Annual Report to Shareholders

Gold Reserve is a company in transition. After many years of advancing the Brisas Project towards operations we now are seeking to obtain the fair market value of Brisas through alternative processes while positioning the Company for other mining opportunities.

1

After many years of developing the Brisas Project and reaching important milestones along the way, the Government of Venezuela revoked our previously issued environmental permit to commence construction. As a result of the permit revocation, in October 2009 the Company filed a Request for Arbitration under the Additional Facility Rules of the International Centre for Settlement of Investment Disputes (“ICSID”) of the World Bank, in Washington D.C. against the Republic of Venezuela. In the arbitration we are seeking compensation for the losses caused to the Company resulting from Venezuela’s violations of the Canada – Venezuela Bilateral Investment Treaty.

In November 2009, ICSID registered our Request for Arbitration and in April 2010 the first session of the Tribunal was held to establish procedural matters and the calendar for the parties' written submissions and the oral hearing. In compliance with the established schedule, we filed our initial written submission or Memorial, on September 24, 2010, seeking compensation of US\$1.928 billion for all of the loss and damage including the full market value of the legal rights to develop the Brisas Project resulting from Venezuela's wrongful conduct.

In December 2010, Venezuela filed a request with the Tribunal for the production of documents over and above the 33 volumes of hard copy exhibits and several thousand pages of electronic appendices which accompanied the Company's September 24, 2010 Memorial. In addition, Venezuela made a jurisdictional objection claiming that Gold Reserve did not have the right to present a claim under the Canada – Venezuela Treaty and further requested a suspension of the proceedings on the merits so that the jurisdictional objections could be treated as a preliminary matter separate from the merits.

On February 3, 2011, the Tribunal issued a procedural order granting in part Venezuela's request for the production of certain documents. To the extent the documents ordered to be produced were deemed to be proprietary by the Company, the Tribunal's order granted view-only access to such documents. In addition to the production of documents, the Tribunal established a revised schedule for the

remaining written submissions including granting Venezuela a five-week extension from March 7, 2011 to April 14, 2011 to file its response or Counter-Memorial to the Company's Memorial. The oral hearing date of February 6, 2012 which was established earlier remains unchanged.

On February 25, 2011, the Tribunal denied Venezuela's previous request to bifurcate the arbitration into a jurisdiction phase and a merits phase and decided that Venezuela's jurisdictional objections should be addressed together with the merits during the remaining course of the arbitration process.

We are very pleased with the Tribunal's procedural rulings to date and the way the case is progressing so far. The document requests were handled reasonably, jurisdictional objections were handled in a fair and efficient manner, and the schedule for the hearing on February 6, 2012 remains in place. Although the hearing was set to be held in Paris, due to our request which with Venezuela agreed, the Tribunal decided to accommodate the parties by holding the hearing in Washington, DC. This accommodation will save considerable travel and legal expenses and this flexibility on the part of the Tribunal is greatly appreciated by management of the Company.

In continuance of our 2010 efforts, our primary 2011 objectives are to manage the arbitration claim, to accelerate its completion and to minimize costs to the extent possible, and to pursue an amicable settlement that may include a monetary agreement and/or

project participation. Gold Reserve has expended close to \$300 million in exploration/development/engineering and procurement to advance Brisas to the construction phase and the Company's completed work product could be invaluable in monetary and time savings for Venezuela.

In October 2010, the Company attended a meeting with representatives from the Venezuelan Attorney General's office and the Ministry of Basic Industry and Mines ("MIBAM") to discuss our dispute and possible resolutions. As a result of that meeting, we have had further formal and informal communications and expect to meet with these representatives again in the near future to continue our discussions and settlement efforts. In our communications we have proposed various alternatives to achieve both the Company's and Venezuela's objectives in a mutually beneficial manner.

Other objectives that we are pursuing and hopeful of achieving during 2011 are the disposition of the remaining Brisas Project related assets, originally costing approximately \$39 million and recorded on the balance sheet at their estimated net realizable value of \$28 million, and advancing alternative industry opportunities for Gold Reserve's direct participation. Subject to the sale of the Brisas Project assets and the assistance of the note holders, we are hopeful that we can redeem, restructure or otherwise modify the terms of the 5.50% convertible notes.

In 2010 we were successful in reducing our controllable costs by over 40% although this reduction was offset by increased arbitration and equipment holding costs. During 2011 we plan to continue the reduction of our costs including our arbitration and equipment holding costs in addition to maintaining a strong financial position throughout the arbitration process.

Also, we plan on maintaining a well qualified work force that will allow us to efficiently advance the arbitration process, support our efforts to settle our dispute with Venezuela, which may include future participation in the Kilometer 88 region, and maintain our capability to transition the Company into new projects should circumstances warrant.

The Company continues to be well served by its employees during this difficult time and we thank them and all of our stakeholders for their past and continuing support.

On behalf of the board,

Rockne J. Timm
Chief Executive Officer

A. Douglas Belanger
President

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

The information presented or incorporated by reference in this Annual Report contains both historical information and forward-looking statements (within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act and the Securities Act (Ontario)) that may state our intentions, hopes, beliefs, expectations or predictions for the future.

In this report, forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by us at this time, are inherently subject to significant business, economic and competitive uncertainties and contingencies that may cause the Company's actual financial results, performance, or achievements to be materially different from those expressed or implied herein.

Forward-looking statements involve risks and uncertainties, as well as assumptions that may never materialize, prove incorrect or materialize other than as currently contemplated which could cause our results to differ materially from those expressed or implied by such forward-looking statements. The words "believe," "anticipate," "expect," "intend," "estimate," "plan," "may," "could" and other similar expressions that are predictions of or indicate future events and future trends which do not relate to historical matters, identify forward-looking statements. Any such forward-looking statements are not intended to give any assurances as to future results. Numerous factors could cause actual results to differ materially from those in the forward-looking statements as more fully described in our Annual Report on Form 10-K –Part I –Item 1A. Risk Factors.

Investors are cautioned not to put undue reliance on forward-looking statements, and investors should not infer that there has been no change in our affairs since the date of this report that would warrant any modification of any forward-looking statement made in this document, other documents filed periodically

with securities regulators or documents presented on our website. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by this notice. We disclaim any intent or obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of assumptions or factors, whether as a result of new information, future events or otherwise, subject to our disclosure obligations under applicable rules promulgated by the U.S. Securities and Exchange Commission (the "SEC").

CAUTIONARY NOTE REGARDING DIFFERENCES IN U.S. AND CANADIAN REPORTING PRACTICES

We maintain our accounts in U.S. dollars and prepare our financial statements, which are filed with this Annual Report, in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"), and subject to Canadian auditing and auditor independence standards. Accordingly, our audited consolidated financial statements included herein may not be comparable to financial statements of companies reporting in accordance with U.S. GAAP. Significant differences between Canadian GAAP and U.S. GAAP are described in Note 19 of our consolidated financial statements.

CURRENCY AND EXCHANGE RATES

Unless otherwise indicated, all references to "\$" or "U.S. dollars" in this Annual Report refer to U.S. dollars, references to "Cdn\$" or "Canadian dollars" refer to Canadian dollars and references to "Bs" refer to Venezuelan Bolivars. The 12 month average rate of exchange for one Canadian dollar, expressed in U.S. dollars, for each of the last three years equaled 0.9707, 0.8761, and 0.9374, respectively and the exchange rate at the end of each such period equaled 0.9991, 0.9559, and 0.8170, respectively.

OVERVIEW

This Management's Discussion and Analysis of Financial Condition and Results of Operations, dated March 22, 2011 is intended to assist in understanding and assessing our results of operations and financial condition.

Gold Reserve, an exploration stage company, is engaged in the business of acquiring, exploring and developing mining projects. From 1992 to 2008 we focused substantially all of our management and financial resources on the development of the Brisas gold and copper project located in the Kilometre 88 mining district of the State of Bolivar in south-eastern Venezuela (which we refer to as the "Brisas Project" or "Brisas"). Since 1992, expenditures associated with the Brisas Project and Choco 5 property both capitalized and expensed as a period cost total nearly \$300 million.

The Company's current financial position and historical results of operations are a product of the Company's efforts, since 1992, to develop the Brisas Project into an operating mine and more specifically, a function of our decision, subsequent to the issuance of the Authorization to Affect, to place orders to acquire approximately \$125 million of equipment, raise \$183 million through the issuance of convertible notes and common shares and to continue to incur substantial operating deficits. Likewise, our October 2009 Request for Arbitration under the Additional Facility Rules of ICSID and the write-off of the costs associated with our Venezuelan operations will continue to influence the future financial position and results of operations of the Company. We expect the arbitration process, which commenced in April 2009 when we advised Venezuela of our claims pursuant to the Canada-Venezuela Treaty, to last three to five years from commencement and consume substantial management time and financial resources.

In continuance of our 2010 efforts, our primary 2011 objectives are to manage the arbitration claim against Venezuela including, to the extent possible, accelerating its completion and to minimize costs. Our other major objectives for 2011 are to continue to: (1) pursue an amicable settlement with Venezuela that may include a monetary agreement and/or project participation; (2) dispose of previously purchased Brisas Project assets, which originally cost

approximately \$39 million and are recorded on the balance sheet at their estimated net realizable value of \$28 million; (3) pursue alternative industry opportunities for participation; and (4) continue to evaluate the Company's options to redeem, restructure or otherwise modify the terms of the 5.50% convertible notes which, among other things, are subject to the sale of the Brisas Project assets.

