

Carnival Corporation Continually Adds New Ships to Industry-Leading Fleet

Carnival Corporation, the world's largest leisure travel company with a portfolio of nine cruise line brands, is scheduled to have 20 new cruise ships delivered to its fleet between 2018 and 2023, including four new ships in 2018 across four of its brands. Additionally, ships throughout the fleet regularly undergo significant refurbishments and remastering to continue providing extraordinary cruise vacation experiences at an exceptional value for its guests. Overall, Carnival Corporation has a fleet of over 100 cruise ships, one of the world's largest fleets. Its ships sail to over 700 destinations, providing extraordinary vacations to over 12 million guests a year.

Carnival Corporation's four new cruise ships for 2018 include:

Carnival Cruise Line: Carnival Horizon – April 2018

As the 26th ship for Carnival Cruise Line, the largest and most popular individual cruise line in the world, Carnival Horizon will offer a number of unique innovations, including the first Dr. Seuss WaterWorks aqua park, the line's first teppanyaki dining venue and Guy's Pig & Anchor Bar-B-Que Smokehouse | Brewhouse, a new restaurant that combines BBQ offerings created by Food Network star Guy Fieri along with four specifically designed craft beers brewed at an onboard brewery. The 133,500-ton Carnival Horizon will also offer many of the popular indoor and outdoor dining, bar, entertainment and activity options that debuted in 2016 on its sister ship, Carnival Vista, such as the bike-ride-in-the-sky SkyRide attraction and an IMAX Theatre.

Seabourn: Seabourn Ovation – May 2018

Following in the footsteps of its highly successful sister ship, Seabourn Encore, launched in early 2017, Seabourn Ovation is set to debut in May 2018. Designed by design icon Adam D. Tihany, the ship will feature contemporary interiors, modern design elements and innovations consistent with Seabourn's reputation for understated elegance and impeccable service. Seabourn Ovation will round out the current planned expansion of the line's award-winning and highly acclaimed fleet.

The fifth all-suite ship in Seabourn's fleet, Seabourn Ovation will carry just 600 guests, based on double occupancy. The ship offers a number of in-suite amenities to provide guests with a "home away from home" onboard experience, including a private veranda in each suite. Guests will also find a number of innovative offerings and programs, including "An Evening with Tim Rice," the new theater-style experience created exclusively for the line in association with Belinda King Creative Productions, and through the brand's partnership with Sir Tim Rice, the acclaimed English musical theatre lyricist of Broadway, West End and film.

AIDA Cruises: AIDAnova – Expected launch date in December 2018

Arriving in late 2018, AIDAnova will combine onboard innovations with evolutions of successful product features offered on the existing fleet to further enhance the guest experience. More than 40 restaurants and bars on board provide guests with an opportunity to enjoy a new level of world-class dining

experiences and culinary trends. Versatile entertainment offerings include the onboard brewery featuring the first-ever beer garden, the beach club and Four Elements, complete with three water slides, in addition to a new escape room for puzzle lovers and the 360-degree Theatrium and Studio X, a TV studio at sea. Guests also have the choice of more than 20 different cabin types – from penthouse suites to generously sized family staterooms or single staterooms with a balcony.

AIDAnova will be the world's first cruise ship fully powered by liquefied natural gas (LNG), the world's cleanest burning fossil fuel, with nearly zero emissions. This ship will be the first in the cruise industry to use LNG to generate 100 percent of its power both in port and on the open sea – an innovation that will reduce exhaust emissions to help protect the environment and support Carnival Corporation's aggressive sustainability goals.

Holland America Line: ms Nieuw Statendam – Expected launch date in December 2018

Nieuw Statendam is the second Pinnacle Class ship for Holland America Line, joining ms Koningsdam, which launched in April 2016. The 99,500-ton ship is the ultimate expression of the brand's evolution, with grand light-filled spaces, visual drama and sumptuous interiors inspired by the fluid curves of musical instruments and created by leading hospitality designer Adam D. Tihany and designer and architect Bjorn Storbraaten.

The ship will carry 2,666 guests and feature fine-dining options at alternative restaurants Sel de Mer, a French seafood brasserie, and Tamarind, an Asian fusion concept, in addition to the Grand Dutch Café with traditional Dutch treats and European beer. Onboard entertainment will include the popular Music Walk area featuring all genres of music showcased in venues including Lincoln Center Stage, Billboard Onboard and the dynamic B.B. King's Blues Club. With the 270-degree LED projection at World Stage, show-time performances will immerse the audience in panoramic visual and sound effects. The ship will also launch with the newly created Exploration Central's hub located in the Crow's Nest, now a comprehensive resource and engagement center with interactive screens and a Virtual Bridge.
