MARKET TRENDS & QUARTERLY HIGHLIGHTS

CURRENT MARKET TRENDS

- ▶ Investors seeking yield premiums continue to deploy capital to managers raising private lending funds focused on the middle market
- ▶ While deal structures remain aggressive relative to historical levels, the abundance of deal flow in the market has allowed spreads to stabilize
- ▶ We continue to see attractive relative value in larger club and syndicated deals, as the yields on these assets have benefited from a rise in interest rates.
- ▶ We continue to execute transactions from existing sponsor clients who are seeking add-on acquisition financings or recapitalizations
- ▶ Consistent with trends in the overall market, we experienced increased deal activity in the second quarter

- ▶ Declared a Q3 2018 dividend of \$0.28 per share payable to shareholders on September 21, 2018
- ▶ Leverage of the portfolio decreased to 3.7x from 3.8x in the prior quarter due to the realization of higher levered positions and new investments closed at a weighted average leverage through tranche of 2.8x
- ▶ Weighted average risk rating remained unchanged from the prior quarter at 2.3, however due to the repayments of higher risk positions, the weighted average risk rating has decreased 0.4 from 2.7 prior year

FINANCIAL HIGHLIGHTS

- ▶ Earned Net Investment Income of \$0.27 per share for the second quarter, which was lower than \$0.31 per share in the prior quarter due to:
 - Lower investment income of \$0.5 million primarily driven by full paydowns of higher yielding investments early in the second quarter
- ▶ Net realized and unrealized losses of \$1.5 million, or \$0.09 per share, for the three months ended June 30, 2018, were primarily driven by:
 - Net realized gain on investments was primarily driven by the partial and full repayments of various portfolio investments during the period
 - Net change in unrealized loss on investments was driven primarily by a negative \$1.4 million credit-related adjustment on our investment in Cochon-MWS Holdings LLC (fka Rooster Energy Ltd.), the reversal of prior period net unrealized gains across nine investments in the amount of \$0.3 million and a net \$0.2 million of positive market-related adjustments primarily on seven investments
- ▶ As of June 30, 2018, sufficient net capital losses may remain accumulated under our Incentive Fee Cap and Deferral Mechanism to potentially eliminate future net investment income incentive fees through at least Q3 2018