We believe the successful execution of these objectives will be facilitated by the Company's senior management team, which has extensive technical, financial and administrative experience in the mining industry- substantially all of whom have been employed by the Company for over 15 years with a single focus of developing the Brisas Project. These individuals not only possess valuable historical knowledge related to the Brisas Project which is important to the successful execution of our arbitration efforts but they also play a critical role in the Company's ongoing evaluation and monitoring of mining opportunities for potential participation by the Company. The timing of any such new investment or transaction if any, and the amounts that may be required cannot be determined at this time and are subject to available cash, sale of equipment originally slated for the Brisas Project and/or future financings, if any.

On October 26, 2009, in apparent response to our filing on October 21, 2009, a Request for Arbitration under the Additional Facility Rules of ICSID against Venezuela, government personnel arrived at the project site, claimed ownership of the Brisas Alluvial Concession, seized assets, expelled our personnel, and took physical possession of the property. Subsequently, on November 4, 2009, Venezuela notified us through the issuance of an Administrative Act, dated October 20, 2009, of its intent to cancel our underlying hard rock concession which it formally completed in June 2010. We recorded a non-cash expense adjustment of approximately of \$151 million related to the capital costs associated with the Brisas Project for the year ended December 31, 2009.

In October 2010, the Company attended a meeting with representatives from the Venezuelan Attorney General's office and MIBAM to discuss our dispute and possible resolutions. As a result of the meeting we have had formal and informal communications and expect to meet with these representatives in the near future to continue our discussions.

In December 2010, Venezuela filed a request with the Tribunal for the production of documents over and above the 33 volumes of hard copy exhibits and thousands of pages of electronic appendices which accompanied the Company's September 24, 2010 Memorial and also filed a jurisdictional objection claiming that Gold Reserve did not have the right to present a claim under the Canada –Venezuela Treaty. Venezuela further requested a suspension of the proceedings on the merits so that the jurisdictional objections could be treated as a preliminary matter separate from the merits.

On February 3, 2011, the Tribunal issued a procedural order granting in part Venezuela's request for the production of certain documents. To the extent the documents ordered to be produced were deemed to be proprietary by the Company, the Tribunal's order granted view-only access to such documents. In addition to the production of documents, the Tribunal in its order established a revised schedule for the remaining written submissions including granting Venezuela a five week extension from March 7, 2011 to April 14, 2011 to file its response or Counter-Memorial to the Company's Memorial. The oral hearing date of February 6, 2012 remains unchanged.

On February 25, 2011, the Tribunal denied Venezuela's previous petition to bifurcate the arbitration into a jurisdiction phase and a merits phase and decided that Venezuela's jurisdictional objections will be addressed together with the merits.

We have no commercial production at this time and, as a result, we have not recorded revenue or cash flows from mining operations and continue to experience losses from operations, a trend we expect to continue unless and until the investment dispute regarding Brisas is resolved favorably to the Company and/or we acquire or invest in an alternative project. Historically we have financed the Company's operations through the issuance of common stock, other equity securities and convertible debt. The Company has only one operating segment, the exploration and development of mineral properties. Segmented financial information by geographic region is shown in Note 14 to the consolidated financial statements.

The expense categories shown in the consolidated statements of operations were reclassified in 2010 to better present the current operations of the Company.

As a result, expenses for the years ended December 31, 2009 and 2008 have been reclassified to be comparative with the December 31, 2010 presentation. These reclassifications had no effect on previously reported results of operations.

We prepare our consolidated financial statements in U.S. dollars in accordance with accounting principles generally accepted in Canada. See Note 19 to the consolidated financial statements.

Forward-looking statements, which reflect our current views about future events, are based on assumptions and are subject to known and unknown risks and uncertainties that could cause actual results to differ materially from those contemplated by these statements. Factors that may cause differences between actual results and those contemplated by forward-looking statements include, but are not limited to, those discussed in our Annual Report on Form 10-K –Part I– Item 1A. Risk Factors. This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with "Selected Financial Data" and the consolidated financial statements and related notes.

The Company no longer characterizes historically reported mineralization as "reserves". The information contained in this Annual Report relating to our past development efforts, regulatory process and reported mineral reserves for the Brisas Project and Choco 5 property is presented only for informational and historical purposes and should not be construed as an indication of our expectations regarding the future development and operation of these properties or the outcome of the arbitration proceedings.

Investors are urged to read our filings with U.S. and Canadian securities regulatory agencies, which can be viewed on-line at www.sec.gov, www.sedar.com or at the Company's website, www.goldreserveinc.com which also includes the Company's corporate governance policies. Additionally, you can request a copy of any of these documents directly from us.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2010 the Company had cash and cash equivalents of approximately \$58.2 million which represents a net reduction over the prior period of approximately \$2.8 million. The net reduction in cash and cash equivalents was primarily comprised of cash used by operations of \$20.4 million offset by cash provided by investing activities of \$17.6 million. The components of changes in cash are more fully described in the “Operating,” “Investing” and “Financing” Activities section below.

	2010	2009	Change
Cash and cash equivalents	\$ 58,186,478	\$ 60,962,813	\$ (2,776,335)

Total financial resources, which includes cash and cash equivalents as well as restricted cash, marketable securities and assets held for sale (which were liquidated in the first quarter of 2011), totaled approximately \$68.4 million at December 31, 2010. As of March 22, 2011 we held approximately \$66 million in cash and investments. The Company’s cash and investments are held primarily in US dollar denominated accounts.

In addition to cash and cash equivalents and investments, the Company holds approximately \$28.1 million of equipment that it intends to dispose of in 2011. The primary future obligation of the Company is the \$103.5 million 5.50% convertible notes which may be settled in cash or common shares in the event the holder chooses the one-time option to put the notes back to the Company for repurchase on June 15, 2012. See Note 17 to the consolidated financial statements and Contractual Obligations below. With the ability to settle any call for redemption of the convertible notes with common shares, we believe that cash and investment balances and funds available from potential future equipment sales will be sufficient to enable us to fund our activities through 2012.

The timing and extent of additional funding, if any, depends on a number of important factors, including, but not limited to the timing and outcome of our investment dispute with Venezuela, the timing and the amount of proceeds, if any, from the sale of Brisas Project assets, the extent of future acquisitions or investments, if any, status of the financial markets and our share price.

Operating Activities

Cash flow used by operating activities for 2010 was approximately \$20.4 million, which consists of a net operating loss of approximately \$23.5 million adjusted for certain non-cash income and expense items primarily related to the write-down of Brisas Project assets, accretion of convertible notes and shares issued for compensation and certain non-cash changes in working capital. Cash flow used by operating activities for 2010 represented an increase over the prior comparable period of approximately \$5.3 million which is primarily attributable to the increase in costs associated with arbitration and equipment storage, maintenance and insurance (equipment holding costs). Although management was successful in reducing certain operating expenses as more fully discussed below in Results of Operations, non-core expenses increased as a result of our arbitration efforts, equipment holding costs and the recognition of interest expense in the statement of operations which was previously capitalized.

Investing Activities

In 2010 net cash provided by investing activities amounted to \$17.6 million an increase of \$32.7 million compared to 2009 during which \$15 million of net cash was used in investing activities.

	2010	Change	2009	Change	2008
Net proceeds (purchases) of marketable securities	\$ 10,130,643	\$ 18,173,275	\$ (8,042,632)	\$ (9,247,214)	\$ 1,204,582
Purchase of property, plant and equipment	(9,496,692)	8,274,749	(17,771,441)	20,928,147	(38,699,588)
Proceeds from sale of equipment	8,914,615	1,617,017	7,297,598	(11,887,142)	19,184,740
Decrease in restricted cash	9,489,777	1,469,882	8,019,895	(26,551,036)	34,570,931
Capitalized interest on convertible debt	-	4,507,319	(4,507,319)	1,181,111	(5,688,430)
Other	(1,429,655)	(1,384,711)	(44,944)	72,816	(117,760)
	\$ 17,608,688	\$ 32,657,531	\$ (15,048,843)	\$ (25,503,318)	\$ 10,454,475

In 2010, net proceeds from marketable securities totaled approximately \$10.1 million compared to net purchases of \$8.0 million in 2009 and net proceeds of \$1.2 million in 2008. The change in marketable securities primarily relates to debt securities which were purchased in 2009 and matured in 2010. Investments in property, plant and equipment mainly relate to contractual purchases of equipment entered in 2007 and paid when the equipment was manufactured and delivered to the Company. Equipment purchases in 2010, 2009 and 2008 totaled approximately \$9.5 million, \$17.8 million and \$38.7 million, respectively.

Since the revocation of the Authorization to Affect, the Company has sold certain equipment originally costing approximately \$61.4 million. In 2010 the Company collected proceeds from the disposal of this equipment totaling approximately \$8.9 million. Over all, the Company has recovered approximately \$35.1 million of progress payments and the purchaser assumed the Company's remaining payment obligations of approximately \$21.9 million. As of December 31, 2010,

the Company's equipment purchase commitments were substantially complete and it held approximately \$28.1 million of equipment intended for sale.

In connection with a portion of the 2007 equipment commitments, we opened an irrevocable standby letter of credit, secured by cash, with a Canadian chartered bank providing security on the performance of certain of our purchase obligations. During 2010, the Company made its final payments on the commitments covered under the letter of credit and accordingly, as of December 31, 2010 the Company had no restricted cash.

