Ring™ Video Doorbell- Fact Sheet: CES 2016

Ring™ Video Doorbell, Secured by ADT Canopy

About the Product:

Ring™ Video Doorbell is a smart doorbell designed to offer convenience, security and monitoring for your home while feeding directly to your mobile device.

- Connects to your Wi-Fi network using the Ring™ app
- Easy self-install using the tools included in the package
- Offers motion sensors to alert you of activity at your home, with movement triggering an alert via the Ring™ app and activating the night vision HD camera
- Provides instant alerts through the free Ring™ app (iOS® and Android™)
- 2-way communication and recorded footage anytime with Cloud Recording

Secured by ADT Canopy

The Ring™ Video Doorbell secured by ADT Canopy offers the protection of the ADT professional security network at the touch of a button within the Ring app.

- Availability without a contract commitment lowers the bar of entry to first time smart home and mobile users
- Option for month-to-month monitoring terms allow for greater flexibility in service provision
- Blended brand efforts gives the audience the ability to trial smart security hardware and service from leading tech and security companies in one, inclusive device
- Use Case: If you feel unsafe when checking the Ring app and seeing who is at your door, you can now alert ADT Canopy's professional security network through an in-app panic button.

Terms of Availability:

- To be Announced
