Roost Smart Battery- Fact Sheet: CES 2016

Roost Smart Battery - Secured by ADT Canopy

About the Product:

Roost 9V batteries are a smart solution to help track and simplify low battery alerts in smoke alarms and notifications when you are away.

- Notifies you before your batteries reach a dangerous low
- Allows you to 'snooze' false alarms (in battery-powered alarms) at the touch of a button
- Shares alerts with friends and family.

Secured by ADT Canopy

Roost Smart Battery secured by ADT offers a cost effective, flexible solution to the modern consumer by allowing better home monitoring and in-app ability to contact emergency services.

- Availability without a contract commitment lowers the bar of entry to first time smart home and mobile users
- Option for month-to-month monitoring terms allow for greater flexibility in service provision
- Blended brand efforts gives the audience the ability to trial smart security hardware and service from leading tech and security companies in one, inclusive device
- Use Case: When secured by ADT Canopy, the Roost Smart batteries will alert ADT's professional security network of in case of a fire as part of the Life Safety service.

Terms of Availability:

- To be Announced