Prior to October 2009, we capitalized interest expense related to our convertible notes. After Venezuela seized physical control of the Brisas Project in October 2009, we expensed interest charges related to the convertible notes. Included in interest expense are amounts related to the accretion of the notes to their face value. See Note 17 to the consolidated financial statements.

Financing Activities

The Company had no significant financing activities in 2010. Net proceeds from the issuance of commons shares have been limited over the last three years and mainly relate to the exercise of employee stock options. The repurchase of convertible notes relates to the open market purchase of approximately \$1.1 million (face value) of convertible notes for \$0.4 million. See Note 17 to the consolidated financial statements and Contractual Obligations below.

	2010	Change	2009	Change	2008
Net proceeds from issuance of common shares	\$ 43,661	\$ 36,573	\$ 7,088	\$ (302,117)	\$ 309,205
Repurchase of convertible notes	-	415,254	(415,254)	(379,387)	(35,867)
	\$ 43,661	\$ 451,827	\$ (408,166)	\$ (681,504)	\$ 273,338

RESULTS OF OPERATIONS

Summary Results of Operations

Consolidated net loss for the year ended December 31, 2010 was approximately \$23.5 million or \$0.41 per share compared to a net loss for the year ended December 31, 2009 of \$165.4 million or \$2.89 per share, a decrease of approximately \$141.9 million. Subsequent to the seizure of the Brisas Project in October 2009 by Venezuela, we recorded a \$150.7 million non-cash expense adjustment related to the carrying value of the project assets and the value of certain processing and related equipment.

	2010	Change	2009	Change	2008
Other Income	\$ 958,368	\$ (2,207,368)	\$ 3,165,736	\$ 644,434	\$ 2,521,302
Total expenses	(24,505,302)	144,110,262	(168,615,564)	(146,368,141)	(22,247,423)
Net Loss	\$ (23,546,934)	\$ 141,902,894	\$ (165,449,828)	\$ (145,723,707)	\$ (19,726,121)

Excluding the 2009 extraordinary loss on expropriation of assets of \$150.7 million, the net loss increased from 2009 to 2010 approximately \$8.8 million. Core operating expenses (Corporate G&A, Venezuela expenses, Corporate communications and Legal and accounting) declined by nearly 40% or \$4.3 million during this period but were offset by increases in costs associated with arbitration, equipment holding costs and interest expense which was previously capitalized.

Consolidated net loss for the year ended December 31, 2009 was approximately \$165.5 million or \$2.89 per share, an increase of approximately \$145.7 million from 2008. In addition to the \$150.7 million adjustment for the impairment of the assets associated with the Brisas project, the change in net loss was due to decreases in other expenses of \$4.4 million and an increase in other income of \$0.6 million.

Other Income

We have no commercial production at this time and as a result, other income is often variable from period to period due to one-time or otherwise variable sources of income such as gains on disposition of marketable securities, extinguishment of debt and sale of equipment.

In 2010, the decrease in other income was primarily attributable to reductions in gains on sales of marketable securities of \$2.0 million. In addition, gains on extinguishment of debt decreased \$0.6 million due to the absence of any re-purchases of the Company's convertible notes. These reductions in other income were partially offset by a \$0.5 million gain on the disposition of equity interests in two previously consolidated subsidiaries. See Note 12 to the consolidated financial statements.

In 2009, the increase in other income was due to a \$2.5 million increase of gains on disposition of marketable securities and a \$0.5 million increase in gains on the extinguishment of debt as a result of the re-purchase of approximately \$1.0 million (face value) of the Company's convertible notes at a substantial discount. These increases were offset by a decrease in interest income primarily due to substantially reduced rates of return on invested cash and to a lesser extent, lower levels of invested cash.

	2010	Change	2009	Change	2008
Interest	\$ 242,170	\$ (46,782)	\$ 288,952	\$ (2,398,873)	\$ 2,687,825
Gain (loss) on disposition of marketable securities	241,621	(2,033,227)	2,274,848	2,517,901	(243,053)
Gain on sale of subsidiaries	474,577	474,577	-	-	-
Gain on extinguishment of debt	-	(601,936)	601,936	525,406	76,530
	<u>\$ 958,368</u>	<u>\$ (2,207,368)</u>	<u>\$ 3,165,736</u>	<u>\$ 644,434</u>	<u>\$ 2,521,302</u>

Expenses

Overall the changes in expenditures are a function of the Company's efforts to reduce principal operating expenses which are masked by ongoing costs associated with our arbitration claim against the Republic of Venezuela, equipment storage costs, takeover defense costs associated with the 2008 Rusoro hostile takeover bid and interest expense on the convertible debt, which as a result of the seizure of the Brisas Project is no longer capitalized as a cost of the project.

During 2010 and 2009, core operating costs decreased from the prior years by \$4.3 million and \$4.6 million, respectively, primarily as a result of reductions related to both the number of personnel and compensation related items, fees associated with consultants and other discretionary costs. Excluding the extraordinary loss, costs associated with equipment holding costs, further write-down of Brisas Project related assets, net equipment sales, arbitration, takeover defense and interest on the convertible notes that is no longer capitalized, increased during 2010 and 2009 by \$10.9 million and \$0.2 million, respectively.

	2010	Change	2009	Change	2008
Corporate general and administrative	\$ 3,288,691	\$ (1,271,030)	\$ 4,559,721	\$ (3,147,824)	\$ 7,707,545
Venezuela expenses	1,714,543	(1,886,105)	3,600,648	(1,429,893)	5,030,541

	18,529,799	10,875,668	7,654,131	223,086	7,431,045
Extraordinary loss on expropriation	-	(150,726,472)	150,726,472	150,726,472	-
Total expenses for the period	\$ 24,505,302	\$ (144,110,262)	\$ 168,615,564	\$ 146,368,141	\$ 22,247,423

Future expenditures associated with corporate general and administrative, corporate communications and legal and accounting are expected to decline at a moderate level, while we expect Venezuelan expenses to decline considerably from the amounts recorded in 2010. Costs associated with the arbitration are expected to moderate and decline as we incurred a substantial portion of the expected costs upfront in preparation of our initial Memorial and case. Equipment write-downs are expected to be negligible while equipment holding costs will continue until we are able to dispose of Brisas Project related equipment. Interest expense, which was previously capitalized and comprised of approximately \$5.6 million of actual interest paid plus an amount related to accretion of the face value of the convertible note, is expected to stay at substantially the same level as 2010.

Contractual Obligations

The following table sets forth information on the Company's material contractual obligation payments for the periods indicated as of December 31, 2010:

	Payments due by Period			
	Total	Less than 1 Year	1-3 Years	More Than 5 Years
Convertible Notes ⁽¹⁾	\$110,792,793	\$5,629,195	\$105,163,598	–
Equipment Contracts ⁽²⁾	39,582	39,582	–	–
Total	\$110,832,375	\$5,668,777	\$105,163,598	–

1 In May 2007, the Company issued \$103,500,000 aggregate principal amount of its 5.50% convertible notes. The notes pay interest semi-annually and are due on June 15, 2022. Although the convertible notes have a face value of \$103.5 million, they are recorded on the balance sheet at approximately \$97 million as Canadian accounting standards require the Company to allocate the proceeds from the notes between their equity and debt components based on their respective fair values at the time of issuance. Subject to certain conditions, the notes may be converted into Class A common shares of the Company, redeemed or repurchased.

The note holders have the option to require the Company to repurchase the notes on June 15, 2012, at a price equal to 100% of the principal amount of the notes plus accrued but unpaid interest. The Company may elect to satisfy its obligation to pay the repurchase price, in whole or in part, by delivering Common Shares. If in the future we elect to repurchase the notes with common shares, we would be required to issue shares based on the share price on June 15, 2012.

At any time on or after June 16, 2010, and until June 15, 2012, the Company may redeem the notes, in whole or in part, for cash at a redemption price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest if the closing sale price of the Common Shares is equal to or greater than 150% of the conversion price then in effect and the closing price for the Company's Common Shares has remained above that price for at least 20 trading days in the period of 30 trading days preceding the Company's notice of redemption. Beginning on June 16, 2012, the Company may, at its option, redeem all or part of the notes for cash at a redemption price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest.

The convertible notes are trading in the gray market often at a significant discount to face value. As the terms of the indenture provide that the Company may repurchase the convertible notes in open market purchases or negotiated transactions. As of December 31, 2010, \$1,151,000 face value of convertible notes have been settled in cash or repurchased by the Company at a total cost of \$451,000. The amounts shown above include the interest and principal payments due based on the estimate that the term of the notes will end on June 15, 2012. If the notes were to reach their contractual maturity date of June 15, 2022, additional interest payments would amount to \$56.3 million over the additional ten year term of the notes.

The covenants contained in the 5.50% convertible note indenture are limited to administrative issues such as payments of interest, maintenance of office or agency location, delivery of reports and other related issues. Likewise, events of default are defined as failure to pay interest and principal amounts when due, default in the performance of covenants, failure to convert notes upon holder's exercise of conversion rights and similar provisions or the Company's failure to give notice of a fundamental change which is generally defined as events related to a change of control in the Company. In the event of a change of control of the Company, the Company will be required to offer to repurchase the notes at a purchase price equal to 100% of the principal amount of the notes plus accrued but unpaid interest with cash or Common Shares unless there has occurred and is continuing certain events of default under the Company's indenture.

