THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements (Unaudited)

1. General

The interim consolidated financial statements presented herein have been prepared by Thermo Fisher Scientific Inc. (the company or Thermo Fisher), are unaudited and, in the opinion of management, reflect all adjustments of a normal recurring nature necessary for a fair statement of the financial position at April 2, 2011, the results of operations for the three-month periods ended April 2, 2011, and April 3, 2010, and the cash flows for the three-month periods ended April 2, 2011, and April 3, 2010. Interim results are not necessarily indicative of results for a full year.

The consolidated balance sheet presented as of December 31, 2010, has been derived from the audited consolidated financial statements as of that date. The consolidated financial statements and notes are presented as permitted by Form 10-Q and do not contain all of the information that is included in the annual financial statements and notes of the company. The consolidated financial statements and notes included in this report should be read in conjunction with the financial statements and notes included in the company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010, filed with the Securities and Exchange Commission (SEC).

The results of two businesses have been classified and presented as discontinued operations in the accompanying financial statements (Note 2). Prior period results have been adjusted to conform to this presentation.

2. Acquisitions and Dispositions

Acquisitions

On December 13, 2010, the company and Dionex Corporation, a leading manufacturer and marketer of chromatography systems, announced that their Boards of Directors unanimously approved a transaction under which Thermo Fisher would acquire all of the outstanding shares of Dionex for \$ 118.50 per share in cash, or a total purchase price of approximately \$2.1 billion. Dionex, headquartered in Sunnyvale, California, is a global leader in the manufacturing and marketing of ion and liquid chromatography and sample preparation systems, consumables, and software for chemical analysis. Dionex systems are used worldwide in environmental analysis and by the life sciences, chemical, petrochemical, food and beverage, power generation, and electronics industries. Their expertise in applications and instrumentation helps analytical scientists to evaluate and develop pharmaceuticals, establish environmental regulations, and produce better industrial products. The transaction is subject to a majority of the outstanding shares of Dionex having been tendered and certain regulatory approvals. Under the terms of the agreement, the company has commenced a tender offer, which expires on May 13, 2011, unless further extended, to acquire all of the outstanding shares of Dionex common stock for \$118.50 per share in cash.

In the first three months of 2011, the Laboratory Products and Services segment acquired operating assets of a Singapore-based distributor of laboratory equipment and consumables for \$2 million.

The company made contingent purchase price payments totaling \$28 million in the first three months of 2011, for acquisitions completed prior to 2011. The payments were contractually due to the sellers upon achievement of certain performance criteria at the acquired businesses.

The company's acquisitions have historically been made at prices above the fair value of the acquired identifiable assets, resulting in goodwill, due to expectations of the synergies that will be realized by combining the businesses. These synergies include the elimination of redundant facilities, functions and staffing; use of the company's existing commercial infrastructure to expand sales of the acquired businesses' products; and use of the commercial infrastructure of the acquired businesses to cost-effectively expand sales of company products.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

2. Acquisitions and Dispositions (continued)

Acquisitions have been accounted for using the purchase method of accounting, and the acquired companies' results have been included in the accompanying financial statements from their respective dates of acquisition. Acquisition transaction costs are recorded in selling, general and administrative expenses. Allocation of the purchase price for acquisitions was based on estimates of the fair value of the net assets acquired and, for acquisitions completed within the past year, is subject to adjustment upon finalization of the purchase price allocation. The company is not aware of any information that indicates the final purchase price allocations will differ materially from the preliminary estimates.

The company's results would not have been materially different from its reported results had the company's 2011 and 2010 acquisitions occurred at the beginning of 2010.

Dispositions

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business (Athena), part of the Analytical Technologies segment, for \$740 million in cash and its Lancaster Laboratories business (Lancaster), part of the Laboratory Products and Services segment, for \$180 million in cash and escrowed proceeds of \$20 million, due in October 2012. Revenues and operating income of the two businesses aggregated approximately \$225 million and \$60 million, respectively, in 2010. Athena provides diagnostic testing for neurological and other diseases, with an emphasis on gene-based tests. Lancaster is a contract-testing laboratory that provides analytical laboratory services. The results of both businesses have been included in the accompanying financial statements as discontinued operations for all periods presented. Operating results and balance sheet data of the discontinued operations were as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Revenues	\$ 54.3	\$ 49.9
Pre-tax Income	9.1	8.5
	April 2, 2011	December 31, 2010
Other Current Assets	\$ 54.9	\$ 64.8
Other Assets	448.0	451.0
Other Accrued Expenses	14.1	17.6
Other Long-term Liabilities	53.2	58.4

(Unaudited)

3. Business Segment Information

The company's continuing operations fall into two business segments, Analytical Technologies and Laboratory Products and Services.

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Revenues		
Analytical Technologies	\$ 1,177.7	\$ 1,083.4
Laboratory Products and Services	1,685.3	1,670.6
Eliminations	(141.6)	(127.1)
Consolidated revenues	2,721.4	2,626.9
Segment Income		
Analytical Technologies (a)	247.6	223.3
Laboratory Products and Services (a)	230.6	231.6
Subtotal reportable segments (a)	478.2	454.9
Cost of revenues charges	(2.9)	(5.1)
Selling, general and administrative charges, net	(3.1)	(1.1)
Restructuring and other costs, net	(15.3)	(17.4)
Amortization of acquisition-related intangible assets	(135.4)	(146.7)
Consolidated operating income	321.5	284.6
Other expense, net (b)	(22.5)	(24.9)
Income from continuing operations before provision for income taxes	\$ 299.0	\$ 259.7
Depreciation		
Analytical Technologies	\$ 22.5	\$ 21.7
Laboratory Products and Services	26.4	25.2
Consolidated depreciation	\$ 48.9	\$ 46.9

(a) Represents operating income before certain charges to cost of revenues and selling, general and administrative expenses; restructuring and other costs, net; and

amortization of acquisition-related intangibles.

(b) The company does not allocate other expense, net to its segments.

THERMO FISHER SCIENTIFIC INC.
Notes to Consolidated Financial Statements
(Unaudited)

4. Other Expense, Net

The components of other expense, net, in the accompanying statement of income are as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Interest Income	\$ 5.0	\$ 2.4
Interest Expense	(27.8)	(22.3)
Other Items, Net	0.3	(5.0)
	\$ (22.5)	\$ (24.9)

5. Stock-based Compensation Expense

The components of pre-tax stock-based compensation expense for the company's continuing operations are as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Stock Option Awards	\$ 13.0	\$ 11.4
Restricted Share/Unit Awards	8.6	7.4
Total Stock-based Compensation Expense	\$ 21.6	\$ 18.8

Stock-based compensation expense is included in the accompanying statement of income as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Cost of Revenues	\$ 1.5	\$ 1.3
Selling, General and Administrative Expenses	19.6	17.1
Research and Development Expenses	0.5	0.4
Total Stock-based Compensation Expense	\$ 21.6	\$ 18.8

No stock-based compensation expense has been capitalized in inventories due to immateriality.

Unrecognized compensation cost related to unvested stock options and restricted stock totaled approximately \$121 million and \$62 million, respectively, as of April 2, 2011, and is expected to be recognized through 2015 with weighted average amortization periods of 3.0 years and 2.5 years, respectively.

During the first three months of 2011, the company made equity compensation grants to employees consisting of 0.5 million restricted shares/units and options to purchase 3.4 million shares.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

6. Pension and Other Postretirement Benefit Plans

Employees of a number of the company's non-U.S. and certain U.S. subsidiaries participate in defined benefit pension plans covering substantially all full-time employees at those subsidiaries. Some of the plans are unfunded, as permitted under the plans and applicable laws. The company also has postretirement healthcare programs at several acquired businesses in which certain employees at those businesses are eligible to participate. The costs of the healthcare program are funded on a self-insured and insured-premium basis. Net periodic benefit costs for the company's defined benefit pension plans include the following components:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Service Cost	\$ 3.1	\$ 2.8
Interest Cost on Benefit Obligation	13.4	13.2
Expected Return on Plan Assets	(14.3)	(13.8)
Amortization of Net Loss	1.4	0.5
Net Periodic Benefit Cost	\$ 3.6	\$ 2.7

Net periodic benefit costs for the company's other postretirement benefit plans include the following components:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Service Cost	\$ 0.2	\$ 0.1
Interest Cost on Benefit Obligation	0.5	0.5
Amortization of Net Gain	(0.1)	(0.1)
Net Periodic Benefit Cost	\$ 0.6	\$ 0.5

THERMO FISHER SCIENTIFIC INC.
Notes to Consolidated Financial Statements
(Unaudited)

7. Earnings per Share

Basic and diluted earnings per share were calculated as follows:

