

OAKTREE CAPITAL GROUP, LLC

OAKTREE

Second Quarter 2016

Forward-Looking Statements & Safe Harbor

This presentation contains forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 (the “Securities Act”) and Section 21E of the U.S. Securities Exchange Act of 1934, each as amended, which reflect the current views of Oaktree Capital Group, LLC (the “Company” or “OCG”), with respect to, among other things, its future results of operations and financial performance. In some cases, you can identify forward-looking statements by words such as “anticipate,” “approximately,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “outlook,” “plan,” “potential,” “predict,” “seek,” “should,” “will” and “would” or the negative version of these words or other comparable or similar words. These statements identify prospective information. Important factors could cause actual results to differ, possibly materially, from those indicated in these statements. Forward-looking statements are based on the Company’s beliefs, assumptions and expectations of its future performance, taking into account all information currently available to the Company. Such forward-looking statements are subject to risks and uncertainties and assumptions relating to the Company’s operations, financial results, financial condition, business prospects, growth strategy and liquidity, including, but not limited to, changes in the Company’s anticipated revenue and income, which are inherently volatile; changes in the value of the Company’s investments; the pace of raising new funds; changes in assets under management; the timing and receipt of, and the impact of taxes on, carried interest; distributions from and liquidation of the Company’s existing funds; the amount and timing of distributions on the Company’s Class A units; changes in the Company’s operating or other expenses; the degree to which the Company encounters competition; and general economic and market conditions. The factors listed in the section captioned “Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015 filed with the U.S. Securities and Exchange Commission (“SEC”) on February 26, 2016, and in Part II, Item 1A. in the Company’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2016, each of which is accessible on the SEC’s website at www.sec.gov, provide examples of risks, uncertainties and events that may cause the Company’s actual results to differ materially from the expectations described in its forward-looking statements. Forward-looking statements speak only as of the date the statements are made. Except as required by law, the Company does not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

This presentation along with any other information provided with or in connection with this presentation are provided for informational purposes only and do not constitute, and should not be construed as, an offer to sell, or a solicitation of an offer to buy, any securities of the Company or its affiliates, or an offer, invitation or solicitation of any specific funds or the fund management services of the Company or its affiliates, or an offer or invitation to enter into any portfolio management mandate with the Company or its affiliates.

The Company discloses certain non-GAAP financial measures in this presentation, including adjusted net income (“ANI”), distributable earnings (“DE”), fee-related earnings (“FRE”) and economic net income (“ENI”). Reconciliations of these non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with GAAP are presented in the Appendix. Capitalized terms in the Appendix, including in the footnotes, that are not otherwise defined shall have the meanings ascribed to them in the Company’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2016, filed with the SEC on August 4, 2016, which is accessible on the SEC’s website at www.sec.gov.

Oaktree: A Leading Global Alternative Asset Manager

- A leader and pioneer in alternative asset management with \$98 billion of AUM
- Diversified mix of pro- and counter-cyclical strategies
- Strong, risk-adjusted investment performance
- A loyal, blue-chip institutional client base
- Attractive growth prospects for new and established strategies

GLOBAL FOOTPRINT¹

INVESTMENT AREAS²

Assets Under Management (\$ in billions)

HISTORICAL ASSETS UNDER MANAGEMENT

As of December 31, unless otherwise indicated (\$ in billions)

¹ Includes offices of affiliates of Oaktree-managed funds. Oaktree headquarters is based in Los Angeles.

² Assets under management presented above exclude \$60 million of assets in the Asia Principal strategy and \$78 million of assets in the Japan Opportunities strategy.

Foundation of Oaktree

INVESTMENT PHILOSOPHY

- Primacy of risk control
- Emphasis on consistency
- Importance of market inefficiency
- Benefits of specialization
- Macro-forecasting not critical to investing
- Disavowal of market timing

BUSINESS PRINCIPLES

- Excellence in investing
- Proprietary, in-depth research
- Commonality of interests with clients
- Transparent client communications
- Fair, explicit management fee arrangements
- Harmonious, cooperative workplace
- New products are usually “step-outs”
- Profit should stem from performance