2 Remaining balance due on equipment purchase contracts entered during 2007.

Off-Balance Sheet Arrangements

The Company is not a party to any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on the Company's financial condition, changes in financial condition, revenues, expenses, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Estimates

We review long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Management considers the sum of the expected future net cash flows to be generated from the use or disposition of a long-lived asset (undiscounted and without interest charges) and compares that to its carrying value and if such expected future net cash flows are less than the carrying value an impairment loss is recognized and the asset is written down to fair value. Fair value is generally determined by discounting estimated cash flows, using quoted market prices where available or making estimates based on the best information available. In 2009, subsequent to the loss of control and physical access to the Brisas Project, we recorded a non-cash adjustment of approximately \$151 million related to the carrying value of Brisas Project assets including an adjustment of approximately \$14.5 million for the estimated net realizable value of certain processing and related equipment. In 2010 we recorded an additional \$2.5 million write-down of some of this processing and related equipment to estimated net realizable value. Management makes no assurances that the estimated net realizable value of the remaining processing and related equipment can be disposed of for its recorded estimated value. See Note 3 and Note 15 to the consolidated financial statements.

The fair value of the debt component of the Company's convertible notes is accreted to the face value of the notes using the effective interest rate

method over the expected life of the notes, with the resulting charge recorded as interest expense. The expected life of the notes is an estimate and is subject to change, if warranted by facts and circumstances related to the potential early redemption of the notes by either the Company or the holders. At December 31, 2008, we revised our estimate of the expected life of the notes to June 15, 2012 and adjusted the carrying value accordingly. See Consolidated Balance Sheets - Convertible Notes and Note 17 to the consolidated financial statements. The adjusted carrying value was calculated by computing the present value of estimated future interest and principal payments at the original effective interest rate. As a result of this change, the carrying value of the notes increased by approximately \$20.5 million with a corresponding increase in capitalized interest and accretion.

The Company uses the liability method of accounting for income taxes. Future tax assets and liabilities are determined based on the differences between the tax basis of assets and liabilities and those amounts reported in the financial statements. The future tax assets or liabilities are calculated using the substantively enacted tax rates expected to apply in the periods in which the differences are expected to be settled. Future tax assets are recognized to the extent that they are considered more likely than not to be realized. We operate and file tax returns in a number of jurisdictions. The preparation of such tax filings requires considerable judgment and the use of assumptions. Accordingly, the amounts reported could vary in the future. See Consolidated Statements of Operations - Income tax expense.

The Company uses the fair value method of accounting for stock options. The fair value is computed using the Black-Scholes method which utilizes estimates that affect the amounts ultimately recorded as stock based compensation. See Note 11 to the consolidated financial statements.

Significant Accounting Policies

Our accounting policies are described in Note 1 of the consolidated financial statements contained in this Annual Report for the year ended December 31, 2010. The more significant accounting policies are as follows:

Financial Instruments. The Company provides disclosures in its financial statements that enable users to evaluate: (a) the significance of financial instruments for the Company's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the Company is exposed during the period and at the balance sheet date, and how the Company manages those risks.

Stock Based Compensation. We use the fair value method of accounting for stock options granted to employees and directors. Consideration paid for shares on exercise of share options in addition to the fair value attributable to stock options granted is credited to capital stock.

Exploration and Development Costs. Exploration costs incurred in locating areas of potential mineralization are expensed as incurred. Exploration costs of properties or working interests with specific areas of potential mineralization are capitalized at cost pending the determination of a property's economic viability. Development costs of proven mining properties not yet producing are capitalized at cost and classified as capitalized exploration costs under property, plant and equipment. Costs related to staffing and maintenance of offices and facilities in Venezuela are charged to operations. Property holding costs are charged to operations during the period if no significant exploration or development activities are being conducted on the related properties. Upon commencement of production, capitalized exploration and development costs would be amortized based on the estimated proven and probable reserves benefited. Properties determined to be impaired or that are abandoned are written-down to the estimated fair value. Carrying values do not necessarily reflect present or future values.

Measurement Uncertainty. Any operations we may have are subject to the effects of changes in legal, tax and regulatory regimes, political, labor and economic developments, social and political unrest, currency and exchange controls, import/export restrictions and government bureaucracy in the countries in which we operate. The realizable value of the remaining processing and related equipment recorded in the consolidated financial statements may be different than management's current estimate. See Note 3 and Note 9 to the consolidated financial statements. The Company operates and files tax returns in a number of jurisdictions. The preparation of such tax filings requires considerable judgment and the use of assumptions. Accordingly, the amounts reported could vary in the future.

Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. We believe that internal controls over financial reporting no matter how well conceived and operated, can only provide reasonable assurance that their objectives are met. There have been no changes in the Company's internal control over financial reporting during the twelve months ended December 31, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

MANAGEMENT'S REPORT

To the Shareholders of Gold Reserve Inc.

The accompanying consolidated financial statements of the Company were prepared by management in accordance with accounting principles generally accepted in Canada, consistently applied and within the framework of the summary of significant accounting policies in these consolidated financial statements. Management is responsible for all information in the Annual Report. All financial and operating data in the Annual Report is consistent, where appropriate, with that contained in the consolidated financial statements.

Management is responsible for establishing and maintaining an adequate internal control structure and procedures for financial reporting. Management has established and maintains a system of internal accounting control designed to provide reasonable assurance that assets are safeguarded from loss or unauthorized use, financial information is reliable and accurate and transactions are properly recorded and executed in accordance with management's authorization. This system includes established policies and procedures, the selection and training of qualified personnel and an organization providing for appropriate delegation of authority and segregation of responsibilities.

The Board of Directors fulfills its responsibilities for the consolidated financial statements primarily through the activities of its Audit Committee, which is composed of three directors, none of whom are members of management. This Committee monitors the independence and performance of our independent auditors and meets with the auditors to discuss the results of their audit and their audit report prior to submitting the consolidated financial statements to the Board of Directors for approval. This Committee reviews and discusses with management the consolidated financial statements, related accounting principles and practices and (when required of management under securities commissions or the applicable listing standards) management's assessment of internal control over financial reporting. This Committee also monitors the integrity of our financial reporting process and systems of internal controls regarding finance, accounting and legal compliance.

The consolidated financial statements have been audited on behalf of the shareholders by the Company's independent auditors, PricewaterhouseCoopers LLP. The auditors' report outlines the scope of their examination and their opinion on the consolidated financial statements. The auditors have full and free access to the Audit Committee.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Gold Reserve Inc.

We have audited the accompanying consolidated financial statements of Gold Reserve Inc. (the "Company") which comprise the consolidated balance sheets as at December 31, 2010 and 2009, consolidated statements of operations, comprehensive loss, changes in shareholders' equity and cash flows for each of the three years ended December 31, 2010, 2009 and 2008 and the related notes including a summary of significant accounting policies.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian generally accepted accounting principles and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement. Canadian generally accepted auditing standards require that we comply with ethical requirements.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2010 and 2009 and the results of its operations and its cash flows for each of the years in the period ended December 31, 2010, 2009 and 2008 in accordance with Canadian generally accepted accounting principles.

Net decrease in cash and cash equivalents	(2,776,335)	(30,587,354)	(3,130,409)
Cash and cash equivalents - beginning of year	60,962,813	91,550,167	94,680,576
Cash and cash equivalents - end of year	\$ 58,186,478	\$ 60,962,813	\$ 91,550,167

1. The Company and Significant Accounting Policies:

The Company. Gold Reserve Inc. (the “Company”) is engaged in the business of acquiring, exploring and developing mining projects. The Company is an exploration stage company incorporated in 1998 under the laws of the Yukon Territory, Canada and is the successor issuer to Gold Reserve Corporation which was incorporated in 1956.

In February 1999, the shareholders of Gold Reserve Corporation approved a plan of reorganization whereby Gold Reserve Corporation became a subsidiary of Gold Reserve Inc., the successor issuer (the “Reorganization”). Generally, each shareholder of Gold Reserve Corporation received one Gold Reserve Inc. Class A common share for each common share owned of Gold Reserve Corporation.

Certain U.S. holders of Gold Reserve Corporation elected, for tax reasons, to receive equity units in lieu of Gold Reserve Inc. Class A common shares. An equity unit is comprised of one Gold Reserve Inc. Class B common share and one Gold Reserve Corporation Class B common share. Each equity unit is substantially equivalent to a Class A common share and is immediately convertible into a Gold Reserve Inc. Class A common share, upon compliance with certain procedures. Equity units are not listed for trading on any stock exchange, but, subject to compliance with applicable federal, provincial and state securities laws, may be transferred. Unless otherwise noted, general references to common shares of the Company include Class A common shares and Class B common shares as a combined group.

From 1992 to 2008 the Company focused substantially all of its management and financial resources on the development of the Brisas gold and copper project located in the Kilometre 88 mining district of the State of Bolivar in south-eastern

Venezuela (which we refer to as the “Brisas Project” or “Brisas”). As further detailed in Note 3, we discontinued development of the Brisas Project after it was seized by the Bolivarian Republic of Venezuela (“Venezuela”). While we are resolving our investment dispute, either through arbitration or settlement, with Venezuela we are also seeking to invest in or acquire alternative mining projects. The Company has no revenue producing mining operations at this time. All amounts shown herein are expressed in U.S. dollars unless otherwise noted. The expense categories shown in the consolidated statements of operations have been revised on a comparative basis to better present the current operations of the Company. The revisions had no effect on previously reported results of operations.

