9. The effect of the dividend distribution on convertible securities:

The Company does not have convertible securities

The distribution of dividend has no effect on the convertible securities

- **The effect of the distribution of dividend on the convertible securities is as follows:**

| Name of Security | No. of Security | Remarks |
|--------------------------|-----------------|----------------------------------|
| <i>Options plan 2007</i> | <i>5760194</i> | <i>Exercise price adjustment</i> |
| <i>Options plan 2010</i> | <i>5760210</i> | <i>Exercise price adjustment</i> |

10. Additional details regarding the distribution of dividend in accordance with the Israel Securities Authority's instruction pursuant to Section 36A of the Law, concerning "Disclosure at the time of a dividend distribution".

Notes: the sum in Section 6 is not final.

The Sum in Section 6 is in USD. The dividend will be paid in NIS. The exact rate of the dividend and the sum of the dividend for share in NIS shall be calculated according to the Representative Exchange Rate of the USD on the Determining Date. The calculation of the dividend as a percentage of issued and paid share capital is based, for the purpose of this report only, on the exchange rate of the USD published on March 27, 2011, which is NIS 3.555 = USD1.

Additional details regarding the distribution of dividend in accordance with the Israel Securities Authority's instruction pursuant to Section 36A of the Law, concerning "Disclosure at the time of a dividend distribution"

A. The resolution of the Board of Directors was made after taking into consideration the financial results of the Company, as were reported in the audited Financial Statements for 2010 as well as the the Company's profits, cash flow, the Company's obligations and their expected repayments, the capital structure, the Company's leverage level, the investments programs, including cash and future transactions estimation, noticing, *inter alia*, certain expenses and investments, the (net) value of the companies held by the Company, the market value of tradable investments and the impact of the distribution on the compliance with the financial covenants which were set out in agreements with banks.

The Company's Board of Directors relied, *inter alia*, on the ability to excise tradable holdings and to receive dividends from companies held by the Company and on additional funding resources which are available for the Company such as raising money and the ability to refinance debt.

B. The estimated data and the said assessments in Section A above, include forward-looking information, as defined in the Securities Law 5728-1968, which is based on the data specified above which the Company's Board of Directors had estimated. These estimations and assessments may not realized, partially or completely, or realize in a substantially different way from the way expected, *inter alia*, due to a change in the ability of the companies held (directly or indirectly) by the Company to create cash flows, to distribute dividends, changes in the conditions of the capital market, inflation rate, rates of exchange, the conditions of the different markets where companies held by the Company are active, political and security changes and regulatory changes which may have an effect on the activity of the Company and companies held by it.

C. Based on the aforementioned, the Company's management has approved before the Board of Directors, to its satisfaction, that the distribution of dividends conforms with the criteria for distributing dividends as set out in the Companies Law, 5759-1999, and that there is no reasonable concern that the distribution of the dividend will prevent the Company from meeting its existing and expected obligations as they come due.
