GENERAL MILLS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Background

The accompanying Consolidated Financial Statements of General Mills, Inc. (we, us, our, or the Company) have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not include certain information and disclosures required for comprehensive financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature. Operating results for the quarterly and nine-month periods ended February 28, 2010, are not necessarily indicative of the results that may be expected for the fiscal year ending May 30, 2010.

These statements should be read in conjunction with the Consolidated Financial Statements and footnotes included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2009. The accounting policies used in preparing these Consolidated Financial Statements are the same as those described in Note 2 to the Consolidated Financial Statements in that Form 10-K, except as discussed in Notes 2, 16, and 17 to these Consolidated Financial Statements.

(2) Basis of Presentation and Reclassification

In December 2007, the Financial Accounting Standards Board (FASB) issued new guidance on noncontrolling interests in financial statements. The guidance established accounting and reporting standards that require: the ownership interest in subsidiaries held by parties other than the parent to be clearly identified and presented in the Consolidated Balance Sheets within equity, but separate from the parent's equity; the amount of consolidated net earnings attributable to the parent and the noncontrolling interest to be clearly identified and presented on the face of the Consolidated Statements of Earnings; and changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary to be accounted for consistently.

We adopted the guidance at the beginning of fiscal 2010. To conform to the current period presentation, we made the following reclassifications to net earnings attributable to noncontrolling interests in our Consolidated Statements of Earnings:

<u>In Millions</u>	<u>Quarter Ended</u> <u>Feb. 22, 2009</u>	<u>Nine-Month</u> <u>Period Ended</u> <u>Feb. 22, 2009</u>
From interest, net	\$ 1.8	\$ 6.0
From selling, general, and administrative expenses	0.4	1.7
Total net earnings attributable to noncontrolling interests	\$ 2.2	\$ 7.7

Also, noncontrolling interests previously reported as minority interests have been reclassified to a separate section in equity on the Consolidated Balance Sheets as a result of the adoption. In addition, certain other reclassifications to our previously reported financial information have been made to conform to the current period presentation.

(3) Acquisitions and Divestitures

There were no acquisitions or divestitures in the nine-month period ended February 28, 2010.

During the second quarter of fiscal 2009, we sold our *Pop•Secret* microwave popcorn product line for \$192.5 million in cash, and we recorded a pre-tax gain of \$128.8 million. We received cash proceeds of \$158.9 million after repayment of a lease obligation and transaction costs.

During the first quarter of fiscal 2009, we acquired Humm Foods, Inc. (Humm Foods), the maker of *Lärabar* fruit and nut energy bars. We issued 0.9 million shares of our common stock with a value of \$55.0 million to the shareholders of Humm Foods as consideration for the acquisition. We recorded the purchase price less tangible and intangible net assets acquired as goodwill of \$41.6 million. The pro forma effect of this acquisition was not material.

(4) Restructuring, Impairment, and Other Exit Costs

Restructuring, impairment, and other exit costs were as follows:

In Millions	Quarter Ended		Nine-Month Period Ended	
	Feb. 28, 2010	Feb. 22, 2009	Feb. 28, 2010	Feb. 22, 2009
Discontinuation of underperforming products in our U.S. Retail segment	\$ —	\$ —	\$ 24.1	\$ —
Discontinuation of underperforming products in our Bakeries and Foodservice segment	6.1	—	6.1	—
Closure and sale of Contagem, Brazil bread and pasta plant	0.2	—	(0.6)	—
Charges associated with restructuring actions previously announced	—	1.2	0.8	6.4
Total	\$ 6.3	\$ 1.2	\$ 30.4	\$ 6.4

During the third quarter of fiscal 2010, we decided to exit certain underperforming products in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products will be insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6.1 million primarily related to the impairment of these long-lived assets. No employees were affected and we expect this action to be completed by the end of the third quarter of fiscal 2011.

During the nine-month period ended February 28, 2010, we took restructuring actions in addition to the item described above. We decided to exit certain underperforming products in our U.S. Retail segment to rationalize capacity for more profitable items. Our decisions to exit these products resulted in a \$24.1 million non-cash charge against the related long-lived assets. No employees were affected by these actions. We expect to recognize \$2.5 million of other exit costs related to these actions, which we anticipate will be completed by the end of the second quarter of fiscal 2011. During the nine-month period ended February 28, 2010, we also recorded a net gain of \$0.6 million related to the closure and sale of our Contagem, Brazil bread and pasta plant. In addition, we recorded \$0.8 million of costs related to previously announced restructuring actions.

During the nine-month period ended February 22, 2009, we did not undertake any new restructuring actions. We incurred incremental plant closure expenses related to previously announced restructuring activities of \$1.2 million in the third quarter of fiscal 2009, and \$6.4 million in the nine-month period ended February 22, 2009.

(5) Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill during fiscal 2010 were as follows:

In Millions	U.S. Retail	International	Bakeries and Foodservice	Joint Ventures	Total
Balance as of May 31, 2009	\$ 5,098.3	\$ 123.3	\$ 923.0	\$ 518.4	\$6,663.0
Other activity, primarily foreign currency translation	—	2.1	—	(19.4)	(17.3)
Balance as of Feb. 28, 2010	\$ 5,098.3	\$ 125.4	\$ 923.0	\$ 499.0	\$6,645.7

The changes in the carrying amount of other intangible assets during fiscal 2010 were as follows:

In Millions	U.S. Retail	International	Joint Ventures	Total
Balance as of May 31, 2009	\$ 3,208.9	\$ 462.6	\$ 75.5	\$ 3,747.0
Other activity, primarily foreign currency translation	(1.5)	0.7	(5.3)	(6.1)
Balance as of Feb. 28, 2010	\$ 3,207.4	\$ 463.3	\$ 70.2	\$ 3,740.9

(6) Inventories

The components of inventories were as follows:

In Millions	Feb. 28, 2010	May 31, 2009
Raw materials and packaging	\$ 262.2	\$ 273.1
Finished goods	1,196.6	1,096.1
Grain	149.0	126.9
Excess of FIFO or weighted-average cost over LIFO cost	(133.2)	(149.3)
Total	\$ 1,474.6	\$ 1,346.8

(7) Financial Instruments, Risk Management Activities, and Fair Values

Financial Instruments. The carrying values of cash and cash equivalents, receivables, accounts payable, other current liabilities, and notes payable approximate fair value. Marketable securities are carried at fair value. As of February 28, 2010, and May 31, 2009, a comparison of cost and market values of our marketable debt and equity securities is as follows:

In Millions	Cost		Market Value		Gross Gains		Gross Losses	
	Feb. 28, 2010	May 31, 2009	Feb. 28, 2010	May 31, 2009	Feb. 28, 2010	May 31, 2009	Feb. 28, 2010	May 31, 2009
Available for sale:								
Debt securities	\$ 11.8	\$ 35.1	\$ 11.9	\$ 35.0	\$ 0.1	\$ 0.1	\$ —	\$ (0.2)
Equity securities	6.1	6.1	14.4	13.8	8.3	7.7	—	—
Total	\$ 17.9	\$ 41.2	\$ 26.3	\$ 48.8	\$ 8.4	\$ 7.8	\$ —	\$ (0.2)

Earnings include insignificant realized gains from sales of available-for-sale marketable securities. Gains and losses are determined by specific identification. Classification of marketable securities as current or noncurrent is dependent upon management's intended holding period, the security's maturity date, or both. The aggregate unrealized gains and losses on available-for-sale securities, net of tax effects, are classified in accumulated other comprehensive income (loss) (AOCI) within stockholders' equity. Scheduled maturities of our marketable securities are as follows:

In Millions	Available for Sale	
	Cost	Market Value
Under 1 year (current)	\$ 4.8	\$ 4.8
From 1 to 3 years	0.8	0.8
From 4 to 7 years	4.1	4.1
Over 7 years	2.1	2.2
Equity securities	6.1	14.4
Total	\$ 17.9	\$ 26.3

Marketable securities with a market value of \$2.3 million as of February 28, 2010, were pledged as collateral for certain derivative contracts.

