Q3'15 Earnings Call

Elisa Steele, Chief Executive Officer
Bryan LeBlanc, EVP, Chief Financial Officer

November 9, 2015

Safe Harbor Statement

“Safe Harbor” statement under Private Securities Litigation Reform Act of 1995: This press release contains forward-looking statements, including statements concerning our financial guidance for the fourth fiscal quarter of 2015 and the full year of 2015, expectations regarding our strategy of driving improved financial and operational performance, the effectiveness and intended benefits of our product releases, and our belief that we are well positioned to build upon our momentum over time. The achievement of success in the matters covered by such forward-looking statements involves substantial risks, uncertainties and assumptions. If any such risks or uncertainties materialize or if any of the assumptions prove incorrect, our results or events could differ materially from the results expressed or implied by the forward-looking statements we make.

The risk and uncertainties referred to above include, but are not limited to, risks associated with our limited operating history; expectations regarding the widespread adoption of social business platforms by enterprises; uncertainty regarding the market for social business platforms; changes in the competitive dynamics of our market; our ability to increase and predict new subscription; subscription renewal or upsell rates and the impact these rates may have on our future revenues; our ability to increase the pace at which we are able to add new customers, our reliance on our own controls and third-party service providers to host some of our products; the risk that our security measures could be breached and unauthorized access to customer data could be obtained; potential third party intellectual property infringement claims; and the price volatility of our common stock.

More information about potential factors that could affect our business and financial results is contained in our quarterly reports on Form 10-Q, annual reports on Form 10-K and other filings that we make with the Securities and Exchange Commission. We do not intend and undertake no duty to release publicly any updates or revisions to any forward-looking statements contained herein.

Non-GAAP Financial Measures

The Company uses certain non-GAAP financial measures in this release. Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles.

Non-GAAP gross profit, loss from operations, net loss and net loss per share exclude stock-based compensation expenses and amortization of acquisition related intangible assets. Non-GAAP net loss and net loss per share exclude a non-recurring gain. Total billings is defined by the Company as revenue plus the change in total deferred revenue. Short-term billings is defined by the Company as revenue plus the change in short-term deferred revenue. Management presents these non-GAAP financial measures because it considers them to be important supplemental measures of performance. Management uses the non-GAAP financial measures for planning purposes, including analysis of the Company's performance against prior periods, the preparation of operating budgets and to determine appropriate levels of operating and capital investments. Management also believes that the non-GAAP financial measures provide additional insight for analysts and investors in evaluating the Company's financial and operational performance. However, these non-GAAP financial measures have limitations as an analytical tool and are not intended to be an alternative to financial measures prepared in accordance with GAAP. We intend to provide these non-GAAP financial measures as part of our future earnings discussions and, therefore, the inclusion of these non-GAAP financial measures will provide consistency in our financial reporting. A reconciliation of these non-GAAP measures to GAAP is provided in the accompanying tables.

We define the number of our platform customers at the end of any given measurement period by counting each customer under an active contract for our Jive Platform, which includes Jive Cloud, that carries a balance in our deferred revenue account at the end of that period. While a single customer may have multiple internal and external communities to support distinct departments, operating segments or geographies, we only include that customer once for purposes of this metric. We believe the number of Jive Platform customers is a leading indicator of our future revenues, billings and upsell opportunities.

Jive is the leading provider of modern communication and collaboration solutions for business.
