(1) Prior to the completion of the private placement in June 2014, we made special compensation payments to our co-founders in recognition of their service to our Company. We refer to these payments as "founder special compensation." Following the completion of the private placement, we ceased paying founder special compensation.

(2) Offering-related expenses are non-recurring expenses related to the Company's private placement of common stock.

(3) In connection with the 2014 amendment to the alliance agreement with CUNA Mutual, we paid CUNA Mutual \$17.8 million. As a result, we recorded non-recurring contract modification expense of \$17.8 million.

(4) Upon the completion of the private placement, our parent company's status as a Subchapter S corporation terminated and our consolidated income became fully subject to U.S. federal income taxes. This adjustment represents estimated income taxes as if the Company had been treated as a C Corporation for each period presented.

(5) As a result of the Company's conversion to a C Corporation, the deferred tax asset increased by approximately \$14.3 million primarily due to the effects of eliminating deferred tax balances on the insurance subsidiaries related to intercompany transactions. This excludes the tax effect related to contract modification expense of \$6.7 million.

(6) Tax effect of founder special compensation, offering-related expenses, and contract modification expense adjustments using the effective tax rate for each period presented.
