Wink HUB, now owned by Flex - Fact Sheet: CES 2016

Wink HUB, Secured by ADT Canopy

About the Product:

An all-in-one hub that allows a diverse line of smart home technologies to be connected in one integrated platform.

- Offers users the flexibility to monitor home conditions remotely and add ADT's monitoring as a service (MaaS) capabilities through ADT Canopy
- Supports products that use Z-wave, Zigbee, Wi-Fi, Bluetooth, & Lutron ClearConnect making it easy to control your smart products from the Wink app.
- Easy self-install and app download

Secured by ADT Canopy

Wink offers a connected hub for renters, homeowners, mobile first users and, and those looking for a more flexible security and automation solution for their home. Key features for this audience:

- Availability without a contract commitment lowers the bar of entry to first time smart home and mobile users
- Option for month-to-month monitoring terms allow for greater flexibility in service provision
- Blended brand efforts gives the audience the ability to trial smart security hardware and service from leading tech and security companies in one, inclusive device
- Use Case: When Wink HUB is secured by ADT Canopy, you are able to connect and protect your home and will have access to ADT Canopy's professional security network within the Wink app.

Terms of Availability:

- To be Announced
