties Apple's proprietary information, including without limitation technical product information, information related to current and future products and services, confidential market research, sales and marketing plans, nonpublic earnings or financial data, and organizational charts and information.
- Follow procurement policies and procedures when acquiring goods or services on behalf of Apple, avoiding any real or apparent conflict of interest. For more information on procurement policies and procedures, talk to your manager or visit Apple Procurement.
- Use Apple's assets in a manner that prevents damage, waste, misuse, or theft. Use assets only for legal and ethical purposes.
- Dispose of assets only with appropriate approval and in compliance with applicable policies. Before disposing of assets, discuss your plans with your manager.

Confidential Apple Information

One of Apple's greatest assets is information about our products and services, including future product offerings. Never disclose confidential operational, financial, trade secret, or other business information without verifying with your manager that such disclosure is appropriate. Typically, disclosure of this information is very limited, and the information may be shared with vendors, suppliers, or other third parties only after a nondisclosure agreement is in place. Even within Apple, confidential information should be shared only on a need-to-know basis. The Intellectual Property Agreement you signed when you joined Apple defines your duty to protect information.

The Apple Identity and Trademarks

The Apple name, names of products (such as iPod), names of services (such as AppleCare), tag lines (such as "Don't steal music"), and logos (such as the familiar Apple logo) collectively create the Apple identity. Before publicly using the Apple name, product names, service names, tag lines, or the Apple logo, visit the Marketing site and select "Corporate Identity" for specific guidelines. Before using product names, service names, tag lines, or logos of third parties, check with the Legal Department. Also keep in mind that there are corporate identity guidelines on how names and logos can be used and presented; for example, the size of the Apple logo and the amount of white space surrounding the logo.

Apple Inventions and Patents

Apple's practice is to consider for patenting the inventions of its employees, regardless of whether the inventions are implemented in actual products. If you are involved in product development, you should contact the Legal Department regarding the patentability of your work. Be alert to possible infringement of Apple's patents and bring any possible infringements directly to the Legal Department.

Copyright Protection

If you create original material for Apple that requires copyright protection, such as software, place Apple's copyright notice on the work and submit a copyright disclosure form to the Legal Department. For more information, visit the Apple Copyright Information site.

Accuracy of Records and Reports

Accurate records are critical to meeting Apple's legal, financial, and management obligations. Ensure that all records and reports, including customer information, technical and product information, correspondence, and public communications are full, fair, accurate, timely, and understandable.

Never misstate facts, omit critical information, or modify records or reports in any way to mislead others, or assist others in doing so.

How can I learn more about procedures for meals and travel?

See Apple's Travel policy or talk to your manager.

Business Expenses

All employees must observe policies and procedures regarding business expenses, such as meal and travel expenses, and submit accurate expense reimbursement requests. Guidelines on daily meal expenses vary worldwide.

Establishing Bank Accounts

All Apple bank accounts must be approved and established by Apple's Treasury Department. All payments must be made by recordable and traceable methods. For more information, contact the Treasury Department.

Loans, Advances, and Guarantees

Other than through established corporate programs, such as programs for employee relocation and the cashless exercise of stock options, Apple does not provide loans or advances of corporate funds to its employees, officers, Board members, or their families and does not guarantee their obligations.

If I suspect money laundering, what should I do?

Advise your manager or contact the Apple Legal Department.

Money Laundering

Money laundering is the process by which individuals or organizations try to conceal illicit funds or make these funds look legitimate. If you are in a position to deal directly with customers or vendors, the following examples may be indications of potential money laundering:

- Attempts to make large payments in cash
- Payments by someone who is not a party to the contract
- Requests to pay more than provided for in the contract
- Payments made in currencies other than those specified in the contract
- Payments from an unusual, nonbusiness account

Tell me more about “legal holds.”

In a litigation case or other legal matter, Apple may be required to produce documents. In these cases the Legal Department may put a “legal hold” on certain documents to prevent the documents from being destroyed, altered, or modified. If it is found that Apple has failed to retain or produce required documents, penalties or adverse rulings may result. Adverse rulings in major litigation cases can cost Apple a significant amount of money. Failure of employees to retain and preserve documents placed on a legal hold may result in discipline or discharge.