(In millions except per share amounts)	Three Months Ended	
	April 2, 2011	April 3, 2010
Income from Continuing Operations	\$ 247.2	\$ 224.6
Income from Discontinued Operations	5.5	5.2
(Loss) Gain on Disposal of Discontinued Operations, Net	(0.5)	2.5
Net Income	252.2	232.3
Income Allocable to Participating Securities	•	•
Net Income for Earnings per Share	\$ 252.2	\$ 232.3
Basic Weighted Average Shares	388.6	409.6
Effect of:		
Convertible debentures	2.2	5.4
Stock options and restricted stock/units	3.8	3.2
Diluted Weighted Average Shares	394.6	418.2
Basic Earnings per Share:		
Continuing operations	\$.64	\$.55
Discontinued operations	.01	.02
	<u>\$.65</u>	<u>\$.57</u>
Diluted Earnings per Share:		
Continuing operations	\$.63	\$.54
Discontinued operations	.01	.02
	<u>\$.64</u>	<u>\$.56</u>

Options to purchase 8.3 million and 8.2 million shares of common stock were not included in the computation of diluted earnings per share for the first three months of 2011 and 2010, respectively, because their effect would have been antidilutive.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements (Unaudited)

8. Debt and Other Financing Arrangements

On February 22, 2011, the company issued \$2.2 billion principal amount of senior notes, as detailed below, to fund its pending acquisition of Dionex (see Note 2) and for general corporate purposes. All of these notes are subject to a special mandatory redemption provision. If the company does not consummate the Dionex acquisition by September 30, 2011, the company will be required to redeem all of the notes in whole at a redemption price of 101% of the aggregate principal, plus accrued and unpaid interest. Accordingly, the notes have been classified as a short-term obligation pending the completion of the Dionex acquisition.

2.05% Senior Notes due 2014

On February 22, 2011, the company issued \$300 million principal amount of 2.05% Senior Notes due 2014. Interest on the notes is payable on February 21 and August 21 of each year. The notes may be redeemed at any time at a redemption price of 100% of the principal amount plus a specified make-whole premium plus accrued interest. The company is subject to certain affirmative and negative covenants, the most restrictive of which limits the ability of the company to pledge principal properties as security under borrowing arrangements.

At the issuance of debt, the company entered into six-month LIBOR-based interest rate swap arrangements with various banks. The aggregate amount of the swaps is equal to the principal amount of the 2.05% Notes and the payment dates of the swaps coincide with the payment dates of the 2.05% Notes. The swap contracts provide for the company to pay a variable interest rate of six-month USD LIBOR plus a spread of 0.4112% (0.88% at April 2, 2011) and to receive a fixed interest rate of 2.05%. The variable interest rate resets semi-annually. The swaps have been accounted for as a fair value hedge of the 2.05% Notes.

3.20% Senior Notes due 2016

On February 22, 2011, the company issued \$900 million principal amount of 3.20% Senior Notes due 2016. Interest on the notes is payable on March 1 and September 1 of each year. The notes may be redeemed at any time at a redemption price of 100% of the principal amount plus a specified make-whole premium plus accrued interest. The company is subject to certain affirmative and negative covenants, the most restrictive of which limits the ability of the company to pledge principal properties as security under borrowing arrangements.

4.50% Senior Notes due 2021

On February 22, 2011, the company issued \$1.00 billion principal amount of 4.50% Senior Notes due 2021. Interest on the notes is payable on March 1 and September 1 of each year. The notes may be redeemed at any time at a redemption price of 100% of the principal amount plus a specified make-whole premium plus accrued interest. The company is subject to certain affirmative and negative covenants, the most restrictive of which limits the ability of the company to pledge principal properties as security under borrowing arrangements.

Redemption of Convertible Notes

During the first quarter of 2011, following issuance of a redemption notice by the company, holders of the company's 3.25% Senior Subordinated Convertible Notes due 2024 exercised conversion rights for substantially all of the remaining \$329 million in par value. The company paid the principal and the premium due upon conversion in cash for a total outlay of \$452 million of which \$35 million was paid in the first quarter of 2011 and the remainder was paid early in the second quarter. The principal had been reclassified to a current liability at April 2, 2011, and the premium was charged to capital in excess of par value when paid.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

8. Debt and Other Financing Arrangements (continued)

The amount of interest expense on the convertible debt recognized in the accompanying statement of income is as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Contractual Coupon Interest	\$ 1.8	\$ 2.9
Amortization of Discount on Convertible Debt	1.4	3.4
Interest Expense	<u>\$ 3.2</u>	<u>\$ 6.3</u>
Effective Interest Rate	3.8%	4.0%

9. Litigation and Related Contingencies

There are various lawsuits and claims pending against the company involving product liability, contract, commercial and other issues. In view of the company's financial condition and the accruals established for these matters, management does not believe that the ultimate liability, if any, related to these matters will have a material adverse effect on the company's financial condition, results of operations or cash flows.

The company establishes a liability that is an estimate of amounts needed to pay damages in the future for events that have already occurred. The accrued liabilities are based on management's judgment as to the probability of losses for asserted and unasserted claims and, where applicable, actuarially determined estimates. The reserve estimates are adjusted as additional information becomes known or payments are made.

For product liability, workers compensation and other personal injury matters, the company accrues the most likely amount or at least the minimum of the range of probable loss when a range of probable loss can be estimated. The company records estimated amounts due from insurers as an asset. Although the company believes that the amounts reserved and estimated recoveries are probable and appropriate based on available information, including actuarial studies of loss estimates, the process of estimating losses and insurance recoveries involves a considerable degree of judgment by management and the ultimate amounts could vary materially. Insurance contracts do not relieve the company of its primary obligation with respect to any losses incurred. The collectability of amounts due from its insurers is subject to the solvency and willingness of the insurer to pay, as well as the legal sufficiency of the insurance claims. Management monitors the financial condition and ratings of its insurers on an ongoing basis.

The company is currently involved in various stages of investigation and remediation related to environmental matters. The company cannot predict all potential costs related to environmental remediation matters and the possible impact on future operations given the uncertainties regarding the extent of the required cleanup, the complexity and interpretation of applicable laws and regulations, the varying costs of alternative cleanup methods and the extent of the company's responsibility. Expenses for environmental remediation matters related to the costs of permit requirements and installing, operating and maintaining groundwater-treatment systems and other remedial activities related to historical environmental contamination at the company's domestic and international facilities were not material in any period presented. The company records accruals for environmental remediation liabilities, based on current interpretations of environmental laws and regulations, when it is probable that a liability has been incurred and the amount of such liability can be reasonably estimated. The company calculates estimates based upon several factors, including reports prepared by environmental specialists and management's knowledge of and experience with these environmental matters. The company includes in these estimates potential costs for investigation, remediation and operation and maintenance of cleanup sites.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

9. Litigation and Related Contingencies (continued)

Management believes that its reserves for environmental matters are adequate for the remediation costs the company expects to incur. As a result, the company believes that the ultimate liability with respect to environmental remediation matters will not have a material adverse effect on the company's financial position, results of operations or cash flows. However, the company may be subject to additional remedial or compliance costs due to future events, such as changes in existing laws and regulations, changes in agency direction or enforcement policies, developments in remediation technologies or changes in the conduct of the company's operations, which could have a material adverse effect on the company's financial position, results of operations or cash flows. Although these environmental remediation liabilities do not include third-party recoveries, the company may be able to bring indemnification claims against third parties for liabilities relating to certain sites.

10. Comprehensive Income and Shareholders' Equity

Comprehensive income combines net income and other comprehensive items. Other comprehensive items represent certain amounts that are reported as components of shareholders' equity in the accompanying balance sheet. The components of comprehensive income are as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Net Income	\$ 252.2	\$ 232.3
Other Comprehensive Items:		
Currency translation adjustment	119.8	(140.5)
Unrealized gains on available-for-sale investments, net of tax	0.4	0.3
Unrealized gains on hedging instruments, net of tax provision	0.1	0.1
Pension and other postretirement benefit liability adjustments, net of tax	0.1	0.8
	<u>120.4</u>	<u>(139.3)</u>
Comprehensive Income	\$ <u>372.6</u>	\$ <u>93.0</u>

11. Fair Value Measurements and Fair Value of Financial Instruments

Fair Value Measurements

The company uses the market approach technique to value its financial instruments and there were no changes in valuation techniques during 2011. The company's financial assets and liabilities carried at fair value are primarily comprised of investments in money market funds, mutual funds holding publicly traded securities, derivative contracts used to hedge the company's currency and interest rate risks and other investments in unit trusts and insurance contracts held as assets to satisfy outstanding retirement liabilities.

The fair value accounting guidance requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities that the company has the ability to access.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data such as quoted prices, interest rates and yield curves.

Level 3: Inputs are unobservable data points that are not corroborated by market data.

