

The Nest Learning Thermostat™ Integrated with ADT Pulse®

About the Product:

The 3rd generation Nest Learning Thermostat™ is an industry leading smart thermostat that remembers what temperatures customers like, creates a custom schedule for the home, and turns itself down when everyone is away, saving energy and creating a more comfortable home atmosphere.

- Offers the flexibility to monitor home conditions remotely within the ADT Pulse mobile app
- Enables mobile access and control the Nest Thermostat from anywhere using the Nest app.
- Auto-away and Auto-Away features for convenience

Works with ADT Pulse®

ADT Pulse® with Nest integration is designed for users who are looking for industry leading smart home technology with all the benefits of ADT's professional security and support network.

- Home owners and long term residents can benefit from ADT's professional installation and professional support for any issues that arise
- Open Pulse API interface allows for further integration of leading smart home technology, adding to the pulse ecosystem
- Smart security and automation services are consolidated into one easy to use mobile platform offering 24/7 support whenever and wherever you need it
- Use Case: ADT Pulse with Nest integration will allow you to control the climate of your home remotely within your Pulse app such as turning on the heat or lowering the A/C.

Terms of Availability:

- ADT Pulse® with The Nest Learning Thermostat™ is nationally available for purchase and integration
- Pricing: Thermostat - \$249