Document Retention and Legal Hold

As an Apple employee, you have a responsibility to manage documents and make decisions on document retention. The definition of “document” is extremely broad. For example, every email or other electronic file, every customer record, and every transaction involves the creation of a document. Different documents have different retention periods. Check with your manager or contact Records Management to determine the appropriate retention period for documents in your area.

At times, Apple may need to retain documents beyond the period they would normally be retained. The most common reasons are litigation or other legal matters. In these situations, retention and preservation of documents is critical. If you have documents that may be required for litigation or other legal matters, the Legal Department will place those documents on a “legal hold,” meaning the documents cannot be altered, destroyed, deleted, or modified in any manner, and will inform the individuals most closely identified with the documents. Instructions for retaining the documents will be provided, and you must ensure that these instructions are followed. A legal hold remains in effect until you are notified by the Legal Department in writing.

Can you give an example of conflicts of interest or potential divided loyalty?

Your brother-in-law owns a business, that business is being considered as a vendor for Apple, and you are one of the decision makers.

May I occasionally use my Apple email address for my outside business?

Limited personal use of your Apple email is permitted for activities such as sending a brief message to a friend. You may never use your Apple email for an outside business.

I'm working on an invention on my own time. Does Apple need to know?

If your invention relates to your job at Apple or could compete with current or reasonably anticipated future products or services of Apple, disclose the invention to your manager.

May I serve on the board of directors of an outside enterprise or organization?

If you plan to serve on a board, you must obtain approval from your manager and the Senior Vice President for your organization. In addition, Vice Presidents and Executive Team members must obtain the approval of their manager and the CEO before they can accept a position on the board of directors of a private or publicly traded company (other than nonprofit entities).

What does "significant personal relationship" mean?

Significant personal relationships include close friends and relatives and may even include a long-term acquaintance or neighbor. If you are unsure, the best approach is to disclose the potential conflict to your manager.

Conflicts of Interest

A conflict of interest is any activity that is inconsistent with or opposed to Apple's best interests, or that gives the appearance of impropriety or divided loyalty. Avoid any situation that creates a real or perceived conflict of interest. Use good judgment, and if you are unsure about a potential conflict, talk to your manager, contact Human Resources, check with the Legal Department, or contact the Business Conduct Helpline.

Outside Employment and Inventions

If you are a full-time Apple employee, taking any other employment, full-time or part-time, requires that you notify your manager. In addition, any employee (full-time or part-time) who obtains outside employment (such as a part-time job away from Apple), has an outside business, or is working on an invention must comply with the following rules.

Do not:

- Use any time at work or any Apple assets for your other job, outside business, or invention. This includes using Apple workspace, telephones, computers, Internet access, copy machines, and any other Apple assets or services.
- Use your position at Apple to solicit work for your outside business or other employer, to obtain favored treatment, or to pressure others to assist you in working on your invention.
- Use confidential Apple information to benefit your other employer, outside business, or invention.
- Participate in an outside employment activity that could have an adverse effect on your ability to perform your duties at Apple.
- Participate in an outside business or outside employment, or develop an invention, that is in an area of Apple's present or reasonably anticipated future business.

Before participating in inventions or businesses that are in the same area as your work for Apple or that compete with or relate to present or reasonably anticipated Apple products or services, you must have written permission from your manager, an Apple product law attorney, and the Senior Vice President of your organization. View Apple's policy on Conflicts of Interest.

Significant Personal Relationships

Do not conduct Apple business with family members or others with whom you have a significant personal relationship. In rare cases where exceptions may be appropriate, written approval from the Senior Vice President for your organization is required.

You shouldn't use your position at Apple to obtain favored treatment for yourself, family members, or others with whom you have a significant relationship. This applies to product purchases or sales, investment opportunities, hiring, promoting, selecting contractors or suppliers, and any other business matter. This does not apply to special purchase plans offered by Apple. If you believe you have a potential conflict involving a family member or other individual, disclose it to your manager.

