Safe Harbor Statement

Some of our comments constitute forward-looking statements that reflect management's current views and estimates of future economic circumstances, industry conditions, Company performance and financial results.

These statements are based on many assumptions and factors that are subject to risk and uncertainties. ADM has provided additional information in its reports on file with the SEC concerning assumptions and factors that could cause actual results to differ materially from those in this presentation, and you should carefully review the assumptions and factors in our SEC reports.

To the extent permitted under applicable law, ADM assumes no obligation to update any forward-looking statements as a result of new information or future events.

CEO's Perspective

Team executed well in environment similar to second quarter

- **Large South American crop, strong U.S. dollar limited North American exports**
- **Tight supplies kept sweeteners and starches results solid**
- **Weak industry ethanol margins**
- **Good global meal demand supported soy crushing**
- **Solid origination volumes in South America**
- **Continued weak oil demand weighed on softseed crushing**
- **WFSI macroeconomic headwinds greater than expected**

Continue to advance strategic plan

- **Closed global cocoa sale**
- **Acquired Eatem Foods**
- **Closed Eaststarch transaction**
- **Strong progress on operational efficiencies**

Segment Operating Profit of \$684 million

Segment operating profits in millions
Excludes specified items and timing effects

- Operating profits similar to Q2, amid similar conditions
- ROIC of 8.3%, above WACC
- EVA of \$428 million

*Segment operating profit as reported was \$709M

Ag Services: Similar to Year-Ago, but Starkly Different Conditions

Segment operating profits in millions
Excludes specified items and timing effects

- Robust global demand, but a well-supplied market limited merchandising opportunities
- Large South American harvest and strong dollar limited North American exports
- Lower exports reduced barge freight rates
- Another strong quarter from Milling

*Ag Services operating profit as reported was \$149M

Corn: Sequentially Similar, Year-over-Year Decline

Segment operating profits in millions
Excludes specified items and timing effects

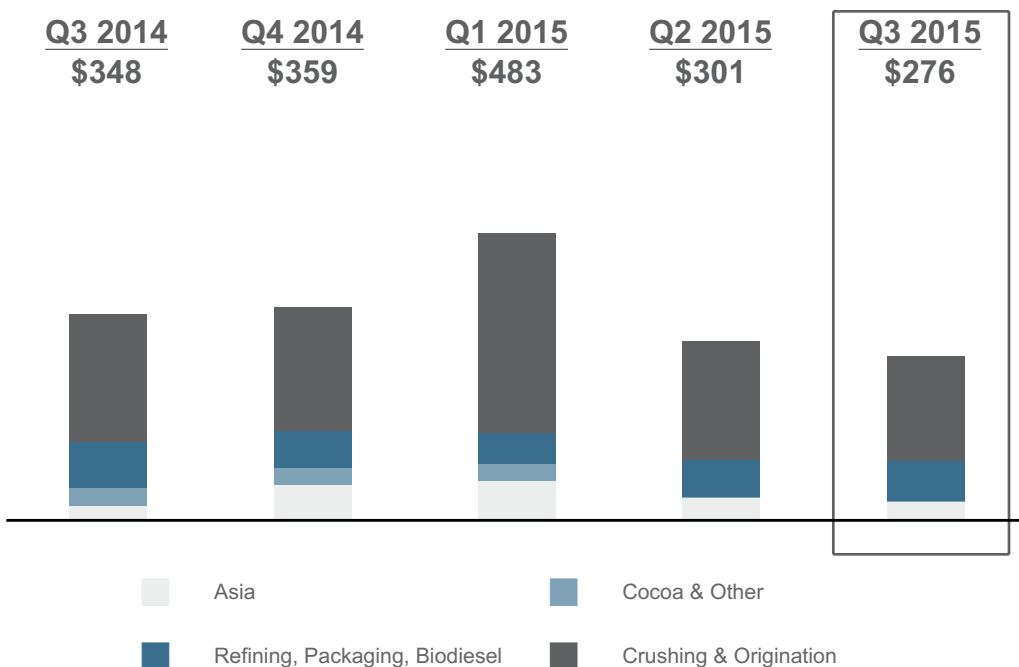

- Strong sweetener demand supported margins and volumes
- Domestic S&S shipments flat, but exports down
- Domestic and export ethanol demand good, but strong industry production boosted inventories and limited margins