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of April 2, 2011:

(In millions)	Quoted Prices			
	April 2, in Active Markets	Significant Other Observable Inputs	Significant Unobservable Inputs	Significant Unobservable Inputs
	2011	(Level 1)	(Level 2)	(Level 3)
Assets				
Cash equivalents	\$2,201.4	\$ 2,201.4	• \$	•
Investments in mutual funds, unit trusts and other similar instruments	34.1	34.1	•	•
Insurance contracts	48.5	•	48.5	•
Auction rate securities	4.5	•	•	4.5
Derivative contracts	35.9	•	35.9	•
Total Assets	\$2,324.4	\$ 2,235.5	\$ 84.4	\$ 4.5
Liabilities				
Derivative contracts	\$ 4.2	• \$	4.2	•
Contingent consideration	3.8	•	•	3.8
Total Liabilities	\$ 8.0	• \$	\$ 4.2	\$ 3.8

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

11. Fair Value Measurements and Fair Value of Financial Instruments (continued)

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2010:

(In millions)	December 31, 2010	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Cash equivalents	\$ 301.6	\$ 301.6	• \$	•
Investments in mutual funds, unit trusts and other similar instruments	36.3	36.3	•	•
Insurance contracts	42.6	•	42.6	•
Auction rate securities	4.6	•	•	4.6
Derivative contracts	40.1	•	40.1	•
Total Assets	\$ 425.2	\$ 337.9	\$ 82.7	\$ 4.6
Liabilities				
Derivative contracts	\$ 3.5	• \$	3.5	•
Contingent consideration	28.7	•	•	28.7
Total Liabilities	\$ 32.2	\$ •	\$ 3.5	\$ 28.7

The company determines the fair value of its insurance contracts by obtaining the cash surrender value of the contracts from the issuer. The company determines the fair value of the auction rate securities by obtaining indications of value from brokers/dealers. The company determines the fair value of acquisition-related contingent consideration based on assessment of the probability that the company would be required to make such future payment. Changes to the fair value are recorded in selling, general and administrative expense. The following tables provide a rollforward of the fair value, as determined by Level 3 inputs, of the auction rate securities and contingent consideration.

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Auction Rate Securities		
Beginning Balance	\$ 4.6	\$ 5.4
Sale of securities	(0.1)	(0.2)

Ending Balance	\$ 3.8	\$ 22.3

The notional amounts of derivative contracts outstanding, primarily consisting of interest rate swaps and, to a lesser extent, foreign currency exchange contracts on intercompany debt, totaled \$2.12 billion and \$1.78 billion at April 2, 2011 and December 31, 2010, respectively. The fair value of such contracts is the estimated amount that the company would receive upon liquidation of the contracts, taking into account the change in currency exchange rates.

The following tables present the fair value of derivative instruments in the consolidated balance sheet and statement of income.

(In millions)	Fair Value – Assets		Fair Value – Liabilities	
	April 2, 2011	December 31, 2010	April 2, 2011	December 31, 2010
Derivatives Designated as Hedging Instruments

11. Fair Value Measurements and Fair Value of Financial Instruments (continued)

(In millions)	Gain (Loss) Recognized Three Months Ended	
(In millions)	April 2, 2011	April 3, 2010
Derivatives Designated as Fair Value Hedges		
Interest rate contracts	\$ 6.4	\$ 3.4
Derivatives Not Designated as Fair Value Hedges		
Foreign currency exchange contracts	(26.7)	17.9

Gains and losses recognized on interest rate and foreign currency exchange contracts are included in the consolidated statement of income under the caption other expense, net, together with the corresponding, offsetting losses and gains on the underlying hedged transactions.

Fair Value of Other Financial Instruments

The carrying amount and fair value of the company's notes receivable and debt obligations are as follows:

(In millions)	April 2, 2011		December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Notes Receivable	\$ 7.1	\$ 7.1	\$ 7.4	\$ 7.4
Debt Obligations:				
Convertible obligations	\$ 302.3	\$ 416.8	\$ 327.9	\$ 461.4
Senior notes	3,976.3	4,045.7	1,784.9	1,806.3
Other	21.6	21.6	24.3	24.3
	\$ 4,300.2	\$ 4,484.1	\$ 2,137.1	\$ 2,292.0

The fair value of debt obligations was determined based on quoted market prices and on borrowing rates available to the company at the respective period ends.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

12. Warranty Obligations

Product warranties are included in other accrued expenses in the accompanying balance sheet. The changes in the carrying amount of warranty obligations are as follows:

(In millions)	Three Months Ended	
	April 2, 2011	April 3, 2010
Beginning Balance	\$ 41.7	\$ 45.2
Provision charged to income	11.0	10.8
Usage	(12.7)	(10.1)
Adjustments to previously provided warranties, net	(0.1)	0.4
Other, net	1.5	(0.8)
Ending Balance	<u>\$ 41.4</u>	<u>\$ 45.5</u>

13. Restructuring and Other Costs, Net

Restructuring costs in the first three months of 2011 in both segments primarily included continuing charges for headcount reductions and facility consolidations in an effort to streamline operations, including the consolidation of a manufacturing and sales facility in Finland of an acquired business with an existing facility in that country. As of May 6, 2011, the company has identified restructuring actions that will result in additional charges of approximately \$35 million, primarily in the remainder of 2011.

During the first quarter of 2011, the company recorded net restructuring and other costs by segment as follows:

(In millions)	Analytical Technologies	Laboratory Products and Services	Corporate	Total
Cost of Revenues	\$ 0.8	\$ 2.1	•	\$ 2.9
Selling, General and Administrative Expenses	3.1	•	•	3.1
Restructuring and Other Costs, Net	11.6	3.5	0.2	15.3
	<u>\$ 15.5</u>	<u>\$ 5.6</u>	<u>\$ 0.2</u>	<u>\$ 21.3</u>

The components of net restructuring and other costs by segment are as follows:

Analytical Technologies

The Analytical Technologies segment recorded \$15.5 million of net restructuring and other charges in the first quarter of 2011. The segment recorded charges to cost of revenues of \$0.8 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$3.1 million for transaction costs, net, primarily related to the pending Dionex acquisition (Note 2); and \$11.6 million of other restructuring costs, substantially all of which were cash costs. These cash costs were primarily associated with headcount reductions and facility consolidations to streamline operations, including the consolidation of a manufacturing and sales facility in Finland of an acquired business with an existing facility in that country. The cash costs consisted of \$7.2 million of severance for approximately 80 employees; \$4.0 million of abandoned facility costs; and \$0.6 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations.

THERMO FISHER SCIENTIFIC INC.

Notes to Consolidated Financial Statements
(Unaudited)

13. Restructuring and Other Costs, Net (continued)

Laboratory Products and Services

The Laboratory Products and Services segment recorded \$5.6 million of net restructuring and other charges in the first quarter of 2011. The segment recorded charges to cost of revenues of \$2.1 million for the sale of inventories revalued at the date of acquisition and accelerated depreciation at facilities closing due to real estate consolidation and \$3.5 million of cash costs. The cash costs, which were associated with headcount reductions and facility consolidations, included \$2.7 million of severance for approximately 110 employees; \$0.4 million of abandoned facility costs; and \$0.4 million of other cash costs associated with restructuring actions.

Corporate

The company recorded \$0.2 million in restructuring charges at its corporate operations, all of which were cash costs for severance, in the first three months of 2011.

The following table summarizes the cash components of the company's restructuring plans. The non-cash components and other amounts reported as restructuring and other costs, net, in the accompanying statement of income have been summarized in the notes to the tables. Accrued restructuring costs are included in other accrued expenses in the accompanying balance sheet.

Balance At April 2, 2011	<u>\$ 4.2</u>	<u>\$ 3.5</u>	<u>\$ 0.3</u>	<u>\$ 8.0</u>

(a) Other includes employee retention costs which are accrued ratably over the period through which employees must work to qualify for a payment.

(b) Excludes an aggregate of \$0.2 million of non-cash income, net.

The company expects to pay accrued restructuring costs as follows: severance and other costs, primarily through 2011; and abandoned-facility payments, over lease terms expiring through 2018.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934 are made throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "seeks," "estimates," and similar expressions are intended to identify forward-looking statements. While the company may elect to update forward-looking statements in the future, it specifically disclaims any obligation to do so, even if the company's estimates change, and readers should not rely on those forward-looking statements as representing the company's views as of any date subsequent to the date of the filing of this Quarterly Report.

A number of important factors could cause the results of the company to differ materially from those indicated by such forward-looking statements, including those detailed under the heading "Risk Factors" in Part II, Item 1A of this report on Form 10-Q.

Overview of Results of Operations and Liquidity

The company develops, manufactures, sells and purchases for resale a broad range of products that are sold worldwide. The company expands the product lines and services it offers by developing and commercializing its own technologies and by making strategic acquisitions of complementary businesses. The company's continuing operations fall into two business segments: Analytical Technologies and Laboratory Products and Services.

The results of two businesses sold on April 4, 2011, have been classified and presented as discontinued operations in the accompanying financial statements. Prior period results have been adjusted to conform to this presentation. The results discussed below refer to the company's continuing operations unless otherwise noted.

