# Company Overview

---

- Founded in 1995
- Headquarters: West Des Moines, IA
- 530 Employees<sup>(a)</sup>
- Market cap of \$2.4 billion<sup>(b)</sup>, public since 2003
- Principal product: fixed index annuity
- Sell primarily through independent agents
- Policyholder funds under management: \$47 billion
- AEL has been a top 3 fixed index annuity producer by annual sales for 16 out of the last 17 years

(a) As of December 31, 2016

(b) As of August 1, 2017

# Investment Thesis

## Simple Business; Easy to Understand

- Vast majority of business is fixed indexed annuities that offer upside participation with downside protection
- Majority of income derived from investment spread (the difference between what our investments yield and what we credit to policyholders)

## Strong Operating Performance

- Track record of consistent growth with 6% and 15% compounded annual growth rate in operating income and assets under management, respectively, over the past 10 years
- Strong operating performance with 11.5% average operating return on equity over the past 5 years

# Investment Thesis

## Strong Distribution Relationships

- Has been a top 3 fixed index annuity producer by annual sales for 16 out of the last 17 years
- Strong relationships with approximately 35 national marketing organizations (NMOs) and nearly 25,000 independent agents
- Recruiting and marketing focus on agents selling over \$1 million of premiums in a calendar year

## Conservative Investment Portfolio

- Highly rated and liquid investment portfolio diversified across multiple industries
- Predominantly fixed maturity portfolio (89% of cash and investments) with high credit quality (97% investment grade)
- Low impairment experience and strong investment culture

# Investment Thesis

## Disciplined Risk Management

- Tight controls on product designs
- Extensive use of options to manage exposure to index appreciation with highly effective outcomes
- Diverse group of highly rated options counterparties with strict concentration limits
- Surrender charges protect approximately 94% of annuity portfolio account value

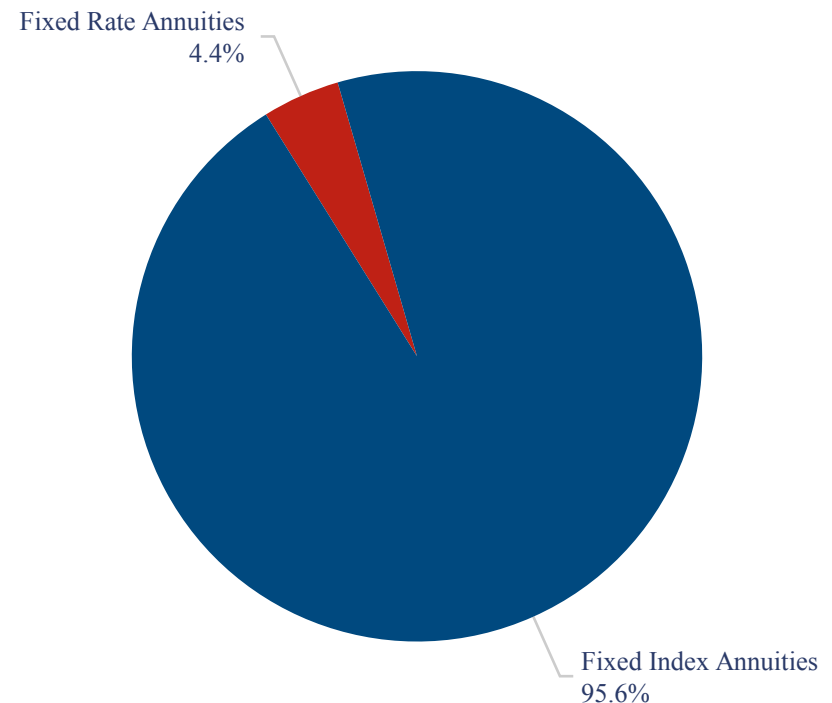

## Future Growth Opportunities

- Favorable demographics – growing customer base as aging population looking for lifetime income
- New distribution channels outside of independent agents (Eagle Life targeting broker/dealers)

# Single Product Focus

- Fixed Indexed Annuities
  - Deposits build tax-deferred
  - “Interest” based on performance of equity index or traditional fixed rate
  - Index crediting funded by call options
  - Offers more upside potential than simple fixed annuities
  - Index resets annually
    - Don’t have to “make back” market losses
  - Minimum guaranteed return with no losses, unlike variable annuities
  - Policy value and minimum crediting rates backed by fixed income portfolio

