15% p.a. of returns in excess of high water mark and LIBOR+5% hurdle; subject to LIBOR+8% trigger

Overview

The investment objective of Blue Capital Global Reinsurance Fund Limited (the "Fund") is to generate attractive returns from a sustainable dividend yield and longer term capital growth by investing substantially all of its assets in a segregated account of Blue Water Master Fund Ltd. This segregated account invests in a diversified portfolio of collateralised reinsurance-linked contracts and other investments whose value is based on insured **catastrophe event risks, which are largely uncorrelated to traditional asset classes**. Blue Capital Management Ltd. ("Blue Capital"), the Fund's investment manager, is wholly owned by Endurance Specialty Holdings Ltd. (NYSE, Ticker "ENH"), a recognised leader in property catastrophe reinsurance.

NAV Total Return

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Full Year
2013	0.3%	0.4%	0.5%	0.7%	0.1%	0.8%	1.0%	2.4%	3.2%	1.9%	0.1%	0.0%	11.8%

News and Events

Hurricane Matthew formed and traveled across the Caribbean and alongside the United States from September 29th through October 9th. While in the Caribbean, Matthew became a rare category five hurricane on the Saffir-Simpson scale, with maximum sustained winds of 160 mph. The hurricane struck Haiti as a category four hurricane before crossing eastern Cuba, and turning to the northwest through the Bahamas towards Florida. After approaching the Florida Atlantic coast, Matthew followed a track closely offshore of the Florida and Georgia coastlines weakening from a category three to category two hurricane, before making landfall in South Carolina and weakening further to a category one hurricane.

Blue Capital has commenced its normal post-event procedures to estimate any loss to the Fund. Blue Capital's loss estimates are largely derived from the utilization of proprietary catastrophe modeling, standard industry models, an in-depth review of in-force contracts or initial indications from clients and brokers. The actual losses from Hurricane Matthew may ultimately differ materially from the initial estimated losses due to the nature of the risks assumed, the complexity of the assessment of damages and the limited number of reported claims received to date.

Blue Capital Global Reinsurance Fund Limited

2016 "Median Loss" NAV Projections ²

² The hypothetical projected net asset value ("NAV") growth and monthly return projections do not comprise a profit forecast and have been provided for illustrative and comparative purposes only and to demonstrate the impact of the accounting treatment of earning premiums. The projections are derived by reference to the collateral held and to the premiums payable under contracts written to date and take into account the modelled median catastrophe loss. As such, the projections set out above should not in any way be construed as forecasting the Fund's actual NAV growth or returns should the losses not occur. Absent loss events, NAV growth will vary from month to month depending on the underlying risk exposures and the associated premium earnings. For some risks (e.g. Earthquake), premiums are earned on a straight line basis throughout the contract term. For other risks (e.g. U.S. and European Windstorm), the level of risk – and therefore the rate at which premium is earned – varies throughout the year. Blue Capital anticipates that the majority of the Fund's capital will ultimately be exposed to U.S. wind events. Such premium is generally earned between July and November, with September representing the peak earnings month. Any losses will be recognized in the month in which they are incurred. The projected NAV assumes future median modelled catastrophe losses. **The projected NAV does not take into account the potential impact of Hurricane Matthew.**

Aggregate Net Return on NAV ³

Modelled Return Probability	
Mean or Greater	72%
Breakeven or Greater	82%
Loss Greater than > (5%)	12%
Loss Greater than > (10%)	9%
Loss Greater than > (15%)	6%
Loss Greater than > (25%)	2%
Loss Greater than > (35%)	1%

³ The in force portfolio return summary is provided for illustrative purposes only. The projections are derived by reference to the Fund's portfolio as at 1 July 2016 using AIR: Touchstone version 3.0 and Catrader version 17.0 results extracted from CATM, Endurance's proprietary technology, and do not take into account actual costs, expenses or other factors which are not attributable to the portfolio. As such, the in force portfolio return summary should not in any way be construed as forecasting the Company's actual returns should no losses occur or otherwise. **The projections do not take into account the potential impact of Hurricane Matthew.**
