

Blue Capital Alternative Income Fund Limited

Global Experts in Catastrophe Reinsurance

Ticker: LSE: BCAI/BCAI.LN BSX: BCAI_BH

Overview

The investment objective of Blue Capital Alternative Income Fund Limited (the "Fund") is to generate attractive returns from a sustainable dividend yield and longer term capital growth by investing substantially all of its assets in a segregated account of Blue Water Master Fund Ltd. This segregated account invests in a diversified portfolio of collateralised reinsurance-linked contracts and other investments whose value is based on insured catastrophe event risks, which are largely uncorrelated to traditional asset classes. Blue Capital Management Ltd. ("Blue Capital"), the Fund's investment manager, is wholly owned by Sompo International, a recognised leader in property catastrophe reinsurance.

Directionally Uncorrelated Diversified LIBOR Linked Returns

Target Return^{1,4}
8% + LIBOR
per annum

Target Dividend^{2,4}
6% + LIBOR
per annum
(paid Quarterly)

Diversified Portfolio
+ 1,500
Positions³

¹ Through active portfolio construction, we assemble a portfolio of catastrophic risk with net target returns of 8% per annum in excess of LIBOR over the long term. The portfolio is constructed to maximize the net return profile within pre-defined risk constraints.

² The Fund intends to distribute a 6% per annum dividend yield in excess of LIBOR in the form of cash and/or scrip.

³ Investors who invest in a single share of the Fund enjoy the benefit of investing in a share that is diversified by underlying investments of greater than 1,500 positions in catastrophe related reinsurance contracts, as at June 1, 2017.

⁴ These are targets only and not profit forecasts. There can be no assurance that these targets will be met or that the Fund will make any returns or distributions whatsoever or that investors will recover all or any of their investment. Prospective investors should decide for themselves whether or not the target returns and distributions are reasonable or achievable in deciding whether to invest in the Fund. The share price may not reflect the net asset value ("NAV") of the Fund's portfolio.

¹ The unaudited table provides a breakdown of the current portfolio's exposure by contract type, as at 30 September 2017. The portfolio exposure represents the fair value of the positions held by the Fund as at such date.

June 1, 2017 Modelled Probable Maximum Loss as a percentage of NAV²

² For contracts that overlap zones, the full policy exposure is counted in each exposed zone. The illustrative portfolio and expected loss impact on the illustrative portfolio are hypothetical and for illustrative purposes only. There is no guarantee that hypothetical catastrophe events would be as illustrated in this slide and would reflect the actual loss impact on the portfolio. Further, the illustrative loss impact does not take into account any costs, expenses or other factors which are not attributable to the reinsurance arrangements, save for the management and performance fees referred to in the assumptions. As such, the inclusion of the hypothetical returns set out should not in any way be construed as forecasting the actual returns from the portfolio should such hypothetical events occur. Results produced using AIR Worldwide Version 17.0. Modelled Probable Maximum Losses (PML's) are 1 in 100 year event modelled loss, except for earthquake which is 1 in 250 year.

Regulatory News

The Fund announced on 7 September 2017 that it suspended its share repurchase programme. The Fund made this decision based on the potential impact to its investments from a U.S. landfall of Hurricane Irma. Through 6 September 2017, 3.25 million Ordinary Shares were repurchased under the repurchase programme at an average price of \$1.04.

The Fund announced on 1 September 2017 that the Fund's Ordinary Shares have traded at an average discount of more than 5 per cent. to the net asset value per Ordinary Share over the three month period ending on 31 August 2017. As a result, in accordance with the discount management policy of the Fund implemented at launch, the Directors are considering various options.

Portfolio Overview

The net asset value of the Fund's Ordinary Shares at 30 September 2017 reflects the previously announced impact of Hurricane Harvey in August as well as the impact of two major hurricanes that made landfall in September and two earthquakes in Mexico. On 10 September 2017, Hurricane Irma made initial U.S. landfall near the Florida Keys, Florida and on 20 September 2017, Hurricane Maria made landfall in Puerto Rico. Additionally, the Southern Coast of Mexico was impacted by an earthquake on 8 September 2017 while Central Mexico was impacted by an earthquake on 19 September 2017.

The estimates for the Fund's incurred losses in 2017, net of reinsurance and reinstatement premiums, have driven the Fund's year-to-date performance to (23.69)%. The Fund's loss estimates have been derived from the utilization of proprietary catastrophe modeling, standard industry models, an in-depth review of in-force contracts and initial indications from clients and brokers. The Fund's actual losses may ultimately differ materially from estimated losses due to the nature of the risks assumed, the complexity of the assessment of damages and the limited number of reported claims received to date.

2017 Actual NAV Return YTD and Illustrative and Hypothetical Return Projections¹

¹ The hypothetical 2017 projected net asset value ("NAV") growth and monthly return projections do not comprise a profit forecast and have been provided for illustrative and comparative purposes only and to demonstrate the impact of the accounting treatment of earning premiums. The projections are derived by reference to the collateral held and to the premiums payable under contracts written to date and take into account the modelled median catastrophe loss. As such, the projections set out above should not in any way be construed as forecasting the Fund's actual NAV growth or returns should the losses not occur. Absent loss events, NAV growth will vary from month to month depending on the underlying risk exposures and the associated premium earnings. For some risks (e.g. Earthquake), premiums are earned on a straight line basis throughout the contract term. For other risks (e.g. U.S. and European Windstorm), the level of risk – and therefore the rate at which premium is earned – varies throughout the year. Blue Capital anticipates that the majority of the Fund's capital will ultimately be exposed to U.S. wind events. Such premium is generally earned between July and November, with September representing the peak earnings month. Any losses will be recognized in the month in which they are incurred.

Aggregate Net Return on NAV

Modelled Return Probability ²	Return Period
Mean or Greater	70% 1.4 years
Breakeven or Greater	78% 1.3 years
Loss Greater than > (5%)	15% 6.6 years
Loss Greater than > (10%)	10% 10 years
Loss Greater than > (15%)	7% 14.3 years
Loss Greater than > (25%)	3% 33.3 years
Loss Greater than > (35%)	2% 50 years

² The in force portfolio return summary is provided for illustrative purposes only. The projections are derived by reference to the Fund's portfolio as at 30 June 2017 using AIR Worldwide ("AIR") Version 17.0 results extracted from CATM®, Endurance's proprietary technology, and do not take into account actual costs, expenses or other factors which are not attributable to the portfolio. As such, the in force portfolio return summary should not in any way be construed as forecasting the Fund's actual returns should no losses occur or otherwise.

³ Net aggregate return distribution between a mean and median catastrophe year using AIR Version 17.0 results from CATM®.
