Financial Performance

- ❖ Overall performance tempered by loan loss provisions and high cost of funds, for which rising asset yields were unable to fully compensate.
- ❖ Non-interest income rose by 161% QoQ, driven by transaction income, trading income and recoveries of previously written off assets;
- ❖ OPEX reduced 1.2% QoQ, as the bank continues to benefit from ongoing automation investments and cost optimisation activities;
- ❖ Non-bank subsidiaries' overall performance declined due to a quiet quarter in capital markets.

Portfolio Strategy

1. Strengthen the core commercial and retail banking business, by:
 - i. strengthening the balance sheet;
 - ii. prudent loan loss provisioning;
 - iii. reducing cost of funds;
 - iv. continued cost optimisation and digitisation;
 - v. driving non interest income primarily through electronic banking
2. Optimise the potential of the bank's growing customer base by leveraging it with our IT infrastructure and distribution channels to:
 - i. invest in growing asset management activities (FCAM - division of CSL Stockbrokers, CSL Trustees and Legacy PFA);
 - ii. pursue financial inclusion and micro enterprise opportunities in a more focused manner through FCMB Microfinance.
3. Maintain presence in advisory and primary capital markets activities, pending renewed investor interest.

FCMB

Bank and Holdco earnings improved QoQ, while non-bank operating companies' performance declined due to continued capital markets lull. Microfinance bank commenced operations, will run marginal losses for two quarters and expected to be profitable for full year.

Investment Banking Group: *Business Review –*
Mr. Tolu Osinibi (ED, FCMB Capital Markets Ltd)

Earnings declined QoQ and YoY due to significant revenue shortfalls in debt capital and non-debt financial services, driven by low opportunities from capital market operations, however, cost control efficiencies improved QoQ.

Looking Ahead –

Mr. Ladi Balogun (Group Chief Executive, FCMB Group Plc)

- ❖ Commercial and Retail Banking activities will remain key determinant of group performance;
- ❖ Loan book will remain flat, due to high risk and high interest rate environment;
- ❖ Anticipated Current and Savings account growth from c. 60,000 monthly customer acquisitions will be deployed towards improving the deposit mix;
- ❖ Net Interest Margins will continue to be constrained by high interest rates;

- Inclusive of regulatory risk reserve
- Drop in 4Q16 earlier advised from 18.5% to 16.9% due to additional transfer to Regulatory Risk Reserve from Retained Earnings at year end

Earnings declined QoQ due to shortfalls in NRFF and sharp increase in loans impairment charges but cushioned by rise in non interest income driven mainly by recovery from previously written-off debt sold to AMCON and cost savings.
