

TerraForm Power owns and operates a best-in-class renewable power portfolio of solar and wind assets located primarily in the United States, totaling more than 2,600 megawatts of installed capacity. TerraForm Power's goal is to acquire operating solar and wind assets in North America and Western Europe. TerraForm Power is listed on the Nasdaq stock exchange (Nasdaq:TERP). It is sponsored by Brookfield Asset Management, a leading global alternative asset manager with more than US\$285 billion of assets under management.

Manager, Accounting Systems and Analysis

Location: Gatineau, Québec

The Manager, Accounting Systems and Analysis will be responsible for ensuring the integrity and operation of all financial systems used by Terraform Power and will support the Controllership team in maintaining the Company's accounting systems. This includes oversight over the financial consolidation, all intercompany transactions and allocations in accordance with service agreements between the entities. Reporting to the Senior Director, Financial Reporting and Compliance and working with Finance and IT, this person must be someone that is hands-on and wear multiple hats, as a team player and problem solver.

Responsibilities

- Act as the subject matter expert for the Company's accounting and consolidation tools
- Responsible for the Company's month and quarter end accounting systems and consolidation process, including the maintenance of the general ledger chart of accounts, reporting hierarchies, foreign currency, conversion, intercompany transactions and eliminations
- Perform period close activities following functional guidelines while adhering to SOX requirements
- Act as Financial Business Analyst for AR, AP, GL and Cash to setup and maintain configuration setups in D365
- Identify areas for improvement and implement new processes/automations end-to-end
- Must have a thorough understanding and the ability partner with the business team and IT to maintain data governance and implement best practices where necessary.
- Manage SOD across systems and work with business on remediation in coordination with the SOX manager
- Prepare for and assist with data extracts, to support internal/external audits
- Work cross functionally to ensure finance initiatives are achieved
- Lead the functional analysis, design and implementation of financial system changes
- Perform maintenance duties for master data management including working across the Finance function to appropriately govern updates (including but not limited to vendors, customers, GL accounts, and GL entities)
- Effectively communicate with business users to gather requirements and provide solutions
- Ability to articulate the System Development Lifecycle (SDLC)
- Migrate and reconcile data from the financial source systems to the financial consolidation systems.
- Navigate large data sets efficiently to assist accounting in periodic and ad hoc analysis
- Actively participate in the planning, development, and implementation of new accounting systems
- Oversee Data Governance Operating Model that defines the roles & responsibilities, governance boards, and governance processes for all domains
- Perform analytical reviews/variance analyses of specific general ledger accounts including intercompany

Qualifications

- 7+ years of hands-on experience supporting financial systems
- Experience with accounting and consolidation technology a must, Microsoft AX/D365, OneStream, and HFM are a plus
- Intermediate to advanced competency with Microsoft Access
- Ability to develop database queries to analyze large sets of data across finance function
- Strong experience in reporting, consolidation and financial analysis
- Bachelor's degree in Accounting or Finance preferred
- Experience in the Energy Renewables sector is a plus
- Highly organized with the ability to thrive in a fast-paced, dynamic environment managing multiple projects in a timely manner
- Outstanding written and oral communication skills with the ability to communicate effectively across different levels of the organization
- Proven ability to adapt and respond in a fluid environment
- Proven ability to create or remediate processes for efficiency and accuracy
- Self-starter who is able to execute on finance initiatives outlined by leadership
