

TerraWave Solutions Expands Wireless Equipment Offering for Newest Cisco Access Points

Las Vegas, NV, July 11, 2011 – [TerraWave Solutions](#)[®], a [Ventev Innovations](#)[®] brand, has expanded its product offering to include even more wireless products that are compatible with the latest Cisco access points (APs)– including the 3502i and 3502e with built-in CleanAir Technology, as well as the AP 1142 and AP 1262. Since Cisco Live! 2010, TerraWave Solutions has developed many secure, cost-efficient enclosure options that are compatible with these APs in addition to a wide array of antennas for deployment in demanding and challenging environments.

The new 2' x 2' x 1.5" MIMO Bevel Edge Ceiling Tile Enclosure (Part Number TW-CTEN-2X2-1142B) is specifically designed for the Cisco 3502i and 1142 APs, and fits into any tegular-edged ceiling tile system, while providing security for the AP. This enclosure also allows for the AP to be serviced without having to remove the enclosure from the ceiling tile grid, and is the most lightweight ceiling tile enclosure that TerraWave offers. This enclosure is also available for a standard drop ceiling (Part Number TW-CTEN-2X2-1142U).

TerraWave Solutions also expanded its MIMO antenna product line that supports the Cisco AP 3502e and AP 1262 – offering a wider variety of deployment options that are aesthetically pleasing for both indoor and outdoor environments.

At Cisco Live! 2011 (Booth #2033) July 11-14, TerraWave Solutions is featuring its premium antenna portfolio, entire WLAN infrastructure and accessory solutions, as well as demonstrating how its newest technologies support the latest Cisco AP offerings. TerraWave Solutions is proud to be an official Technology Partner and Solution Developer within the Cisco Developer Network (CDN).

About TerraWave Solutions

TerraWave Solutions offers Wi-Fi infrastructure and accessory solutions to customers throughout the world. Focusing on 802.11 and enterprise mobility solutions, TerraWave manufactures, integrates, and supplies wireless LAN components based on the unique requirements of every client. TerraWave's goal is to provide customers with custom Wi-Fi solutions that address every aspect of wireless LAN deployment in the enterprise. TerraWave's wireless networking knowledge and comprehensive line of leading-edge products means customers receive complete solutions to deploy, manage, and secure wireless networks. To learn more, please visit www.terra-wave.com. TerraWave is a brand of Ventev Innovations[®], a division of TESSCO Technologies Incorporated.

About TESSCO

[TESSCO Technologies](#), (NASDAQ:TESS), is *Your Total Source*[®] to build, use, and maintain wireless systems. The convergence of wireless and the Internet is revolutionizing the way we live and work. New systems and applications are unlocking human potential at an unprecedented rate. TESSCO is there, thinking in new ways for exceptional outcomes. TESSCO architects and delivers, with innovation, productivity and speed, the product and value chain solutions to organizations responsible for building, operating, and maintaining wireless voice, data and video systems.
