

Overview of Our Segments

Leggett & Platt manufactures thousands of different items. These products are organized into four segments and further divided into 10 groups and 20 business units. Here we share more information about our four segments; information by group is in the following tabbed section.

Residential Furnishings Segment

Our Residential Furnishings segment began in 1883 with the manufacture of steel coil bedsprings. Today, we supply a variety of components used by bedding and upholstered furniture manufacturers in the assembly of their finished products. Our range of products offers our customers a single source for many of their component needs.

Efficient manufacturing methods, internal production of key raw materials, and numerous manufacturing and assembly locations allow us to supply many customers with components at a lower cost than they can produce themselves. In addition to cost savings, sourcing components from us allows our customers to focus on designing, merchandising and marketing their products.

Products

Bedding Group

- Innersprings (sets of steel coils, bound together, that form the core of a mattress)
- Wire forms for mattress foundations

Furniture Group

- Steel mechanisms and hardware (enabling furniture to recline, tilt, swivel, rock and elevate) for reclining chairs and sleeper sofas
- Springs and seat suspensions for chairs, sofas and loveseats
- Steel tubular seat frames
- Bed frames, ornamental beds, and “top-of-bed” accessories
- Adjustable bed bases

Fabric & Carpet Underlay Group

- Structural fabrics for mattresses, residential furniture and industrial uses
- Carpet underlay materials (bonded scrap foam, felt, rubber and prime foam)
- Geo components (synthetic fabrics and various other products used in ground stabilization, drainage protection, erosion and weed control, as well as silt fencing)

Customers

Most of our Residential Furnishings customers are manufacturers of finished bedding products (mattresses and foundations) or upholstered furniture for residential use. We also sell many products, including ornamental beds, bed frames, adjustable bed bases, carpet underlay, and top-of-bed accessories, directly to retailers and distributors. We sell geo components products primarily to dealers, contractors, landscapers, road construction companies and government agencies.

Commercial Fixturing & Components Segment

Our Store Fixtures group designs, produces, installs and manages our customers' store fixtures projects. Our Office Furniture Components group designs, manufactures, and distributes a wide range of engineered components targeted for the office seating market.

Products

Store Fixtures Group

- Custom-designed, full store fixture packages for retailers, including shelving, counters, showcases, and garment racks
- Standardized shelving used by large retailers, grocery stores and discount chains

Office Furniture Components Group

- Bases, columns, back rests, casters and frames for office chairs, and control devices that allow office chairs to tilt, swivel and elevate
- Select lines of private-label finished furniture

Customers

Customers of the Commercial Fixturing & Components segment include:

- Retail chains and specialty shops
- Office, institutional and commercial furniture manufacturers

Industrial Materials Segment

The quality of the Industrial Materials segment's products and service, together with low cost, have made Leggett the leading U.S. supplier of drawn steel wire and a major producer of welded steel tubing. Our Wire group operates a steel rod mill with an annual output of approximately 500,000 tons, of which a substantial majority is used by our own wire mills. We have four wire mills that supply virtually all the wire consumed by our other domestic businesses. Our Steel Tubing business unit also supplies nearly all of our internal needs for welded steel tubing. In addition to supporting our internal requirements, we supply many external customers with wire and steel tubing products.

On January 12, 2012, we completed the acquisition of Western Pneumatic Tube Holding, LLC. Western is a leading provider of integral components for critical aircraft systems, and forms the Aerospace Products business unit within the Tubing group. Western specializes in fabricating thin-walled, large diameter, welded tubing and specialty formed products from titanium, nickel, and other specialty materials for leading aerospace suppliers and OEMs.

Products

Wire Group

- Steel rod
- Drawn wire
- Steel billets
- Fabricated wire products

Tubing Group

- Welded steel tubing
- Fabricated tube components
- Titanium and nickel tubing for the aerospace industry

Customers

We use about half of our wire output and about one-quarter of our steel tubing output to manufacture our own products. For example, we use our wire and steel tubing to make:

- Bedding and furniture components
- Motion furniture mechanisms
- Commercial fixtures and shelving
- Automotive seat components and frames

The Industrial Materials segment also has a diverse group of external customers, including:

- Bedding and furniture makers
- Automotive seating manufacturers
- Aerospace suppliers and OEMs
- Lawn and garden equipment manufacturers
- Mechanical spring makers
- Waste recyclers and waste removal businesses
- Medical supply businesses

Specialized Products Segment

Our Specialized Products segment designs, manufactures and sells products including automotive seating components, specialized machinery and equipment, and service van interiors. Our established design capability and focus on product development have made us a leader in innovation. We also benefit from our broad geographic presence and our internal production of key raw materials and components.

Products

Automotive Group

- Manual and power lumbar support and massage systems for automotive seating
- Seat suspension systems
- Automotive control cables
- Low voltage motors and motion assemblies
- Formed metal and wire components for seat frames

Machinery Group

- Full range of quilting machines for mattress covers
- Machines used to shape wire into various types of springs
- Industrial sewing/finishing machines

Commercial Vehicle Products Group

- Van interiors (the racks, shelving and cabinets installed in service vans)

Customers

- Automobile seating manufacturers
- Bedding manufacturers
- Telecom, cable, home service and delivery companies