(Dollars in millions)	Three Months Ended			
	April 2, 2011		April 3, 2010	
Revenues				
Analytical Technologies	\$ 1,177.7	43.3%	\$ 1,083.4	41.2%
Laboratory Products and Services	1,685.3	61.9%	1,670.6	63.6%
Eliminations	(141.6)	(5.2)%	(127.1)	(4.8)%
	\$ 2,721.4	100%	\$ 2,626.9	100%

Sales in the first quarter of 2011 were \$2.72 billion, an increase of \$95 million from the first quarter of 2010. Aside from the effects of currency translation and acquisitions, net of divestitures (discussed in total and by segment below), revenues increased from 2010 by \$25 million (1%). The increase in revenues was primarily due to increased demand, offset in part by lower sales resulting from cessation of a supply contract, discussed below, and lower stimulus-funded sales in Japan as compared to the first quarter of 2010, which together decreased sales by approximately 3 percentage points.

The company's strategy is to augment internal growth at existing businesses with complementary acquisitions such as those completed in 2010. The company's principal recent acquisitions are described below.

- Fermentas, a manufacturer and global distributor of enzymes, reagents and kits for molecular and cellular biology research, was acquired in July 2010 to expand the company's ability to provide complete workflows for genomics research.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Overview of Results of Operations and Liquidity (continued)

- Finnzymes, a provider of integrated tools for molecular biology analysis, including reagents, instruments, consumables and kits, was acquired in March 2010 to expand the company's portfolio of reagents and other consumables for the molecular biology research and diagnostics markets.
- Ahura Scientific, a provider of handheld spectroscopy instruments that are used worldwide in the identification of chemicals for safety, security and pharmaceutical applications, was acquired in February 2010 to expand the company's portfolio of portable analytical devices.

On December 13, 2010, the company and Dionex Corporation, a leading manufacturer and marketer of chromatography systems, announced that their Boards of Directors unanimously approved a transaction under which Thermo Fisher would acquire all of the outstanding shares of Dionex for \$118.50 per share in cash, or a total purchase price of approximately \$2.1 billion. Dionex, headquartered in Sunnyvale, California, is a global leader in the manufacturing and marketing of ion and liquid chromatography and sample preparation systems, consumables, and software for chemical analysis. Dionex systems are used worldwide in environmental analysis and by the life sciences, chemical, petrochemical, food and beverage, power generation, and electronics industries. Their expertise in applications and instrumentation helps analytical scientists to evaluate and develop pharmaceuticals, establish environmental regulations, and produce better industrial products. The transaction is subject to a majority of the outstanding shares of Dionex having been tendered and certain regulatory approvals. Under the terms of the agreement, the company has commenced a tender offer, which expires on May 13, 2011, unless further extended, to acquire all of the outstanding shares of Dionex common stock for \$118.50 per share in cash.

In the first quarter of 2011, operating income and operating income margin were \$322 million and 11.8%, respectively, compared with \$285 million and 10.8%, respectively, in 2010. The increases in operating income and operating income margin were primarily due to productivity improvements, global sourcing initiatives, lower operating costs following restructuring actions and, to a lesser extent, profit on incremental sales. In addition, amortization expense decreased by \$11 million in the first quarter of 2011, primarily due to the completion of amortization of acquisition-related intangibles from a 2005 acquisition.

The company's effective tax rates were 17.3% and 13.5% in the first quarter of 2011 and 2010, respectively. The increase in the effective tax rate was primarily due to increased earnings in higher tax jurisdictions. In addition, the tax provision in the first quarter of 2011 was unfavorably affected by \$6.9 million, or 2.3 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates. The company expects its effective tax rate for the full year 2011 to be between 15.5% and 17.5% based on currently forecasted profitability in the countries in which the company conducts business. The tax provision in the first quarter of 2010 was favorably affected by \$1.9 million or 0.7 percentage points resulting from the resolution of tax audits.

Income from continuing operations increased to \$247 million in the first quarter of 2011, from \$225 million in the first quarter of 2010, primarily due to the items discussed above that increased operating income, offset in part by a higher tax rate.

During the first three months of 2011, the company's cash flow from operations totaled \$339 million (including \$13 million from discontinued operations), compared with \$343 million (including \$8 million from discontinued operations) for the first three months of 2010. The decrease resulted primarily from increases in working capital items, particularly inventories, to support the growth in sales.

As of April 2, 2011, the company's outstanding debt totaled \$4.30 billion. In addition, the company has an unsecured revolving credit agreement expiring in August 2012 with available capacity of \$953 million at April 2, 2011. The company issued senior notes in February 2011 to fund the pending Dionex acquisition. If the company does not consummate the Dionex acquisition by September 30, 2011, the company will be required to redeem all of the notes in whole at a redemption price of 101% of the aggregate principal, plus accrued and unpaid interest. Accordingly, the notes have been classified as a short-term obligation pending the completion of the Dionex acquisition (See Note 8).

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Overview of Results of Operations and Liquidity (continued)

The company believes that its existing cash and short-term investments of \$2.79 billion as of April 2, 2011, and the company's future cash flow from operations together with available borrowing capacity under its revolving credit agreement, are sufficient to fund the acquisition of Dionex and to meet the cash requirements of its existing businesses for the foreseeable future, including at least the next 24 months.

Critical Accounting Policies and Estimates

The company's discussion and analysis of its financial condition and results of operations is based upon its financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent liabilities. Management believes the most complex and sensitive judgments, because of their significance to the consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and Note 1 to the Consolidated Financial Statements of the company's Form 10-K for 2010, describe the significant accounting estimates and policies used in preparation of the consolidated financial statements. Actual results in these areas may differ from management's estimates under different assumptions or conditions. There have been no significant changes in the company's critical accounting policies during the first three months of 2011.

Results of Operations

First Quarter 2011 Compared With First Quarter 2010

Continuing Operations

(In millions)	Three Months Ended		Total Change	Currency Translation	Acquisitions/ Divestitures	Operations
	April 2, 2011	April 3, 2010				
Revenues						
Analytical Technologies	\$ 1,177.7	\$ 1,083.4	\$ 94.3	\$ 13.9	\$ 27.3	\$ 53.1
Laboratory Products and Services	1,685.3	1,670.6	14.7	14.9	13.5	(13.7)
Eliminations	(141.6)	(127.1)	(14.5)	(0.4)	•	(14.1)
Consolidated Revenues	\$ 2,721.4	\$ 2,626.9	\$ 94.5	\$ 28.4	\$ 40.8	\$ 25.3

Sales in the first quarter of 2011 were \$2.72 billion, an increase of \$95 million from the first quarter of 2010. The favorable effects of currency translation resulted in an increase in revenues of \$28 million in 2011. Sales increased \$41 million due to acquisitions, net of divestitures. Aside from the effects of currency translation and acquisitions, net of divestitures, revenues increased \$25 million (1%). The increase in revenues was primarily due to increased demand, offset in part by lower sales resulting from cessation of a supply contract, discussed below, and lower stimulus-funded sales in Japan as compared to the first quarter of 2010, which together decreased sales by approximately 3 percentage points. Sales were stronger in Europe as the North America and Asia markets were affected by the supply contract termination and Japan stimulus funded spending in 2010, respectively.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations (continued)

In the first quarter of 2011, operating income and operating income margin were \$322 million and 11.8%, respectively, compared with \$285 million and 10.8%, respectively, in 2010. The increases in operating income and operating income margin were primarily due to productivity improvements, global sourcing initiatives, lower operating costs following restructuring actions and, to a lesser extent, profit on incremental sales. In addition, amortization expense decreased by \$11 million in the first quarter of 2011, primarily due to the completion of amortization of acquisition-related intangibles from a 2005 acquisition.

In the first quarter of 2011, the company recorded restructuring and other costs, net, of \$21 million, including \$3 million of charges to cost of revenues related to the sale of inventories revalued at the date of acquisition and accelerated depreciation on manufacturing assets to be abandoned due to facility consolidations and \$3 million of charges to selling, general and administrative expenses for transaction costs, net, primarily related to the acquisition of Dionex. The company incurred \$15 million of cash costs, primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated, such as the consolidation of a manufacturing and sales facility of an acquired business in Finland with an existing facility in that country.

In the first quarter of 2010, the company recorded restructuring and other costs, net, of \$24 million, including \$5 million of charges to cost of revenues related to the sale of inventory revalued at the date of acquisition and accelerated depreciation on manufacturing assets to be abandoned due to facility consolidations and \$1 million of charges to selling, general and administrative expenses for transaction costs related to the acquisition of Finnzymes. The company incurred \$12 million of cash costs primarily for actions in response to the downturn in the economy and reduced revenues including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated. The company also incurred a \$6 million charge on a patent infringement claim initiated prior to a business unit's acquisition by the company.

As of May 6, 2011, the company has identified restructuring actions that will result in additional charges of approximately \$35 million in 2011 and expects to identify additional actions during the remainder of 2011. The restructuring actions initiated in the first three months of 2011 are expected to result in annual cost savings of approximately \$20 million.