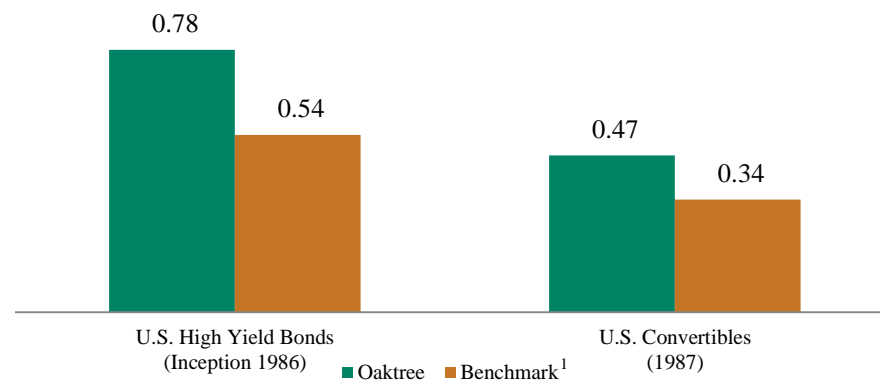

Oaktree’s mission is to deliver superior investment results with risk under control and to conduct our business with the highest integrity

History of Exceptional Investment Performance

SUPERIOR RETURNS, BOTH GROSS AND RISK-ADJUSTED, IN OUR OPEN-END FUNDS

Annualized gross return since inception

Sharpe ratio since inception²

OUTSTANDING TRACK RECORD IN OUR CLOSED-END FUNDS

Aggregate closed-end gross IRR	18.9% ³
Drawn capital	\$73 billion ³
% of funds more than 18 months old with positive gross and net IRRs	96%
% of incentive-creating AUM actively generating incentives	59%

¹Detail on benchmarks is presented in the Appendix.

²The Sharpe Ratio is a metric used to calculate risk-adjusted return. It is the ratio of excess return to volatility, with excess return defined as the return above that of a riskless asset (three-month T-bill) divided by the standard deviation of such returns. The higher the Sharpe Ratio, the greater the return for a given level of risk compared to the risk-free rate.

³Since oldest strategy inception in October 1988. Excludes closed-end Senior Loan funds, CLOs, Oaktree Asia Special Situations Fund, Asia Principal Opportunities Fund, certain separate accounts and co-investments.

⁴Represents annualized time-weighted return since October 1988.

\$10 billion or more of gross capital raised for 9 consecutive years

A Preferred Alternative Manager

ACCORDING TO A RECENT KEEFE, BRUYETTE & WOODS CIO SURVEY, OAKTREE IS ONE OF THE MOST PREFERRED ALTERNATIVE MANAGERS

Please rank (1 through 5) the alternative managers to whom you'd be most willing to commit additional assets

Note: The information presented in the chart above has been obtained with permission from a publication prepared by Keefe, Bruyette & Woods ("KBW") titled Winter 2016 CIO Survey. KBW surveys chief investment officers and other key decision makers at corporate, government and other public pension plans, endowments and foundations (primarily universities), and investment managers in order to gain an understanding of institutional investors' asset allocation and manager selection process, among other things. Only 29 decision makers out of a total population of more than 500 responded to KBW's survey. In addition, the survey group was limited to U.S. based institutions and thus is not necessarily indicative of non-U.S. domiciled institutional investors. Potential investors should note specifically that with respect to the chart presented the data reflected represents responses from only 20 of the 29 respondents to the survey and thus should not be assumed to be representative of the total population of the types of institutional investors surveyed. Indeed, if the pool of respondents was larger the results may be materially different from those presented.

Oaktree Hallmark: Funds Sized to Opportunity Set

OPPORTUNITIES FUNDS SIZING

(\$ in billions)

- Increase fund size ahead of potential market dislocation
- Scale back funds when opportunity set shrinks
- Dramatic downsizing of funds enables team to remain highly selective
- Largest funds are among our best performers

Opportunities Funds' structure allows us to access current distressed debt opportunities as well as take advantage of future market dislocations

¹Percentage represents the decrease in capital commitment from predecessor fund.

²Capital raised as of 6/30/16.

³Opportunities Fund IX is still in its investment period and therefore since inception returns are not meaningful to this analysis.