The fair values and carrying amounts of long-term debt, including the current portion, were \$6,334.0 million and \$5,779.0 million, respectively, as of February 28, 2010. The fair value of long-term debt was estimated using market quotations and discounted cash flows based on our current incremental borrowing rates for similar types of instruments.

Risk Management Activities. As a part of our ongoing operations, we are exposed to market risks such as changes in interest rates, foreign currency exchange rates, and commodity prices. To manage these risks, we may enter into various derivative transactions (e.g., futures, options, and swaps) pursuant to our established policies.

Commodity Price Risk. Many commodities we use in the production and distribution of our products are exposed to market price risks. We utilize derivatives to manage price risk for our principal ingredients and energy costs, including grains (oats, wheat, and corn), oils (principally soybean), non-fat dry milk, natural gas, and diesel fuel. Our primary objective when entering into these derivative contracts is to achieve certainty with regard to the future price of commodities purchased for use in our supply chain. We manage our exposures through a combination of purchase orders, long-term contracts with suppliers, exchange-traded futures and options, and over-the-counter options and swaps.

We use derivatives to manage our exposure to changes in commodity prices. We do not perform the assessments required to achieve hedge accounting for commodity derivative positions. Accordingly, the changes in the values of these derivatives are recorded currently in cost of sales in our Consolidated Statements of Earnings.

Although we do not meet the criteria for cash flow hedge accounting, we nonetheless believe that these instruments are effective in achieving our objective of providing certainty in the future price of commodities purchased for use in our supply chain. Accordingly, for purposes of measuring segment operating performance these gains and losses are reported in unallocated corporate items outside of segment operating results until such time that the exposure we are managing affects earnings. At that time we reclassify the gain or loss from unallocated corporate items to segment operating profit, allowing our operating segments to realize the economic effects of the derivative without experiencing any resulting mark-to-market volatility, which remains in unallocated corporate items.

Unallocated corporate items for the quarterly and nine-month periods ended February 28, 2010, and February 22, 2009, included:

In Millions	Quarter Ended		Nine-Month Period Ended	
	Feb. 28, 2010	Feb. 22, 2009	Feb. 28, 2010	Feb. 22, 2009
Net gain (loss) on mark-to-market valuation of commodity positions	\$ 1.6	\$ (28.4)	\$ (9.6)	\$ (300.4)
Net loss (gain) on commodity positions reclassified from unallocated corporate items to segment operating profit	(0.1)	81.9	60.5	47.2
Net mark-to-market revaluation of certain grain inventories	(6.5)	17.7	(3.3)	(36.2)
Net mark-to-market valuation of certain commodity positions recognized in unallocated corporate items	\$ (5.0)	\$ 71.2	\$ 47.6	\$ (289.4)

As of February 28, 2010, the net notional value of commodity derivatives was \$598.7 million, of which \$461.5 million related to agricultural inputs and \$137.2 million related to energy inputs. These contracts relate to inputs that generally will be utilized within the next 12 months.

Interest Rate Risk. We are exposed to interest rate volatility with regard to future issuances of fixed-rate debt, and existing and future issuances of floating-rate debt. Primary exposures include U.S. Treasury rates, LIBOR, and commercial paper rates in the United States and Europe. We use interest rate swaps and forward-starting interest rate swaps to hedge our exposure to interest rate changes, to reduce the volatility of our financing costs, and to achieve a desired proportion of fixed versus floating-rate debt, based on current and projected market conditions. Generally under these swaps, we agree with a counterparty to exchange the difference between fixed-rate and floating-rate interest amounts based on an agreed upon notional principal amount.

Floating Interest Rate Exposures — Except as discussed below, floating-to-fixed interest rate swaps are accounted for as cash flow hedges, as are all hedges of forecasted issuances of debt. Effectiveness is assessed based on either the perfectly effective hypothetical derivative method or changes in the present value of interest payments on the underlying debt. Effective gains and losses deferred to AOCI are reclassified into earnings over the life of the associated debt. Ineffective gains and losses are recorded as net interest. The amount of hedge ineffectiveness was less than \$1 million as of February 28, 2010.

Fixed Interest Rate Exposures — Fixed-to-floating interest rate swaps are accounted for as fair value hedges with effectiveness assessed based on changes in the fair value of the underlying debt and derivatives, using incremental borrowing rates currently available on loans with similar terms and maturities. Ineffective gains and losses on these derivatives and the underlying hedged items are recorded as net interest. The amount of hedge ineffectiveness was less than \$1 million as of February 28, 2010.

During the second quarter of fiscal 2010 we entered into \$700 million of interest rate swaps to convert \$700 million of 5.65% fixed-rate notes due September 10, 2012, to floating rates.

In anticipation of our acquisition of The Pillsbury Company (Pillsbury) and other financing needs, we entered into pay-fixed interest rate swap contracts during fiscal 2001 and 2002 totaling \$7.1 billion to lock in our interest payments on the associated debt. As of February 28, 2010, we still owned \$1.6 billion of Pillsbury-related pay-fixed swaps that were previously neutralized with offsetting pay-floating swaps in fiscal 2002.

In advance of a planned debt financing in fiscal 2007, we entered into \$700.0 million pay-fixed, forward-starting interest rate swaps with an average fixed rate of 5.7 percent. All of these forward-starting interest rate swaps were cash settled for \$22.5 million coincident with our \$1.0 billion 10-year fixed-rate note offering on January 24, 2007. As of February 28, 2010, a \$15.5 million pre-tax loss remained in AOCI, which will be reclassified to earnings over the term of the underlying debt.

The following table summarizes the notional amounts and weighted-average interest rates of our interest rate swaps. As discussed above, we have neutralized all of our Pillsbury-related pay-fixed swaps with pay-floating swaps;

however, we cannot present them on a net basis in the following table because the offsetting occurred with different counterparties. Average floating rates are based on rates as of the end of the reporting period.

In Millions	Feb. 28, 2010	May 31, 2009
Pay-floating swaps - notional amount	\$ 2,344.9	\$ 1,859.3
Average receive rate	4.6%	5.7%
Average pay rate	0.2%	0.3%
Pay-fixed swaps - notional amount	\$ 1,600.0	\$ 2,250.0
Average receive rate	0.2%	0.5%
Average pay rate	7.3%	6.4%

The swap contracts mature at various dates from fiscal 2010 to 2013 as follows:

In Millions	Pay Floating	Pay Fixed
2010	\$ 9.3	\$ —
2011	17.6	—
2012	1,603.4	850.0
2013	714.6	750.0

Foreign Exchange Risk. Foreign currency fluctuations affect our net investments in foreign subsidiaries and foreign currency cash flows related to foreign-dominated commercial paper, third party purchases, intercompany loans, and product shipments. We are also exposed to the translation of foreign currency earnings to the U.S. dollar. Our principal exposures are to the Australian dollar, British pound sterling, Canadian dollar, Chinese renminbi, euro, Japanese yen, and Mexican peso. We mainly use foreign currency forward contracts to selectively hedge our foreign currency cash flow exposures. We also generally swap our foreign-dominated commercial paper borrowings and nonfunctional currency intercompany loans back to U.S. dollars or the functional currency; the gains or losses on these derivatives offset the foreign currency revaluation gains or losses recorded in earnings on the associated borrowings. We generally do not hedge more than 18 months forward.