Segment Results

The company's management evaluates segment operating performance using operating income before certain charges/credits to cost of revenues and selling, general and administrative expenses, principally associated with acquisition accounting; restructuring and other costs/income including costs arising from facility consolidations such as severance and abandoned lease expense and gains and losses from the sale of real estate and product lines; and amortization of acquisition-related intangible assets. The company uses these measures because it helps management understand and evaluate the segments' core operating results and facilitate comparison of performance for determining compensation (Note 3). Accordingly, the following segment data is reported on this basis.

Selling, General and Administrative Charges, Net	(3.1)	(1.1)	
Restructuring and Other Costs, Net	(15.3)	(17.4)	
Amortization of Acquisition-related Intangible Assets	(135.4)	(146.7)	
Consolidated Operating Income	<u>\$ 321.5</u>	<u>\$ 284.6</u>	13%
Reportable Segments Operating Income Margin	17.6%	17.3%	
Consolidated Operating Income Margin	11.8%	10.8%	

Income from the company's reportable segments increased 5% to \$478 million in the first quarter of 2011 due primarily to profit on incremental sales and, to a lesser extent, productivity improvements, global sourcing initiatives and lower operating costs following restructuring actions. The company also refers to this measure as adjusted operating income.

Analytical Technologies

(Dollars in millions)	Three Months Ended		
	April 2, 2011	April 3, 2010	Change
Revenues	<u>\$1,177.7</u>	<u>\$1,083.4</u>	<u>9%</u>
Operating Income Margin	<u>21.0%</u>	<u>20.6%</u>	<u>0.4</u>

Sales in the Analytical Technologies segment increased \$94 million to \$1.18 billion in the first quarter of 2011. The favorable effects of currency translation resulted in an increase in revenue of \$14 million in 2011. Sales increased \$27 million due to acquisitions. In addition to the changes in revenue resulting from currency translation and acquisitions, revenues increased \$53 million (5%) primarily due to increased demand. Demand was particularly strong for process instruments and clinical diagnostics products. The increase in revenues was offset in part by lower stimulus-funded sales in Japan in the first quarter of 2011 which decreased growth by 5 percentage points.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations (continued)

Operating income margin was 21.0% in the first quarter of 2011 and 20.6% in the first quarter of 2010. The increase resulted from profit on incremental sales and, to a lesser extent, productivity improvements, global sourcing initiatives and lower operating costs following restructuring actions. These increases were offset in part by higher spending on research and development initiatives.

Laboratory Products and Services

(Dollars in millions)	Three Months Ended		
	April 2, 2011	April 3, 2010	Change
Revenues	\$ 1,685.3	\$ 1,670.6	1%
Operating Income Margin	13.7%	13.9%	(0.2)

Sales in the Laboratory Products and Services segment increased \$15 million to \$1.69 billion in the first quarter of 2011. The favorable effects of currency translation resulted in an increase in revenues of \$15 million in 2011. Sales increased \$14 million due to acquisitions. In addition to the changes in revenue resulting from currency translation and acquisitions, revenues decreased \$14 million (1%) primarily due to cessation of a supply contract, discussed below, offset in part by increased demand for biopharma outsourcing services and flu products.

In November 2009, a significant supplier of the company's healthcare market channel notified the company that it intended to cease an existing supply arrangement in mid-2010. The company believes this was in part a response to the company's strategic decision to expand its product offerings to provide its customers with a broader menu of diagnostic solutions. The company has signed an agreement with an alternative supplier of laboratory products and has begun selling these and other products from the new supplier offsetting a portion of the drop in revenue. As a result of these events, sales were unfavorably affected by \$31 million, net, in the first quarter of 2011 compared with the first quarter of 2010. The company expects that cessation of the supply contract will continue to unfavorably affect revenue growth by approximately \$25 million in the second quarter of 2011.

Operating income margin decreased to 13.7% in the first quarter of 2011 from 13.9% in the first quarter of 2010, primarily due to the loss of the supply contract and strategic investments including expansion of the commercial organization in the Asia/Pacific region and information technology initiatives in Europe, offset in part by productivity improvements.

Other Expense, Net

The company reported other expense, net, of \$23 million and \$25 million in the first quarter of 2011 and 2010, respectively (Note 4). Other expense, net includes interest income, interest expense, equity in earnings of unconsolidated subsidiaries and other items, net. The decrease was primarily due to higher interest income and lower other expense, offset in part by a \$6 million increase in interest expense related to the debt issued to fund the pending Dionex acquisition.

Provision for Income Taxes

The company's effective tax rates were 17.3% and 13.5% in the first quarter of 2011 and 2010, respectively. The increase in the effective tax rate was primarily due to increased earnings in higher tax jurisdictions. In addition, the tax provision in the first quarter of 2011 was unfavorably affected by \$6.9 million, or 2.3 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates. The company expects its effective tax rate for the full year 2011 to be between 15.5% and 17.5% based on currently forecasted profitability in the countries in which the company conducts business. The tax provision in the first quarter of 2010 was favorably affected by \$1.9 million or 0.7 percentage points resulting from the resolution of tax audits.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Results of Operations (continued)

Contingent Liabilities

The company is contingently liable with respect to certain legal proceedings and related matters. An unfavorable outcome in one or more of the matters described under "Litigation and Related Contingencies" in Note 9 could materially affect the company's financial position as well as its results of operations and cash flows.

Discontinued Operations

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business (Athena), part of the Analytical Technologies segment, for \$740 million in cash and its Lancaster Laboratories business (Lancaster), part of the Laboratory Products and Services segment, for \$180 million in cash and escrowed proceeds of \$20 million, due in October 2012. Revenues and operating income of the two businesses aggregated approximately \$225 million and \$60 million, respectively, in 2010. Athena provides diagnostic testing for neurological and other diseases, with an emphasis on gene-based tests. Lancaster is a contract-testing laboratory that provides analytical laboratory services. The results of both businesses have been included in the accompanying financial statements as discontinued operations for all periods presented (Note 2). After-tax income from discontinued operations was \$5.5 million and \$5.2 million, in the first quarters of 2011 and 2010, respectively.

During the first quarter of 2010, the company recorded additional proceeds related to a business divested in 2003, resulting in an after-tax gain of \$2.5 million.

Liquidity and Capital Resources

Consolidated working capital was \$2.04 billion at April 2, 2011, compared with \$2.43 billion at December 31, 2010. Included in working capital were cash, cash equivalents and short-term investments of \$2.79 billion at April 2, 2011 and \$0.93 billion at December 31, 2010. The increase in cash was primarily due to the issuance of debt to fund the pending Dionex acquisition.

First Three Months of 2011

Cash provided by operating activities was \$339 million during the first three months of 2011. Increases in accounts receivable and inventory used cash of \$64 million and \$63 million, respectively, primarily to support growth in sales. An increase in accounts payable provided cash of \$68 million, primarily due to the timing of payments. Cash payments for income taxes totaled \$115 million in the first three months of 2011, compared with \$52 million in the first three months of 2010 due to timing of payments and, to a lesser extent, an increase in taxable income. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$10 million during the first three months of 2011.

During the first three months of 2011, the company's primary investing activities included the purchase of property, plant and equipment and acquisitions. The company expended \$64 million for purchases of property, plant and equipment and \$24 million for acquisitions, including contingent earn-out payments.

The company has no material commitments for purchases of property, plant and equipment and expects that for all of 2011, such expenditures will approximate between \$285 and \$310 million. Other than the issuance of debt discussed in Note 8, the company's contractual obligations and other commercial commitments did not change materially between December 31, 2010 and April 2, 2011.

THERMO FISHER SCIENTIFIC INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources (continued)

The company's financing activities provided \$1.65 billion of cash during the first three months of 2011, principally for the issuance of debt (Note 8) offset in part by the repurchase of \$538 million of the company's common stock. Following issuance of a redemption notice for the remaining \$329 million principal outstanding of the company's 3.25% Senior Subordinated Convertible Notes due 2024, substantially all of the balance was converted for a total cash outlay of \$452 million of which \$35 million was paid in the first quarter of 2011 and the remainder was paid early in the second quarter. The company's financing activities also included \$45 million of proceeds of employee stock option exercises. On September 8, 2010, the Board of Directors authorized the repurchase of up to \$750 million of the company's common stock through September 8, 2011. On February 23, 2011, the Board of Directors authorized the repurchase of up to an additional \$750 million of the company's common stock through February 22, 2012. At April 2, 2011, \$700 million was available for future repurchases of the company's common stock under this authorization.

As of April 2, 2011, the company's outstanding debt totaled \$4.30 billion. In addition, the company has an unsecured revolving credit agreement expiring in August 2012 with available capacity of \$953 million at April 2, 2011. The company issued senior notes in February 2011 to fund the pending Dionex acquisition. If the company does not consummate the Dionex acquisition by September 30, 2011, the company will be required to redeem all of the notes in whole at a redemption price of 101% of the aggregate principal, plus accrued and unpaid interest. Accordingly, the notes have been classified as a short-term obligation pending the completion of the Dionex acquisition (See Note 8).