Step-Out Strategies, A Natural Evolution

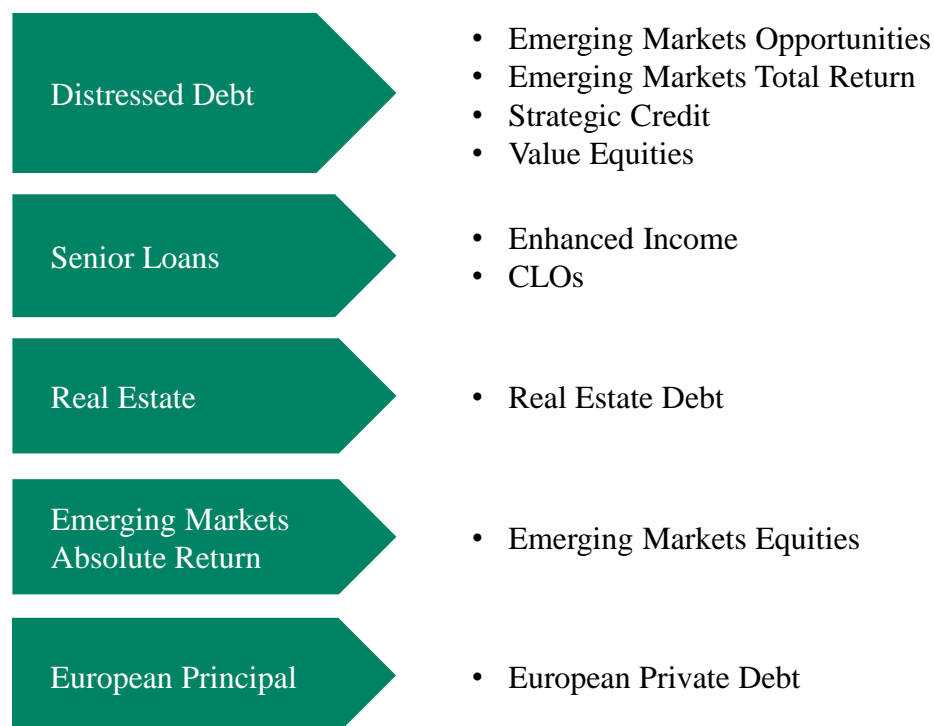

NEARLY \$17 BILLION OF AUM IN ADJACENT PRODUCTS

AUM GROWTH IN STEP-OUT STRATEGIES

As of December 31, unless otherwise noted (\$ in millions)

ORGANIC GROWTH A RESULT OF “STEP-OUT” STRATEGIES

¹ “Other” includes Real Estate Debt, Emerging Markets Opportunities, Emerging Markets Total Return, European Private Debt and Value Equities.

Benefits of Locked-in Capital

MANAGEMENT FEES

For the year ended December 31, unless otherwise noted (\$ in millions)

Note: Beginning with the fourth quarter of 2015, the definition of adjusted net income was modified to reflect differences with respect to gains and losses resulting from foreign-currency transactions and hedging activities, which under GAAP are recognized as general and administrative expense whether realized or unrealized in the current period, but for adjusted net income unrealized gains and losses from foreign-currency hedging activities are deferred until realized, at which time they are included in the same revenue or expense line item as the underlying exposure that was hedged. The impact on 2009-2013 from this change was deemed to be immaterial and thus management fees have not been recast for these changes.

¹ This compares with \$22.8 billion of uncalled capital commitments as of 6/30/16. The difference primarily relates to funds that pay fees based on committed capital and have already begun their investment period, as these funds are excluded from shadow AUM but included in uncalled capital commitments to the extent they have not yet drawn 100% of committed capital. Shadow AUM also excludes general partner commitments.

- **Management fees have remained stable despite:**

- Significant closed-end fund distributions (nearly \$60 billion since January 2010)
- \$13 billion of AUM not yet generating management fees (“shadow AUM”) at 6/30/16¹
- Significant portion of current fundraising cycle not yet reflected in management fees

- **The stability of management fees can be attributed to:**

- Locked-in capital: 72% of management fees from closed-end funds over the LTM
- Diversified mix of pro- and counter-cyclical investment strategies

Well Positioned for Fee-related Earnings Growth

SHADOW AUM¹ OF \$13 BILLION

Blended annual fee rate of 1.3%

CONTINUED STRENGTH IN FUNDRAISING

- \$6 billion in closed-end fundraising over the LTM, including:
 - Over \$2 billion for Opportunities Funds X/Xb, \$1 billion for Real Estate Opportunities Fund VII and \$1 billion for European Principal Fund IV
- Continued fundraising in established strategies, as well as newer funds
 - European Capital Solutions (“ECS”) – successor to the first European Private Debt fund, a €600 million fund (including separate accounts)
 - European Principal Fund IV – successor to European Principal Fund III, a €3 billion fund
- Expanding opportunities within the ~\$4 trillion emerging market debt investable universe
- Expanded marketing efforts for dedicated funds in the €460⁴ billion European high yield bond and €470⁴ billion European senior loan markets

¹ Shadow AUM: Uncalled capital commitments that will start generating management fees when (i) for funds that pay fees based on drawn capital or NAV, the capital is drawn or (ii) for funds that pay fees based on committed capital, the investment period begins. Excludes capital commitments from the general partner and its affiliates since they are not fee generating.