The amount of hedge ineffectiveness was less than \$1 million as of February 28, 2010.

We also have many net investments in foreign subsidiaries that are denominated in euros. We previously hedged a portion of these net investments by issuing euro-denominated commercial paper and foreign exchange forward contracts. As of February 28, 2010, we had deferred net foreign currency transaction losses of \$95.7 million in AOCI associated with hedging activity.

Fair Value Measurements and Financial Statement Presentation. In September 2006, the FASB issued new accounting guidance on fair value measurements. This guidance provides a single definition of fair value, a framework for measuring fair value, and expanded disclosures concerning fair value. The guidance applies to instruments accounted for under previously issued pronouncements that prescribe fair value as the relevant measure of value. We partially adopted the guidance at the beginning of fiscal 2009 for all instruments recorded at fair value on a recurring basis. In the first quarter of fiscal 2010 we adopted the remaining provisions of the guidance for all nonfinancial assets and liabilities that are not remeasured at fair value on a recurring basis. Our adoption of these provisions did not have a material impact on our results of operations or financial condition.

We categorize assets and liabilities into one of three levels based on the assumptions (inputs) used in valuing the asset or liability. Level 1 provides the most reliable measure of fair value, while Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.

Level 3: Unobservable inputs reflecting management's assumptions about the inputs used in pricing the asset or liability.

The fair values of our assets, liabilities, and derivative positions recorded at fair value as of February 28, 2010, were as follows:

(g) We recorded a \$4.8 million non-cash impairment charge in the third quarter of fiscal 2010 to write down certain long-lived assets to their fair value of \$2.5 million. Fair value was based on historical activity for transactions of similar assets in the marketplace and third party appraisals. These assets had a book value of \$7.3 million and were associated with the restructuring activities described in Note 4. Also during the second quarter of fiscal 2010 we recorded a \$6.6 million non-cash impairment charge to write down certain long-lived assets to their fair value of \$0.4 million. Fair value was based on recently reported transactions for similar assets in the marketplace. These assets had a book value of \$7.0 million and were associated with the exit activities described in Note 4.

We did not significantly change our valuation techniques from prior periods.

(c) All loss recognized in earnings is related to the ineffective portion of the hedging relationship. No amounts were reported as a result of being excluded from the assessment of hedge effectiveness.

(d) Loss recognized in earnings is reported in SG&A expenses for foreign exchange contracts.

(e) The net amount of loss recognized in earnings is related to the ineffective portion of the hedging relationship and the related hedged items. No amounts were reported as a result of being excluded from the assessment of hedge effectiveness.

(f) Gain (loss) recognized in earnings is reported in interest, net for interest rate contracts, in cost of sales for commodity contracts, and in SG&A expenses for equity contracts and foreign exchange contracts.

Amounts Recorded in Accumulated Other Comprehensive Loss. Unrealized losses from interest rate cash flow hedges recorded in AOCI as of February 28, 2010, totaled \$18.8 million after tax. These deferred losses are primarily related to interest rate swaps we entered into in contemplation of future borrowings and other financing

requirements and are being reclassified into net interest over the lives of the hedged forecasted transactions. As of February 28, 2010, we had no amounts from commodity derivatives recorded in AOCI. Unrealized losses from foreign currency cash flow hedges recorded in AOCI as of February 28, 2010, were \$15.5 million after-tax. The net amount of pre-tax gains and losses in AOCI as of February 28, 2010, that we expect to be reclassified into net earnings within the next 12 months is \$36.8 million of expense.

Credit-Risk-Related Contingent Features. Certain of our derivative instruments contain provisions that require us to maintain an investment grade credit rating on our debt from each of the major credit rating agencies. If our debt were to fall below investment grade, the counterparties to the derivative instruments could request full collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on February 28, 2010, was \$3.2 million. We have not posted any collateral associated with these contracts. If the credit-risk-related contingent features underlying these agreements were triggered on February 28, 2010, we would be required to post an additional \$3.2 million of collateral to the counterparties.

Counterparty Credit Risk. We enter into interest rate, foreign exchange, and certain commodity and equity derivatives, primarily with a diversified group of highly rated counterparties. We continually monitor our positions and the credit ratings of the counterparties involved and, by policy, limit the amount of credit exposure to any one party. These transactions may expose us to potential losses due to the risk of nonperformance by these counterparties; however, we have not incurred a material loss and do not anticipate incurring any such material losses. We also enter into commodity futures transactions through various regulated exchanges.

The amount of loss due to the credit risk of the counterparties, should the counterparties fail to perform according to the terms of the contracts, is \$56.1 million against which we hold \$4.3 million of collateral. Under the terms of master swap agreements, some of our transactions require collateral or other security to support financial instruments subject to threshold levels of exposure and counterparty credit risk. Collateral assets are either cash or U.S. Treasury instruments and are held in a trust account that we may access if the counterparty defaults.

(8) Debt

The components of notes payable were as follows:

In Millions	Feb. 28, 2010	May 31, 2009
U.S. commercial paper	\$ 437.8	\$ 401.8
Euro commercial paper	—	275.0
Financial institutions	143.3	135.4
Total	\$ 581.1	\$ 812.2

Our commercial paper borrowings are supported by fee-paid committed credit lines consisting of a \$1.8 billion facility expiring in October 2012 and a \$1.1 billion facility expiring in October 2010. As of February 28, 2010, we did not have any outstanding borrowings under these credit lines.

In January 2009, we sold \$1.2 billion aggregate principal amount of our 5.65 percent notes due 2019. In August 2008, we sold \$700.0 million aggregate principal amount of our 5.25 percent notes due 2013. The proceeds of these notes were used to repay a portion of our outstanding commercial paper. Interest on these notes is payable semi-annually in arrears. These notes may be redeemed at our option at any time for a specified make-whole amount. These notes are senior unsecured, unsubordinated obligations that include a change of control repurchase provision.

Our credit facilities and certain of our long-term debt and noncontrolling interests agreements contain restrictive covenants. As of February 28, 2010, we were in compliance with all of these covenants.

(10) Stock Plans

We have various stock-based compensation programs under which awards, including stock options, restricted stock, and restricted stock units, may be granted to employees and non-employee directors. These programs and related accounting are described on pages 74 to 76 of our Annual Report on Form 10-K for the fiscal year ended May 31, 2009.

Compensation expense related to stock-based payments recognized in SG&A expenses in the Consolidated Statements of Earnings was as follows:

In Millions	Quarter Ended		Nine-Month Period Ended	
	Feb. 28, 2010	Feb. 22, 2009	Feb. 28, 2010	Feb. 22, 2009
Compensation expense related to stock-based payments	\$ 35.1	\$ 27.6	\$ 132.5	\$ 114.3

As of February 28, 2010, unrecognized compensation expense related to non-vested stock options and restricted stock units was \$214.3 million. This expense will be recognized over 23 months, on average.

Net cash proceeds from the exercise of stock options less shares used for withholding taxes and the intrinsic value of options exercised were as follows:

In Millions	Nine-Month Period Ended	
	Feb. 28, 2010	Feb. 22, 2009
Net cash proceeds	\$ 321.0	\$ 287.3
Intrinsic value of options exercised	\$ 219.1	\$ 221.1

We estimate the fair value of each option on the grant date using the Black-Scholes option-pricing model, which requires us to make predictive assumptions regarding future stock price volatility, employee exercise behavior, and dividend yield. We estimate our future stock price volatility using the historical volatility over the expected term of the option, excluding time periods of volatility we believe a marketplace participant would exclude in estimating our stock price volatility. For fiscal 2009 and all future grants, we have excluded historical volatility for fiscal 2002 and prior, primarily because volatility driven by our acquisition of The Pillsbury Company does not reflect what we believe to be expected future volatility. We also have considered, but did not use, implied volatility in our estimate, because trading activity in options on our stock, especially those with tenors of greater than 6 months, is insufficient to provide a reliable measure of expected volatility. Our method of selecting the other valuation assumptions is explained on pages 74 and 75 in our Annual Report on Form 10-K for the fiscal year ended May 31, 2009.