Principles of Consolidation. The consolidated financial statements contained herein have been prepared in accordance with accounting principles generally accepted in Canada, which as described in Note 19, differ in certain material respects from accounting principles generally accepted in the U.S.

These consolidated financial statements include the accounts of the Company, Gold Reserve Corporation, four Venezuelan subsidiaries, two Barbadian subsidiaries and one Aruban subsidiary which were formed to hold the Company’s interest in its foreign subsidiaries or for future transactions. All subsidiaries are wholly owned. All intercompany accounts and transactions have been eliminated on consolidation. The Company’s policy is to consolidate those subsidiaries where control exists. In years ended 2009 and 2008, the consolidated financial statements also included the accounts of two domestic subsidiaries, Great Basin Energies, Inc. (“Great Basin”) and MGC Ventures Inc. (“MGC Ventures”). Great Basin and MGC Ventures were 45% and 44% owned, respectively until the Company in December 2010, disposed of its equity interest in the subsidiaries. See Note 12 to the consolidated financial statements.

Cash and Cash Equivalents. The Company considers short-term, highly liquid investments purchased with an original maturity of three months or less to be cash equivalents for purposes of reporting cash equivalents and cash flows. Cash and cash equivalents are designated as held-for-trading and recorded at fair value. The Company manages the exposure of its cash and cash equivalents to credit risk by diversifying its holdings into major Canadian and U.S. financial institutions and corporations.

Exploration and Development Costs.

Exploration costs incurred in locating areas of potential mineralization are expensed as incurred. Exploration costs of properties or working interests with specific areas of potential mineralization are capitalized at cost pending the determination of a property's economic viability. Development costs of proven mining properties not yet producing are capitalized at cost and classified as capitalized exploration costs under property, plant and equipment. Costs related to staffing and maintenance of offices and facilities in Venezuela are charged to operations. Property holding costs are charged to operations during the period if no significant exploration or development activities are being conducted on the related properties. Upon commencement of production, capitalized exploration and development costs would be amortized based on the estimated proven and probable reserves benefited. Properties determined to be impaired or that are abandoned are written-down to the estimated fair value. Carrying values do not necessarily reflect present or future values.

Property, Plant and Equipment. Property, plant and equipment are recorded at cost less accumulated depreciation. Replacements and major improvements are capitalized. Maintenance and repairs are charged to expense as incurred. The cost and accumu-

lated depreciation of assets retired or sold are removed from the accounts and any resulting gain or loss is reflected in operations. Depreciation is provided using straight-line and accelerated methods over the lesser of the useful life or lease term of the related asset. Interest and financing costs incurred during the construction and development of qualifying assets are capitalized on an interest avoidance basis. The amount capitalized during an accounting period is determined by applying an interest rate to the average amount of accumulated qualifying assets during the period. Adjustments increasing the carrying value of convertible notes upon remeasurement due to a change in estimated life are considered interest costs and are therefore eligible for capitalization. The Company's qualifying assets include its costs of developing mining properties and constructing new facilities.

Assets Held for Sale. Long-Lived assets are classified as held for sale in the period in which certain criteria are met. Assets held for sale are measured at the lower of carrying amount or fair value less cost to sell and are not depreciated as long as they remain classified as held for sale.

Impairment of Long Lived Assets. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. If the sum of the expected future net cash flows to be generated from the use or disposition of a long-lived asset (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized and the asset is written down to fair value. Fair value is generally determined by discounting estimated cash flows, using quoted market prices where available or making estimates based on the best information available.

Foreign Currency. The U.S. dollar is the Company's functional currency. The Company's foreign subsidiaries are integrated foreign operations and accordingly foreign currency amounts are translated into U.S. dollars using the temporal method. Non-monetary assets and liabilities are translated at historical rates, monetary assets and liabilities are translated at current rates and revenue and expense items are translated at average exchange rates during the reporting period, except for depreciation which is translated at historical rates. Translation gains and losses are included in operating expenses.

Stock Based Compensation. The Company uses the fair value method of accounting for stock options. The fair value of options granted to employees is computed using the Black-Scholes method as described in Note 11 and is expensed over the vesting period of the option. For non-employees, the fair value of stock based compensation is recorded as an expense over the vesting period or, if earlier, upon completion of performance. Consideration paid for shares on exercise of share options, in addition to the fair value attributable to stock options granted, is credited to capital stock. Fair value of restricted stock issued as compensation is based on the grant date market value and expensed over the vesting period. The Company also maintains the Gold Reserve Director and Employee Retention Plan. Units granted under the plan become fully vested and payable upon a change of control. Each Unit granted to a participant entitles such person to receive a cash payment equal to the fair market value of one Gold Reserve Class A Common Share (1) on the date the Unit was granted or (2) on the date any such participant becomes entitled to payment, whichever is greater.

Income Taxes. The Company uses the liability method of accounting for income taxes. Future tax assets and liabilities are determined based on the differences between the tax basis of assets and liabilities and those amounts reported in the financial statements. The future tax assets or liabilities are calculated using the substantively enacted tax rates expected to

apply in the periods in which the differences are expected to be settled. Future tax assets are recognized to the extent that they are considered more likely than not to be realized.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Measurement Uncertainty. Any operations we may have are subject to the effects of changes in legal, tax and regulatory regimes, political, labor and economic developments, social and political unrest, currency and exchange controls, import/export restrictions and government bureaucracy in the countries in which we may operate.

In 2009, as a result of the loss of control and physical access to the Brisas project, we recorded a \$150.7 million non-cash expense adjustment related to the carrying value of the Brisas Project related assets including an adjustment of approximately \$14.5 million for the estimated net realizable value of certain processing and related equipment. See Notes 3, 9 and 15. The Company operates and files tax returns in a number of jurisdictions. The preparation of such tax filings requires considerable judgment and the use of assumptions. Accordingly, the amounts reported could vary in the future.

Net Loss Per Share. Net loss per share is computed by dividing net loss by the combined weighted average number of Class A and B common shares outstanding during each year. In periods in which a loss is incurred, the effect of potential issuances of shares under options and convertible notes would be anti-dilutive, and therefore basic and diluted losses per share are the same.

Convertible Notes. Convertible notes are initially recorded at fair value and subsequently measured at amortized cost. The fair value is allocated between the equity and debt component parts based on their respective fair values at the time of issuance and recorded net of transaction costs. The equity portion of the notes is estimated using the residual value method. The fair value of the debt component is accreted to the face value of the notes using the effective interest rate method over the expected life of the notes estimated to be June 15, 2012, with the resulting charge recorded as interest expense. Interest expense allocable to the qualifying cost of developing mining properties and to constructing new facilities is capitalized until assets are ready for their intended use.

Comprehensive Income. Comprehensive income includes net income or loss and other comprehensive income. Other comprehensive income may include unrealized gains and losses on available-for-sale securities, gains and losses on certain derivative instruments and foreign currency gains and losses from self sustaining foreign operations. The Company presents comprehensive income and its components in the consolidated statements of comprehensive loss.

Financial Instruments. The Company's financial instruments consist of cash and cash equivalents, marketable securities, accounts payable, accrued expenses and convertible notes. Cash and cash equivalents are classified as held for trading and any changes in fair value are charged to the statement of operations. Marketable equity securities are classified as available for sale with any unrealized gain or loss recorded in other comprehensive income. Marketable debt securities are classified as held-to-maturity and are measured at amortized cost using the effective interest rate method. Other financial liabilities are accounted for at cost or amortized cost.

2. New Accounting Policies:

US GAAP. The Company currently prepares its financial statements in accordance with Canadian GAAP and includes a footnote reconciliation to US GAAP. Effective January 1, 2011, the Company will adopt US GAAP and will prepare its financial statements in accordance with US GAAP for all subsequent US and Canadian filings.

3. Expropriation of Brisas Project by Venezuela and Related Arbitration:

From 1992 to 2008 we focused substantially all of our management and financial resources on the development of the Brisas gold and copper project located in the Kilometre 88 mining district of the State of Bolivar in south-eastern Venezuela. After approval of the Brisas operating plan by the Ministry of Mines and the Environmental and Social Impact Study by the Ministry of Environment in 2003 and early 2007, respectively, the Ministry of Environment issued in March 2007, the Authorization to Affect which authorized the commencement of construction activities on the Brisas Project. In April 2008, the Ministry of Environment revoked the Authorization to Affect without prior notification.

After months of continuous efforts to meet with representatives of Venezuela to resolve the issues related to the revocation of the Authorization to Affect, on April 21, 2009 the Company notified Venezuela of the existence of a dispute under the Canada – Venezuela Treaty.

After several additional months of efforts to meet with representatives of Venezuela to resolve the issues related to the revocation of the Authorization to Affect, on October 21, 2009 we filed a Request for Arbitration under the Additional Facility Rules of the International

Centre for Settlement of Investment Disputes (“ICSID”), against Venezuela (“Respondent”). On October 26, 2009, Venezuelan government personnel arrived at the Brisas Project camp site, claimed ownership of the Brisas Alluvial Concession, seized assets, expelled our personnel and took physical possession of the property. Subsequently, on November 4, 2009, Venezuela notified the Company through the issuance of an Administrative Act, dated October 20, 2009, of its intent to cancel the Company’s underlying hard rock concession which was formally cancelled in June 2010. In November 2009 our Request for Arbitration was registered by ICSID (Gold Reserve Inc. v. Bolivarian Republic of Venezuela (ICSID Case No. ARB(AF)/09/1)).