The company believes that its existing cash and short-term investments of \$2.79 billion as of April 2, 2011, and the company's future cash flow from operations together with available borrowing capacity under its revolving credit agreement, are sufficient to fund the acquisition of Dionex and to meet the cash requirements of its existing businesses for the foreseeable future, including at least the next 24 months.

First Three Months of 2010

Cash provided by operating activities was \$343 million during the first three months of 2010. Increases in accounts receivable and inventory used cash of \$104 million and \$35 million, respectively, primarily to support growth in sales. An increase in accounts payable provided cash of \$74 million, primarily due to timing of payments. Cash payments for income taxes totaled \$52 million in the first three months of 2010.

During the first three months of 2010, the company's primary investing activities included acquisitions and the purchase of property, plant and equipment. The company expended \$229 million for acquisitions and \$49 million for purchases of property, plant and equipment.

The company's financing activities used \$178 million of cash during the first three months of 2010, principally for the extinguishment of debt, offset in part by \$27 million of proceeds of employee stock option exercises.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The company's exposure to market risk from changes in interest rates, currency exchange rates, commodity prices and equity prices has not changed materially from its exposure at year-end 2010.

THERMO FISHER SCIENTIFIC INC.

Item 4. Controls and Procedures

The company's management, with the participation of the company's chief executive officer and chief financial officer, evaluated the effectiveness of the company's disclosure controls and procedures as of April 2, 2011. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of the company's disclosure controls and procedures as of April 2, 2011, the company's chief executive officer and chief financial officer concluded that, as of such date, the company's disclosure controls and procedures were effective at the reasonable assurance level.

There have been no changes in the company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the fiscal quarter ended April 2, 2011, that have materially affected or are reasonably likely to materially affect the company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1A. Risk Factors

Set forth below are the risks that we believe are material to our investors. This section contains forward-looking statements. You should refer to the explanation of the qualifications and limitations on forward-looking statements beginning on page 23.

We must develop new products, adapt to rapid and significant technological change and respond to introductions of new products in order to remain competitive. Our growth strategy includes significant investment in and expenditures for product development. We sell our products in several industries that are characterized by rapid and significant technological changes, frequent new product and service introductions and enhancements and evolving industry standards. Our competitors may adapt more quickly to new technologies and changes in customers' requirements than we can. Without the timely introduction of new products, services and enhancements, our products and services will likely become technologically obsolete over time, in which case our revenue and operating results would suffer.

Many of our existing products and those under development are technologically innovative and require significant planning, design, development and testing at the technological, product and manufacturing-process levels. Our customers use many of our products to develop, test and manufacture their own products. As a result, we must anticipate industry trends and develop products in advance of the commercialization of our customers' products. If we fail to adequately predict our customers' needs and future activities, we may invest heavily in research and development of products and services that do not lead to significant revenue.

It may be difficult for us to implement our strategies for improving internal growth. Some of the markets in which we compete have been flat or declining over the past several years. To address this issue, we are pursuing a number of strategies to improve our internal growth, including:

- strengthening our presence in selected geographic markets;
- allocating research and development funding to products with higher growth prospects;

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

- developing new applications for our technologies;
- expanding our service offerings;
- continuing key customer initiatives;
- combining sales and marketing operations in appropriate markets to compete more effectively;
- finding new markets for our products; and
- continuing the development of commercial tools and infrastructure to increase and support cross-selling opportunities of products and services to take advantage of our depth in product offerings.

We may not be able to successfully implement these strategies, and these strategies may not result in the expected growth of our business.

Our business is affected by general economic conditions and related uncertainties affecting markets in which we operate. The current economic conditions including the lingering effects of the global recession could adversely impact our business in 2011 and beyond, resulting in:

- reduced demand for some of our products;
- increased rate of order cancellations or delays;
- increased risk of excess and obsolete inventories;
- increased pressure on the prices for our products and services; and
- greater difficulty in collecting accounts receivable.

Demand for some of our products depends on capital spending policies of our customers and on government funding policies. Our customers include pharmaceutical and chemical companies, laboratories, universities, healthcare providers, government agencies and public and private research institutions. Many factors, including public policy spending priorities, available resources and product and economic cycles, have a significant effect on the capital spending policies of these entities. These policies in turn can have a significant effect on the demand for our products.

As a multinational corporation, we are exposed to fluctuations in currency exchange rates, which could adversely affect our cash flows and results of operations. International revenues account for a substantial portion of our revenues, and we intend to continue expanding our presence in international markets. The exposure to fluctuations in currency exchange rates takes on different forms. International revenues are subject to the risk that fluctuations in exchange rates could adversely affect product demand and the profitability in U.S. dollars of products and services provided by us in international markets, where payment for our products and services is made in the local currency. As a multinational corporation, our businesses occasionally invoice third-party customers in currencies other than the one in which they primarily do business (the "functional currency"). Movements in the invoiced currency relative to the functional currency could adversely impact our cash flows and our results of operations. In addition, reported sales made in non-U.S. currencies by our international businesses, when translated into U.S. dollars for financial reporting purposes, fluctuate due to exchange rate movement. Should our international sales grow, exposure to fluctuations in currency exchange rates could have a larger effect on our financial results. In 2010, currency translation had an unfavorable effect of \$19 million on the revenues of our continuing operations due to the strengthening of the U.S. dollar relative to other currencies in which the company sells products and services, but in the first three months of 2011, currency translation had a favorable effect on revenues of our continuing operations of \$28 million due to the weakening of the U.S. dollar relative to other currencies in which the company sells products and services.

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

Healthcare reform legislation could adversely impact us. The recently enacted Federal legislation on healthcare reform could have an adverse impact on us. Some of the potential consequences, such as a reduction in governmental support of healthcare services or adverse changes to the delivery or pricing of healthcare services or products or mandated benefits, may cause healthcare-industry participants to purchase fewer of our products and services or to reduce the prices they are willing to pay for our products or services. The new legislation also includes an excise tax, beginning in 2013, on revenue from the sale by manufacturers of certain medical devices, which could have an adverse impact on our results of operations.

Our inability to protect our intellectual property could have a material adverse effect on our business. In addition, third parties may claim that we infringe their intellectual property, and we could suffer significant litigation or licensing expense as a result. We place considerable emphasis on obtaining patent and trade secret protection for significant new technologies, products and processes because of the length of time and expense associated with bringing new products through the development process and into the marketplace. Our success depends in part on our ability to develop patentable products and obtain and enforce patent protection for our products both in the United States and in other countries. We own numerous U.S. and foreign patents, and we intend to file additional applications, as appropriate, for patents covering our products. Patents may not be issued for any pending or future patent applications owned by or licensed to us, and the claims allowed under any issued patents may not be sufficiently broad to protect our technology. Any issued patents owned by or licensed to us may be challenged, invalidated or circumvented, and the rights under these patents may not provide us with competitive advantages. In addition, competitors may design around our technology or develop competing technologies. Intellectual property rights may also be unavailable or limited in some foreign countries, which could make it easier for competitors to capture increased market position. We could incur substantial costs to defend ourselves in suits brought against us or in suits in which we may assert our patent rights against others. An unfavorable outcome of any such litigation could materially adversely affect our business and results of operations.

We also rely on trade secrets and proprietary know-how with which we seek to protect our products, in part, by confidentiality agreements with our collaborators, employees and consultants. These agreements may be breached and we may not have adequate remedies for any breach. In addition, our trade secrets may otherwise become known or be independently developed by our competitors.

Third parties may assert claims against us to the effect that we are infringing on their intellectual property rights. We could incur substantial costs and diversion of management resources in defending these claims, which could have a material adverse effect on our business, financial condition and results of operations. In addition, parties making these claims could secure a judgment awarding substantial damages, as well as injunctive or other equitable relief, which could effectively block our ability to make, use, sell, distribute, or market our products and services in the United States or abroad. In the event that a claim relating to intellectual property is asserted against us, or third parties not affiliated with us hold pending or issued patents that relate to our products or technology, we may seek licenses to such intellectual property or challenge those patents. However, we may be unable to obtain these licenses on commercially reasonable terms, if at all, and our challenge of the patents may be unsuccessful. Our failure to obtain the necessary licenses or other rights could prevent the sale, manufacture, or distribution of our products and, therefore, could have a material adverse effect on our business, financial condition and results of operations.

Changes in governmental regulations may reduce demand for our products or increase our expenses. We compete in many markets in which we and our customers must comply with federal, state, local and international regulations, such as environmental, health and safety and food and drug regulations. We develop, configure and market our products to meet customer needs created by those regulations. Any significant change in regulations could reduce demand for our products or increase our expenses. For example, many of our instruments are marketed to the pharmaceutical industry for use in discovering and developing drugs. Changes in the U.S. Food and Drug Administration's regulation of the drug discovery and development process could have an adverse effect on the demand for these products.