The estimated fair values of stock options granted and the assumptions used for the Black-Scholes option-pricing model were as follows:

(12) Share Repurchases

During the third quarter of fiscal 2010, we repurchased 1.2 million shares of common stock for an aggregate purchase price of \$88.9 million. During the nine-month period ended February 28, 2010, we repurchased 5.5 million shares of common stock for an aggregate purchase price of \$324.3 million.

During the third quarter of fiscal 2009, we repurchased 0.1 million shares of common stock for an aggregate purchase price of \$5.4 million. During the nine-month period ended February 22, 2009, we repurchased 18.9 million shares of common stock for an aggregate purchase price of \$1,232.5 million.

(14) Statements of Cash Flows

During the nine-month period ended February 28, 2010, we made cash interest payments of \$308.6 million, compared to \$223.7 million in the same period last year. Also, in the nine-month period ended February 28, 2010, we made tax payments of \$479.6 million, compared to \$273.8 million in the same period last year. In fiscal 2009 we acquired Humm Foods by issuing to its shareholders 0.9 million shares of our common stock, with a value of \$55.0 million, as consideration. This acquisition is treated as a non-cash transaction in our Consolidated Statements of Cash Flows.

(16) Business Segment Information

We operate in the consumer foods industry. We have three operating segments by type of customer and geographic region as follows: U.S. Retail; International; and Bakeries and Foodservice.

Our U.S. Retail segment reflects business with a wide variety of grocery stores, mass merchandisers, membership stores, natural food chains, and drug, dollar and discount chains operating throughout the United States. Our major product categories in this business segment are ready-to-eat cereals, refrigerated yogurt, ready-to-serve soup, dry dinners, shelf stable and frozen vegetables, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza and pizza snacks, grain, fruit and savory snacks, and a wide variety of organic products including soup, granola bars, and cereal.

In Canada, our major product categories are ready-to-eat cereals, shelf stable and frozen vegetables, dry dinners, refrigerated and frozen dough products, dessert and baking mixes, frozen pizza snacks, and grain, fruit and savory snacks. In markets outside North America, our product categories include super-premium ice cream, grain snacks, shelf stable and frozen vegetables, dough products, and dry dinners. Our International segment also includes products manufactured in the United States for export, mainly to Caribbean and Latin American markets, as well as products we manufacture for sale to our international joint ventures. Revenues from export activities are reported in the region or country where the end customer is located.

In our Bakeries and Foodservice segment we sell products including cereals, snacks, refrigerated and soft-serve frozen yogurt, unbaked and fully baked frozen dough products, baking mixes, flour, dinner and side dish products, and custom food items. Many products we sell are branded to the consumer and nearly all are branded to our customers. Our customers include foodservice distributors and operators, convenience store distributors and operators, vending operators, home improvement and electronics retailers, quick service restaurant chains and other independent restaurants, cafeterias, and retail, supermarket, and wholesale bakeries. Following our fiscal 2009 divestitures, substantially all of this segment's operations are located in the United States.

Operating profit for these segments excludes unallocated corporate expense, restructuring, impairment, and other exit costs, and divestiture gains and losses. Unallocated corporate expense includes variances to planned corporate overhead expenses, variances to planned domestic employee benefits and incentives, all stock-based compensation costs, annual contributions to the General Mills Foundation, and other items that are not part of our measurement of segment operating performance. These include gains and losses arising from the revaluation of certain grain inventories and gains and losses from mark-to-market valuation of certain commodity positions until passed back to our operating segments. These items affecting operating profit are centrally managed at the corporate level and are excluded from the measure of segment profitability reviewed by executive management. Under our supply chain organization, our manufacturing, warehouse, and distribution activities are substantially integrated across our operations in order to maximize efficiency and productivity. As a result, fixed assets and depreciation and amortization expenses are neither maintained nor available by operating segment.

As discussed in Note 2, we adopted new accounting guidance on noncontrolling interests at the beginning of fiscal 2010. To conform to the current year's presentation, earnings attributable to noncontrolling interests in foreign subsidiaries of \$0.4 million for the quarter ended February 22, 2009, and \$1.7 million for the nine-month period ended February 22, 2009, which were previously deducted from the International segment's operating profit, have been reclassified to net earnings attributable to noncontrolling interests.

Our operating segment results were as follows:

(17) New Accounting Pronouncements

In the first quarter of fiscal 2010, we adopted new accounting guidance on business combinations. The guidance establishes principles and requirements for how the acquirer in a business combination: recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance also changes the accounting for acquisition-related tax contingencies, requiring all such changes in these contingencies to be recorded in earnings after the effective date. The adoption of the guidance did not have any impact on our results of operations or financial condition.

In the first quarter of fiscal 2010, we adopted new accounting guidance on accounting for equity method investments. The guidance addresses the impact of the issuance of the noncontrolling interests and business combination guidance on accounting for equity method investments. The adoption of the guidance did not have a material impact on our results of operations or financial condition.

In the first quarter of fiscal 2010, we adopted new accounting guidance on financial instruments indexed to an entity's own stock. The guidance defines when adjustment features within contracts are considered to be equity-indexed. The adoption of the guidance did not have any impact on our results of operations or financial condition.

In the first quarter of fiscal 2010, we adopted new accounting guidance issued to assist in determining whether instruments granted in share-based payment transactions are participating securities. The guidance provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of EPS pursuant to the two-class method. The adoption of the guidance did not have a material impact on our basic and diluted EPS.

In the first quarter of fiscal 2010, we adopted new accounting guidance on convertible debt instruments. The guidance requires issuers to account separately for the liability and equity components of convertible debt instruments that may be settled in cash or other assets. The adoption of the guidance did not have a material impact on our results of operations or financial condition.

In the first quarter of fiscal 2010, we adopted new accounting guidance on determining the useful life of intangible assets. The guidance amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The guidance applies to intangible assets that are acquired individually or with a group of other assets and intangible assets acquired in business combinations and asset acquisitions. The adoption of the guidance did not have any impact on our results of operations or financial condition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

INTRODUCTION

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with the MD&A included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2009, for important background regarding, among other things, our key business drivers. Significant trademarks and service marks used in our business are set forth in *italics* herein. Certain terms used throughout this report are defined in a glossary on pages 31-32 of this report.

CONSOLIDATED RESULTS OF OPERATIONS

Third Quarter Results

For the third quarter of fiscal 2010, net sales grew 3 percent to \$3,629 million and total segment operating profit of \$607 million was 8 percent higher than \$561 million in the third quarter of fiscal 2009. (See page 31 for a discussion of this measure not defined by GAAP).

Net sales growth of 3 points for the third quarter of fiscal 2010 was the result of 2 points of growth from net price realization and mix, and 1 point from favorable foreign currency exchange. Contributions from volume growth were flat, including the loss of 1 point of growth from divested products.

Components of net sales growth

Third Quarter of Fiscal 2010 vs. Third Quarter of Fiscal 2009	U.S. Retail	International	Bakeries and Foodservice	Combined Segments
Volume growth (a)	Flat	2 pts	-5 pts	Flat
Net price realization and mix	3 pts	1 pt	-5 pts	2 pts
Foreign currency exchange	NA	8 pts	Flat	1 pt
Net sales growth	3 pts	11 pts	-10 pts	3 pts

(a) Measured in tons based on the stated weight of our product shipments.

