

FINANCIAL TEAR SHEET

Corporate Profile

Kraton Corporation (NYSE: KRA), through its operating subsidiary Kraton Polymers LLC and its subsidiaries, is a leading global producer of engineered polymers and one of the world's largest producers of styrenic block copolymers ("SBCs"), a family of products whose chemistry was pioneered by us almost fifty years ago. SBCs are highly-engineered thermoplastic elastomers, which enhance the performance of numerous products by delivering a variety of attributes, including greater flexibility, resilience, strength, durability and processability. Kraton also sells a high-end polyisoprene rubber (IR), polyisoprene latex, and SBC-based compounded materials. Kraton polymers are used in a wide range of applications including adhesives, coatings, consumer and personal care products, sealants and lubricants, medical, packaging, automotive, paving, roofing and footwear products. Our products can be processed in a variety of manufacturing applications, including injection molding, blow molding, compression molding, extrusion, hot melt, and solution applied coatings. They are highly customized to each unique application and usually represent a key enabler of the performance of our customers' products. We currently offer approximately 800 products to more than 700 customers in over 60 countries worldwide. We manufacture products at five plants globally, including our flagship plant in Belpre, Ohio, as well as plants in Germany, France and Brazil, and a joint venture plant operated in Japan.