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

If any of our security products fail to detect explosives or radiation, we could be exposed to product liability and related claims for which we may not have adequate insurance coverage. The products currently or previously sold by our environmental and process instruments businesses include a comprehensive range of fixed and portable instruments used for chemical, radiation and trace explosives detection. These products are used in airports, embassies, cargo facilities, border crossings and other high-threat facilities for the detection and prevention of terrorist acts. If any of these products were to malfunction, it is possible that explosive or radioactive material could fail to be detected by our product, which could lead to product liability claims. There are also many other factors beyond our control that could lead to liability claims, such as the reliability and competence of the customers' operators and the training of such operators. Any such product liability claims brought against us could be significant and any adverse determination may result in liabilities in excess of our insurance coverage. Although we carry product liability insurance, we cannot be certain that our current insurance will be sufficient to cover these claims or that it can be maintained on acceptable terms, if at all.

Our inability to successfully identify and complete acquisitions or successfully integrate any new or previous acquisitions could have a material adverse effect on our business. Our business strategy includes the acquisition of technologies and businesses that complement or augment our existing products and services. Promising acquisitions are difficult to identify and complete for a number of reasons, including competition among prospective buyers and the need for regulatory, including antitrust, approvals. We may not be able to identify and successfully complete transactions. Any acquisition we may complete may be made at a substantial premium over the fair value of the net identifiable assets of the acquired company. Further, we may not be able to integrate any acquired businesses successfully into our existing businesses, make such businesses profitable, or realize anticipated cost savings or synergies, if any, from these acquisitions, which could adversely affect our business.

Moreover, we have acquired many companies and businesses. As a result of these acquisitions, we recorded significant goodwill and indefinite-lived intangible assets on our balance sheet, which amount to approximately \$9.04 billion and \$1.33 billion, respectively, as of April 2, 2011. We assess the realizability of goodwill and indefinite-lived intangible assets annually as well as whenever events or changes in circumstances indicate that these assets may be impaired. These events or circumstances would generally include operating losses or a significant decline in earnings associated with the acquired business or asset. Our ability to realize the value of the goodwill and indefinite-lived intangible assets will depend on the future cash flows of these businesses. These cash flows in turn depend in part on how well we have integrated these businesses. If we are not able to realize the value of the goodwill and indefinite-lived intangible assets, we may be required to incur material charges relating to the impairment of those assets.

We are subject to laws and regulations governing government contracts, and failure to address these laws and regulations or comply with government contracts could harm our business by leading to a reduction in revenue associated with these customers. We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws governing government contracts differ from the laws governing private contracts and government contracts may contain pricing terms and conditions that are not applicable to private contracts. We are also subject to investigation for compliance with the regulations governing government contracts. A failure to comply with these regulations could result in suspension of these contracts, criminal, civil and administrative penalties or debarment.

Because we compete directly with certain of our larger customers and product suppliers, our results of operations could be adversely affected in the short term if these customers or suppliers abruptly discontinue or significantly modify their relationship with us. Our largest customer in the laboratory products business and our largest customer in the diagnostics business are also significant competitors. Our business may be harmed in the short term if our competitive relationship in the marketplace with these customers results in a discontinuation of their purchases from us. In addition, we manufacture products that compete directly with products that we source from third-party suppliers. We also source competitive products from multiple suppliers. Our business could be adversely affected in the short term if any of our large third-party suppliers abruptly discontinues selling products to us.

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

Because we rely heavily on third-party package-delivery services, a significant disruption in these services or significant increases in prices may disrupt our ability to ship products, increase our costs and lower our profitability. We ship a significant portion of our products to our customers through independent package delivery companies, such as UPS and Federal Express in the U.S. and DHL in Europe. We also maintain a small fleet of vehicles dedicated to the delivery of our products and ship our products through other carriers, including national and regional trucking firms, overnight carrier services and the U.S. Postal Service. If UPS or another third-party package-delivery provider experiences a major work stoppage, preventing our products from being delivered in a timely fashion or causing us to incur additional shipping costs we could not pass on to our customers, our costs could increase and our relationships with certain of our customers could be adversely affected. In addition, if UPS or our other third-party package-delivery providers increase prices, and we are not able to find comparable alternatives or make adjustments in our delivery network, our profitability could be adversely affected.

We are subject to regulation by various federal, state and foreign agencies that require us to comply with a wide variety of regulations, including those regarding the manufacture of products, the shipping of our products and environmental matters. Some of our operations are subject to regulation by the U.S. Food and Drug Administration and similar international agencies. These regulations govern a wide variety of product activities, from design and development to labeling, manufacturing, promotion, sales and distribution. If we fail to comply with the U.S. Food and Drug Administration's regulations or those of similar international agencies, we may have to recall products and cease their manufacture and distribution, which would increase our costs and reduce our revenues.

We are subject to federal, state, local and international laws and regulations that govern the handling, transportation, manufacture, use or sale of substances that are or could be classified as toxic or hazardous substances. Some risk of environmental damage is inherent in our operations and the products we manufacture, sell or distribute. This requires us to devote significant resources to maintain compliance with applicable environmental laws and regulations, including the establishment of reserves to address potential environmental costs, and manage environmental risks.

We rely heavily on our manufacturing operations to produce products we sell, and our business could be adversely affected by disruptions of our manufacturing operations. We rely upon our manufacturing operations to produce many of the products we sell. Any significant disruption of those operations for any reason, such as strikes or other labor unrest, power interruptions, fire, earthquakes, or other events beyond our control could adversely affect our sales and customer relationships and therefore adversely affect our business. Although most of our raw materials are available from a number of potential suppliers, our operations also depend upon our ability to obtain raw materials at reasonable prices. If we are unable to obtain the materials we need at a reasonable price, we may not be able to produce certain of our products or we may not be able to produce certain of these products at a marketable price, which could have an adverse effect on our results of operations.

Fluctuations in our effective tax rate may adversely affect our results of operations and cash flows. As a global company, we are subject to taxation in numerous countries, states and other jurisdictions. In preparing our financial statements, we record the amount of tax that is payable in each of the countries, states and other jurisdictions in which we operate. Our future effective tax rate, however, may be lower or higher than experienced in the past due to numerous factors, including a change in the mix of our profitability from country to country, changes in accounting for income taxes and recently enacted and future changes in tax laws in jurisdictions in which we operate. Any of these factors could cause us to experience an effective tax rate significantly different from previous periods or our current expectations, which could have an adverse effect on our business, results of operations and cash flows.

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

We may incur unexpected costs from increases in fuel and raw material prices, which could reduce our earnings and cash flow. Our primary commodity exposures are for fuel, petroleum-based resins, steel and serum. While we may seek to minimize the impact of price increases through higher prices to customers and various cost-saving measures, our earnings and cash flows could be adversely affected in the event these measures are insufficient to cover our costs.

Unforeseen problems with the implementation and maintenance of our information systems or system failures at certain of our sites could interfere with our operations. As a part of the effort to upgrade our current information systems, we are implementing new enterprise resource planning software and other software applications to manage certain of our business operations. As we implement and add functionality, problems could arise that we have not foreseen. Such problems could adversely impact our ability to provide quotes, take customer orders and otherwise run our business in a timely manner. In addition, if our new systems fail to provide accurate and increased visibility into pricing and cost structures, it may be difficult to improve or maximize our profit margins. As a result, our results of operations and cash flows could be adversely affected.

We also rely on our technology infrastructure, among other functions, to interact with suppliers, sell our products and services, fulfill orders and bill, collect and make payments, ship products, provide services and support to customers, track customers, fulfill contractual obligations and otherwise conduct business. Our systems may be vulnerable to damage or interruption from natural disasters, power loss, telecommunication failures, terrorist attacks, computer viruses, computer denial-of-service attacks and other events. When we upgrade or change systems, we may suffer interruptions in service, loss of data or reduced functionality. Certain of our systems are not redundant, and our disaster recovery planning is not sufficient for every eventuality. Despite any precautions we may take, such problems could result in, among other consequences, interruptions in our services, which could harm our reputation and financial results.

Our debt may restrict our investment opportunities or limit our activities. As of April 2, 2011, we had approximately \$4.30 billion in outstanding indebtedness. In addition, we had the ability to borrow an additional \$953 million under our revolving credit facility. We may also obtain additional long-term debt and lines of credit to meet future financing needs, which would have the effect of increasing our total leverage.

Our leverage could have negative consequences, including increasing our vulnerability to adverse economic and industry conditions, limiting our ability to obtain additional financing and limiting our ability to acquire new products and technologies through strategic acquisitions.

Our ability to satisfy our obligations depends on our future operating performance and on economic, financial, competitive and other factors beyond our control. Our business may not generate sufficient cash flow to meet these obligations. If we are unable to service our debt or obtain additional financing, we may be forced to delay strategic acquisitions, capital expenditures or research and development expenditures. We may not be able to obtain additional financing on terms acceptable to us or at all.