² Includes Real Estate Debt

³ “Other” primarily includes European Private Debt, Emerging Markets Opportunities, Value Equities, a separate account associated with our Global Principal strategy, Emerging Markets Total Return, as well as un-invested multi-strategy AUM

⁴As of December 31, 2015

Diverse Incentive Income Pipeline

TOTAL NET ACCRUED INCENTIVES \$771 MILLION

■ Liquidating Funds (Not Yet Paying) ■ Liquidating Funds (Paying)¹ ■ Investing Funds

NET ACCRUED INCENTIVES ARE DIVERSIFIED AMONG OUR INVESTMENT STRATEGIES

■ Distressed debt ■ Control Investing ■ Real Estate ■ Other²

We continue to have \$771 million (\$4.98 per unit³) in net accrued incentives across our closed-end and evergreen funds

¹ Funds paying include all incentive-creating evergreen funds and closed-end funds that have reached the stage of their distribution waterfall where the drawn capital and preferred return have been distributed to investors and, therefore, incremental distributions thereafter generate incentive income for the Company. Funds paying does not reflect funds that may pay incentive income related to tax distributions only.

² Other primarily includes Mezzanine and European Private Debt funds.

³ Per Operating Group unit (not per Class A unit). Net accrued incentives (fund level) is presented before income taxes.

Distributable Earnings: Strength through Diversification

FEE-RELATED EARNINGS

22% year-on-year increase in fee-related earnings in 2Q2016 driven by recent record fundraising

+

DOUBLELINE

\$56 million of distributable earnings over the LTM as DoubleLine grew AUM 34% over this period

+

INVESTMENT INCOME PROCEEDS FROM FUNDS

A steady source, with unrealized investment income proceeds on corporate investments of \$286 million, of which \$105 million was in closed-end funds in their liquidation period

+

INCENTIVE INCOME

50 straight quarters of positive incentive income

Our strong financial profile enables us to maintain a high payout ratio, while investing in growth and product development

Substantial Asset Value with Significant Upside

BOOK VALUE	\$11.25 ¹	Includes: <ul style="list-style-type: none"> • \$1.4 billion Investments • \$0.3 billion Net Cash
+	+	
NET ACCRUED INCENTIVES (FUND LEVEL)	\$4.98 ¹	<ul style="list-style-type: none"> • 68% in liquidating or evergreen funds
TOTAL	\$16.23 ¹ + DOUBLELINE	<ul style="list-style-type: none"> • DoubleLine carrying value of ~\$16 million is significantly below FMV

The key tenets of our capital management strategy have been and remain:

- 1) Grow a strong, highly rated balance sheet with ample liquidity that allows us to fund growth for our current investment strategies along with strategic or opportunistic corporate development initiatives
- 2) Distribute to unitholders any cash that isn't needed to achieve #1, subject to our cash distribution policy
- 3) Consider opportunistic, not formulaic, purchases of our units, in the context of a long-term goal of enhancing the public float of our units