As a result of the seizure of the Brisas Project by Venezuela we no longer have control or physical access to the project which has caused the Company to discontinue the development of its Venezuelan properties, including Brisas and Choco 5 (which was a grass-roots exploration property also located in the State of Bolivar) and discontinue reporting mineral

reserves for Brisas. In 2009 we recorded a \$150.7 million non-cash expense adjustment related to the carrying value of the Brisas Project related assets including an adjustment of approximately \$14.5 million for the estimated net realizable value of certain processing and related equipment.

The Company is seeking compensation of \$1.98 billion in the arbitration for all of the loss and damage resulting from Venezuela’s wrongful conduct which includes the full market value of the legal rights to develop the Brisas Project. The Tribunal held the first session with the parties on April 23, 2010 during which time several procedural matters were agreed to, including the time schedule for the Arbitration. In compliance with that schedule, we filed our initial written submission, known as the Memorial, on September 24, 2010. The Respondent is required to file its reply to the Company’s Memorial by April 14, 2011. Thereafter, further written submissions are scheduled to be made prior to the oral hearings, which are scheduled to commence on February 6, 2012.

4. Cash and Cash Equivalents:

	2010	2009
Bank deposits	\$ 52,307,918	\$ 53,900,646
Money market funds	5,878,560	7,062,167
Total	\$ 58,186,478	\$ 60,962,813

The above amounts exclude restricted cash of approximately \$9.5 million in 2009. See Note 15. At December 31, 2010 and 2009, the Company had approximately \$39,000 and \$59,000, respectively, in Venezuela and banks outside Canada and the U.S.

5. Marketable Debt Securities:

	2010	2009
Amortized cost	\$ -	\$ 10,175,020

All of the Company's marketable debt securities matured in December, 2010. These securities were classified as held-to-maturity and measured at amortized cost using the effective interest rate method.

6. Marketable Equity Securities:

	2010	2009
Fair value at beginning of year	\$ 598,825	\$ 1,342,760
Acquisitions	778,144	2,135,293
Dispositions, at cost	(667,166)	(2,102,548)
Realized gain on sale	(241,621)	(2,274,848)
Unrealized gain	1,795,741	1,498,168
Fair value at end of year	\$ 2,263,923	\$ 598,825

The Company's marketable equity securities are classified as available-for-sale and are recorded at quoted market value with gains and losses recorded within other comprehensive income until realized. As of December 31, 2010 and 2009 marketable equity securities had a cost basis of \$1,046,009 and \$876,049, respectively.

7. Financial Instruments:

The fair values as at December 31, 2010 and 2009 along with the carrying amounts shown on the consolidated balance sheets for each classification of financial instrument are as follows:

		December 31, 2010		December 31, 2009	
	Classification	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	held for trading	\$ 58,186,478	\$ 58,186,478	\$ 60,962,813	\$ 60,962,813
Restricted cash	held for trading	-	-	9,489,777	9,489,777
Marketable debt securities	held to maturity	-	-	10,175,020	10,208,950
Marketable equity securities	available for sale	2,263,923	2,263,923	598,825	598,825
A/P and accruals	other financial liabilities	1,633,150	1,633,150	3,790,003	3,790,003
Accrued interest	other financial liabilities	234,550	234,550	234,550	234,550
Convertible notes	other financial liabilities	96,975,421	69,477,790	93,693,168	69,085,575

Fair value estimates for marketable securities are made at the balance sheet date by reference to recent market transactions. The convertible notes are not listed on an exchange but are traded on a limited basis in a grey market. Fair value estimates for convertible notes are based on an assessment of available market information.

CICA 3862 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: Level 1 inputs are quoted prices in active markets for identical assets or liabilities, Level 2 inputs are other than quoted prices included within Level 1 that are directly or indirectly observable for the asset or liability and Level 3 inputs are unobservable inputs for the asset or liability that reflect the entity's own assumptions.

	Fair value			
	December 31, 2010	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 58,186,478	\$ 58,186,478		
Marketable equity securities	2,263,923	2,263,923	–	–

	Fair value			
	December 31, 2009	Level 1	Level 2	Level 3
Cash and cash equivalents	\$ 60,962,813	\$ 60,962,813		
Marketable equity securities	598,825	598,825	–	–
Restricted cash	9,489,777	9,489,777		

The Company is exposed to various risks including credit risk, liquidity risk, currency risk and interest rate risk as described below:

- a) Credit risk is the risk that a counter party will fail to meet its obligations to the Company. The Company's primary exposure to credit risk is through its cash and cash equivalents, restricted cash and marketable debt securities balances. The Company diversifies its cash holdings into major Canadian and U.S. financial institutions and corporations.
- b) Liquidity risk is the risk that an entity will encounter difficulty in meeting its obligations associated with its financial liabilities. The Company has historically managed this risk by maintaining adequate cash balances through equity and debt offerings to meet its obligations. With respect to the convertible notes, the holders have the option to require the Company to repurchase the notes on June 15, 2012, for the principal amount of the notes plus unpaid interest and the Company may satisfy this obligation, in whole or in part, by delivering Common Shares. The following table presents the Company's payments due on accounts payable and accrued expenses and its undiscounted interest and principal payments due on its convertible notes, based on the estimate that the term of the notes will end on June 15, 2012. If the notes were to reach their contractual maturity date of June 15, 2022, additional interest payments would amount to \$56.3 million over the additional ten year term of the notes.

Payments due by Period

	Total	Less than 1 Year	1-3 Years	4-5 Years	More Than 5 Years
A/P and accruals	\$ 1,633,150	\$ 1,633,150	–	–	–
Interest	8,443,793	5,629,195	\$ 2,814,598	–	–
Principal	102,349,000	–	102,349,000	–	–
Total	\$ 112,425,943	\$ 7,262,345	\$ 105,163,598	–	–

- c) The Company is subject to currency risk mainly due to its operations in Venezuela. Transactions denominated in foreign currency are exposed to exchange rate fluctuations which have an impact on the statement of operations. The Company's cash and other monetary assets and liabilities that are held in Venezuelan and Canadian currency are subject to fluctuations against the US dollar. A 10% weakening of those currencies against the US dollar would have increased (decreased) the Company's net loss from the translation of foreign currency denominated financial instruments, as at December 31, 2010 and 2009, by the amounts shown below.

	2010	2009
Venezuelan Bolívar	\$ (38,365)	\$ 60,766
Canadian Dollar	(11,363)	(10,894)
Total	\$ (49,728)	\$ 49,872

The Company limits the amount of currency held in non-U.S dollar accounts, but does not actively use derivative instruments to limit its exposure to fluctuations in foreign currency rates.

- d) The Company is subject to the risk that changes in market interest rates will cause fluctuations in the fair values of its financial instruments. Cash and cash equivalents earn floating market rates of interest. Other current financial assets and liabilities are generally not exposed to this risk because of their immediate or short-term maturity. The interest rate on the Company's convertible notes is fixed and therefore the interest payments are not subject to changes in market rates of interest.

8. Capital Management:

29

The capital structure of the Company consists of common shares and equity units, convertible notes, stock options, accumulated deficit, accumulated other comprehensive income and KSOP debt. The Company's objectives when managing its capital are to:

- a) maintain sufficient liquidity in order to meet financial obligations including the costs of acquiring and developing mining projects and servicing debt;
- b) safeguard the Company's assets and its ability to continue as a going concern and
- c) maintain a capital structure that provides the flexibility to access additional sources of capital with minimal dilution to existing shareholders.

The Company manages its capital consistent with the objectives stated above and makes adjustments to its capital structure based on economic conditions and the risk characteristics of the underlying assets. The Company is in compliance with the covenants of its convertible notes. There were no changes to the Company's capital management during 2010.

9. Property, Plant and Equipment:

	Cost	Accumulated Depreciation	Net
2010			
United States			
Machinery and equipment	\$ 28,071,469	\$ -	\$ 28,071,469

Machinery and equipment includes amounts paid for infrastructure and milling equipment previously intended for use on the Brisas project. In 2010 we recorded a \$2.5 million write-down of some of this equipment to estimated net realizable value. In 2009 we recorded a \$150.7 million non-cash expense adjustment related to the carrying value of the Brisas Project related assets including an adjustment of approximately \$14.5 million for the estimated net realizable value of certain processing and related equipment.

At December 31, 2010 certain equipment with a carrying value of approximately \$8.0 million was reclassified to assets held for sale. During the first quarter of 2011, this equipment was sold for \$8.3 million and the Company recorded a gain on sale of \$0.3 million.

