Financial Performance

- ❖ Improvement in interest income and fees & commission dampened by high interest cost regime, high non-earning assets in CRR, drop in FX income as well as lower than expected recoveries.
- ❖ Increase in CRR despite reduction in deposits continues to reduce liquidity as well as earnings capacity
- ❖ On a positive note, continued automation investments and cost optimisation by the bank led to a 5% QoQ reduction in opex
- ❖ Improvement in investment banking (particularly brokerage) and asset management businesses as capital market activities picked up slightly during the quarter

Portfolio Strategy

1. Strengthen the core commercial and retail banking business, by:
 - i. strengthening the balance sheet;
 - ii. prudent loan loss provisioning;
 - iii. reducing cost of funds;
 - iv. continued cost optimisation and digitisation;
 - v. driving non interest income primarily through electronic banking
2. Optimise the potential of the bank's growing customer base by leveraging it with our IT infrastructure and distribution channels to:
 - i. invest in growing asset management activities (FCAM - division of CSL Stockbrokers, CSL Trustees and Legacy PFA);
 - ii. pursue financial inclusion and micro enterprise opportunities in a more focused manner through FCMB Microfinance.
3. Maintain presence in advisory and primary capital markets activities, pending renewed investor interest.

Looking Ahead –

Mr. Ladi Balogun (Group Chief Executive, FCMB Group Plc)

- ❖ Commercial and Retail Banking activities will remain key determinant of group performance;
- ❖ Loan book will reduce, due to high risk and high interest rate environment ;
- ❖ Resumption of growth in deposits expected in H2;
- ❖ Net Interest Margin will remain stable at current levels;
- ❖ Non interest income should continue to rise as a result of growth in customer base, digital migration and pick up of economic activities;
