15% p.a. of returns in excess of high water mark and LIBOR+5% hurdle; subject to LIBOR+8% trigger

## Overview

The investment objective of Blue Capital Global Reinsurance Fund Limited (the "Fund") is to generate attractive returns from a sustainable dividend yield and longer term capital growth by investing substantially all of its assets in a segregated account of Blue Water Master Fund Ltd. This segregated account invests in a diversified portfolio of collateralised reinsurance-linked contracts and other investments whose value is based on insured **catastrophe event risks, which are largely uncorrelated to traditional asset classes**. Blue Capital Management Ltd. ("Blue Capital"), the Fund's investment manager, is wholly owned by Endurance Specialty Holdings Ltd. (NYSE, Ticker "ENH"), a recognised leader in property catastrophe reinsurance.

## NAV Total Return

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Full Year
2013	0.3%	0.4%	0.5%	0.7%	0.1%	0.8%	1.0%	2.4%	3.2%	1.9%	0.1%	0.0%	11.8%

		Cash	4%		

## Catastrophe Group Return Comparisons<sup>1</sup>

Note 1. Aon Benfield Cat Bond Total Return, a monthly index that tracks the total rate of return for all outstanding catastrophe bonds. The index is calculated using the Aon Benfield Securities month end indicative price sheet. It is reported here on a one month lag due to the timing of when data is supplied to Bloomberg. Eurekahedge ILS Advisers Index, is a collaborative index between ILS Advisers and Eurekahedge of an equally weighted index of 34 constituent funds. The index is designed to provide a broad measure of the performance of underlying hedge fund managers who explicitly allocate to insurance linked investments and have at least 70% of their portfolio invested in non-life risk. Sources: Eurekahedge and Bloomberg

# Blue Capital Global Reinsurance Fund Limited

March 2016 Fact Sheet

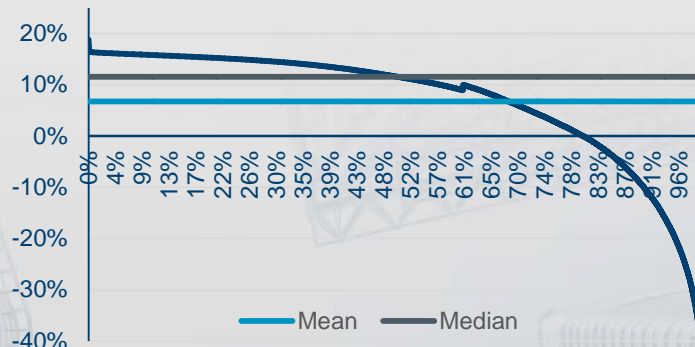

## 2016 "Median Loss" NAV Projections <sup>2</sup>

<sup>2</sup> The hypothetical projected net asset value growth and monthly return projections do not comprise a profit forecast and have been provided for illustrative and comparative purposes only and to demonstrate the impact of the accounting treatment of earning premiums. The projections are derived by reference to the collateral held and to the premiums payable under contracts written to date and take into account the modelled median cat loss. As such, the projections set out above should not in any way be construed as forecasting the Fund's actual net asset value growth or returns should the losses not occur. Absent loss events, NAV growth will vary from month to month depending on the underlying risk exposures and the associated premium earnings. For some risks (e.g. Earthquake), premiums are earned on a straight line basis throughout the contract term. For other risks (e.g. U.S. and European Windstorm), the level of risk – and therefore the rate at which premium is earned – varies throughout the year. Blue Capital anticipates that the majority of the Fund's capital will ultimately be exposed to U.S. wind events. Such premium is generally earned between July and November, with September representing the peak earnings month. Any losses will be recognized in the month in which they are incurred. The Projected NAV assumes future median modelled Cat losses.

## Aggregate Net Return on NAV <sup>3</sup>

Modelled Return Probability	
Mean or Greater	67.6%
Breakeven or Greater	79.2%
Loss Greater than > (5%)	14.0%
Loss Greater than > (10%)	9.6%
Loss Greater than > (15%)	6.6%
Loss Greater than > (25%)	3.1%
Loss Greater than > (35%)	1.2%

<sup>3</sup> The in force portfolio return summary is provided for illustrative purposes only. The projections are derived by reference to the Fund's portfolio as at 31 January 2016 using AIR Worldwide ("AIR") Version 17.0 results extracted from CATM, Endurance's proprietary technology, and do not take into account actual costs, expenses or other factors which are not attributable to the portfolio. As such, the in force portfolio return summary should not in any way be construed as forecasting the Company's actual returns should no losses occur or otherwise. <sup>2</sup> Net aggregate return distribution between a mean and median catastrophe year using AIR Version 17.0 results from CATM.

## Recent Events

A series of earthquakes and aftershocks beginning on 14 April 2016 have been reported in wide parts of the Kumamoto and Oita prefectures of Japan, including a U.S. Geological Survey estimated magnitude of M7.0 earthquake which occurred on 16 April 2016. Also, between 10 - 12 April 2016, the United States experienced severe hailstorms particularly in Texas.

Blue Capital has commenced its normal post-event procedures to estimate any loss to the Fund. Blue Capital's loss estimates are largely derived from the utilization of proprietary catastrophe modeling, standard industry models, an in-depth review of in-force contracts or initial indications from clients and brokers. At this time, Blue Capital does not believe these events will have a material impact on the Fund. The actual losses from these events may ultimately differ materially from the initial estimated losses due to the nature of the risks assumed, the complexity of the assessment of damages and the limited number of reported claims received to date.