Cost of sales decreased \$8 million from the third quarter of fiscal 2009 to \$2,252 million. The decrease in cost of sales was primarily driven by favorable mix and lower input cost. In the third quarter of fiscal 2010, we recorded a \$5 million net increase in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories compared to a net decrease of \$71 million in the third quarter of fiscal 2009. In the third quarter of fiscal 2010 we recorded a charge of \$48 million resulting from a change in the capitalization threshold for certain equipment parts, enabled by an upgrade to our parts management system.

Selling, general, and administrative (SG&A) expenses were up \$139 million in the third quarter of fiscal 2010 versus the same period in fiscal 2009. SG&A expenses as a percent of net sales in the third quarter of fiscal 2010 increased by 3 percentage points compared with fiscal 2009. The increase in SG&A expenses was primarily driven by a 33 percent increase in advertising and media expense. In January 2010, the Venezuelan government devalued the Bolivar exchange rate against the U.S. dollar. The effect of the devaluation was a \$14 million foreign exchange loss. Also in the third quarter of fiscal 2010, we recorded a \$13 million recovery against a corporate investment which was written down in the third quarter last year. In addition during the third quarter of fiscal 2009, we recorded a \$41 million gain from a settlement with the insurance carrier covering the loss of our *La Salteña* pasta manufacturing facility in Argentina, which was destroyed by fire in fiscal 2008.

Restructuring, impairment, and other exit costs were \$6 million for the third quarter of fiscal 2010 and \$1 million for the same period of fiscal 2009. During the third quarter of fiscal 2010, we decided to exit certain underperforming products in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products will be insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6 million primarily related to the impairment of these long-lived assets. No employees were affected and we expect this action to be completed by the end of the third quarter of fiscal 2011. In the third quarter of fiscal 2009, we did not undertake any new restructuring actions.

Interest, net for the third quarter of fiscal 2010 totaled \$94 million, a \$4 million decrease from the same period of fiscal 2009. Average interest bearing instruments decreased \$1.3 billion, leading to an \$18 million decrease in net interest, due to reduced share repurchase activity in fiscal 2010 versus last year. This decrease was offset by average interest rates which increased 100 basis points, generating a \$14 million increase in net interest due to a shift from short-term floating rate debt to long-term fixed rate debt versus the same period last year.

The **effective tax rate** for the third quarter of fiscal 2010 was 33.8 percent compared to 45.7 percent for the third quarter of fiscal 2009. The 11.9 percentage point decrease was primarily due to an unfavorable decision on an uncertain tax matter from the U.S. Court of Appeals for the Eighth Circuit, which increased income tax expense by \$53 million in the third quarter of fiscal 2009.

After-tax earnings from joint ventures increased to \$24 million compared to \$16 million in the same quarter last fiscal year. In the third quarter of fiscal 2010, net sales for Cereal Partners Worldwide (CPW) increased 15 percent, due to 5 points of volume growth and 10 points of favorable foreign exchange. Net sales for our Häagen-Dazs joint venture in Japan declined 5 percent, mainly due to 4 points of volume decline.

Average diluted shares outstanding increased by 4 million in the third quarter of fiscal 2010 from the same period a year ago due primarily to the issuance of shares of our common stock upon stock option exercises partially offset by the repurchase of 7 million shares since the end of the third quarter of fiscal 2009.

Net earnings were \$332 million in the third quarter, up 15 percent from \$289 million last year. **Diluted earnings per share (EPS)** was \$0.96 in the third quarter, up 13 percent from \$0.85 last year. Diluted EPS for the third quarter of fiscal 2010 included a \$0.01 net reduction related to the mark-to-market valuation of certain commodity positions compared to a \$0.13 net benefit in fiscal 2009. The third quarter of fiscal 2009 also included an \$0.08 gain from the settlement with the insurance carrier covering our *La Salteña* pasta manufacturing facility in Argentina and a \$0.15 charge from a court ruling on an uncertain tax matter.

Nine-month Results

For the nine-month period ended February 28, 2010, net sales grew 2 percent to \$11,226 million and total segment operating profit of \$2,255 million was 14 percent higher than \$1,975 million in the nine-month period ended February 22, 2009.

Net sales growth of 2 points for the nine-month period ended February 28, 2010, was the result of 2 points of growth from net price realization and mix. Contributions from volume growth were flat, including the loss of 2 points of growth from divested products.

(a) Measured in tons based on the stated weight of our product shipments.

Cost of sales decreased \$713 million from the nine-month period ended February 22, 2009, to \$6,644 million. The decrease in cost of sales was primarily driven by favorable mix and lower input costs. In the nine-month period ended February 28, 2010, we recorded a \$48 million net decrease in cost of sales related to mark-to-market valuation of certain commodity positions and grain inventories compared to a net increase of \$289 million in the nine-month period ended February 22, 2009. In the third quarter of fiscal 2010 we recorded a charge of \$48 million resulting from a change in the capitalization threshold for certain equipment parts, enabled by an upgrade to our parts management system.

SG&A expenses were up \$301 million in the nine-month period ended February 28, 2010, versus the same period in fiscal 2009. SG&A expenses as a percent of net sales in fiscal 2010 increased by 2 percentage points compared to fiscal 2009. The increase in SG&A expenses was primarily driven by a 29 percent increase in advertising and media expense. In January 2010, the Venezuelan government devalued the Bolivar exchange rate against the U.S. dollar. The effect of the devaluation was a \$14 million foreign exchange loss. Also in the third quarter of fiscal 2010, we recorded a \$13 million recovery against a corporate investment which was written down in the third quarter last year. In addition during the third quarter of fiscal 2009, we recorded a \$41 million gain from a settlement with the insurance carrier covering the loss of our *La Salteña* pasta manufacturing facility in Argentina, which was destroyed by fire in fiscal 2008.

There were no divestitures during the nine-month period ended February 28, 2010. During the nine-month period ended February 22, 2009, we recorded a **divestiture gain** of \$129 million related to the sale of our *Pop•Secret* product line for \$192 million in cash.

Restructuring, impairment, and other exit costs were \$30 million for the nine-month period ended February 28, 2010, and \$6 million for the same period of fiscal 2009. During the third quarter of fiscal 2010, we decided to exit certain underperforming products in our Bakeries and Foodservice segment. As a result of this decision, we concluded that the future cash flows generated by these products will be insufficient to recover the net book value of the associated long-lived assets. Accordingly, we recorded a non-cash charge of \$6 million primarily related to the impairment of these long-lived assets. No employees were affected and we expect this action to be completed by the end of the third quarter of fiscal 2011. During the second quarter of fiscal 2010, we decided to exit certain underperforming products in our U.S. Retail segment to rationalize capacity for more profitable items. Our decisions to exit these products resulted in a \$24 million non-cash charge against the related long-lived assets in the second quarter of fiscal 2010. No employees were affected by these actions. We expect to recognize \$2 million of other exit costs related to these actions, which we anticipate will be completed by the end of the second quarter of fiscal 2011. In addition, we recorded \$1 million of costs related to previously announced restructuring actions and a net gain of \$1 million related to the closure and sale of our Contagem, Brazil bread and pasta plant. In the nine-month period ended February 22, 2009, we did not undertake any new restructuring actions.

Interest, net for the nine-month period ended February 28, 2010, totaled \$275 million, a \$7 million decrease from the same period of fiscal 2009. Average interest bearing instruments decreased \$704 million leading to a \$29 million decrease in net interest, due to reduced share repurchase activity in the nine-month period ended February 28, 2010, versus the same period last year. This was offset by average interest rates which increased 50 basis points, generating a \$22 million increase in net interest due to a shift from short-term floating rate debt to long-term fixed rate debt versus the same period last year.