*Corn operating profit as reported was \$131M

Oilseeds: Yet Another Solid Quarter

Segment operating profits in millions
Excludes specified items and timing effects

- Meal demand supported soy crush margins and volumes in N.A.
- Weak global vegoil demand reduced softseed margins and volumes
- Large Brazilian crops, weak R\$ drove S.A. origination and export volumes and margins
- RPBO reflects good N.A. refined-oil demand, weaker demand abroad, and absence of year-ago \$27M biodiesel credits

*Oilseeds operating profit as reported was \$335M

WFSI: Macroeconomic Headwinds Pressured Results

Segment operating profits in millions

Excludes specified items and timing effects

Includes WILD and SCI earnings starting Q4 2014

- Strong dollar and weakness in emerging markets affected a number of product lines
- Improved gross margins in flavors, polyols and proteins
- More than 80 synergy wins, more than 675 in the pipeline

*WFSI operating profit as reported was \$70M

Notes: Non-GAAP Reconciliation

The Company uses certain “Non-GAAP” financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures.

- (1) **Adjusted earnings per share (EPS) and adjusted EPS excluding timing effects**
Adjusted EPS and adjusted EPS excluding timing effects reflect ADM's fully diluted EPS after removal of the effect on Reported EPS of certain specified items and timing effects as more fully described above. Management believes that these are useful measures of ADM's performance because they provide investors additional information about ADM's operations allowing better evaluation of ongoing business performance. These non-GAAP financial measures are not intended to replace or be an alternative to Reported EPS, the most directly comparable GAAP financial measure, or any other measures of operating results under GAAP. Earnings amounts in the tables above have been divided by the company's diluted shares outstanding for each respective quarter in order to arrive at an adjusted EPS amount for each specified item and timing effect.
- (2) **Segment operating profit and adjusted segment operating profit**
Segment operating profit is ADM's consolidated income from operations before income tax excluding corporate items. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items and timing effects. Timing effects relate to hedge ineffectiveness and mark-to-market hedge timing effects. Management believes that segment operating profit and adjusted segment operating profit are useful measures of ADM's performance because they provide investors information about ADM's business unit performance excluding corporate overhead costs, and specified items and timing effects. Segment operating profit and adjusted segment operating profit are non-GAAP financial measures and are not intended to replace earnings before income tax, the most directly comparable GAAP financial measure. Segment operating profit and adjusted segment operating profit are not measures of consolidated operating results under U.S. GAAP and should not be considered as alternatives to income before income taxes or any other measure of consolidated operating results under U.S. GAAP.
- (3) **Adjusted Return on Invested Capital (ROIC)**
Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM's net earnings adjusted for the after tax effects of interest expense, changes in the LIFO reserve and other specified items. Adjusted ROIC invested capital is the sum of ADM's equity (excluding noncontrolling interests) and interest-bearing liabilities adjusted for the after tax effect of the LIFO reserve, and other specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM's returns excluding the impacts of LIFO inventory reserves and other specified items. Management uses Adjusted ROIC to measure ADM's performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures.
- (4) **Average ROIC**
Average ROIC is ADM's trailing 4-quarter net earnings adjusted for the after-tax effects of interest expense and changes in the LIFO reserve divided by the sum of ADM's equity (excluding non-controlling interests) and interest-bearing liabilities adjusted for the after-tax effect of the LIFO reserve. Management uses average ROIC for investors as additional information about ADM's returns. Average ROIC is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (5) **Adjusted Economic Value Added**
Adjusted economic value added is ADM's trailing 4-quarter economic value added adjusted for LIFO and other specified items. The Company calculates economic value added by comparing ADM's trailing 4-quarter adjusted returns to its Annual WACC multiplied by adjusted invested capital. Adjusted economic value added is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