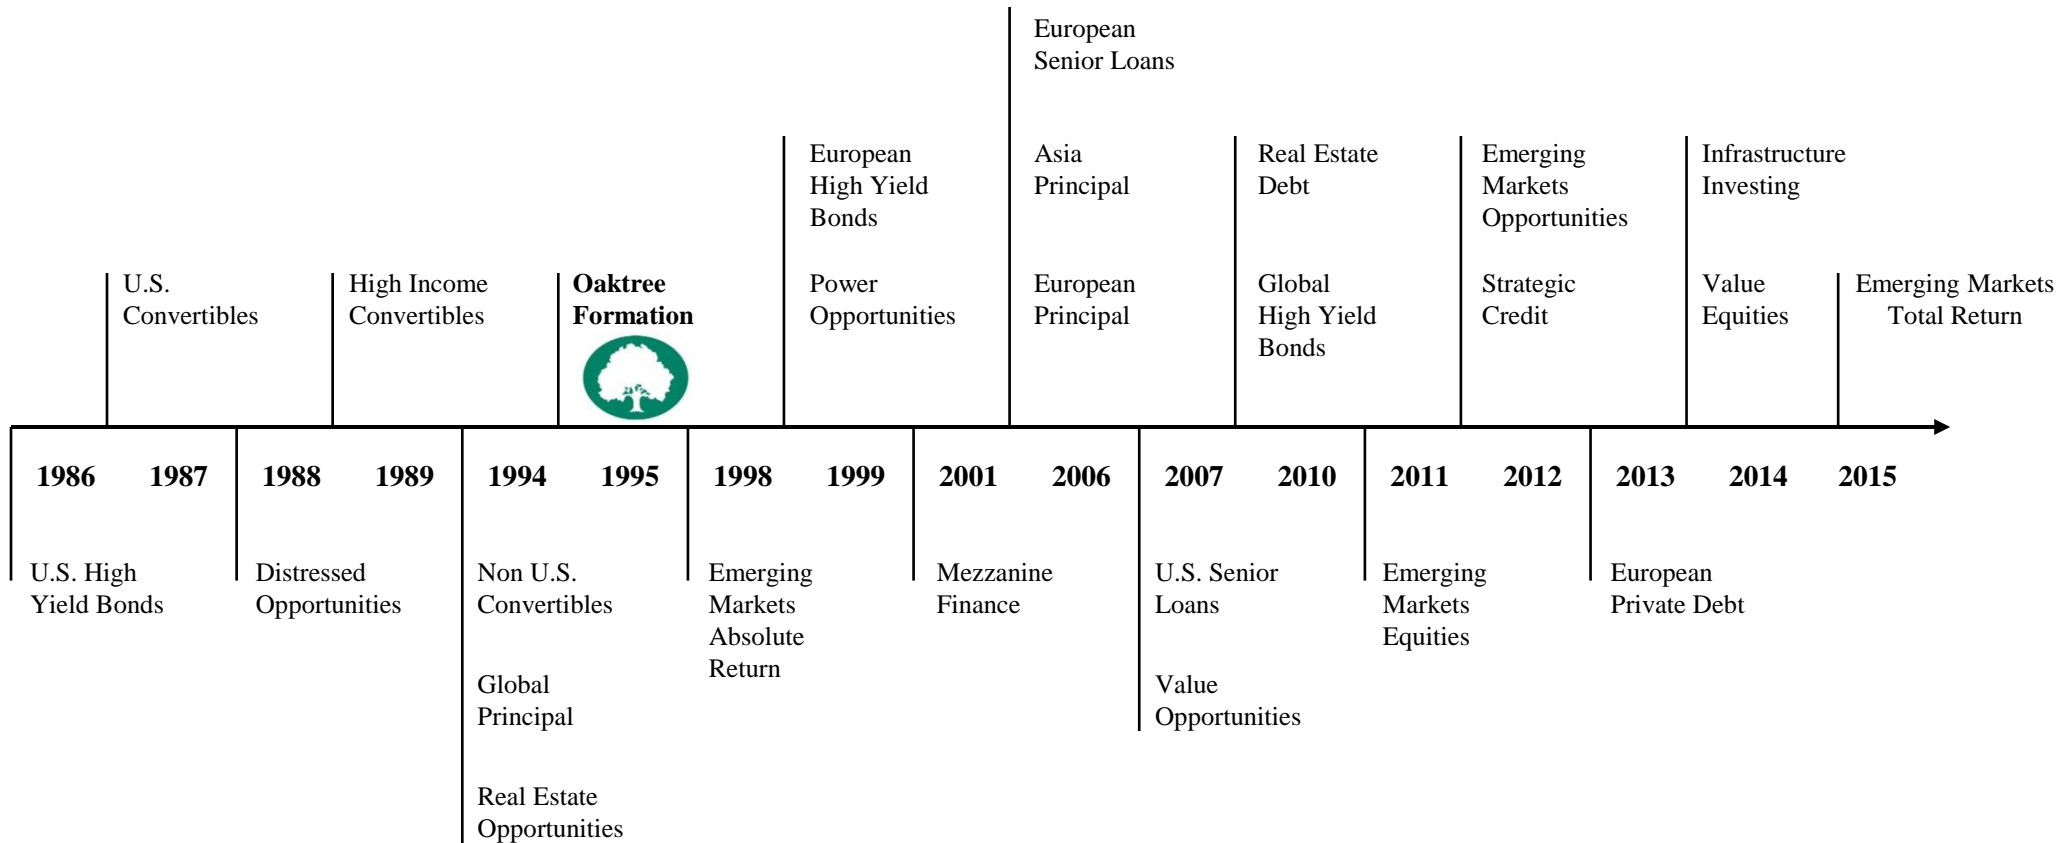

¹ Per Operating Group unit (not per Class A unit). Net accrued incentives (fund level) is presented before income taxes.

Shows when management fee basis changes from committed capital to the lower of contributed capital or cost

Incentive income recognized in ANI to date

Incentive income that would be recognized if fund was liquidated at its current NAV

Reflects the amount of distributions required for fund to start recognizing incentive income¹

Drawn capital relative to total committed reflects how invested the fund is and, therefore, provides an indication of when we might raise a successor fund

Indicator for generating incentives (must cross net return threshold, generally 8%, before generating incentives)

Note: There are some exceptions to the statements above (e.g. some closed-end funds charge fees on contributed capital or NAV during the investment period).
¹ Additionally, tax distributions impact the timing of incentive income recognition.

Description of Non-GAAP Metrics

Adjusted net income (“ANI”) is a measure of profitability for our investment management segment. The components of revenues (“segment revenues”) and expenses used in the determination of ANI do not give effect to the consolidation of the funds that we manage. Segment revenues include investment income (loss) that is classified in other income (loss) in the GAAP-basis statements of operations. Segment revenues and expenses also reflect Oaktree's proportionate economic interest in Highstar, whereby amounts received for contractually reimbursable costs are classified for segment reporting as expenses and under GAAP as other income. In addition, ANI excludes the effect of (a) non-cash equity-based compensation expense related to unit grants made before our initial public offering, (b) acquisition-related items, including amortization of intangibles and changes in the contingent consideration liability, (c) differences arising from equity value units (“EVUs”) that are classified as liability awards under GAAP but as equity awards for segment reporting, (d) income taxes, (e) other income or expenses applicable to OCG or its Intermediate Holding Companies, and (f) the adjustment for non-controlling interests. In the fourth quarter of 2015, the definition of ANI was modified to reflect differences with respect to (a) third-party placement costs associated with closed-end funds, which under GAAP are expensed as