

ABOUT ADT CANOPY

We believe everyone deserves to feel safe, no matter where they are. ADT Canopy extends best-in-class ADT professional monitoring to the DIY and IoT markets, through partnerships with popular wearable and life safety connected technology partners. With availability on new smart devices, no long-term contract and monthly costs starting under \$10 per month for panic services, customers can receive a potentially life-saving service designed to meet their needs.

About the Canopy Service

ADT Canopy offers two service structures that will vary between devices.

Panic

The panic service is a 'user-initiated' call for help which will, at the touch of a button, connect you to an ADT Security professional. Our security professional will be able to track your location and call emergency services, virtually escort you to a safe location or send help if you are unable to confirm your safety whether you are at home or on the go.

Intrusion

The intrusion service will be a 'device-initiated' emergency contact service designed to monitor the perimeter of your home through door and window sensors.

Samsung Gear S3 Smartwatch

LG Smart Security Hub

Pricing: varies by service and application. For 2017, pricing for the Panic feature enabled on Samsung Gear S3 smartwatches will be \$10/month. Pricing on the LG Smart Security will be \$19.99/month for intrusion detection and Secure Video Storage is also available for \$9.99/7 days or \$29.99/30 days.
