Non-GAAP Reconciliations

This information should not be considered in isolation or as a substitute for related GAAP measures. Additionally, these measures as calculated by the Company may not be comparable to similarly titled measures used by other companies.

■ Adjusted EPS or Earnings from continuing operations excluding special items

- We use Earnings from continuing operations excluding special items (Adjusted EPS) as an underlying operational performance measure of the continuing operations of the business and to have a basis to compare underlying operating results to prior and future periods. We make adjustments to net income (a GAAP measure) to remove non-recurring charges and credits. We believe these adjustments are relevant in evaluating the overall performance of the business.

■ Adjusted cash flow from operations or Net cash provided by operating activities excluding special items

- We use Adjusted cash flow from operations, or Net cash provided by operating activities excluding special items, as an underlying operational performance measure of the continuing operations of the business and to have a basis to compare underlying cash flow results to prior and future periods. We make adjustments to cash flow from operations (a GAAP measure) to remove non-recurring receipts and payments. We believe these adjustments are relevant in evaluating the overall performance of the business.

■ Free cash flow

- We define Free cash flow as Adjusted cash flow from operations minus expenditures for capital improvements at existing locations and expenditures for the development of cemetery property, collectively referred to as Recurring Capex.
- We use free cash flow to assess the financial performance of the Company. We believe that Free cash flow is useful to investors because it relates the operating cash flow of the Company to the capital that is spent to continue and improve business operations, such as investment in the Company's existing businesses. Further, free cash flow facilitates our ability to strengthen the Company's balance sheet, to repay our debt obligations, pay cash dividends, and to repurchase our common shares. We also believe the presentation of this measure will enhance the investors' ability to analyze trends in the business and evaluate our underlying performance relative to other companies in the industry.

(A) Reconciliations to GAAP net cash provided by operating activities are not provided for these forward-looking estimates because GAAP net cash provided by operating activities for the fiscal year ending December 31, 2017 is not accessible and reconciling information is not available without unreasonable effort. We are unable to predict changes in assets and liabilities; future acquisition and transition costs, system and process transitions costs; potential tax adjustments to reserves, payments, credits or refunds; potential legal defense costs or settlements of litigation or the recognition of receivables for insurance recoveries associated with litigation, and these amounts could be material such that the amount of net cash provided by operating activities would vary substantially from the amount of projected net cash provided by operating activities excluding special items.

(B) Reconciliations to GAAP Net income per share are not provided for these forward-looking estimates because GAAP Net income per share for the fiscal year ending December 31, 2017 is not accessible and reconciling information is not available without unreasonable effort. We are not able to predict future system and process transitions costs; acquisition and transition costs, gains/losses and impairment charges associated with asset dispositions; gains/losses associated with the early extinguishment of debt or foreign currency transactions; potential tax adjustments to reserves, payments, credits or refunds; potential costs associated with settlements of litigation or the recognition of receivables for insurance recoveries associated with litigation, and these amounts could be material, such that the amount of Net income per share would vary substantially from the amount of projected Normalized earnings per share.

Our outlook for 2017 reflects management's current views and estimates regarding future economic and financial market conditions, company performance and financial results, business prospects, the competitive environment and other events. These views and estimates that support the outlook provided are subject to a number of risks and uncertainties, many of which are beyond the control of SCI, that could cause actual results to differ materially from the potential results.
