

Samsung SmartThings, Secured by ADT Canopy

About the Product:

Samsung SmartThings lets you easily monitor, control, and secure your home from anywhere through a cloud connected platform which sends important notifications about what's happening at home, controls your smart devices with a simple tap, and automates your home to react to your unique preferences.

- Easy DIY installation and app download to facilitate getting started
- Compatible with ZigBee, Z-Wave, and IP-connected devices.

Designed with a Broad Audience in Mind:

Samsung SmartThings secured by ADT is a cloud connected platform for renters, mobile first users, and those looking for a more flexible security and automation solution for their home. Key features for this audience:

- Availability without a contract commitment lowers the bar of entry to first time smart home and mobile users
- Option for month-to-month monitoring terms allow for greater flexibility in service provision
- Blended brand efforts gives the audience the ability to trial smart security hardware and service from leading tech and security companies in one, inclusive device
- Use Case: When Samsung SmartThings is secured by ADT Canopy, you are able to connect and protect your home and will have access to ADT Canopy's professional security network within the SmartThings app.

Terms of Availability:

- To be Announced