Account Value  
June 30, 2017

**Total: \$46.9 billion**

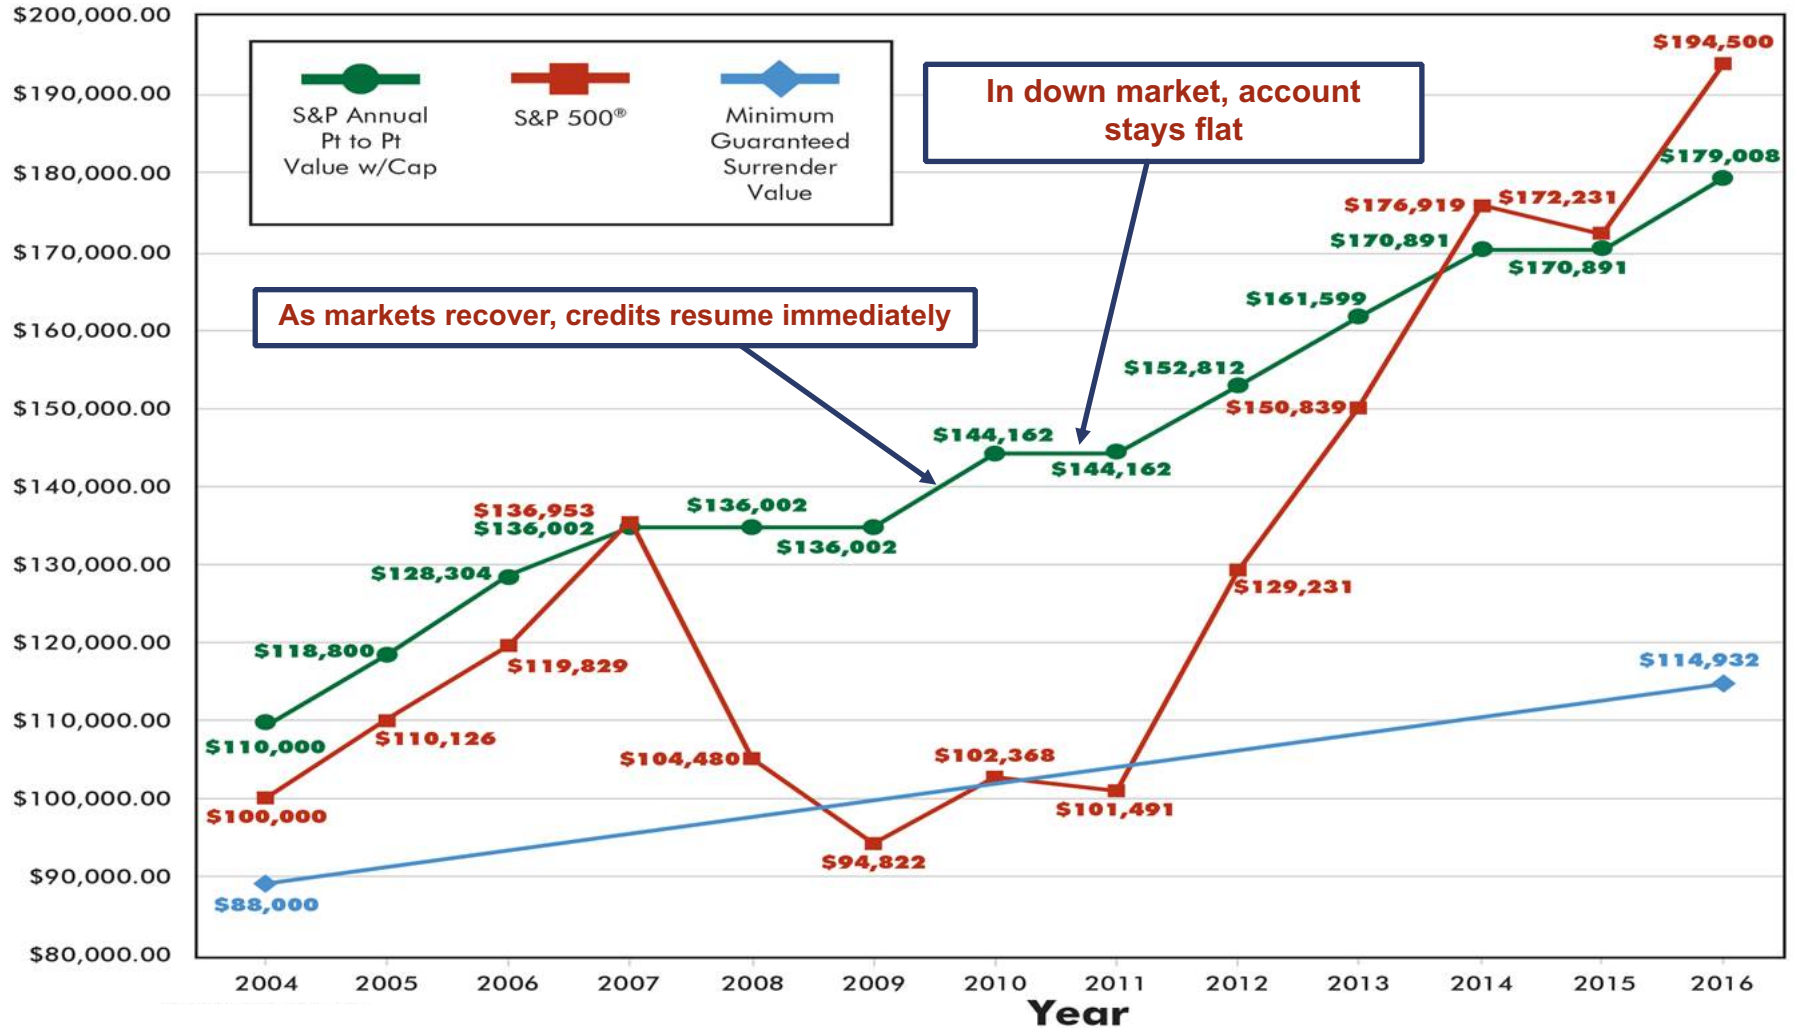

# Compelling Benefits vs. Competing Categories

---

- Product offers principal guarantee and upside potential from equity markets
- AEL pays commission, not policyholder
- No additional fees
- Premium bonus of 3% – 10%
- No market risk
- Guaranteed minimum exit value
- Opportunity for lifetime income

# Principal Protected Growth

\*Based on actual credited rates for the period shown on the Bonus Gold (Index-1-05) product issued on 09/30/2004.