The **effective tax rate** for the nine-month period ended February 28, 2010, was 33.5 percent compared to 38.1 percent for the nine-month period ended February 22, 2009. The 4.6 percentage point decrease was primarily due to an unfavorable decision on an uncertain tax matter from the U.S. Court of Appeals for the Eighth Circuit, which increased income tax expense by \$53 million in the third quarter of fiscal 2009.

After-tax earnings from joint ventures for the nine-month period ended February 28, 2010, increased to \$86 million compared to \$80 million in the same period in fiscal 2009. In the nine-months ended February 28, 2010, net sales for Cereal Partners Worldwide (CPW) increased 3 percent, due to 4 points of growth from net price realization and mix and a 1 point increase in volume, offset by 2 points of unfavorable foreign exchange. Net sales for our Häagen-Dazs joint venture in Japan declined 1 percent, due to an 8 point decline in volume, offset by favorable foreign exchange.

Average diluted shares outstanding decreased by 5 million shares for the nine-month period ended February 28, 2010, from the same period a year ago, due primarily to the repurchase of 7 million shares since February 22, 2009 and a lower incremental share effect from stock options, partially offset by the issuance of shares of our common stock upon stock option exercises.

Net earnings were \$1,319 million in the nine-month period ended February 28, 2010, up 39 percent from \$946 million in the same period last year. **Diluted EPS** was \$3.87 in the nine-month period ended February 28, 2010, up 42 percent from \$2.73 last year. Diluted EPS for the nine-month period ended February 28, 2010 included a \$0.09 net gain related to the mark-to-market valuation of certain commodity positions, compared to a \$0.53 net reduction

in the same period of fiscal 2009. The nine-month period ended February 22, 2009, also included a \$0.21 gain related to the divestiture of our *Pop•Secret* product line, an \$0.08 gain from the settlement with the insurance carrier covering our *La Salteña* pasta manufacturing facility in Argentina, and a \$0.15 charge from a court ruling on an uncertain tax matter.

SEGMENT OPERATING RESULTS

U.S. Retail Segment Results

Net sales for our U.S. Retail operations grew 3 percent in the third quarter of fiscal 2010 to \$2,571 million. Net sales increased across most of our U.S. Retail divisions with net price realization and mix contributing 3 points of growth. Contributions from volume growth were flat.

Net sales for our U.S. Retail operations grew 4 percent in the nine-month period ended February 28, 2010, to \$7,885 million. Net sales increased across most of our U.S. Retail divisions with net price realization and mix adding 3 points and volume on a tonnage basis contributing 1 point of growth.

U.S. Retail Net Sales Percentage Change by Division

During the third quarter of fiscal 2010, net sales for Big G cereals grew 6 percent driven by *Multigrain Cheerios* and *Lucky Charms* and introductory sales of *Chocolate Cheerios* and *Wheaties Fuel*. Meals division net sales decreased 2 percent mainly from lower sales of *Progresso* ready-to-serve soups, offset by gains in *Old El Paso* Mexican products, *Green Giant* frozen vegetables, and *Helper* and *Restaurant Favorites* dinner mixes. Pillsbury net sales grew 2 percent including gains on *Pillsbury Toaster Strudel*, *Totino's* pizza, and *Pillsbury* refrigerated dough products. Net sales for Yoplait grew 2 percent, led by introductory sales of *Yoplait Delights* and *Yoplait* Greek style yogurt. Snacks net sales grew 15 percent, driven by several fruit snack varieties and *Fiber One* and *Nature Valley* grain snacks. Net sales for Baking Products declined 8 percent, reflecting a decrease in flour prices versus year-ago levels and competitive merchandising activity in dessert mixes. Small Planet Food's net sales were up 32 percent, reflecting performance of *Cascadian Farm* cereal and granola bars, *Muir Glen* tomatoes, and *Lärabar* fruit and nut energy bars.

Operating profits increased 9 percent to \$534 million in the third quarter of fiscal 2010 versus the same period a year ago driven by \$77 million of favorable net price realization and mix and \$52 million of favorable supply chain costs, partially offset by a 27 percent increase in advertising and media expenses.

Operating profits increased 14 percent to \$1.9 billion in the nine-month period ended February 28, 2010, versus the same period a year ago, primarily driven by favorable net price realization and mix of \$217 million, favorable supply chain costs of \$190 million and a volume increase of \$40 million, partially offset by a 25 percent increase in advertising and media expenses.

International Segment Results

Net sales for our International segment were up 11 percent in the third quarter of fiscal 2010 to \$644 million. This growth was driven by 8 points of favorable foreign currency exchange, 2 points of volume growth, and a 1 point increase from net price realization and mix.

Net sales for our International segment were up 4 percent in the nine-month period ended February 28, 2010, to \$2,030 million. This growth was driven by a 4 point increase from net price realization and mix. Foreign exchange and volume were both flat for the nine-month period ended in fiscal 2010 versus fiscal 2009.

International Net Sales Percentage Change by Geographic Region

Total	11 %	4 %

For the third quarter of fiscal 2010, net sales in Europe grew 13 percent driven by *Old El Paso* and *Nature Valley* in the United Kingdom. Net sales in Canada increased 17 percent due to volume increases in the cereal product line as a result of Olympic promotions, new *Nature Valley* launches, and favorable foreign currency exchange. In the Asia/Pacific region, net sales grew 18 percent due to growth from *Häagen-Dazs* shops and *Wanchai Ferry* products in China. Latin America net sales decreased 13 percent due to unfavorable foreign currency exchange in Venezuela and the discontinuation of our bread and pasta brands in Brazil in the fourth quarter of fiscal 2009. This decrease was partially offset by net price realization on *Diablitos* in Venezuela and volume growth from *La Salteña* in Argentina.

Operating profits declined 48 percent to \$25 million in the third quarter of fiscal 2010, reflecting unfavorable foreign currency effects and an increase in advertising and media expenses.

Operating profits declined 18 percent to \$172 million in the nine-month period of fiscal 2010 versus the same period a year ago, reflecting unfavorable foreign currency effects and an increase in advertising and media expenses.

In January 2010 the Venezuelan government devalued the Bolivar by resetting the official exchange rate. The effect of the devaluation was a \$14 million foreign exchange loss, primarily on the revaluation of non-Bolivar monetary balances in Venezuela. We continue to use the official exchange rate to translate the financial statements of our Venezuelan operations, as we intend to remit dividends solely through the government-operated Foreign Exchange Administration Board (CADIVI). The devaluation of the Bolivar also reduced the U.S. dollar equivalent of our Venezuelan operating profit, but this did not have a material impact on our results. During the third quarter of fiscal 2010 Venezuela became a highly inflationary economy. We do not expect that the effects of Venezuela's change to highly inflationary status will have a material impact on our results in the fourth quarter of fiscal 2010.

Bakeries and Foodservice Segment Results

Net sales for our Bakeries and Foodservice segment decreased 10 percent to \$414 million in the third quarter of fiscal 2010. Volume declined 5 points, including a 9 point reduction from divested product lines. Net price realization and mix drove a 5 point decrease, primarily from price declines indexed to wheat markets and unfavorable mix.

Net sales for our Bakeries and Foodservice segment decreased 14 percent to \$1,311 million in the nine-month period ended February 28, 2010. Volume declined 9 points, including a 9 point reduction from divested product lines. Net

price realization and mix drove a 5 point decrease, primarily from price declines indexed to wheat markets and unfavorable mix.