I have stock in companies that do business with Apple. Is this a problem?

It's unlikely that this is a problem. However, it could be a concern if (1) you're influencing a transaction between Apple and the company, and (2) the transaction is significant enough to potentially affect the value of your investment.

How do I know whether information is material?

Determining what constitutes material information is a matter of judgment. In general, information is material if it would likely be considered important by an investor purchasing or selling Apple securities or securities of other companies.

Does Apple's policy apply to buying or selling stock in other companies?

Yes. For example, say you learn about a customer's nonpublic expansion plans through discussions about hardware purchases. If you purchase stock in the customer's company or advise others to do so, it could be viewed as insider trading.

What is harassment?

Harassment is unwelcome or unsolicited speech or conduct based on factors such as race, color, age, sex, or sexual orientation. It may include activities such as viewing sexually explicit sites or displaying an inappropriate calendar. It may include unwelcome touching or advances, jokes, slurs, and other offensive behavior.

Personal Investments

Many Apple employees have investments in publicly traded stock or privately held businesses. If you hold shares of a publicly traded business or have any ownership in a privately held business, a conflict may exist if you are involved in or attempt to influence transactions between Apple and the business in which you are invested.

If a real or apparent conflict exists, disclose the conflict to your manager. The manager will help determine whether a conflict exists and, if appropriate, the best approach to eliminate the conflict.

Buying and Selling Stock

Never buy or sell stock while you are in possession of information obtained through your employment at Apple if the information has not been publicly announced and could have a material effect on the value of the investment. This applies to decisions to buy or sell Apple securities and to investments in other companies. It is also against Apple policy and may be illegal under U.S. law to give others, such as friends and family members, tips on when to buy or sell stock while you are in possession of material, nonpublic information concerning that stock.

In addition, employees are prohibited from investing in derivatives of Apple's securities. This includes, but is not limited to, trading in put or call options related to securities of the company.

Members of Apple's Board of Directors, executive officers, and certain other individuals are subject to blackout periods during which they are prohibited from trading in Apple stock. If you are subject to these restrictions, you'll be notified by the Legal Department. However, as a reminder, you may never buy or sell stock while you are in possession of material, nonpublic information regardless of being subject to blackout periods.

Review Apple's Insider Trading policy. Specific questions on buying and selling stock should be referred to the Legal Department.

Harassment and Discrimination

Apple encourages a creative, culturally diverse, and supportive work environment. Apple does not tolerate harassment or discrimination based on factors such as race, color, sex, sexual orientation, gender identity characteristics or expression, religion, national origin, age, marital status, disability, medical condition, veteran status, or pregnancy. Additional restrictions may apply based on regional laws and regulations.

These requirements apply to interactions with employees, customers, suppliers, and applicants for employment and any other interactions where you represent Apple.

If you feel that you have been harassed or discriminated against or have witnessed such action, report the situation to a manager or to Human Resources. You may also contact the Business Conduct Helpline. In the U.S., view more information on harassment. Outside the U.S., contact Human Resources.

Where can I learn more about policies on confidential employee information?

View the Apple Safe Harbor Privacy Policy.

Is personal information on my computer system private?

Limited personal use of Apple equipment and systems is allowed, but subject to local regulations, Apple may monitor equipment and systems. If in doubt, check with the Legal Department.

What if I have a substance abuse issue?

Help yourself and Apple by taking action. Talk to your Human Resources representative or, in the U.S., view information on the Employee Assistance Program.

How do I reach Corporate Communications?

Contact Corporate Communications at media.help@apple.com.

If I make a presentation on my own time, may I accept a payment?

That depends. If you are representing Apple, you may not accept payment. If you are on your own time and are not representing Apple, you may be allowed to accept payment. Before accepting this type of opportunity, check with your manager, Human Resources, or the Business Conduct Helpline.

