

## Financial Tear Sheet Corporate Profile

For more than a century, FMC Corporation has served the global agricultural, industrial and consumer markets with innovative solutions, applications and quality products. On November 1, 2017, FMC acquired a significant portion of DuPont's Crop Protection business. FMC's 2016 pro forma revenue was approximately \$4 billion<sup>1</sup>. FMC employs more than 7,000 people throughout the world and operates its businesses in two segments: FMC Agricultural Solutions and FMC Lithium.

Ever since our beginning in California in 1883 when John Bean invented the first piston sprayer for agriculture, FMC has continued a proud heritage of pioneering solutions for our customers. Today, we use an array of advanced technologies in manufacturing, research and development to produce customized products and solutions for the many markets we serve.

As a global leader utilizing advanced technologies and customer-focused research and development, FMC provides innovative and cost-effective solutions to enhance crop yield and quality by controlling a broad spectrum of insects, weeds and disease, as well as in non-agricultural markets for pest control. Our lithium products are utilized in energy storage, specialty polymers and pharmaceutical synthesis.

<sup>1</sup>2016 pro forma revenue assumes the transactions with DuPont occurred at the beginning of the year and includes twelve months of revenue from the DuPont Crop Protection business and it excludes the revenue from FMC Health and Nutrition. The pro forma revenue reflects FMC's calculation as of the date hereof based on information currently available. Form 8-K will be filed within 75 days of the transaction date and will include unaudited pro forma condensed financial information related to the transactions.