Bakeries and Foodservice Net Sales Percentage Change by Customer Segment

	Quarter Ended Feb. 28, 2010	Nine-Month Period Ended Feb. 28, 2010
Foodservice Distributors	2 %	(1) %
Convenience Stores	9	6
Bakeries and National Restaurant Accounts	(19)	(23)
Total	(10) %	(14) %

We realigned our Bakeries and Foodservice customer segments in fiscal 2010 and reclassified previous years to conform to the current year presentation.

Operating profits for the third quarter of fiscal 2010 were \$48 million, up from \$22 million in the third quarter of fiscal 2009. The increase is primarily due to favorable input costs of \$42 million, offset by unfavorable net price realization, divested product lines, and unfavorable mix of \$16 million.

Operating profits for the nine-month period ended February 28, 2010, were \$194 million, up from \$113 million in the nine-month period ended February 22, 2009. The increase is due to a decrease in input costs of \$77 million, an increase of \$10 million from grain merchandising earnings, and \$8 million of favorable net price realization. These were partially offset by a \$14 million decline from divested product lines.

UNALLOCATED CORPORATE ITEMS

Unallocated corporate items totaled \$40 million of expense in the third quarter of fiscal 2010 compared to \$46 million of income in the same period in fiscal 2009. In the third quarter of fiscal 2010 we recorded a \$5 million net increase in expense related to mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$71 million net increase in income in the third quarter of fiscal 2009. Also in the third quarter of fiscal 2010, we recorded a \$13 million recovery against a corporate investment which was written down in the third quarter last year. In addition during the third quarter of fiscal 2009, we also recognized a \$41 million gain from an insurance settlement as discussed previously in this MD&A.

Unallocated corporate expense totaled \$92 million in the nine-month period ended February 28, 2010, compared to \$405 million in the same period last year. In the nine-month period ended February 28, 2010, we recorded a \$48 million net decrease in expense related to mark-to-market valuation of certain commodity positions and grain inventories, compared to a \$289 million net increase in expense in the same period a year ago. Also in the third quarter of fiscal 2010, we recorded a \$13 million recovery against a corporate investment which was written down in the third quarter last year. In addition during the third quarter of fiscal 2009, we also recognized a \$41 million gain from an insurance settlement as discussed previously in this MD&A.

LIQUIDITY

During the nine-month period ended February 28, 2010, our operations generated \$1,558 million of cash compared to \$1,130 million in the same period last year, mainly reflecting the \$373 million increase in net earnings, which was partially offset by an increased use of cash in working capital. Also, net earnings for fiscal 2009 included a \$129 million pre-tax gain on the sale of our *Pop•Secret* product line.

Cash used by investing activities during the nine-month period ended February 28, 2010, was \$485 million, a \$328 million increase over the same period in fiscal 2009. The increased use of cash primarily reflects the \$192 million of proceeds from the divestiture of our *Pop•Secret* product line in fiscal 2009 and the \$41 million of insurance proceeds received in fiscal 2009 from the settlement with the insurance carrier covering the loss at our *La Salteña* pasta manufacturing facility in Argentina. We invested \$122 million in affiliates, mainly our CPW joint venture, in fiscal 2010. In addition, we invested \$419 million in land, buildings, and equipment in fiscal 2010, an increase of \$68 million over the prior year.

Cash used by financing activities increased \$548 million during the nine-month period ended February 28, 2010, over the same period a year ago. We repaid \$739 million of notes payable and long-term debt in fiscal 2010 versus a \$716 million net issuance of notes payable and long-term debt in fiscal 2009. We also used \$908 million less cash to repurchase shares than the same period last year. In addition, we paid \$478 million in dividends in fiscal 2010, \$40 million more than the prior year.

CAPITAL RESOURCES

Our capital structure was as follows:

In Millions	Feb. 28, 2010	May 31, 2009
Notes payable	\$ 581.1	\$ 812.2
Current portion of long-term debt	107.4	508.5
Long-term debt	5,671.6	5,754.8
Total debt	6,360.1	7,075.5
Noncontrolling interests	245.0	244.2
Stockholders' equity	6,232.1	5,172.3
Total capital	\$ 12,837.2	\$ 12,492.0

Our commercial paper borrowings are supported by fee-paid committed credit lines consisting of a \$1.8 billion facility expiring in October 2012 and a \$1.1 billion facility expiring in October 2010. As of February 28, 2010, we did not have any outstanding borrowings under these credit lines.

Our credit facilities and certain of our long-term debt and noncontrolling interests agreements contain restrictive covenants. As of February 28, 2010, we were in compliance with all of these covenants.

We have \$107.4 million of long-term debt maturing in the next 12 months that is classified as current. We believe that cash flows from operations, together with available short- and long-term debt financing, will be adequate to meet our liquidity and capital needs for at least the next 12 months.

We have an effective shelf registration statement on file with the Securities and Exchange Commission (SEC) covering the sale of debt securities. The shelf registration statement will expire in December 2011.

OFF BALANCE-SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

There were no material changes outside the ordinary course of our business in our contractual obligations or off-balance-sheet arrangements during the first nine-months of fiscal 2010.

SIGNIFICANT ACCOUNTING ESTIMATES

Our significant accounting policies are described in Note 2 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2009. The accounting policies used in preparing our interim fiscal 2010 Consolidated Financial Statements are the same as those described in our Form 10-K, except as discussed in Notes 2, 16 and 17 to our Consolidated Financial Statements included in this Form 10-Q. We tested our goodwill and brand intangibles for impairment on our annual assessment date in the third quarter of fiscal 2010. As of our annual impairment assessment date, there was no impairment of any of our intangibles as their related fair values were substantially in excess of the carrying values.

Our significant accounting estimates are those that have meaningful impact on the reporting of our financial condition and results of operations. These estimates include our accounting for promotional expenditures, intangible assets, stock compensation, income taxes, and defined benefit pension, other postretirement, and postemployment benefits. The assumptions and methodologies used in the determination of those estimates as of February 28, 2010, are the same as those described in our Annual Report on Form 10-K for the fiscal year ended May 31, 2009.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued new accounting guidance that changes the consolidation model for variable interest entities (VIEs). The guidance requires companies to qualitatively assess the determination of the primary beneficiary of a VIE based on whether the company (1) has the power to direct matters that most significantly impact the VIE's economic performance, and (2) has the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. The guidance is effective for fiscal years beginning after November 15, 2009, which for us is fiscal 2011. We are currently evaluating the impact of the guidance on our results of operations and financial position.

In December 2008, the FASB issued new guidance on employer's disclosures for post-retirement benefit plan assets. The guidance requires an employer to disclose information on the investment policies and strategies and the significant concentrations of risk in plan assets. An employer must also disclose the fair value of each major category of plan assets as of each annual reporting date together with the information on the inputs and valuation techniques used to develop such fair value measurements. The guidance will be effective for us as of May 30, 2010, and will have no impact on our results of operations or financial position.

NON-GAAP MEASURES

We have included in this MD&A a discussion of total segment operating profit which is a measure of financial performance that is not defined by GAAP. This non-GAAP measure should be viewed in addition to, and not in lieu of, the comparable GAAP measure.

Total segment operating profit is used in internal management reporting and as a component of the Board of Directors' rating of our performance for management and employee incentive compensation. Management and the Board of Directors believe that this measure provides useful information to investors because it is the profitability measure we use to evaluate segment performance. A reconciliation of this measure to the relevant GAAP measure, operating profit, is included in Note 16 to the Consolidated Financial Statements included in this Form 10-Q.

GLOSSARY

AOCI. Accumulated other comprehensive income (loss).

Derivatives. Financial instruments such as futures, swaps, options, and forward contracts that we use to manage our risk arising from changes in commodity prices, interest rates, foreign exchange rates, and stock prices.