# Market Growth

---

- Aging population needs retirement savings & income
  - Longevity risk favors lifetime guarantee
  - 2008-2009 bear market left permanent scars
- Indexed annuity characteristics attracting attention
  - Low volatility of returns
  - Principal guarantee
  - Upside potential versus straight fixed income
  - Tax deferred accumulation
  - Guaranteed lifetime income

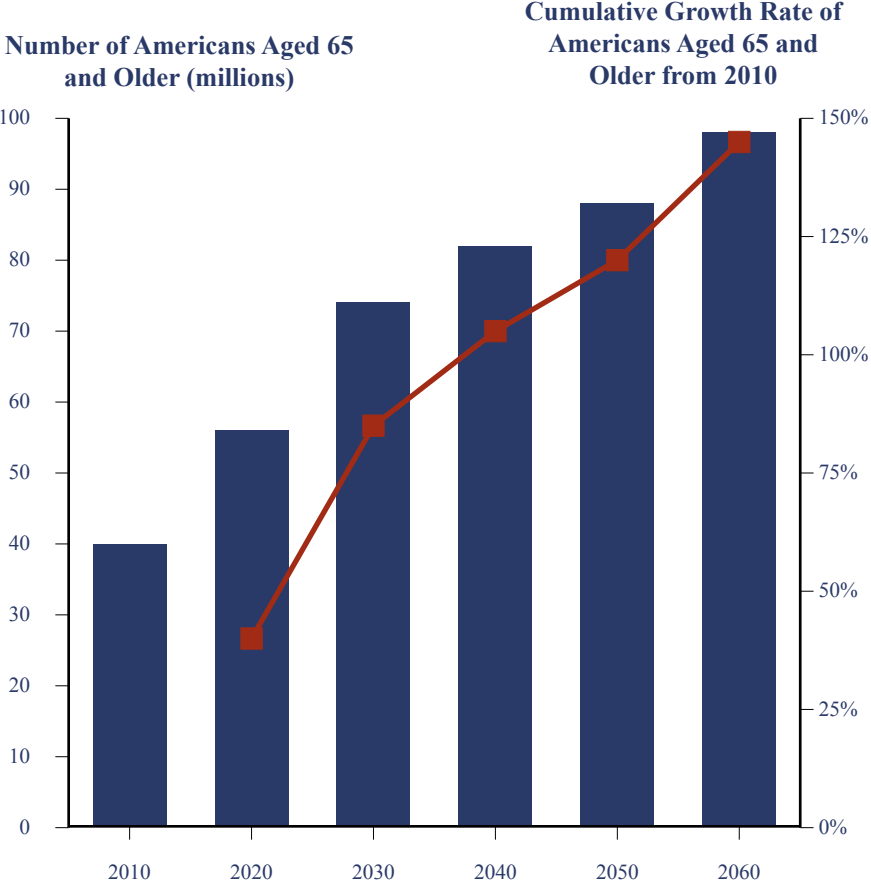

# Growing Market Demographic

- Our typical policyholder <sup>(a)</sup>
  - 63 years old
  - Average fund value of \$85,548