incurred, but for ANI are capitalized and amortized as general and administrative expense in proportion to the associated management fee stream, and (b) gains and losses resulting from foreign-currency transactions and hedging activities, which under GAAP are recognized as general and administrative expense whether realized or unrealized in the current period, but for ANI unrealized gains and losses from foreign-currency hedging activities are deferred until realized, at which time they are included in the same revenue or expense line item as the underlying exposure that was hedged. Foreign-currency transaction gains and losses are included in other income (expense), net. Prior periods have not been recast for the change related to third-party placement costs, but have been recast to retroactively reflect the change related to foreign-currency hedging. Incentive income and incentive income compensation expense are included in ANI when the underlying fund distributions are known or knowable as of the respective quarter end, which may be later than the time at which the same revenue or expense is included in the GAAP-basis statements of operations, for which the revenue standard is fixed or determinable and the expense standard is probable and reasonably estimable. CLO investments are carried at fair value for GAAP reporting, whereas for segment reporting they are carried at amortized cost, subject to any impairment charges. Investment income on CLO investments is recognized in ANI when cash distributions are received. Cash distributions are allocated between income and return of capital based on the effective yield method. ANI is calculated at the Operating Group level.

Economic net income (“ENI”) is a non-GAAP measure that we use to evaluate the financial performance of our segment by applying the “Method 2,” instead of the “Method 1,” revenue recognition approach to accounting for incentive income. ANI follows Method 1, except incentive income is recognized when the underlying fund distributions are known or knowable as of the respective quarter end, as opposed to the fixed or determinable standard of Method 1. The Method 2 approach followed by ENI recognizes incentive income as if the funds were liquidated at their reported values as of the date of the financial statements. ENI is computed by adjusting ANI for the change in accrued incentives (fund level), net of associated incentive income compensation expense, during the period.

