**During the third quarter of 2016, we implemented a new system and processes for tracking installed *da Vinci* systems in the field. As part of the transition process, we performed a verification audit of our installed base records that identified 42 systems, mostly older standard and S models which had been retired. We removed these retired systems from our installed base estimate during the third quarter of 2016.

(1) Non-GAAP gross profit margin is calculated by dividing non-GAAP gross profit by revenue.

(2) Non-GAAP operating margin is calculated by dividing non-GAAP operating income divided by revenue.

###

This information is supplemental to the first quarter 2017 earnings press release issued by Intuitive Surgical, Inc. on April 18, 2017, and should be read in conjunction with that release and the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2017, when filed with the U.S. Securities and Exchange Commission.

(#) About Non-GAAP Financial Measures

To supplement our consolidated financial statements, which are prepared and presented in accordance with accounting principles generally accepted in the United States (“GAAP”), we use the following non-GAAP financial measures: non-GAAP gross profit, non-GAAP gross profit margin, non-GAAP SG&A expenses, non-GAAP research and development (“R&D”) expenses, non-GAAP income from operations, non-GAAP operating margin, non-GAAP income before taxes, non-GAAP net income, and non-GAAP net income per diluted share (“EPS”). The presentation of this financial information is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP.

We use these non-GAAP financial measures for financial and operational decision-making and as a means to evaluate period-to-period comparisons. We believe that these non-GAAP financial measures provide meaningful supplemental information regarding our performance and liquidity by excluding non-cash charges, such as amortization of intangible assets and share-based compensation (“SBC”) expenses, and other special items. We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting, and analyzing future periods. These non-GAAP financial measures also facilitate management’s internal comparisons to our historical performance and liquidity. We believe these non-GAAP financial measures are useful to investors because (1) they allow for greater transparency with respect to key metrics used by management in its financial and operational decision-making and (2) they are used by our institutional investors and the analyst community to help them analyze the performance of our business.

Non-GAAP gross profit. We define non-GAAP gross profit as gross profit excluding the amortization of intangible assets, expenses related to SBC, and litigation charges and recoveries.

Non-GAAP SG&A expenses. We define non-GAAP SG&A expenses as SG&A expenses excluding the amortization of intangible assets, expenses related to SBC, and litigation charges and recoveries.

Non-GAAP R&D expenses. We define non-GAAP R&D expenses as R&D expenses excluding the amortization of intangible assets and expenses related to SBC.

Non-GAAP income from operations. We define non-GAAP income from operations as income from operations excluding the amortization of intangible assets, expenses related to SBC, and litigation charges and recoveries.

Non-GAAP income before taxes. We define non-GAAP income before taxes as income before taxes excluding the amortization of intangible assets, expenses related to SBC, and litigation charges and recoveries.

Non-GAAP net income and EPS. We define non-GAAP net income as net income excluding the amortization of intangible assets, expenses related to SBC, and litigation charges and recoveries, net of the related tax effects; and the excess tax benefits or deficiencies associated with share-based compensation arrangements. The tax effects are determined by applying a calculated non-GAAP effective tax rate, which is commonly referred to as the with-and-without method. Without excluding these tax effects, investors would only see the gross effect that these non-GAAP adjustments had on our operating results. We define non-GAAP EPS as non-GAAP net income divided by the weighted average outstanding shares, on a fully-diluted basis.

There are a number of limitations related to the use of non-GAAP measures versus measures calculated in accordance with GAAP. Non-GAAP gross profit, non-GAAP SG&A expenses, non-GAAP R&D expenses, non-GAAP income from operations, non-GAAP income before taxes, non-GAAP net income, and non-GAAP EPS exclude amortization of intangible assets and SBC, which are recurring expenses. SBC has been and will continue to be for the foreseeable future a significant recurring expense in our business. In addition, the components of the costs that we exclude in our calculation of non-GAAP net income and non-GAAP EPS may differ from the components that our peer companies exclude when they report their results of operations. Management addresses these limitations by providing specific information regarding the GAAP amounts excluded from non-GAAP net income and non-GAAP EPS and evaluating non-GAAP net income and non-GAAP EPS together with net income and EPS calculated in accordance with GAAP.