Generally Accepted Accounting Principles (GAAP). Guidelines, procedures, and practices that we are required to use in recording and reporting accounting information in our financial statements.

Goodwill. The difference between the purchase price of acquired companies and the related fair values of net assets acquired.

Hedge accounting. Accounting for qualifying hedges that allows changes in a hedging instrument's fair value to offset corresponding changes in the hedged item in the same reporting period. Hedge accounting is permitted for certain hedging instruments and hedged items only if the hedging relationship is highly effective, and only prospectively from the date a hedging relationship is formally documented.

Interest bearing instruments. Notes payable, long-term debt, including current portion, cash and cash equivalents, and certain interest bearing investments classified within prepaid expenses and other current assets and other assets.

LIBOR. London Interbank Offered Rate.

Mark-to-market. The act of determining a value for financial instruments, commodity contracts, and related assets or liabilities based on the current market price for that item.

Noncontrolling interests. Interests of subsidiaries held by third parties.

Net mark-to-market valuation of certain commodity positions. Realized and unrealized gains and losses on derivative contracts that will be allocated to segment operating profit when the exposure we are hedging affects earnings.

Net price realization. The impact of list and promoted price changes, net of trade and other price promotion costs.

Notional principal amount. The principal amount on which fixed-rate or floating-rate interest payments are calculated.

OCI. Other Comprehensive Income.

Total debt. Notes payable and long-term debt, including current portion.

Translation adjustments. The impact of the conversion of our foreign affiliates' financial statements to U.S. dollars for the purpose of consolidating our financial statements.

Variable interest entities (VIEs). A legal structure that is used for business purposes that either (1) does not have equity investors that have voting rights and share in all the entity's profits and losses or (2) has equity investors that do not provide sufficient financial resources to support the entity's activities.

CAUTIONARY STATEMENT RELEVANT TO FORWARD-LOOKING INFORMATION FOR THE PURPOSE OF "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This report contains or incorporates by reference forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are based on our current expectations and assumptions. We also may make written or oral forward-looking statements, including statements contained in our filings with the SEC and in our reports to stockholders.

The words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "plan," "project" or similar expressions identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical results and those currently anticipated or projected. We wish to caution you not to place undue reliance on any such forward-looking statements.

In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we are identifying important factors that could affect our financial performance and could cause our actual results in future periods to differ materially from any current opinions or statements.

Our future results could be affected by a variety of factors, such as: competitive dynamics in the consumer foods industry and the markets for our products, including new product introductions, advertising activities, pricing actions, and promotional activities of our competitors; economic conditions, including changes in inflation rates, interest rates, tax rates, or the availability of capital; product development and innovation; consumer acceptance of new products and product improvements; consumer reaction to pricing actions and changes in promotion levels; acquisitions or dispositions of businesses or assets; changes in capital structure; changes in laws and regulations, including labeling and advertising regulations; impairments in the carrying value of goodwill, other intangible assets, or other long-lived assets, or changes in the useful lives of other intangible assets; changes in accounting standards and the impact of significant accounting estimates; product quality and safety issues, including recalls and product liability; changes in consumer demand for our products; effectiveness of advertising, marketing, and promotional programs; changes in consumer behavior, trends, and preferences, including weight loss trends; consumer perception of health-related issues, including obesity; consolidation in the retail environment; changes in purchasing and inventory levels of significant customers; fluctuations in the cost and availability of supply chain resources, including raw materials, packaging, and energy; disruptions or inefficiencies in the supply chain; volatility in the market value of derivatives used to manage price risk for certain commodities; benefit plan expenses due to changes in plan asset values and discount rates used to determine plan liabilities; failure of our information

technology systems; resolution of uncertain income tax matters; foreign economic conditions, including currency rate fluctuations; and political unrest in foreign markets and economic uncertainty due to terrorism or war.

You should also consider the risk factors that we identify on pages 7 through 12 of our Annual Report on Form 10-K for the fiscal year ended May 31, 2009, which could also affect our future results.

We undertake no obligation to publicly revise any forward-looking statements to reflect events or circumstances after the date of those statements or to reflect the occurrence of anticipated or unanticipated events.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The estimated maximum potential value-at-risk arising from a one-day loss in fair value for our interest rate and commodity market-risk-sensitive instruments outstanding as of February 28, 2010, was \$31 million and \$8 million, respectively. The \$13 million decrease in interest rate value-at-risk during the nine-month period ended February 28, 2010, was due to decreased interest rate market volatility in fiscal 2010 and new hedging instruments that reduced value-at-risk. The \$3 million decrease in commodity value-at-risk during the third quarter of fiscal 2010 was due to lower volatility in commodity markets. For additional information, see Item 7A of our Annual Report on Form 10-K for the fiscal year ended May 31, 2009.

Item 4. Controls and Procedures.

We, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of February 28, 2010, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is (1) recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and (2) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, in a manner that allows timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during our fiscal quarter ended February 28, 2010, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table sets forth information with respect to shares of our common stock that we purchased during the fiscal quarter ended February 28, 2010:

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program (b)	Maximum Number of Shares that may yet be Purchased Under the Program (b)
November 30, 2009- January 3, 2010	—	\$ —	—	18,288,643
January 4, 2010- January 31, 2010	850,000	71.34	850,000	17,438,643
February 1, 2010- February 28, 2010	407,800	69.35	407,800	17,030,843
Total	1,257,800	\$ 70.70	1,257,800	17,030,843

(a) These shares were purchased in the open market.

(b) On December 11, 2006, our Board of Directors approved and we announced an authorization for the repurchase of up to 75,000,000 shares of our common stock. Purchases can be made in the open market or in privately negotiated transactions, including the use of call options and other derivative instruments, Rule 10b5-1 trading plans, and accelerated repurchase programs. The Board did not specify an expiration date for the authorization.

ADDENDUM NO 10 TO THE
PROTOCOL OF CEREAL PARTNERS WORLDWIDE

JENNY CRAIG EXCEPTION TO THE PRODUCT "TERRITORY" OF THE JV

The following sets forth the understanding of General Mills, Inc ("GMI") and Nestlé SA (NSA) with respect to Jenny Craig distributing Jenny Craig branded breakfast cereals in Europe. CPW SA is a party to this understanding.

Jenny Craig is part of the Nestlé Nutrition Weight Management business unit of Nestlé.

The *Jenny Craig* Weight Loss Programme is a weight loss programme that comprises three elements: a range of dietician-designed nutritionally balanced, portion-controlled meals and snacks; a personal consultant and help on hand 24/7; personalised menu plan meals sent in portion-controlled packs direct to the clients home or office.

CPW SA has authorized a small scale test launch of Jenny Craig breakfast cereals as part of the Jenny Craig Weight Loss Programme in the UK in 2009.

The Jenny Craig Weight Loss Programme also include a Jenny Craig cereal bar for snacks.

CPW has agreed to supply the Jenny Craig breakfast cereals and cereal bars to Nestlé.

Consequently, GMI, NSA and CPW SA agree as follows:

1. Nestlé through its Nestlé Nutrition Weight Management business unit is authorized to distribute in the European Union breakfast cereal under the brand Jenny Craig as part of the Jenny Craig Weight Loss Programme. Risks and benefits of this business are for Nestlé.
2. Unless otherwise agreed between CPW and Nestlé, CPW will be the sole supplier of Jenny Craig breakfast cereals and cereal bars to Nestlé under terms and conditions to be agreed.
3. This authorization is only for Jenny Craig branded breakfast cereals included in the Jenny Craig Weight Loss Programme and distributed via the Jenny Craig direct to consumer distribution model. The product shall not be sold in the retail or out of home channels.

It is effective January 1, 2010.

Capitalized terms not defined herein shall have the meaning assigned in the Protocol.