Distributable earnings is a non-GAAP performance measure derived from our segment results that we use to measure our earnings at the Operating Group level without the effects of the consolidated funds for the purpose of, among other things, assisting in the determination of equity distributions from the Operating Group. However, the declaration, payment and determination of the amount of equity distributions, if any, is at the sole discretion of our board of directors, which may change our distribution policy at any time. Distributable earnings and distributable earnings revenues differ from ANI in that they exclude segment investment income or loss and include the receipt of investment income or loss from distributions by our investments in funds and companies. Additionally, any impairment charges on our CLO investments included in ANI are, for distributable earnings purposes, amortized over the remaining investment period of the respective CLO, in order to align with the timing of expected cash flows. In addition, distributable earnings differs from ANI in that it is net of Operating Group income taxes and excludes non-cash equity-based compensation expense.

Operating Group income taxes.....	(4,031)	(7,640)	(6,275)	(6,136)	(6,175)	(18)	(3,374)	(4,004)
Distributable Earnings.....	<u>\$ 405,146</u>	<u>\$ 635,680</u>	<u>\$ 488,535</u>	<u>\$ 672,181</u>	<u>\$ 984,266</u>	<u>\$ 606,136</u>	<u>\$ 447,576</u>	<u>\$ 454,471</u>

¹ This adjustment adds back the effect of timing differences associated with the recognition of incentive income and incentive income compensation expense between adjusted net income and net income attributable to OCG.

² This adjustment adds back the effect of differences in the recognition of investment income related to corporate investments in CLOs which under GAAP are marked-to-market but for segment reporting are accounted for at amortized cost, subject to impairment between adjusted net income and net income attributable to OCG.

³ This adjustment adds back the effect of (a) equity-based compensation expense related to unit grants made before our initial public offering, which is excluded from adjusted net income because it does not affect our financial position and from distributable earnings because it is non-cash in nature and does not impact our ability to fund operations or make equity distributions, and (b) differences arising from EVUs that are classified as liability awards under GAAP but as equity awards for segment reporting.

⁴ This adjustment adds back the effect of timing differences with respect to the recognition of third-party placement costs associated with closed-end funds between adjusted net income and net income attributable to OCG.

⁵ This adjustment adds back the effect of timing differences associated with the recognition of unrealized gains and losses related to foreign-currency hedging between adjusted net income and net income attributable to OCG.

⁶ This adjustment adds back the effect of acquisition-related items associated with the amortization of intangibles and changes in the contingent consideration liability.

⁷ Because adjusted net income and distributable earnings are pre-tax measures, this adjustment adds back the effect of income tax expense.

⁸ Because adjusted net income and distributable earnings are calculated at the Operating Group level, this adjustment adds back the effect of items applicable to OCG, its Intermediate Holding Companies or non-controlling interests.

⁹ This adjustment eliminates our segment investment income, which with respect to investments in funds is initially largely non-cash in nature and is thus not available to fund our operations or make equity distributions.

¹⁰ This adjustment characterizes the portion of the distributions received from funds as receipts of investment income or loss. In general, the income or loss component of a distribution from a fund is calculated by multiplying the amount of the distribution by the ratio of our investment's undistributed income or loss to our remaining investment balance. In addition, if the distribution is made during the investment period, it is generally not reflected in distributable earnings until after the investment period ends.

¹¹ This adjustment eliminates the effect of equity-based compensation charges related to unit grants made after our initial public offering, which is excluded from distributable earnings because it is non-cash in nature and does not impact our ability to fund our operations or make equity distributions.

¹ Fee-related earnings is a component of adjusted net income and is comprised of segment management fees less segment operating expenses other than incentive income compensation expense and non-cash equity-based compensation expense related to unit grants made after our initial public offering.

² This adjustment adds back the effect of equity-based compensation expense related to unit grants made after our initial public offering, which is excluded from fee-related earnings because it is non-cash in nature and does not impact our ability to fund our operations or make equity distributions.

³ The change in accrued incentives (fund level), net of associated incentive income compensation expense, represents the difference between (a) our recognition of net incentive income and (b) the incentive income generated by the funds during the period that would be due to us if the funds were liquidated at their reported values as of that date, net of associated incentive income compensation expense.

⁴ This adjustment reflects the elimination of amounts attributable to the Company's consolidated funds and the reclassification of net gains or losses related to foreign-currency hedging activities to general and administrative expense.