The following table relates to stock options at December 31, 2010

Price Range	Number Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price of Exercisable Options
\$0.29 - \$0.29	1,121,689	2.93	\$0.29	1,121,689	\$0.29
\$0.73 - \$0.73	535,000	3.21	\$0.73	535,000	\$0.73
\$3.95 - \$4.19	686,000	0.76	\$4.12	686,000	\$4.12
\$4.30 - \$4.62	298,500	0.92	\$4.57	298,500	\$4.57
\$4.83 - \$4.83	257,913	0.40	\$4.83	257,913	\$4.83
\$5.07 - \$5.36	279,000	1.91	\$5.19	279,000	\$5.19
\$0.29 - \$5.36	3,178,102	1.94	\$2.39	3,178,102	\$2.39

The Company recorded compensation expense during 2010, 2009, and 2008 of \$99,532, \$590,180, and \$1,958,470, respectively, for stock options granted. The fair value of the options granted was calculated using the Black-Scholes model based on the following assumptions:

	2010	2009	2008
Weighted average risk free interest rate	–	1.46%	1.55%
Expected life	–	4.6 years	4.5 years
Expected volatility	–	120%	92%
Dividend yield	–	nil	nil

Retention Units Plan. In addition to the equity incentive plans, the Company also maintains the Gold Reserve Director and Employee Retention Plan. Units granted under the plan become fully vested and payable upon achievement of certain milestones related to the Brisas project or in the event of a change of control. The Company's Board of Directors is currently evaluating modifying the vesting provisions of the units to more adequately reflect the current business objectives of the Company including successful arbitration, settlement of our dispute with Venezuela, reacquiring an interest in the Brisas Project and successful acquisition of a new business opportunity meeting specific parameters. Each Unit granted to a participant entitles such

person to receive a cash payment equal to the fair market value of one Gold Reserve Class A Common Share (1) on the date the Unit was granted or (2) on the date any such participant becomes entitled to payment, whichever is greater. As of December 31, 2010 an aggregate of 1,607,500 unvested Units have been granted to directors and executive officers of the Company and 315,000 Units have been granted to other employees. The Company currently does not accrue a liability for these units as events required for vesting of the units have not yet occurred. The value of these units, based on the grant date value of the Class A shares, was approximately \$8.4 million.

12. Related Party Transactions:

MGC Ventures. The Chief Executive Officer, President, Vice President-Finance and Vice President-Administration of the Company are also officers and/or directors and shareholders of MGC Ventures. On December 15, 2010, the non-affiliated shareholders of MGC Ventures approved the redemption of all of the shares of MGC Ventures common stock held by Gold Reserve. Gold Reserve received \$0.9 million and recorded a gain on sale of subsidiary of \$0.2 million. Prior to the redemption, Gold Reserve owned 12,062,953 common shares of MGC Ventures which represented 44% of its outstanding shares. MGC Ventures owned 258,083 common shares of the Company at December 31, 2010 and 2009. During the last three years, the Company sublet a portion of its office space to MGC Ventures for \$6,000 per year.

Great Basin. The Chief Executive Officer, President, Vice President-Finance and Vice President-Administration of the Company are also officers and/or directors and shareholders of Great Basin. On December 15, 2010, the non-affiliated shareholders of Great Basin approved the redemption of all of the shares of Great Basin common stock held by Gold Reserve. Gold Reserve received \$1.2 million and recorded a gain on sale of subsidiary of \$0.3 million. Prior to the redemption, Gold Reserve owned 15,661,595 common shares of Great Basin which represented 45% of its outstanding shares. Great Basin owned 491,192 common shares of the Company at December 31, 2010 and 2009. During the last three years, the Company sublet a portion of its office space to Great Basin for \$6,000 per year.

13. Income Tax:

	2010	2009	2008
Current income tax expense (benefit)	\$ -	\$ (27,496)	\$ (9,969)
Future income tax expense (benefit)	(359,767)	169,815	747,019
	<u>\$ (359,767)</u>	<u>\$ 142,319</u>	<u>\$ 737,050</u>

33

Income tax expense differs from the amount that would result from applying Canadian tax rates to net loss before taxes. These differences result from the items noted below:

	2010	2009	2008
Income tax benefit based on Canadian tax rates	\$ (6,693,876)	\$ (48,765,715)	\$ (5,601,776)
Increase (decrease) due to:			
Different tax rates on foreign subsidiaries	(218,882)	(5,333,076)	(544,744)
Non-deductible expenses	1,108,571	509,749	1,461,477
Change in valuation allowance and other	5,444,420	53,731,361	5,422,093
	<u>\$ (359,767)</u>	<u>\$ 142,319</u>	<u>\$ 737,050</u>

No current income tax has been recorded by the parent company for the three years ended December 31, 2010. Current income tax in 2009 and 2008 relates to two of the Company's former U.S. subsidiaries. Future income tax relates to unrealized gains and losses on available-for-sale securities.

The Company has recorded a valuation allowance to reflect the estimated amount of the future tax assets which may not be realized, principally due to the uncertainty of utilization of net operating losses and other carry forwards prior to expiration. The valuation allowance for future tax assets may be reduced in the near term if the Company's estimate of future taxable income changes. The components of the Canadian and U.S. future income tax assets and liabilities as of December 31, 2010 and 2009 were as follows:

	Future Tax Asset	
	2010	2009
Accounts payable and accrued expenses	\$ 129,618	\$ 153,649
Property, plant and equipment	(9,170)	(11,914)
Total temporary differences	120,448	141,735
Net operating loss carry forward	30,134,668	26,049,292
Alternative minimum tax credit	19,871	19,871
Total temporary differences, operating losses and tax credit carry forwards	30,274,987	26,210,898
Valuation allowance	(30,274,987)	(26,210,898)
Net deferred tax asset	\$ -	\$ -

34

At December 31, 2010, the Company had the following U.S. and Canadian tax loss carry forwards and tax credits:

	U.S.	Canadian	Expires
Regular tax net operating loss:	\$ 645,622	-	2011
	1,424,144	-	2012
	-	1,725,246	2014
	-	2,150,316	2015
	1,386,674	-	2018
	1,621,230	-	2019

	4,622,825	2,610,981	2026
	6,033,603	4,845,641	2027
	4,360,823	18,469,375	2028
	1,769,963	17,503,563	2029
	2,159,079	21,639,404	2030
	\$ 34,895,204	\$ 68,944,526	
Alternative minimum tax net operating loss:	\$ 618,845	-	2011
	1,399,529	-	2012
	\$ 2,018,374	-	

14. Segmented Financial Information:

The Company has one operating segment, which is the exploration and development of mineral properties. Segmented financial information by geographic region is as follows:

	U.S./Canada	Venezuela	Consolidated
2010			
Other income	\$ 958,368	\$ –	\$ 958,368
Depreciation	40,913	91,740	132,653
Net loss after tax	\$ 21,921,652	\$ 1,625,282	\$ 23,546,934
Identifiable assets			
Property, plant and equipment, net	\$ 28,144,900	\$ 358,430	\$ 28,503,330
General corporate assets	69,529,033	398,003	69,927,036
Total identifiable assets	\$ 97,673,933	\$ 756,433	\$ 98,430,366
2009			
Other income	\$ 3,165,736	\$ –	\$ 3,165,736
Depreciation	46,774	167,128	213,902
Extraordinary loss	–	150,726,472	150,726,472
Net loss after tax	\$ 8,028,733	\$ 157,421,095	\$ 165,449,828
Identifiable assets			
Property, plant and equipment, net	\$ 37,601,810	\$ 520,292	\$ 38,122,102
General corporate assets	81,428,089	364,829	81,792,918
Total identifiable assets	\$ 119,029,899	\$ 885,121	\$ 119,915,020
2008			
Other income	\$ 2,444,772	\$ –	\$ 2,444,772
Depreciation	50,053	174,018	224,071
Net loss after tax	\$ 15,075,179	\$ 4,650,942	\$ 19,726,121
Identifiable assets			
Property, plant and equipment, net	\$ 129,112	\$ 175,003,366	\$ 175,132,478
General corporate assets	110,951,216	1,530,820	112,482,036
Total identifiable assets	\$ 111,080,328	\$ 176,534,186	\$ 287,614,514

Net loss and identifiable assets of each segment are those that are directly identified with those geographic locations.

15. Commitments:

In mid 2007, we commenced procurement efforts for the Brisas Project and placed orders totaling approximately \$125 million for a gyratory crusher, pebble crushers, SAG and ball mills, mill motors, and other equipment for the Brisas Project. Since the revocation of the Authorization to Affect, the Company has sold certain equipment originally costing approximately \$61.4 million. The Company recovered approximately \$35.1 million of progress payments and the purchaser assumed the Company's remaining payment obligations of approximately \$21.9 million resulting in a combined loss on sale of equipment of approximately \$4.4 million. As of December 31, 2010, the Company had remaining equipment commitments of less than \$0.1 million. The Company opened an irrevocable standby letter of credit with a Canadian chartered bank providing security on the performance of a portion of these obligations. As of December 31, 2010 and December 31, 2009, the Company had restricted cash of \$0 and \$9.5 million, respectively, as required by this letter of credit.

36

16. Shareholder Rights Plan:

The Company instituted a shareholder rights plan (the "Rights Plan") in 1999. Since the original approval by the shareholders, the Rights Plan and the Rights Plan agreement have been amended and continued from time to time. In June 2009, the shareholders approved certain amendments to the Rights Plan including continuing the Shareholder Rights Plan until June 30, 2012. The Rights Plan is intended to give adequate time for shareholders of the Company to properly assess the merits of a take-over bid without pressure and to allow competing bids to emerge. The Rights Plan is designed to give the Board of Director's time to consider alternatives to allow shareholders to receive full and fair value for their common shares. One right is issued in respect of each outstanding share. The rights become exercisable only when a person, including any party related to it or acting jointly with it, acquires or announces its intention to acquire 20% or more of the Company's outstanding shares without complying with the "permitted bid" provisions of the Rights Plan. Each right would, on exercise, entitle the holder, other than the acquiring person and related persons, to purchase Class A common shares of the Company at a 50% discount to the market price at the time.

