Why Grupo Security?

Well-Established Brand in the Attractive Chilean Market. Chile offers market-friendly regulated industries with attractive growth potential and strong macroeconomic dynamics. Banco Security's (64% of Grupo Security's assets as of June'17) strategy centers on providing innovative and segmented products to a well-defined niche market of large and medium-sized companies and affluent individuals. The Chilean insurance market provides attractive opportunities with penetration levels at 5%, below the 7-11% in developed countries. Gross life written premiums for the sector have expanded at a 10-year CAGR of 13.2% in Ch\$. Chile also has a strong asset management industry, with mutual funds expanding at a 12.6% 10-year CAGR in Ch\$. Recognized for its client service, Banco Security ranks among the first Chilean banks in Customer Satisfaction.

Successful Track Record of Acquiring and Integrating Operations Capitalizing on Industry Consolidation Opportunities. Over the past 20 years, Grupo Security has successfully completed 12 strategic acquisitions for a total investment of US\$728 million, expanding its service offering and market share in its target segments while achieving significant synergies. The acquisition of the Cruz del Sur insurance, asset management and brokerage businesses in mid-2013 for approx. US\$300 million resulted in annual synergies equivalent to US\$25.9 million, above the US\$15.8 million originally anticipated. In 2012, Grupo Security began its regional expansion strategy in the Andean region through the acquisition of the leading corporate travel agency in Peru to gain experience in that market and pave the way for further expansion. Early 2015 Grupo Security announced the US\$22.5 million acquisition of insurance company Protecta, the country's 7th largest life insurance company establishing a foothold in the Peruvian financial market.

Expansion within the Andean Region Offers Long-Term Growth Potential. Peru offers one of the most attractive high-growth banking and insurance markets in LatAm, with low penetration of loans and insurance services. Despite high industry concentration, insurance to GDP stood at 1.9% in Dec'15, similar to that in Chile in 1990. System premiums and investments have expanded at a 10-year CAGR of 12% and 14% in US\$, respectively, compared with 11% and 8% in Chile. Furthermore, loans to GDP in Peru stood at 37% in Dec'15, compared with 82% in Chile, while system loans have expanded at a 10-year CAGR of 16.1% in US\$, compared with 8.7% in Chile. Expected GDP growth of 2.8% for 2017 and 4.0% for 2018, ahead of most other countries in LatAm, low inflation and a growing middle class also support growth. Peru's legal, regulatory and operational environment shares similarities with Chile promoting the development of this market.
