

Fourth Quarter 2015

Earnings Conference Call

February 2, 2016

Safe Harbor Statement

Some of our comments constitute forward-looking statements that reflect management's current views and estimates of future economic circumstances, industry conditions, Company performance and financial results.

These statements are based on many assumptions and factors that are subject to risk and uncertainties. ADM has provided additional information in its reports on file with the SEC concerning assumptions and factors that could cause actual results to differ materially from those in this presentation, and you should carefully review the assumptions and factors in our SEC reports.

To the extent permitted under applicable law, ADM assumes no obligation to update any forward-looking statements as a result of new information or future events.

Chairman's Perspective

Global dynamics reduced margins across:

- **U.S. agricultural export sector**
- **U.S. ethanol industry**
- **Global soybean crushing industry**

In 2015, continued to execute strategic plan

- **Adjusted ROIC in excess of WACC; positive EVA**
- **Executed growth, operational efficiency and portfolio management initiatives**

Safest year in ADM's history

Taking actions in a challenging environment

Ag Services: Down from Last Year's Very Strong Q4

Segment operating profits in millions
Excludes specified items and timing effects

- Fewer N.A. merchandising opportunities due to low commodity prices
- Strong U.S. dollar, ample global crops limited U.S. exports
- Improved performance by Global Trade Desk
- Another solid quarter from Milling

*Ag Services operating profit as reported was \$219M

Corn: Down Sequentially, Year-Over-Year

Segment operating profits in millions
Excludes specified items and timing effects

- Good sweetener demand supported margins and volumes
- Falling crude prices, high industry production pressured industry ethanol margins
- Excess global supply challenged lysine profits

*Corn operating profit as reported was \$200M

Oilseeds: Down vs. Very Strong Year-Ago Quarter

Segment operating profits in millions
Excludes specified items and timing effects

- Soy crush margins declined through quarter as buyers anticipated Argentine exports into well-supplied global market
- Strong U.S. dollar, ample global meal supply pressured U.S. meal exports
- RPBO down on weaker global biodiesel margins

*Oilseeds operating profit as reported was \$426M

WFSI: WILD Flavors Achieved First Full Year Accretion of \$0.10 Per Share

Segment operating profits in millions
Excludes specified items and timing effects

*WFSI operating profit as reported was \$38M

- Positive contributions from WILD Flavors, SCI and Eatem Foods
- Implemented \$40M in annualized cost synergies; on track for €100 million in run-rate by end of 2017

Notes: Non-GAAP Reconciliation

The Company uses certain “Non-GAAP” financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures.

- (1) **Adjusted earnings per share (EPS) and adjusted EPS excluding timing effects**
Adjusted EPS and adjusted EPS excluding timing effects reflect ADM’s fully diluted EPS after removal of the effect on Reported EPS of certain specified items and timing effects as more fully described above. Management believes that these are useful measures of ADM’s performance because they provide investors additional information about ADM’s operations allowing better evaluation of ongoing business performance. These non-GAAP financial measures are not intended to replace or be an alternative to Reported EPS, the most directly comparable GAAP financial measure, or any other measures of operating results under GAAP. Earnings amounts in the tables above have been divided by the company’s diluted shares outstanding for each respective quarter in order to arrive at an adjusted EPS amount for each specified item and timing effect.
- (2) **Segment operating profit and adjusted segment operating profit**
Segment operating profit is ADM’s consolidated income from operations before income tax excluding corporate items. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items and timing effects. Timing effects relate to hedge ineffectiveness and mark-to-market hedge timing effects. Management believes that segment operating profit and adjusted segment operating profit are useful measures of ADM’s performance because they provide investors information about ADM’s business unit performance excluding corporate overhead costs, and specified items and timing effects. Segment operating profit and adjusted segment operating profit are non-GAAP financial measures and are not intended to replace earnings before income tax, the most directly comparable GAAP financial measure. Segment operating profit and adjusted segment operating profit are not measures of consolidated operating results under U.S. GAAP and should not be considered as alternatives to income before income taxes or any other measure of consolidated operating results under U.S. GAAP.
- (3) **Adjusted Return on Invested Capital (ROIC)**
Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM’s net earnings adjusted for the after tax effects of interest expense, changes in the LIFO reserve and other specified items. Adjusted ROIC invested capital is the sum of ADM’s equity (excluding noncontrolling interests) and interest-bearing liabilities adjusted for the after tax effect of the LIFO reserve, and other specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM’s returns excluding the impacts of LIFO inventory reserves and other specified items. Management uses Adjusted ROIC to measure ADM’s performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures.
- (4) **Average ROIC**
Average ROIC is ADM’s trailing 4-quarter net earnings adjusted for the after-tax effects of interest expense and changes in the LIFO reserve divided by the sum of ADM’s equity (excluding non-controlling interests) and interest-bearing liabilities adjusted for the after-tax effect of the LIFO reserve. Management uses average ROIC for investors as additional information about ADM’s returns. Average ROIC is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (5) **Adjusted Effective Tax Rate**
Adjusted effective tax rate is ADM’s effective tax rate adjusted for the tax effect of LIFO and other specified items. Management uses adjusted effective tax rate to assist investors in the understanding of underlying business performance and therefore improves future modeling of earnings. Adjusted effective tax rate is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (6) **Adjusted Economic Value Added**
Adjusted economic value added is ADM’s trailing 4-quarter economic value added adjusted for LIFO and other specified items. The Company calculates economic value added by comparing ADM’s trailing 4-quarter adjusted returns to its Annual WACC multiplied by adjusted invested capital. Adjusted economic value added is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