Percentage of Fund Value by Policyholder's Age

- Projected Growth in our Target Market <sup>(b)</sup>

# DOL Fiduciary Rule Requirements & Strategy

- On April 4, 2017, the DOL released a rule delaying the April 10, 2017 applicability date of the Fiduciary Rule to June 9, 2017 and further delaying certain requirements until January 1, 2018
  - As of June 9, 2017, independent agents selling fixed annuities to qualified accounts are fiduciaries
  - Until January 1, 2018, independent agents may rely on Prohibited Transaction Exemption ("PTE") 84-24
    - Compliance with Impartial Conduct Standards
    - Disclosure of compensation and product fees and charges
    - Attestation of compliance to insurance carrier
- On June 6, 2017, the DOL issued a request for information on whether the January 1, 2018 effective date should be delayed and whether modifications to the rule or additional exemptions are necessary.
- FIA non-qualified sales not subject to the new rule
  - \$1.6 billion of 2016 sales
  - Independent agents may prospect for more non-qualified business
- Mitigate disruption of qualified sales by independent agent distribution
  - \$3.8 billion of 2016 FIA sales
  - Introduce traditional fixed rate annuities with lifetime income benefit riders that can be sold under the less onerous PTE 84-24
- Continue to expand qualified sales by broker-dealer and bank distribution
  - \$350 million of 2016 FIA sales
  - Administrative infrastructure already in place
  - 7 anchor distributors; 55 distribution relationships
- Substantial majority of independent distribution has a path to a Financial Institution for BICE
  - Insurance Intermediary Prohibited Transaction Exemption
  - Many large NMOs have broker-dealers or registered investment advisory operations that may be able to serve as the Financial Institution

(a) Lifetime Income Benefit Riders ("LIBR")

(b) Non-GAAP pretax operating income, non-GAAP operating income and non-GAAP operating income per diluted common share are non-GAAP financial measures. Non-GAAP operating income equals net income (loss) adjusted to eliminate the impact of net realized gains and losses on investments, including net OTTI losses recognized in operations, fair value changes in derivatives and embedded derivatives, loss on extinguishment of debt, the effect of a counterparty default on expired call options and changes in litigation reserves.

# High ROE on Growing Book Value Per Share

(a) Operating return on equity is a non-GAAP financial measure. Operating return on equity equals operating income divided by average stockholders' equity excluding accumulated other comprehensive income.

(a) Pro-forma June 30, 2017 amounts include the impact of the redemption of \$400 million of 6.625% senior unsecured notes in July 2017. The redemption resulted in a net decrease in notes and loan payable of \$400 million and a net decrease in stockholders' equity of \$10.8 million.

(b) Total capitalization and stockholders' equity excluding AOCI are non-GAAP financial measures based on stockholders' equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, we believe these non-GAAP financial measures provide useful supplemental information.

# Spread Management

- Majority of our income is derived from our investment spread – the difference between the earned yield of our investments and the liability cost of our policies
- Target investment spread:
  - 290 - 310 bps<sup>(a)</sup>
  - 205 - 225 bps<sup>(b)</sup>
- Earned yield has been under pressure due to lower interest rates and higher cash balances
- Liability costs are decreasing
  - We have been reducing crediting rates prudently
  - Current base rates
    - New money<sup>(a)</sup> = 1.00% - 1.15%
    - New money<sup>(b)</sup> = 1.80% - 2.10%
    - Renewals = 1.00% - 3.00%

(a) Bonus products

(b) Non-bonus products, introduction of MVA option

# Surrender Charge Protection

- Surrenders are assumed to increase as surrender charges decrease
- 10% penalty-free withdrawals are assumed to remain level at 3% - 4% of fund values per year

## Breakdown by Geography June 30, 2017

## Breakdown by Property June 30, 2017

# Key Credit Strengths

## Significant Liquidity and Stable Income Generation of Operating Subsidiaries

- Multiple sources of parent company liquidity, including cash on hand, investment advisory fees, dividend capacity of subsidiaries and bank credit facility
- Increasing amounts of invested assets generating increasing investment advisory fees for holding company
- Significant dividend capacity of primary operating subsidiary (\$272.7 million in 2017)
- Since 2008, only \$10 million of dividends paid as operating company retained earnings to support business growth and holding company cash needs met through other sources

## Strong Capital Adequacy of Operating Subsidiaries

- Retain statutory earnings in operating insurance companies to support business in-force and future growth
- Total adjusted statutory capital has grown each year since 2009, from \$1.2 billion at December 31, 2009 to \$2.9 billion at December 31, 2016 (CAGR of 13.1%)
- Average RBC ratio of 344% since 2008
- At December 31, 2016, approximately \$575mm of adjusted capital in excess of the amount required to maintain an RBC of 275% (required by revolving credit facility covenants)
- Selective use of reinsurance to supplement capital base and manage certain risks

## Strong and Improving Credit Profile

- Retained earnings have supported deleveraging of company since 2008
- Stockholders equity (excluding AOCI) has grown from \$785 million at December 31, 2009 to \$2.0 billion at June 30, 2017 a CAGR of 13.9%