Confidential Employee Information

As part of your job, you may have access to information regarding other Apple employees or applicants. This may range from employment history to personal contact information to health information to information on investment decisions. Such information is confidential and should be shared only with those who have a business need to know the information. It should not be shared outside Apple unless there is a legal or business reason to share the information and your manager approves.

Privacy

Subject to rules or regulations affecting an employee's rights, Apple may monitor or search its work environments, including equipment, networks, mail, and electronic systems, without notice. Apple monitors facilities and equipment to promote safety, prevent unlawful activity, investigate misconduct, manage information systems, comply with legal guidelines, and for other business purposes.

Substance Abuse

Employees are prohibited from manufacturing, distributing, dispensing, possessing, using, or being under the influence of illegal drugs in the workplace. Use of alcohol or medications on the job or before work can cause safety issues, damage customer relations, and hurt productivity and innovation. Use good judgment and keep in mind that you are expected to perform to your full ability when working for Apple. View Apple's policy on Drugs in the Workplace.

Public Communications

All public communications, speaking opportunities, and inquiries from the press or the financial analyst community must be referred to Corporate Communications or the Investor Relations Department.

Honoraria and Public Speaking

All public speaking engagements in which you represent Apple must be preapproved by your manager and Corporate Communications. If you receive approval to make a public presentation at a business meeting or conference, you may not request or accept any form of personal compensation from the organization that requested the presentation. This does not prohibit accepting reimbursement for expenses, if approved by your manager.

Publishing Articles

If you author an article or other publication, do not identify yourself in the publication as an employee of Apple without prior approval from Corporate Communications. This could be viewed as an endorsement by Apple.

Your Obligation to Take Action

Always apply Apple's principles of business conduct, follow Apple policies, and comply with laws and regulations. When you are unsure, take the initiative to investigate the right course of action. Check with your manager, Human Resources, Legal, Internal Audit, or Finance, or review our policies on AppleWeb. If you would like to talk with someone outside your immediate area, consider contacting the Business Conduct Helpline.

If you have knowledge of possible violations of Apple's business conduct principles, policies, or legal and regulatory requirements, you must notify your manager, Human Resources, Legal, Internal Audit, Finance, or the Business Conduct Helpline.

Business Conduct Helpline

The Business Conduct Helpline is available to all employees worldwide and is active 24/7. It helps to answer your questions on business conduct issues, policies, regulations, and compliance with legal requirements and Apple's Business Conduct policy. It also allows you to advise Apple of situations that may require investigation or management attention.

The Business Conduct Helpline is committed to keeping your issues and identity confidential. If you would be more comfortable doing so, you may contact the Helpline anonymously. Your information will be shared only with those who have a need to know, such as those involved in answering your questions or investigating and correcting issues you raise. Note that if your information involves accounting, finance, or auditing, the law requires that necessary information be shared with the Audit and Finance Committee of Apple's Board of Directors.

In France, due to legal restrictions, anonymous use of the Business Conduct Helpline is discouraged and the Helpline may be used only to report accounting, finance, and auditing issues.

When you use the Business Conduct Helpline to report an issue, you are protected from any form of retaliation. Retaliation will not be tolerated.

The Business Conduct Helpline is available on AppleWeb. Access the Business Conduct Helpline.

February 27, 2009

Securities and Exchange Commission

Washington, D.C. 20549

Ladies and Gentleman:

We were previously principal accountants for Apple Inc. and under the date of November 4, 2008, we reported on the consolidated financial statements of Apple Inc. as of and for the years ended September 28, 2008, and September 29, 2007, and the effectiveness of internal control over financial reporting as of September 28, 2008. On February 26, 2009, we were dismissed. We have read Apple Inc.'s statements included under Item 4.01 of its Form 8-K dated February 26, 2009, and we agree with such statements, except that we are not in a position to agree or disagree with Apple Inc.'s statements in the second paragraph regarding the audit committee's decision to engage Ernst & Young LLP, and its statements in the sixth paragraph.

Very truly yours,

/s/ KPMG LLP

CERTIFICATIONS

I, Steven P. Jobs, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Apple Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
