

Ring™ Video Doorbell, Integrated with ADT Pulse®

About the Product:

Ring™ Video Doorbell is a smart doorbell designed to offer convenience, security and monitoring for your home all streamlined on its companion Ring™ app for easy utilization.

- Allows you to lock your door and arm your system remotely through the Ring app.
- Connects to your Wi-Fi network to share updates and information
- Offers motion sensors to alert you of activity at your home, with movement triggering an alert via the Ring™ app and activating the night vision HD camera
- Provides instant alerts to the free Ring™ app (iOS® and Android™) and Pulse® Platform
- 2-way communication and recorded footage anytime with Cloud Recording

Works with ADT Pulse®

The Ring™ Video Doorbell powered by ADT Pulse® offers consumers a complete security and automation experience blending the latest smart home tech with ADT's leading network of security support.

- Home owners and long term residents can benefit from ADT's professional installation and professional support for any issues that arise
- Open Pulse API interface allows for further integration of leading smart home technology, adding to the pulse ecosystem
- Smart security and automation services are consolidated into one easy to use mobile platform offering 24/7 support whenever and wherever you need it
- Use Case: With Ring Video Doorbell integration, ADT Pulse customers can now receive real-time video updates on who is at their door, lock their door or arm their system all while notifying ADT all within the Ring app.