Additionally, the agreements governing our debt require that we maintain certain financial ratios, and contain affirmative and negative covenants that restrict our activities by, among other limitations, limiting our ability to incur additional indebtedness, make investments, create liens, sell assets and enter into transactions with affiliates. The covenants in our revolving credit facility include a debt-to-EBITDA ratio. Specifically, the company has agreed that, so long as any lender has any commitment under the facility, or any loan or other obligation is outstanding under the facility, or any letter of credit is outstanding under the facility, it will not permit (as the following terms are defined in the facility) the Consolidated Leverage Ratio (the ratio of consolidated Indebtedness to Consolidated EBITDA) as at the last day of any fiscal quarter to be greater than 3.0 to 1.0.

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors (continued)

Our ability to comply with these financial restrictions and covenants is dependent on our future performance, which is subject to prevailing economic conditions and other factors, including factors that are beyond our control such as foreign exchange rates and interest rates. Our failure to comply with any of these restrictions or covenants may result in an event of default under the applicable debt instrument, which could permit acceleration of the debt under that instrument and require us to prepay that debt before its scheduled due date. Also, an acceleration of the debt under one of our debt instruments would trigger an event of default under other of our debt instruments.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

A summary of the share repurchase activity for the company's first quarter of 2011 follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Dollar Amount of Shares That May Yet Be Purchased Under the Plans or Programs (1) (in millions)
Fiscal January (Jan. 1 – Feb. 5)	1,200,000	\$ 56.51	1,200,000	\$ 419.7
Fiscal February (Feb. 6 – Mar. 5)	3,303,756	56.51	3,303,756	983.0
Fiscal March (Mar. 6 – Apr. 2)	<u>5,116,872</u>	55.31	<u>5,116,872</u>	700.0
Total First Quarter	<u><u>9,620,628</u></u>	<u>\$ 55.87</u>	<u><u>9,620,628</u></u>	<u>\$ 700.0</u>

(1) On September 9, 2010, the company announced a repurchase program authorizing the purchase of up to \$750 million of the company's common stock through September 8,

2011. On February 24, 2011 the company announced a repurchase program authorizing the purchase of up to an additional \$750 million of the company's common stock

through February 22, 2012. All of the shares of common stock repurchased by the company during the first quarter of 2011 were purchased under these programs.

*Indicates management contract or compensatory plan, contract or arrangement.

**Certification is not deemed "filed" for purposes of Section 18 of the Exchange Act or otherwise subject to the liability of that section. Such certification is not deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act except to the extent that the registrant specifically incorporates it by reference.

Attached as Exhibit 101 to this report are the following formatted in XBRL (Extensible Business Reporting Language): (i) Consolidated Statements of Income for the three months ended April 2, 2011 and April 3, 2010 (ii) Consolidated Balance Sheets at April 2, 2011, and December 31, 2010, (iii) Consolidated Statements of Cash Flows for the three months ended April 2, 2011 and April 3, 2010 and (iv) Notes to Consolidated Financial Statements.

In accordance with Rule 406T of Regulation S-T, the XBRL related information in Exhibit 101 to this Quarterly Report on Form 10-Q is deemed not filed or part of a registration statement or prospectus for purposes of sections 11 or 12 of the Securities Act, is deemed not filed for purposes of section 18 of the Exchange Act, and otherwise is not subject to liability under these sections.

[Director Form as of 2/23/11]

THERMO FISHER SCIENTIFIC INC.
RESTRICTED STOCK UNIT AGREEMENT

Granted Under the 2008 Stock Incentive Plan

1. Award of Restricted Stock Units.

This agreement (the "Agreement") sets forth the terms and conditions of an award by Thermo Fisher Scientific Inc., a Delaware corporation, on _____, 2011 (the "Award Date") to _____ (the "Participant") of _____ restricted stock units of the Company (individually, an "RSU" and collectively, the "RSUs"). Each RSU represents the right to receive one share of common stock, \$1.00 par value, of the Company ("Common Stock") pursuant to the terms, conditions and restrictions set forth in this Agreement and in the Company's 2008 Stock Incentive Plan (the "Plan"). The shares of Common Stock that are issuable in connection with the RSUs are referred to in this agreement as Shares. Capitalized terms used in this Agreement and not otherwise defined shall have the same meaning as in the Plan.

2. Time-Based Vesting.

Except as otherwise provided in paragraphs (b) and (c) of Section 3, the RSUs shall vest on the earlier of (i) the first anniversary of the Award Date or (ii) the date of the annual meeting of the stockholders of the Company in the year following the Award Date (the earlier of such dates, the "Vesting Date"); provided that on such Vesting Date, the Participant is, and has been at all times since the Award Date, a director of the Company.

3. Additional Vesting Provisions.

(a) Termination of Relationship with the Company. In the event that the Participant ceases to be a director of the Company for any reason not described in paragraphs (b) or (c) below prior to the Vesting Date, RSUs shall be immediately forfeited to the Company.

(b) Death. In the event that the Participant's service with the Company is terminated by reason of death prior to the Vesting Date, the RSUs shall vest 100% upon the date of such death.

(c) Change in Control Event. In the event that the Participant's service as a director ceases within one year after a Change in Control Event that occurs prior the Vesting Date, the RSUs shall vest 100% upon the date of such cessation.

4. Delivery of Shares

(a) The Company shall deliver the Shares that become issuable pursuant to an RSU within the sixty-day period following the date the RSUs vest pursuant to Sections 2 or 3 above.

(b) The Company shall not be obligated to deliver Shares to the Participant unless the issuance and delivery of such Shares shall comply with all relevant provisions of law and other legal requirements including, without limitation, any applicable federal or state securities laws and the requirements of any stock exchange upon which shares of Common Stock may then be listed.

5. Restrictions on Transfer.

The Participant shall not sell, assign, transfer, pledge, hypothecate or otherwise dispose of, by operation of law or otherwise (collectively "transfer") any RSUs, or any interest therein, except by will or the laws of descent and distribution.

6. Provisions of the Plan.

This Agreement is subject to the provisions of the Plan, a copy of which is furnished to the Participant with this Agreement.

7. Dividends; Other Corporate Transactions.

(a) If at any time during the period between the Award Date and the date that Shares are delivered after the RSU vests, the Company pays a dividend or other distribution with respect to its Common Stock, including without limitation a distribution of shares of the Company's stock by reason of a stock dividend, stock split or otherwise, then on the date the Shares issuable upon vesting of the RSU are delivered, the Company shall pay the Participant, at the time of delivery of Shares pursuant to Section 4, the dividend or other distribution that would have been paid on such Shares if the Participant had owned such Shares during the period beginning on the Award Date and ending on the respective delivery date. No dividend or other distribution shall be paid with respect to RSUs that are forfeited.

(b) In the event of a Reorganization Event, then the rights of the Company under this Agreement and all other terms of this Agreement (including without limitation vesting provisions) shall inure to the benefit of the Company's successor and shall apply to the cash, securities or other property which the Common Stock was converted into or exchanged for pursuant to such Reorganization Event in the same manner and to the same extent as they applied to the Shares. Such cash, securities or other property shall be delivered or paid at the time provided in Section 4.

(c) Except as set forth in Section 7(a) or (b) above and in the Plan, neither the Participant nor any person claiming under or through the Participant shall be, or have any rights or privileges of, a stockholder of the Company in respect of the Shares issuable pursuant to the RSUs granted hereunder until the Shares have been delivered to the Participant.

8. Governing Law. This Agreement shall be governed by and interpreted in accordance with the laws of the State of Delaware without regard to any applicable conflicts of laws.

9. Unfunded Rights. The right of the Participant to receive Common Stock pursuant to this Agreement is an unfunded and unsecured obligation of the Company. The Participant shall have no rights under this Agreement other than those of an unsecured general creditor of the Company.

10. Compliance with Section 409A of the Code. This Agreement is intended to provide for payments that are exempt from or compliant with Section 409A. Accordingly, a Participant shall have no right to designate the taxable year of payment. Notwithstanding any other provision of this Agreement, if and to the extent any portion of any payment under this Agreement to the Participant is deferred compensation payable upon his or her separation from service and the Participant is a specified employee as defined in Section 409A(a)(2)(B)(i), as determined by the Company in accordance with its procedures, by which determination the Participant (through accepting the Award) agrees that he or she is bound, such portion of the payment, compensation or other benefit shall not be paid before the day that is six months plus one day after the date of "separation from service", except as Section 409A may then permit.

The Company makes no representations or warranty and shall have no liability to the Participant or any other person if any provisions of or payments, compensation or other benefits under this Agreement are determined to constitute nonqualified deferred compensation subject to Section 409A but do not to satisfy the conditions of that section.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above written.

CERTIFICATION REQUIRED BY EXCHANGE ACT RULES 13a-14(a) and 15d-14(a),
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Marc N. Casper, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Thermo Fisher Scientific Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