17. Convertible Notes:

In May 2007, the Company issued \$103,500,000 aggregate principal amount of its 5.50% Senior subordinated convertible notes. The notes are unsecured, bear interest at a rate of 5.50% annually, pay interest semi-annually in arrears and are due on June 15, 2022. The notes are convertible into Class A common shares of the Company at the initial conversion rate, subject to adjustment, of 132.626 shares per \$1,000 principal amount (equivalent to a conversion price of \$7.54). Upon conversion, the Company will have the option, unless there has occurred and is then continuing an event of default under the Company's indenture, to deliver common shares, cash or a combination of common shares and cash for the notes surrendered.

The note holders have the option to require the Company to repurchase the notes on June 15, 2012, at a price equal to 100% of the principal amount of the notes plus accrued but unpaid interest. The Company may elect to satisfy its obligation to pay the repurchase price, in whole or in part, by delivering Common Shares. In the event of a change of control of the Company, the Company may be required to offer to repurchase the notes at a purchase price equal to 100% of the principal amount of the notes plus accrued but unpaid interest unless there has occurred and is continuing certain events of default under the Company's indenture.

At any time on or after June 16, 2010, and until June 15, 2012, the Company may redeem the notes, in whole or in part, for cash at a redemption price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest if the closing sale price of the Common Shares is equal to or greater than 150% of the conversion price then in effect and the closing price for the Company's Common Shares has remained above that price for at least twenty trading days in the period of thirty trading days preceding the Company's notice of redemption. Beginning on June 16, 2012, the Company may, at its option, redeem all or part of the notes for cash at a redemption price equal to 100% of the principal amount being redeemed plus accrued and unpaid interest.

The covenants contained in the 5.50% convertible note indenture are limited to administrative issues such as payments of interest, maintenance of office or agency location, delivery of reports and other related issues.

Likewise, events of default are defined as failure to pay interest and principal amounts when due, default in the performance of covenants, failure to convert notes upon holder's exercise of conversion rights and similar provisions or the Company's failure to give notice of a fundamental change which is generally defined as events related to a change of control in the Company.

Canadian accounting standards require the Company to allocate the notes between their equity and debt component parts based on their respective fair values at the time of issuance. The liability component was computed by discounting the stream of future payments of interest and principal at the prevailing market rate for a similar liability that does not have an associated equity component. The equity portion of the notes was estimated using the residual value method at approximately \$29 million, net of issuance costs. The fair value of the debt component is accreted to the face value of the notes using the effective interest rate method over the expected life of the notes which is estimated to be June 15, 2012, with the resulting charge recorded as interest expense. The Company capitalized interest and accretion on the notes until October, 2009, when the Company filed for arbitration and when Venezuela seized the Brisas Project. Thereafter all interest and accretion on the notes has been expensed. As of December 31, 2010, convertible notes with a face value of \$1,151,000 had been settled in cash or repurchased by the Company at a total cost of approximately \$451,000.

18. Takeover defense and Litigation:

On December 15, 2008, Rusoro Mining Ltd. ("Rusoro") commenced an unsolicited offer to acquire all of the outstanding shares and equity units of the Company in consideration for three shares of Rusoro for each Company share or equity unit. On December 16, 2008, the Company filed an action in the Ontario Superior Court of Justice against Rusoro and Rusoro's financial advisor Endeavour Financial International Corporation ("Endeavour") seeking an injunction restraining Rusoro and Endeavour from proceeding with Rusoro's unsolicited offer, significant monetary damages, and various other items. Endeavour was the Company's financial advisor from 2004 until shortly after the commencement of Rusoro's offer.

On February 10, 2009, the Ontario Superior Court

of Justice granted an interlocutory injunction restraining Rusoro from proceeding with any hostile takeover bid to acquire the shares of the Company until the conclusion and disposition at trial of the action commenced by the Company. The injunction was granted by the Court following a motion by the Company on the basis that Rusoro had access to or benefited from the use of the Company's confidential information as a result of Rusoro's relationship with Endeavour. The Court also issued an interlocutory injunction restraining Endeavour from having any involvement with a hostile takeover bid for the Company. The Court further required that Rusoro, Endeavour and their agents return to the Company both all the confidential information of the Company and also anything produced from that confidential information and pay the court costs. Following the issuance of the interlocutory injunctions, Rusoro withdrew its unsolicited offer to acquire the outstanding shares and equity units of the Company.

On February 15, 2009, Rusoro and Endeavour both served a motion with the Ontario Superior Court of Justice seeking permission to appeal to the Divisional Court the February 10, 2009 order that was granted against them. The Company opposed these motions which were heard in Toronto on April 2, 2009 and on April 6, 2009 the permission to appeal was denied. Rusoro has filed a counterclaim against the Company for, among other things, damages of Cdn \$102.5 million allegedly arising from the Company's successful motion for an interlocutory injunction. Endeavour has filed a \$0.5 million counter claim against the Company relating to the lost opportunity to earn a success fee from the successful completion of the Rusoro offer. During 2010, the Company developed its strategy for the execution of this action, added two additional defendants and amended the claim for monetary damages and collected all its relevant documents, including electronically stored information and is in the process of proceeding to depositions.

19. Differences Between Canadian and U.S. GAAP:

The Company prepares its consolidated financial statements in accordance with generally accepted accounting principles ("GAAP") in Canada, which differ in certain respects from GAAP in the United States. The effect of the principal measurement differences between U.S. and Canadian GAAP are summarized below.

Consolidated Summarized Balance Sheets

	Canadian GAAP	Change	U.S. GAAP

- A** Effective September 30, 2008, the Company adopted EIC 172, which requires that the tax benefit of tax loss carryforwards recognized to offset unrealized gains in other comprehensive income, such as unrealized gains on available-for-sale securities, be recognized in net income (loss). EIC 172 was applied retrospectively with restatement of prior periods from January 1, 2007. Under US GAAP, the tax benefit is recorded in other comprehensive income.
- B** For U.S. GAAP purposes, the Company adopted SFAS 123R (codified within ASC 718), "Accounting for Stock Based Compensation" effective January 1, 2006. SFAS 123R requires the use of the fair value method of accounting for stock based compensation. This standard is substantially consistent with the revised provisions of CICA 3870, which was adopted by the Company for Canadian GAAP effective January 1, 2004. For U.S. GAAP, the Company applied the modified prospective method of adoption included in SFAS 123R which requires that the company expense the fair value of all unvested and new grants on a prospective basis beginning January 1, 2006. In 2005, for U.S. GAAP purposes, the Company accounted for stock-based employee compensation arrangements using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No.25, "Accounting for Stock Issued to Employees." Under Opinion No. 25, when the exercise price of certain stock options is amended, these options are accounted for as variable compensation from the date of the effective repricing. Under this method, following the repricing date, compensation expense is recognized when the quoted market value of the Company's common shares exceeds the amended exercise price. Should the quoted market value subsequently decrease, a recovery of a portion, or all of the previously recognized compensation expense will be recognized. The Company has not amended the exercise price of any stock options since 2001.
- C** In 2007, the company issued \$103,500,000 aggregate principal amount of convertible notes. As described in Note 17, under Canadian GAAP these notes are allocated between their equity and debt component parts. The debt component is accreted to the face value of the notes with the resulting interest expense charged to operations. Under U.S. GAAP, the notes are classified as a liability net of issuance costs and accreted to face value over the term ending on the first put date of the notes. As of December 31, 2010 and 2009, an additional \$24.9 million and \$22.6 million, respectively of accretion expense had been incurred for Canadian GAAP purposes over the amount incurred under U.S. GAAP.
- D** Prior to the seizure of the Brisas Project and related arbitration filing, the Company capitalized interest on its convertible notes on an interest avoidance basis. The amount capitalized during an accounting period is determined by applying an interest rate to the average amount of accumulated qualifying assets during the period. The Company's qualifying assets include its costs of developing mining properties and constructing new facilities. The amount capitalized under U.S. GAAP differed from the amount capitalized under Canadian GAAP due to the difference in the amount of qualifying mineral property costs which had been accumulated under the two sets of accounting principles. Subsequent to the loss of control of the Brisas Project, all capitalized interest was written off.
- E** In 2003 and 2004, the Company completed equity offerings consisting of common shares and common share purchase warrants. For Canadian GAAP purposes the proceeds from the offerings were recorded as common shares. For U.S. GAAP purposes a value was assigned to the warrants and recorded as a separate element of stockholders' equity. Warrants that expired unexercised were subsequently recorded as contributed surplus.
- F** Under Canadian GAAP, the noncontrolling interest is shown on the balance sheet between liabilities and equity. Under US GAAP, the noncontrolling interest is reclassified to equity and shown as a separate component from the equity of the parent.

Additional Balance Sheet disclosure - U.S. GAAP

	2010	2009
Accounts payable	\$ 629,103	\$ 2,531,523
Accrued expenses	1,004,047	1,258,480
Accounts payable and accrued expenses	\$ 1,633,150	\$ 3,790,003
